General MARSHALL. I am pretty certain it was. In fact, I have assumed all the time that it was, because the message that I received that morning was the completed message, the last section of which had come in during the night. As I said before, my understanding was—though I am not the best witness on this, and I am indulging largely in hearsay—that the major portion of that message was delivered to the Secretary of State on the night before, although I don't know.

General RUSSELL. General, I am going to talk to you now, and I am going to describe a message to you that I am not too familiar with and that I can't talk too intelligently about. I just read it the minute before you came into the room, and maybe we can work something out of it together.

This same naval source from which I have been quoting stated that:

On the 4th of December, 1941, Commander McCollum drafted a long warning message to the Commanders-in-Chief of the Asiatic and Pacific Fleets, summarizing significant events up to that date, quoting the "Winds Message," and ending with [34] the positive warning that war was imminent.

Now, this is on the 4th day of December:

Admiral Wilkinson approved this message—

which I shall talk about in a minute more definitely—

and discussed it with Admiral Noyes in my presence. I was given the message to read after Admiral Noyes read it, and saw it at about three p. m., Washington time, on December 4, 1941. Admiral Wilkinson asked, "What do you think of the message?" Admiral Noyes replied, "I think it is an insult to the intelligence of the Commander-in-Chief." Admiral Wilkinson stated, "I do not agree with you. Admiral Kimmel is a busy man,"

and so forth.

Now, to come to the message itself:

The "Winds Message" was received in the Navy Department during the evening of December 3, '41, while Lieutenant (junior grade) Francis M. Brotherhood, U. S. Navy Reserve, was on watch. There was some question in Brotherhood's mind as to what this message really meant because it came in a different form from what had been anticipated. Brotherhood called in Lieutenant Commander Kramer, who came down that evening and identified the message as the "Winds Message"—

General FRANK .W-i-n-d-s?

General MARSHALL. You are trying to find out what that is.

General RUSSELL. "Winds Message."

General MARSHALL. I can explain it.

[35] General RUSSELL. (Reading):

—we had been looking for. The significant part of the "Winds Message" read:—

There are a lot of Japanese words which I can't pronounce.

Now, then, after reciting the Japanese words the recitation continues:

The meaning of this message from the previously mentioned tip-off was: "War with the United States. War with Britain, including the N. E. I., etc. Peace with Russia".

Now, apparently the memorandum from which I have been reading attaches considerable importance to this message which they describe as the "Winds Message." Do you know any connection that the War Department may have had with that message or whether or not it was ever transmitted to the War Department?

General MARSHALL. We were aware, as I recall, that the Japanese had instructed their people that a certain reference to—was it winds or weather?

To winds.

General GRUNERT. Winds and weather.

General MARSHALL. Winds and bad weather. —would occur in an ordinary broadcast and would be repeated in a certain number of times, and things of that sort; and that when that occurred certain things were to be done, and as I recall one of them was the destruction of their code machines. I have forgotten, or I do not recall at the moment, the particular—the other implications of that message. However, I was aware of it a few days before when I was before the Naval Board, [36] because they had the actual deciphered code, you see, which had been intercepted, which gave this information. And I might add that the interest there before the Naval Court was, when we picked up this broadcast conveying this particular information. The records of the War Department show that prior to December 7th none of our monitoring services had picked up such a Japanese broadcast.

Oh, here it is; I have the message. On the 28th of November 1941, a Japanese message was deciphered and translated which read as follows:

From Tokyo to Washington, 19 November 1941.

Regarding the broadcast—

I would like to refer there: if you look at the date you can see how long a time it took to get these things processed, the great difficulty with the means then available to do it.

Regarding the broadcast of a special message in an emergency.

In case of emergency (danger of cutting off our diplomatic relations) and the cutting off of international communications the following warnings will be added to the middle of the daily Japanese-language shortwave news broadcast:

Subparagraph 1. In case of a Japanese-U. S. relations in danger: Higashi no kaze ame (translated that means "East wind rain").

Subparagraph 2. Japanese-U. S. S. R. relations: Kita no kaze kumori (North wind cloudy).

Subparagraph 2. Japan-British relations: Nishi no kaze hare (West wind cloudy).

[37] This signal will be given in the middle and at the end, as a weather forecast, and each sentence will be repeated twice. When this is heard please destroy all code papers and so forth. This is as yet to be a completely secret arrangement.

Forwarding as urgent intelligence.

In subparagraphs 2 and 3 they do not repeat the "In case," but that is implied. That finishes the message.

I am told, or I am informed, that on the 28th of November, 1941, Colonel Bratton, who was in charge of all these secret matters and who, as I stated, is available here for the Board, made arrangements for listening for Japanese broadcasts that might include this code. These arrangements were made through Colonel Sadtler, then in the office of the Chief Signal Officer, who put Colonel Bratton in charge with a Mr. E. G. Sterling, then Chief of the National Defense Operations Section of the Federal Communications Commission. The F. C. C. did thereafter monitor Japanese broadcasts for the purpose of determining if the Japanese sent a message using the "Winds" code. Colonel Bratton was unable to find that a—our records do not show that a Japanese message using the "Winds" code was intercepted by the F. C. C. or the Army Signal Corps until after Pearl Harbor.

It appears from the record that on the 5th of December, '41, Colonel Sadtler, in the office of the Chief Signal Corps Officer, was informed by Admiral Noyes, Naval Communications Officer, that a Japanese message using the "Winds" code had been intercepted the previous night and that the message decoded meant that Japanese-Great Britain relations were to be [38] broken; that on December 5, 1941, Colonel Sadtler so informed General Miles, Colonel Bratton, General Gerow, Colonel Gaily, General Gerow's executive officer, and General Bettlesmith, who was then Secretary of the General Staff, but that General Miles or Colonel Bratton never informed General Marshall personally of this Sadtler information.

The presumption, of course, is that Colonel Smith informed me.

We find in the records that Colonel Bratton prior to this time had been informed by the Navy that Commander Rochefort of the 14th Naval District knew all that our own Navy Department knew about the "Winds" code message, and that on the 5th of December he caused the following message to be sent to the Commanding General, Hawaiian Department:

(Message of December 5, 1941, to the commanding general, Hawaiian Department, in re Japanese "Weather" broadcasts from Tokyo, is as follows:)

Contact Commander Rochefort immediately through Commandant 14th Naval District regarding broadcasts from Tokyo reference weather.

The record shows that General Miles and Colonel Bratton were, on the 5th of December, 1941, and had been for some time prior thereto, expecting a break in Japanese-Great Britain relations.

You remember, I commented on the fact that we didn't know their method of going down the Indo-China coast. They were trying to keep us from a war break and involve only Great Britain.

I find that no officer of the Navy advised General Miles [39] or Colonel Bratton that any mesasge implementing the "Winds" code had been received by the Navy.

General RUSSELL. Well, there seems to be some conflict because, as I interpret the message that you have just read, our people reached the conclusion, based on what they knew, that the only executive flash on this code that had been made indicated that there would be a break with Britain only.

General MARSHALL. That's the——

General RUSSELL. That is the sense of that message?

General MARSHALL. Yes.

General RUSSELL. While the Navy people's report from which I am reading now indicated that war was to come with the United States and with Britain, but not with Russia.

General MARSHALL. Well, that is the actual mesage that I read to you.

General RUSSELL. Yes, we have it here. I think there is a little conflict between that interpretation and this interpretation, and might I inquire——

General MARSHALL. What do you mean by "interpretation"?

General RUSSELL. The Navy people say that the executive order, whenever it came in—and they alleged it came in on the 3rd of December—executing the code words which were intercepted apparently on the 28th of November, interpreted, meant that war was coming with the United States and with Britain, but not with Russia; and the message which you have just submitted to the record, as I remember it, was to the effect that trouble would come with Britain alone.

General MARSHALL. The Chief of Army Intelligence, G-2, [40] General Bissell, informs me that from the records it appears that Colonel Sadtler of the Signal Corps was informed by Admiral Noyes, Navy Communications Officer, that a Japanese message using the "Winds" code had been intercepted the previous night and that the message decoded meant that Japanese-Great Britain relations were to be broken.

General RUSSELL. Well, I think the materiality there is that they transmitted, according to that statement, to the War Department information that the relations with Britain would be broken, and did not report our relations with Japan; and in the document from which I am reading they stated that we would be included in the break.

Now, so far as I know, these are the questions which have been developed, the answers to which might involve, or might have involved, disclosing the source, which we do not want to disclose.

Before going away from it I want to ask this question, in an effort to connect this information with the Commanding General of the Hawaiian Department: You had come to the definite conclusion some time in the fall of '41 that war with Japan was inevitable?

General MARSHALL. That is correct.

General RUSSELL. General, can you recall about when you reached that conclusion?

General MARSHALL. It is awfully hard to recall these things.

General RUSSELL. It was a gradual sort of process of reasoning?

General MARSHALL. It was a gradual process. There was [41] this thought, of course, woven in all of this matter: That the Japanese would attain every conceivable advantage before an actual state of war was on, and our problem was how to handle that phase of the matter. I have referred a little while ago to the fact that they had made movements in Manchuria; they had done things in China; they had very recently, as of 1941, gotten themselves installed in Indo-China; they had made what internationally would be characterized as outrageous moves; and nobody had done anything about it, and they were acting very much on that presumption, that nobody would do anything about it. Great Britain was so heavily involved and at that time was in such dire circumstances in its war with Germany that they felt that there would be every reluctance on the part of the British to become involved in a war with Japan; therefore, they could take the greatest possible liberties in what they did.

The same, for a slightly different reason, applied to the United States, so far as public opinion was concerned, I think the Japanese were capitalizing on the belief that it would be very difficult to bring our people into a willingness to enter the war. That, incidentally, was somewhat confirmed by the governmental policy on our part of making certain that the overt act should not be attributed to the United States, because of the state of public mind at that time. Of course, no one anticipated that that overt act would be the crippling of the Pacific Fleet.

My own thoughts were, I believe, roughly of this nature: That the Japanese were going to take every conceivable advantage and finally would reach the point where they could [42] safely declare war, involve us in war, and get all the other things they were after; that they would go as far as possible before they did that, which would certainly seem to be the part of wisdom.

I also felt this, from the information that we were receiving: that they were now getting in a highly nervous state because of the arrival of supplies in the Philippines. I recall one of the "magic" messages which went to the Japanese Consul General in Manila to check up immediately on the presence of Flying Fortresses in the Philippines. We apparently had gotten them in there without their knowing it, and it was quite a long time before any evidence of their knowledge of those Fortresses being there. Just how that could be managed, I don't know. He also was reporting to them the tremendous unloading procedures being carried out at night and the movement of things at night from the docks, and everybody barred from the vicinity, which accumulated in my mind the thought that they were in a critical posture as to what they must do to prevent us from building up further in the Philippines.

Our own belief was that, once we got the planes out there, and particularly these convoys that were then on the Pacific, which had, compared to what the Philippines already had, a wealth of material that they would absolutely lack, that the Japanese would be in an extremely delicate strategical position in trying to carry out any enterprise to the south of the Philippines. That was a matter of conjecture as to the potency of a force of heavy bombers numbering nearly a hundred, [43] the largest we ever had gathered together up to that time, and their ability to range far and wide over the ocean, and their assumed ability to bomb successfully moving naval vessels.

So in my mind the question was when they would turn from offensive infiltrations to acts that would absolutely develop a state of war. Connected with my thoughts in this matter was the fact that the campaign in Russia was proceeding at a most remarkable rate. The great offensive of the German Army at that time gave the impression that Russia was about to be overwhelmed. And if you look back you will find that Hitler had announced that the capture of Moscow would occur, I think, about December 15th. And as a matter of fact I think what happened was, the Japanese became committed to all these things and the final overt acts on their part in the firm belief that the German Army was going to eliminate Russia, which of course was a very pertinent consideration from the Japanese point of view, considering the Russian force then on the Manchurian front and the great threat to Japan's security if a strong Russia was established in that vicinity. So that it was a problem, in my mind, of detecting when they would pass from this progressive infiltration to acts that absolutely provoked war.

What they were doing, which from the technical point of view is interesting and relates to this matter, was building up all of their installations. For example, when they started in their operations against the Isthmus of Kra, the Malay Peninsula, down to Singapore, they had already established in Indio-China their air bases, their bombs, their gasoline. Everything was read, and it permitted them to concentrate [44] great force and to give covering, air cover, to all their transport movements that were coming down there.

The desperate situation of the British was indicated by the loss of their two great battleships, the RENOWN and the PRINCE OF WALES, while undertaking to sink those Japanese convoys without air coverage. Air coverage was practically nonexistent, with no way of providing them. But the Japs were set up.

And as an example of what that means, we on our side, when we became involved in the development, immediately after December 7th, of air forces from Australia and Sumatra and Java, Bali, and those other islands, including Borneo—we had no ground installations at all. It was with the greatest possible difficulty that we could operate the planes, because we didn't have personnel on the ground to keep them going. The Japanese had done all that beforehand. Our losses in planes were very heavy, in particular, because we had no adequate ground installations, either in mechanics or fields or bombs or anti-aircraft guns, and we just lost all over the place on that basis. Now, the Japanese were accomplishing all that without becoming involved

in war. The problem, then, was how long they would go ahead on that basis.

General GRUNERT. May I suggest that we have a slight pause at this point.

(There was a brief informal recess.)

General RUSSELL. I think I shall change the question and ask if it is a fact that you came to the conclusion some time in the fall of 1941, and prior to November 1st, that war with Japan was inevitable.

[45] General MARSHALL. I came to that conclusion, I think, about that time, but as to when the Japanese would carry their actions to the point of actually provoking war, I was still in a state of uncertainty because of the methods they had employed in all their previous maneuvers. And I might add; and I was also uncertain as to whether or not they might not endeavor to maneuver in such a way that they would provoke the English, in the hopes that we would not participate with the British.

General RUSSELL. Now, General, when in that critical period in the fall of '41 did you reach a firm belief that war with Japan was imminent?

General MARSHALL. Was the question when?

General RUSSELL. When, in that particular period of time?

General MARSHALL. I couldn't give you an actual date. The whole period from July onward was one of terrific effort on our part to build our fences as quickly as we possibly could, and also to have the State Department do all in its power to prevent a rupture.

General RUSSELL. General, you had reached the conclusion on the 27th of November of '41 that war with Japan was imminent?

General MARSHALL. Oh, yes. I wasn't here on the 27th of November, but that would be my conclusion.

General RUSSELL. Yes.

General MARSHALL. But even then I must state that just when they would provoke an open rupture was still—

General RUSSELL. Debatable?

General MARSHALL. Still debatable. If you read these "Winds" messages, they were talking about the rupture of [46] diplomatic relations, and very remarkable things had been done under a rupture of diplomatic relations while still evading an actual act of war; and just how far they would play on the American public's reluctance to engage in a war, and the British unwillingness to further extend their slender resources, was quite a problem.

General RUSSELL. Well, do you believe that the information as to Japanese activities, conduct, movements, and so forth, which you have described rather fully this morning, which reached you from secret sources, influenced your thinking as to the inevitability and the probable imminence of war?

General MARSHALL. Yes.

General RUSSELL. Would it have been possible and feasible to have sent the substance of this secret information to the Commanding Generals of the Overseas Departments by courier or otherwise, thereby avoiding the danger of exposing the codes that you were striving so diligently to protect?

General MARSHALL. It was both practical and feasible, but I felt then that it was unwise. I would say now, considering what has happened, that the situation might well have been helped by translating

that information to them. In our own view, an alert of the character, particularly the character of the two that occurred at that time, the Naval alert and then the later Army alert, were sufficient for any Commander with a great responsibility; and in addition to that you must remember that we were pouring through Hawaii, on the way to the Philippines, convoys, rushing everybody. Everything was being pushed to the last extreme. Nobody could look at [47] that without realizing that something very critical was in the wind. Our great problem was how to do these things, energized in the way we were—the shipments, and collecting the means and getting them out, particularly to the Philippines, which passed entirely through Hawaii—without giving such notice to the Japanese that it would have an unfortunate effect in our stalling off this affair.

Undoubtedly they did obtain that view. I think they were rushed in their decision by the fact that if they didn't catch it, didn't act within a certain period of time, it would be too late: we would have gained the necessary strength to make it undesirable, to make it too dangerous for them to act. All of that was apparent to the Commanders in the place. Only the most critical necessities would have involved us in taking over all that commercial shipping, in pushing these troop movements, in pushing the cargo shipments, in taxing the Pacific Fleet's resources in providing convoys. Everything was involved there at the time, and I cannot see how—I never have quite understood how the change from a great fear, as expressed in all the previous communications, of an air assault, suddenly seemed to lapse. I don't know what the explanation of it is, and I myself have never discussed it.

I went ahead with the war, in the next two hours, and have kept at it ever since, and didn't go into this thing at all. For instance, the voluminous report like that is entirely beyond my capacity. I was busy with the war with Japan and Germany. And I have also thought it was wise that I shouldn't discuss the thing. And I have been brought into it now. In a limited way I have familiarized myself as far as the documents [48] permitted me to do, but I must say even now it is a very sketchy thing on my part.

General GRUNERT. Are there any other questions?

General RUSSELL. I have been developing this end of it, and we have had no meeting to consider final conclusions, and whatnot. In my opinion, based on the record as it now stands, and the new stuff that is coming in to us, there are several other subjects which should be submitted to General Marshall and that he should discuss with us. From the War Department standpoint I think we should discuss them, and from the Board's standpoint I think we should have them. I have prepared a few questions on them, and I have the definite feeling that the record is going to have an incompleteness about it as to those things unless we do get General Marshall's opinion on them; and if they are not discussed by him I shall be inclined to dictate into the record those things which I think should have been discussed with the Chief of Staff. I know he has to go now, but I am just wondering if he cannot come back at a later time.

General MARSHALL. I'll tell you, I am going to see the Chinese official right now, I am going to the combined Chiefs of Staff at two-thirty, and I have to get ten minutes with the U. S. Chiefs of Staff on

a most critical matter before then. I have to see the Ambassador that is going to France. I am leaving.

General GRUNERT. It appears necessary, then, that we ask you for about another hour early next week.

General MARSHALL. Well, it will have to be early because confidentially I am leaving for France on Tuesday, and I have [49] to go.

When I appeared before the Board before, there were certain communications that I said I would have looked up that passed between myself and General Short prior to the attack on Pearl Harbor. I have had them collected, and here they are (indicating).

General GRUNERT. If there are any additional questions that we have on our urgent agenda that have not been answered, then we shall ask them Monday, complete the thing Monday.

General RUSSELL. The memorandum submitted by the Board to General Marshall on August 31, 1944, is as follows:

(Memorandum dated August 31, 1944, Army Pearl Harbor Board to General George C. Marshall, is as follows:)

31 AUGUST 1944.

Subject: Army Pearl Harbor Board Investigation.

To: General George C. Marshall, Chief of Staff, U. S. Army.

1. Since your appearance before the Board it has heard much testimony and has examined many documents. As a result information, apparently material, has been brought to the attention of the Board, which it did not have when you testified. Hence the Board requests that you subject yourself to a rehearing as early as possible after the Board's return to Washington, D. C., now scheduled for Sunday, September 24, 1944.

2. The particular subjects on which the Board would like to get additional information follow:

[50] a. A witness before the Board stated that it had come to his knowledge that vital information in the hands of the War and Navy Departments on the following subjects was not supplied to responsible officers in Hawaii:

(1) That the War and Navy Departments knew that Japan had set a deadline of 25 November, later extended to 29 November for the signing of an agreement, after which they would take hostile steps against the U. S.

(2) That on the 26th of November an ultimatum was delivered to Japan by the U. S.; that this was done notwithstanding a joint recommendation to the President by General Marshall and Admiral Stark that no ultimatum of any kind should be made to Japan.

(3) That he (the witness) was certain that several days prior to 7 December 1941 there was information in the WD and the Navy Department that Japan would attack the U. S., and, very probably, that the attack would be directed against the fleet at Pearl Harbor, among other places.

(4) That there was information in the War and Navy Departments on 6 December 1941 that the order of attack was momentarily imminent.

(5) That early on 7 December 1941 the precise time of the attack was known. It was known three or probably four hours before the attack.

b. Particular reasons, if any, which prompted the selection of General Short for the command [51] of the Hawaiian Department.

a. Knowledge possessed by the Chief of Staff as to the means available to General Short for reconnaissance, and as to the effectiveness of the reconnaissance being conducted.

d. Whether the Chief of Staff knew that between 27 November and 7 December 1941 the Alert in effect in the Hawaiian Department for the Army forces provided security against sabotage only.

e. Whether there were any restrictions imposed upon the War Department relating to its activities in the Pacific by either the President or the State Department? Specifically, were the injunctions to commanders in the Pacific area to avoid commission of the first overt act, alarming the population in Hawaii, disclosing intent, etc. the result of instructions from such sources?

f. Reasons for not using the telephone to inform General Short of the information contained in the Chief of Staff's radiogram of 7 December 1941.

3. On your former hearing the Board understood that you would direct a further search of War Department records to determine whether or not there were other communications between you and General Short in 1941 than those about which you testified. The Board has not been informed as to the results of that search.

4. As to the five subjects listed in paragraph 1 *a* this letter, if in your opinion the Secretary of War has information thereon that you may not have, will [52] you please transmit those subjects to him to be added to the subjects on which the Board hopes to have him testify.

For the Board:

GEORGE GRUNERT,
Lieutenant General,
President.

(Thereupon there was a brief recess.)

[TOP SECRET]**[54] PROCEEDINGS BEFORE THE ARMY PEARL
HARBOR BOARD**

SATURDAY, SEPTEMBER 30, 1944**MUNITIONS BUILDING,
Washington, D. C.**

The Board, at 10:45 a. m., pursuant to recess on Friday, September 29, 1944, conducted the hearing of witnesses, Lt. Gen. George Grunert, President of the Board, presiding.

Present: Lt. Gen. George Grunert, President; Maj. Gen. Henry D. Russell and Maj. Gen. Walter H. Frank, Members.

Present also: Colonel Charles W. West, Recorder; Major Henry C. Clausen, Assistant Recorder; and Colonel Harry A. Toulmin, Jr., Executive Officer.

General GRUNERT. The Board will come to order.

**TESTIMONY OF RUFUS S. BRATTON, 03726, COLONEL OF INFANTRY,
HEADQUARTERS COMMANDANT: COMMANDING OFFICER,
SPECIAL TROOPS, HEADQUARTERS, THIRD ARMY, E. T. O.**

(The witness was sworn by the Recorder and advised of his rights under Article of War 24.)

Colonel WEST. Colonel, will you please state to the Board your name, rank, organization, and station?

Colonel BRATTON. Rufus S. Bratton, 03726, Colonel of Infantry, Headquarters Commandant; Commanding Officer, Special Troops, Headquarters, Third Army, E. T. O.

General GRUNERT. In the particular part of the [55] investigation that we have, concerning what you may know something about, General Russell, here, will conduct the examination for the Board, and then the Board will piece out, wherever it sees fit. General Russell.

General RUSSELL. What was your assignment in 1941?

Colonel BRATTON. Chief of the Far Eastern Section G-2, War Department.

General RUSSELL. As such, in discharge of your duties in that assignment, were all secret messages relating to the Japanese situation received by the War Department, from whatever source, made available to you?

Colonel BRATTON. General, before replying to that question, I have been cautioned by G-2 to remind the Board that my answer bears upon documents which are now classified as top secret, and the answer is yes.

General GRUNERT. For the information of the witness, your testimony today on these matters will be separately recorded and treated as top secret.

Colonel BRATTON. Yes, sir.

General RUSSELL. Your answer would be yes?

Colonel BRATTON. Yes, sir.

General RUSSELL. That, then, definitely stated, would involve information which reached the War Department as a result of the decoding of Japanese information, data, and messages?

Colonel BRATTON. The decoding and deciphering of certain Japanese diplomatic correspondence.

General FRANK. Intercepted?

Colonel BRATTON. Yes, sir.

[56] General RUSSELL. Colonel, do you know what agencies during the latter part of 1941 were engaged in the interception of such messages as your last answer described?

Colonel BRATTON. Yes, sir; the S. I. S. of the Signal Corps.

General RUSSELL. Would you tell us what that is?

Colonel BRATTON. Sir?

General RUSSELL. Would you explain, define "S. I. S."?

Colonel BRATTON. Signal Intelligence Service.

General RUSSELL. Yes.

Colonel BRATTON. The Signal Corps; and the code encipher section of naval communications.

General RUSSELL. Are those the only two agencies made available to you who intercepted Japanese information in the latter part of 1941?

Colonel BRATTON. That is correct, sir.

General RUSSELL. Colonel, possibly before I asked that question I should have made a preliminary statement that there is some information before the Board as to activities of the Federal Communications Commission. Do you recall any intercepted Japanese information reaching the War Department from that source?

Colonel BRATTON. No, sir; to the best of my knowledge and belief they were not engaged in that type of work, legitimately or otherwise.

General RUSSELL. But it is your definite recollection that no information came to you, in the capacity which you have just described, from that source?

Colonel BRATTON. Not that type of information, General. [57] Shortly before the attack on Pearl Harbor it came to our knowledge that the Japanese, by means of certain code phrases which they would inject into their weather broadcasts from Tokyo, would have a certain significance. Knowing that the F. C. C. monitored all those broadcasts from a station on the West Coast, I made arrangements through Colonel Sadtler of the Signal Corps to have these weather broadcasts monitored by the F. C. C. station, which at that time I believe was in Portland, Oregon. I made arrangements with certain officials of the F. C. C. to call me on the telephone immediately in the event this code which I knew of was monitored or intercepted. They had my telephone number at the office and at my home. They did call me on one or two occasions repeating what appeared to be this weather code signal which I was waiting for. Examination of the

intercept, however, disclosed that it was not the code that I was looking for. That is the only direct contact that I have had with the F. C. C. or any of its officials.

General RUSSELL. About when were these two messages delivered to you by the F. C. C.?

Colonel BRATTON. During the first week in December, sir.

General RUSSELL. I want at this point, because I think it is related, to discuss with you the message which has on occasions been referred to as the "Winds" message, spelled in our record W-i-n-d-s.

Colonel BRATTON. Yes, sir.

General RUSSELL. And ask whether or not the information delivered to you by the F. C. C. on either of the two occasions [58] related to that "Winds" message, if you are acquainted with the "Winds" message.

Colonel BRATTON. They related to it, but they were not transmissions of the code that I was waiting for, sir.

General RUSSELL. On yesterday, Colonel, General Marshall was before the Board, and General North. There was read into the record a statement as to this message that we are discussing now, the "Winds" message. Did you prepare that statement or talk about its contents? The reason I am asking you that, I want to shorten this investigation if I can.

Colonel BRATTON. I don't think I know about the communication that you speak of.

General RUSSELL. All right. I am talking about the statement that General Marshall had relating to the "Winds" message. It evidently was prepared for him by some member of his staff.

Colonel BRATTON. It was not prepared by me, sir.

General RUSSELL. Not by you. Now, did you ever get information, from any source, relating to this, I will call it, weather intercept about which you have testified that you made some request on the F. C. C.?

Colonel BRATTON. As I have stated, sir, I got several reports from the F. C. C. about an intercept of a weather broadcast which they thought might be what I was looking for. The message that I was waiting for, that is, the one which, deciphered, would indicate a break in the relations between Japan and the United States, never reached me from any source whatever prior to the attack on Pearl Harbor. I had conversations on one of two occasions with Colonel Sadtler [59] of the Signal Corps, with Lieutenant Kramer of the Navy, and with Commander McCullom of the Navy, the latter being my opposite number in O. N. I., concerning messages that had been picked up, either by the Navy or by the F. C. C., containing weather broadcasts and containing phrases similar to those that we were waiting for.

On the morning of December the 5th I have a vague recollection of a meeting in General Miles's office where Colonel Sadtler was present, in which he said something to the effect that the message had come through. Questioning developed the fact, however, that the message he was talking about was one which indicated a break in diplomatic relations between Great Britain and Japan. That was beside the point at that time because it was our belief that relations between Japan and Great Britain were on the point of rupture and had been for several days. The message that we were waiting for was one which would indicate a break in relations between Japan and

the United States. I never received that message from any source prior to the attack on Pearl Harbor.

General RUSSELL. Colonel, I am going to show you a discussion of this message of December 4. I think we can take it up about here (indicating) and read down to that point. Will you please read that, and after which I will ask you a question or two.

Colonel BRATTON. This message never reached me, sir, prior to the attack on Pearl Harbor, nor, to the best of my knowledge and belief, did it reach any other official of G-2 or the War Department.

General RUSSELL. Have you seen that message, Colonel, at [60] any time before this morning?

Colonel BRATTON. No, sir.

General RUSSELL. Did you know of its existence at any time until this morning?

Colonel BRATTON. Only by hearsay, since my return to Washington recently.

General RUSSELL. And by "recently" you would mean within—

Colonel BRATTON. Within the last two weeks, sir.

General RUSSELL. Two weeks. This is not, then, the message which the Federal Communications Commission sent to you thinking that it was the "Winds" message which you were expecting and very desirous of having?

Colonel BRATTON. No, sir.

General RUSSELL. This is an entirely different message?

Colonel BRATTON. Yes, sir.

General RUSSELL. Now, are you familiar enough with the code words used in the message which I have just exhibited to you, and which you have just read, to state to the Board whether or not the translation and interpretation of those code words has been correctly done there?

Colonel BRATTON. As to the first phrase, "Higashi no kaze ame," that has been correctly translated.

General RUSSELL. And what was that translation?

Colonel BRATTON. War with—it meant a break in diplomatic relations between Japan and the United States. The code message that we intercepted and deciphered did not say that when this "Winds" message came through it meant war. It did say that it meant a break in diplomatic relations. Stop.

[61] I believe that the second phrase, "Nishi no kaze hare," is correctly translated: War with Britain: that is, a break in diplomatic relations between Japan and Great Britain.

And I believe that the third phrase has also been correctly translated, meaning that there will be no break with Russia.

General FRANK. You were a language student in Japan, weren't you?

Colonel BRATTON. Yes, sir.

General FRANK. Therefore, you are conversant with the Japanese language so that you can actually translate those phrases?

Colonel BRATTON. Yes, sir.

General RUSSELL. For the purpose of the record, I will state that the message which the Colonel has just been discussing with the Board is a message which appears in the testimony of L. F. Safford, who at the time of giving the testimony was a Captain of United States Navy, this testimony being given on April 29, 1944; and the portion of the

testimony containing the "Wind" message which the Colonel has just discussed appears on page 361 of the record which is being used in questioning the witness.

Now, Colonel, going away from the "Winds" message, which we apparently have exhausted, unless you have some other suggestion to make about it.

Colonel BRATTON. I have an additional statement to make, if I may, sir.

General RUSSELL. About this particular message?

Colonel BRATTON. About this code, this "Winds" code.

[62] General RUSSELL. Very well. I think it would be well to make that here.

Colonel BRATTON. There were several codes sent out by the Japanese foreign office at about this time, to their diplomatic officials abroad, which they hoped to use in the case or in the event of a sudden rupture of communications. There were several versions of this wind and weather code sent out. I discussed these codes with my opposite number in the O. N. I., Commander McCullom, on a number of occasions. Learning from him that they were monitoring the Japanese communication system in Honolulu as a function of naval communications, and learning also from him that their expert there was a Commander Rochefort, who was thoroughly familiar with the whole matter, I deemed it advisable, on or about the 5th of December, to have our G-2 in Honolulu contact Commander Rochefort, with the end in view that the latter could explain to G-2 what it was we were waiting for, and could explain to him orally, with complete security, the significance of the message. G-2 did send a message.

General FRANK. G-2 in Washington?

Colonel BRATTON. G-2, the A. C. of S. G-2 in the War Department, then General Miles, upon my recommendation, did send a message to G-2 in Honolulu, on or about the morning of the 5th of December, directing him to contact immediately Commander Rochefort with respect to the significance of certain weather broadcasts coming from Tokyo. That document is available in the files of G-2 now, sir. The message did go out. I did it this way as a means of saving time and for security reasons.

[63] That is all I have to say on that point, sir.

General RUSSELL. Have you a copy of that message of G-2 of the Hawaiian Department with you there?

Colonel BRATTON. Not in my possession, sir, but it can be secured from Colonel Clarke.

General RUSSELL. Colonel, before we go away from this line of questioning which we are doing now upon codes—and it has been suggested by your last statement: You say that there were a number of Japanese codes in existence in this critical period of late November and early December of '41?

Colonel BRATTON. Yes, sir. I recall from memory, as an example, one that was to be used in telephone conversations.

General RUSSELL. We have had some evidence before the Board which has left the Board—I wouldn't say left the Board, but left me—somewhat confused. Is it true, or not, that the Japanese code which was broken about this time in '41 is the same code which is in existence now?

Colonel BRATTON. I can't testify on that of my own knowledge, General. I have been away from Washington for over a year.

General RUSSELL. Well, the last time you were in contact with that code, we will say a year ago, was that the same code that the Japanese armed forces were using or that the Japanese Empire was using in 1941?

General FRANK. In other words, had they changed the code, to your knowledge?

Colonel BRATTON. Over a period of some six years when I handled these matters for G-2, the Japanese changed their codes and ciphers a number of times. It held us up for periods of [64] from two to six weeks, as a rule, before we could get the hang of the change. At the time I left Washington, to the best of my knowledge and belief, we had not broken any Japanese military code or cipher. We had broken several of their diplomatic codes and ciphers and one or more of their naval operational codes and ciphers.

Does that answer your question, sir?

General RUSSELL. Yes. I think one more question will clarify it, because we shall talk cases.

Let us assume, for example, that the Japanese authorities knew this morning that we or the American forces had broken the code, to the place that we could interpret these code words which you have just interpreted for us. Would that indicate anything to the Japanese authorities today which might cause them to take any action of any kind?

Colonel BRATTON. Yes, sir. I think, if I understand your question, if the Japanese knew today that we were reading any of their codes or ciphers, they could so effectively change them as to make them unreadable from now on over a period of considerable time.

General RUSSELL. Two to six weeks?

Colonel BRATTON. Such an act on their part might well prolong our war with Japan much longer than necessary.

General RUSSELL. I think the question that I was attempting to ask, I probably did not ask: This code that you have just interpreted for us, and from the record that we exhibited—are those code words being used by the Japanese today?

Colonel BRATTON. Not to my knowledge, sir.

[65] General RUSSELL. If they knew, therefore, that we had intercepted these messages and had broken that code at that time, it would convey to them no information as to whether or not we had broken the code which they are using today, would it?

Colonel BRATTON. Oh, yes, sir, it would, because these code phrases are a code within a cipher. I didn't make that clear. The whole message about this "Winds" signal was in a very secret cipher, and these code expressions were contained in that. This was their most secret cipher, and it contained a code which was to be broadcast as part of a weather broadcast.

General RUSSELL. And they are continuing to use that cipher?

Colonel BRATTON. Yes, sir.

General RUSSELL. And this would disclose the fact that we did have information on that secret cipher which they do not know that we have, if they should learn that we have picked this up?

Colonel BRATTON. That is correct, sir.

General RUSSELL. Yes.

General GRUNERT. Therefore, the danger of any leak exists now as much as ever?

Colonel BRATTON. Sir?

General GRUNERT. Therefore, the danger that any leak of this thing might affect the war effort exists now as it has in the past?

Colonel BRATTON. Yes, sir.

General FRANK. In the answers to the questions that General Russell has asked you I notice in each instance you [66] said that you did not get any information on this prior to Pearl Harbor. Did you get any information on this since Pearl Harbor or just after Pearl Harbor? Was there any point in your putting into your answer the phrase that you did not get this prior to December 7th?

Colonel BRATTON. Yes, there is this point to it: My recollection is very definite to the effect that I did not get it prior to the attack on Pearl Harbor. It may have been made available to me thereafter, and it would not have made much impression on me at that time because the attack had been made; it would no longer have as much significance in my mind.

General FRANK. You stated in one of your answers that Colonel Sadtler had made a report that there had been some Japanese broadcast of a "Winds" message.

Colonel BRATTON. Yes, sir.

General FRANK. What was the substance of that?

Colonel BRATTON. My recollection of that is very vague, General, and I have discussed the matter with General Miles, and his memory is equally vague. I have seen a statement made by Colonel Sadtler to the effect that on the morning of the 5th of December 1941 he went to General Miles with the oral statement that the "Winds" implementing message had been received by the Navy. He says that General Miles then sent for me and the three of us discussed it in General Miles' office. Colonel Sadtler further stated that he got his information from Admiral Noyes of the Navy, and it was to the effect that the phrase had come through which meant a break in the diplomatic relations between Japan and Great [67] Britain. I don't remember the incident. Colonel Sadtler is so positive in his statement, however, that something of the sort must have happened. But the point I wish to emphasize is this: we knew that relations between Japan and Great Britain were on the point of being broken at any minute. We had been telling everybody so. That is not the message that we were waiting for. The one that we were waiting for was one which would indicate a break between Japan and the United States.

General FRANK. Since you were waiting for this, and you did have some information on a message that did come through, so far as you remember you did not investigate it further to find out if the "Winds" message concerning the United States had come through; is that correct?

Colonel BRATTON. Yes, I did make further inquiries about this message, but prior to investigating the thing more thoroughly I had dispatched to G-2 in Hawaii the message that I have previously referred to, so that if this "Winds" code implementing message did come through they in Hawaii would be alerted just as quickly as we were.

General FRANK. Do you know whether or not Colonel Fielder ever got that message?

Colonel BRATTON. I do not, sir.

General FRANK. Do you know whether or not he ever got any information from Rochefort?

Colonel BRATTON. Of my own knowledge I do not, sir.

General FRANK. We had Colonel Fielder on the stand as a witness in Honolulu.

[68] Colonel BRATTON. Yes, sir.

General FRANK. And asked him if he had any information about any code word being flashed, and I think his testimony indicated—at least, he said he did not.

Colonel BRATTON. The message was dispatched, sir.

General RUSSELL. Colonel, before we go away from this subject of the "Winds" message, have you anything else there, documentary or otherwise, that you would like to say about it?

Colonel BRATTON. Yes, sir. I would like to read into the record an extract from a document known as "Summary of Far Eastern Documents," compiled in G-2 in the fall of 1943. A paragraph extracted from page 36 of this document reads as follows:

(Excerpts from "Summary of Far Eastern Documents" are as follows:)

FE 361D On 5 December G-2 instructed G-2, Hawaiian Department, to confer immediately with a naval officer on duty at Pearl Harbor who had learned from most secret sources that weather broadcasts from Tokyo would include information regarding Japan's intention to break diplomatic relations with certain designated powers including the United States.

General GRUNERT. I would like to ask a few more questions along that line. This message you referred to was sent to G-2 of the Hawaiian Department?

Colonel BRATTON. Yes, sir.

General GRUNERT. Do you know of any instructions to G-2 [69] of the Hawaiian Department that would have prevented him from informing his Commanding General of the tenseness of the situation at that time which might have caused the Commanding General to take greater security measures than he would have had he not had that information?

Colonel BRATTON. No, sir.

General GRUNERT. Had you been G-2 out there and received that message which, in a way, put you on an additional alert or a state of alertness, would you have considered it your duty as G-2 of the Department to have at least secretly informed your Commanding General that such a thing might be expected and that therefore everything should be prepared for any eventuality?

Colonel BRATTON. Yes, sir.

General GRUNERT. Was there an acknowledgment of that message to G-2 of the Hawaiian Department to the G-2 of the War Department? In other words, do you know whether or not he actually received that message?

Colonel BRATTON. We have no documentary proof thereof, General, but the standing operating procedure—

General GRUNERT. Did anything happen later to show that he had received it in any way?

Colonel BRATTON. Well, we have negative evidence that it was received, in this way: it was standing operating procedure in the message center of the War Department at that time to check back in code, by

number, the receipt of all outgoing messages. The officer in charge of the message center at that time, Colonel French of the Signal Corps, made the statement in my presence, yesterday or the day before, that [70] to the best of his knowledge and belief no nonreceipt check was ever received on that numbered message, and that to the best of his belief the message was received by the addressee. It was most certainly sent out, as the record shows.

General GRUNERT. The transcript of the testimony of Colonel Fielder will show that he was given an opportunity to inform the Board of anything additional to those things on which he was questioned, that would further our investigation. Now I am trying to find out why he didn't inform the Board, either on or off the record, of this additional, really, warning that something was in the wind. I can't quite understand, unless there are G-2 instructions to the contrary, that he could not impart such information without authority from the War Department, or something of that effect. You see what I mean?

Colonel BRATTON. I understand perfectly, General; and there, of course, were no such instructions issued by the War Department to any of its G-2s, that I know of. Our policy at that time was to expect the G-2s everywhere to be in the very closest contact with their Commanding Generals.

General GRUNERT. Then, the only reason I can see for it is that he evidently forgot the whole business.

Colonel BRATTON. I find that hard to believe, sir. Of my own knowledge, between the *24th of November and the 7th of December* there were *five warning messages* sent out of the War Department to *Hawaii*. The fifth one was not delivered to the addressee until after the attack. To the best of our knowledge and belief all four of the others were.

General GRUNERT. Will you recount the dates of those? [71] I think the Board has all of them or has had testimony on all of them, but I want to recheck.

General FRANK. Those four include messages to the Commanding General, Hawaiian Department, through the Navy, or are they all exclusively from the War Department?

Colonel BRATTON. One or two were naval messages, sir.

If you will allow me to quote again from this document, sir, on page 34 of the document previously referred to as "Summary of Far Eastern Documents," is this statement:

FE 356A Based on all the information available, including that from the State Department, and the most secret sources, and after consultation among G-2, WPD, and the Navy, a message was dispatched on 24 November from the Office of the Chief of Naval Operations to the Commanders-in-Chief, Asiatic Fleet, Manila, and Pacific Fleet, Pearl Harbor, and the Naval Commandants at San Diego, San Francisco, Seattle, and Balboa, with the request that senior Army officers in their respective areas also be informed. This message stated, among other things, that there "are very doubtful chances of a favorable outcome of negotiations with Japan" and warned of a possible "surprise aggressive movement in any direction."

On page 35 of the same document:

FE 358A On the same date, 27 November, the Chief of the War Plans Division, after consultation with G-2, directed the dispatch of a first-priority message to the Commanding Generals of the Hawaiian Department and the Caribbean Defense Command stating [72] that, among other things, "Negotiations with

Japan appear to be terminated to all practical purposes" and that "Japanese future action unpredictable but hostile action possible at any moment".

FE 358B G-2, in a message to the G-2s of all Corps Areas, Caribbean Defense Command, Hawaiian Department, instructed them to "advise only the Commanding Officer and the Chief of Staff that it appears that the conference with the Japanese has ended in an apparent deadlock stop. Acts of sabotage and espionage probable stop Also possible that hostilities may begin stop."

Now:

FE 358C On 28 November G-2 directed that a radio be sent first-priority warning Corps Areas and Overseas Department Commanders that because of the critical situation all precautions should be taken immediately to guard against sabotage, subversion, and espionage within their commands.

The message of 5 December has already been read into the record as FE 361D (pg. 68).

Now:

FE 366A On the morning of 7 December G-2 learned that the Japanese Ambassador had received instructions to deliver to the Secretary of State at one o'clock in the afternoon a statement which rejected an American proposal of 26 November and which asserted that it was impossible to reach any agreement through further negotiations. Based on [73] this information the Chief of Staff, after consultation with G-2 and WPD, wrote a first-priority radiogram which was dispatched about 12:17 p. m. to the Commanding Generals of the United States Army Forces in the Far East, Caribbean Defense Command, Hawaiian Department, and 4th Army. The message read as follows: "Japanese are presenting at one p. m., Eastern Standard Time, today, what amounts to an ultimatum; also they are under orders to destroy their code machine immediately stop Just what significance the hour set may have we do not know, but be on the alert according stop Inform naval authorities of this communication stop".

I think that covers the five messages, sir, that I have knowledge of.

General RUSSELL. Now, you have been reading from a document which you have described as "Summary of Far Eastern Documents"?

Colonel BRATTON. Yes, sir.

General RUSSELL. Where is that of record? In the office of G-2?

Colonel BRATTON. Sir?

General RUSSELL. Where is that document from, what office?

Colonel BRATTON. From the files of G-2 in the War Department, sir.

General RUSSELL. How long has it been there; do you know?

Colonel BRATTON. Since it was prepared, in the fall of 1943, sir.

[74] General RUSSELL. Now, the last message which you read to the Board, Colonel, is the one that I indicated a little earlier that we wanted to discuss with you for a moment, the message of December 7th.

Colonel BRATTON. Yes, sir.

General RUSSELL. The information which the Board has is that on the morning of December 7th there were on the desk of the Chief of Staff of the Army two messages, one to the effect that the ultimatum would be delivered at one o'clock and the code machines were being destroyed, and the other a rather long statement which was alleged to have been in response to the memorandum of the Secretary of State of November 26. Do you recall that there were two such messages there on that morning?

Colonel BRATTON. Yes, sir; I put them there myself and can identify them both.

General RUSSELL. Let us consider the short message relating to the destruction of the code machines and the delivery of the ultimatum.

Colonel BRATTON. Yes.

General RUSSELL. From what source did the War Department receive the information upon which that message was based?

Colonel BRATTON. There is the translation made in the code encipher section of naval signal communications, sir.

General RUSSELL. Do you know what time it was delivered to the War Department?

Colonel BRATTON. It was delivered to me, sir.

General RUSSELL. At what time?

Colonel BRATTON. Between half past eight and nine o'clock [75] Sunday morning, December 7, 1941.

General RUSSELL. Do you remember the circumstances of the delivery, by whom delivered, and so forth?

Colonel BRATTON. No, sir, not at this time, but there is no reason why I should, because there were a great bulk of this material being delivered to me daily at all times of the day and during the night, during these days.

General RUSSELL. That was about the most important message that you had received in this period, wasn't it?

Colonel BRATTON. Yes, sir. It was brought over to me, as I remember now, by an officer courier from the Navy.

General RUSSELL. Do you know from what source the Navy discovered this information?

Colonel BRATTON. They had intercepted the Japanese message, General, and deciphered it themselves.

General RUSSELL. This was a naval intercept?

Colonel BRATTON. Sir?

General RUSSELL. This was a naval intercept?

Colonel BRATTON. Yes, sir; it was a naval—I don't know who intercepted it, but it was a naval translation. For your information, sir, the Army and the Navy divided this material. There was so much of it that in order to process it and get it out where it could be used the Navy took certain parts of it and the Army took certain parts of it, and the results were interchanged so that we both had all the material all the time.

General RUSSELL. But this message reached you between eight-thirty and nine o'clock on the morning of December 7, 1941, Washington time, and at that time it had been deciphered and translated?

[76] Colonel BRATTON. Yes, sir.

General RUSSELL. And was in plain English?

Colonel BRATTON. It was in English when I received it, sir.

General RUSSELL. Yes. Now let us consider the long memorandum which you stated a moment ago that you placed on the Chief of Staff's desk that morning. From what source did you get the long memorandum?

Colonel BRATTON. I believe it was a naval translation also, sir.

General RUSSELL. Do you recall whether or not the Navy asked the Army to help in the deciphering and translation of either one of these two messages?

Colonel BRATTON. It might be that we helped each other on the translation of the long one, because it was in fourteen parts and covered some ten pages, sir.

General RUSSELL. Do you recall what time you placed the short message on the desk of the Chief of Staff?

Colonel BRATTON. The short one, sir?

General RUSSELL. Yes.

Colonel BRATTON. I handed it to him in person, sir.

General RUSSELL. About what time?

Colonel BRATTON. May I refer to some notes that I made at the time, sir?

General RUSSELL. Yes.

Colonel BRATTON. I would like to answer that in some detail if I may, sir.

General RUSSELL. All right.

Colonel BRATTON. The message in question was delivered [77] to me from the Navy some time between 0830 and 0900 that morning. It was immediately apparent that it was of such importance that it ought to be communicated to the Chief of Staff, the A. C. of S. G-2, and the Chief of WPD with the least practicable delay. Neither of these officers were in their offices at that time.

I called General Marshall's quarters by telephone and was informed that he had gone horseback riding. I requested his orderly to go out and find him at once and ask him to call me on the telephone as soon as practicable, as I had an important message to deliver to him. I then called General Miles and reported to him the step that I had taken, and recommended that he come down to the office at once. I do not remember whether I called General Gerow or whether General Miles called him, but we had some discussion as to which one of us would do it, and I don't remember now which one of us did, but in any event General Gerow was summoned to his office.

I waited for the telephone call from General Marshall, which I received sometime between ten and eleven. I informed him that I had a message of extreme importance which he should see at once, and told him that I would bring it to his quarters if he so desired. He said to report to him in his office, as he was on his way there. I reported to him in his office at about 11:25, immediately upon his arrival. Shortly thereafter General Miles arrived. The message was laid before General Marshall and discussed. We were all asked by the Chief of Staff for an expression of opinion as to the meaning or significance of the message in connection with the lengthy Japanese ultimatum which the Chief of Staff had on his desk [78] and read aloud to us at this time.

General Miles and I stated that we believed there was important significance in the time of the delivery of the reply, one p. m., an indication that some military action would be undertaken by the Japanese at that time. We thought it probable that the Japanese line of action would be into Thailand but that it might be into any one or more of a number of other areas. General Miles urged that the Philippines, Hawaii, Panama, and the West Coast be informed immediately that the Japanese reply would be delivered at one o'clock that afternoon, Washington time, and that they, the Commanders in the areas indicated, should be on the alert.

General Marshall then called Admiral Stark on the telephone and told him over the phone that he thought we should send out a warning, as indicated above. After Admiral Stark replied, General Marshall put down the telephone and stated that the Admiral did not think any further warning necessary since all the forces had already been several

times alerted. General Miles and I nevertheless urged General Marshall to send the warnings. General Marshall then wrote out in pencil the warning message. There was some discussion at this time, I believe, as to whether or not the Philippines should be included.

General Marshall again got Admiral Stark on the telephone and read to him the message he had just written out. Admiral Stark apparently concurred and asked that the naval forces be also informed. General Marshall added a request to that effect at the bottom of his penciled warning.

At about this time General Gerow and Colonel Bundy [79] arrived. General Marshall again asked us in succession, beginning with General Miles, our opinion as to the significance of the Japanese message. General Miles said he thought it probably meant an attack on Thailand but that the timing had some significance, and that warning messages to our people should be sent. General Gerow, Colonel Bundy, and I concurred.

General Marshall then gave me the message in his handwriting and instructed me to take it immediately to the message center for transmittal. As I was about to go out of the door there was some discussion as to whether it should go to General Gerow's office for typing first, but it was decided that as time was an important factor I was to take it in its draft form to the message center. As I left the room General Gerow made a statement to the effect that, if there was any question of priority involved, to give first priority to the Philippines.

I took the message to Colonel French, Signal Corps officer in charge of the message center, explained to him that it was General Marshall's desire that the message be transmitted to the addressees by the fastest possible safe means, giving the Philippines first priority. Colonel French said that he would give it his personal attention and processing of the message would commence immediately.

I then returned to the office of the Chief of Staff. The latter directed me to find out how long it would take for the delivery of the message to the addressees. I returned to the message center and talked the matter over with Colonel [80] French, who informed me that the message would be encoded in about three minutes, on the air in about eight minutes, and in the hands of the addressees in about thirty minutes. I looked at my watch at this time and saw that it was 11:50 a. m. I returned to the Chief of Staff's office and reported to him the information as to speed of delivery that had been given me by Colonel French.

General RUSSELL. When was the the memorandum prepared from which you are just reading, Colonel?

Colonel BRATTON. On or about the 10th of December, 1941, I would say, sir. It was prepared by General Miles, with my assistance, as a memorandum for the record, of what happened.

General FRANK. Did you say with your assistance or assistant?

Colonel BRATTON. Assistance, t-a-n-c-e. He asked me to go over it with him and make such corrections as were necessary, so that it would be a memorandum for the record, of our recollection of what took place in General Marshall's office that morning.

General RUSSELL. Where has that memorandum from which you have just read been since the date of its preparation, Colonel?

Colonel BRATTON. I may say, sir, that what I have just read is an extract of testimony given by me before an investigation being conducted in G-2 by Colonel Clarke, who allowed me to read into the record the statement that I have made from the memorandum that I have referred to. The memorandum referred to—a copy has, to the best of my knowledge [81] and belief, been in the possession of General Sherman Miles and a carbon copy in my possession since then.

General RUSSELL. Has the memorandum been in the files of G-2 of the War Department as well as in the possession of General Miles and of yourself?

Colonel BRATTON. Yes, sir, to the best of my knowledge and belief. It was made primarily to leave in the files of G-2 for the record.

General RUSSELL. Now, Colonel Clarke directed this hearing on or about the 10th day of December, or this investigation, as it might be called; is that true?

Colonel BRATTON. I don't know, sir. I appeared as a witness before his investigation first on the 14th of December and on several—

General FUNK. What year?

Colonel BRATTON. Sir?

General FRANK. The 14th of December what year?

Colonel BRATTON. This year.

General FRANK. Oh.

Colonel BRATTON. Of 1944, and I have been questioned by Colonel Clarke and his assistant, Colonel Gibson, several times since that date.

Colonel TOULMIN. Do you mean of this year? December of this year?

Colonel BRATTON. Yes, sir.

General RUSSELL. I think I have got the story. Is it true, or not, Colonel, that in 1941—

General FRANK. Wait a minute.

Colonel TOULMIN. Let us get this thing straight.

[82] General FRANK. Let us get this straight.

Colonel BRATTON. You are familiar with the investigation being conducted by G-2, are you not?

General FRANK. No.

Colonel BRATTON. Oh, you must be, sir. Colonel Clarke has communicated with you a number of times, I am sure.

Will you please read my original answer?

The Reporter (reading):

"I don't know, sir. I appeared as a witness before his investigation first on the 14th of December and on several—"

Colonel BRATTON. That should be the 14th of September.

General RUSSELL. Now, Colonel, I think we can straighten this out. Our dates have just gone a little awry here.

Now, on or about the 10th day of December, 1941, you and General Miles, acting together, prepared a memorandum, and you kept a carbon copy of it, and General Miles took a copy, and a copy you think was left in the records of G-2 of the War Department?

Colonel BRATTON. Yes, sir.

General RUSSELL. That was about three or four days after the attack on Pearl Harbor?

Colonel BRATTON. Yes, sir.

General RUSSELL. Now, the language which you have just read into the record a minute ago was extracted from that original December 10, 1941, memorandum; that is true, is it?

Colonel BRATTON. Yes, sir.

General RUSSELL. The initial memorandum setting forth what occurred on the morning of December 7, 1941, was prepared about [83] the 10th of December, 1941?

Colonel BRATTON. Yes, sir.

General RUSSELL. By you and General Miles. Recently you were called by Colonel Clarke, who is conducting an independent investigation?

Colonel BRATTON. Yes, sir.

General RUSSELL. And in reply to questions by Colonel Clarke you read the extract from the December 10, 1941, memorandum into the Clarke record?

Colonel BRATTON. That is correct, sir.

General RUSSELL. And this morning you have read from the Clarke record, but it contains the language of the December 10, 1941, memorandum?

Colonel BRATTON. That is correct, sir.

General RUSSELL. All right.

Now is anyone helping Colonel Clarke with his investigation, or is he just making it alone?

Colonel BRATTON. Yes, sir. He has a Lieutenant Colonel Gibson of the M. I. S. assisting him.

General RUSSELL. Now, Colonel, on the morning of December 7 when you received the short message that we are discussing now, did you have the long message in completed form at that time, which was about 8:30 a. m.?

Colonel BRATTON. I had had the bulk of it since the evening before, sir. It came in fourteen parts, I believe. Thirteen of those parts were received the afternoon and evening of the 6th and were delivered by me to the office of the Chief of Staff, the A. C. of S. G-2, the office of the Secretary of State. The last part didn't come in, as I [84] remember, until very late at night or very early in the morning of the 7th, and it was delivered at that time to those same agencies.

General RUSSELL. Do you remember the hour that the latter part of that long message was delivered to the agencies?

Colonel BRATTON. No, sir, I do not.

General RUSSELL. And you have no record from which you could tell that?

Colonel BRATTON. No, sir.

General RUSSELL. Colonel, the thing that caused your agitation and provoked activity was this message which reached you about 8:30 on Sunday morning?

Colonel BRATTON. Yes, sir.

General RUSSELL. After receiving this message, which I believe you testified came to you deciphered and translated and in English, you immediately began your effort to locate the Chief of Staff of the Army?

Colonel BRATTON. Yes, sir.

General RUSSELL. And you finally were in touch with him some three hours later, at 11:25, in his office?

Colonel BRATTON. Yes, sir.

General RUSSELL. When did you initiate your efforts to get in touch with the G-2 about this message?

Colonel BRATTON. Immediately after telephoning to find out where General Marshall was.

General RUSSELL. Well, when did G-2 get to the office that morning?

Colonel BRATTON. My recollection is, sir, that he came [86] in at about the same time General Marshall reached his office. I had been waiting in the anteroom or in the hall so I could catch them the minute they got there, and my recollection is that General Miles came in right on the heels of General Marshall, and I followed them both to the latter's office.

General RUSSELL. Now, so far as I am concerned, I have about exhausted what I wanted on December 7th.

General FRANK. When you gave this short message to General Marshall was it all by itself?

Colonel BRATTON. To the best of my recollection now, it was. He had on his desk all fourteen parts of the long Japanese reply.

General FRANK. But the only thing that you brought in at the time that you first saw him was this short message about something happening at one o'clock?

Colonel BRATTON. I think so, yes, sir.

Colonel TOULMIN. Colonel, we will clear up one matter. As I got your testimony, you said that at 8:30 in the morning of December 7th, here in Washington, you first received this message; is that correct?

Colonel BRATTON. Between 8:30 and 9, yes.

Colonel TOULMIN. And what was the exact time, if you recall, when you first called General Marshall's quarters, in your first endeavor to reach him?

Colonel BRATTON. It was at about 9 a. m., sir.

Colonel TOULMIN. That is all.

General RUSSELL. That is all.

General GRUNERT. Any other questions?

[86] General RUSSELL. I will ask you very hurriedly, Colonel, about some messages that are represented to have been sent to the War Department from naval sources, to the effect that:

(Messages alleged to have been sent to the War Department from Naval sources are as follows:)

On the 24th of November we learned that November 29, 1941, Tokyo time, was definitely the governing date for offensive military operations of some nature. We interpreted this to mean that large-scale movements for the conquest of Southeast Asia and the Southwest Pacific would begin on that date, because, at that time, Hawaii was out of our minds.

Do you know anything about the Navy telling you that we were to go to war or that large-scale offensives would be begun by the Japanese on the 29th of November?

Colonel BRATTON. You said 24th, didn't you, sir (indicating)?

General RUSSELL. On the 24th they were told that the 29th was the definite date.

May I ask you this, Colonel, in order to facilitate the examination: Do you have any independent recollection of it, or would you have to refer to the document which you have with you?

Colonel BRATTON. I would have to refer to the documents I have with me, sir.

General RUSSELL. Well, suppose we then just confine ourselves to what we can recall, and we shall attempt to have [87] the document placed in evidence.

On November 26 we received specific evidence of Japan's intention to wage an offensive war against both Britain and the United States.

Independently of records, do you know whether or not such a message as that was received by the War Department from the Navy Department?

Colonel BRATTON. Yes, sir. On page 34 of this Summary of Far Eastern Documents you will find under "G-2 153" this statement:

(Excerpt from "Summary of Far Eastern Documents," page 34, is as follows:)

G-2 advised the Chief of Staff on 26 November that O. N. I. reported a concentration of units of the Japanese fleet at an unknown point after moving from Japanese home waters southward towards Formosa and that air and submarine activity was intensified in the Marshall Islands.

General RUSSELL (reading):

On December 1st we had definite information from three independent sources that Japan was going to attack Britain and the United States, and, from two of them, that Japan would maintain peace with Russia.

Do you know anything about that message?

General GRUNERT. That is continuing quotation from the document.

General RUSSELL. Yes, sir.

General GRUNERT. Let the record show that that is continuing quotations from the document.

[88] General RUSSELL. Yes. I will identify the questions. That is the December 1st message, Colonel.

Colonel BRATTON. I have nothing on the 1st of December, General. My only record as of about that time is on page 35 of this Summary of Far Eastern Documents:

(Excerpt from "Summary of Far Eastern Documents," page 35, is as follows:)

FE 360 The Singapore military observer advised G-2 on 2 December that the alert in Malaya had been advanced from the third to the second degree on the previous day. Japanese reconnaissance activities over Malaya were reported.

General RUSSELL. Colonel, I am asking you now about messages which Navy Intelligence has stated that they delivered to the War Department. But this did not come from Naval Intelligence?

Colonel BRATTON. No, sir. I don't remember any message of that nature being delivered to the War Department by the Navy on that day.

General RUSSELL. We have discussed the December 4th message which we have referred to as the "Wind" message.

December 6th message, and this is coming from the record, as suggested by General Grunert, which we have referred to earlier:

We received positive information that Japan would declare war against the United States, at a time to be specified thereafter.

That was 9 o'clock Saturday morning, the War Department is supposed to have gotten that information from the Navy. [89] Do you have any report of a December 6th message that Japan was going to declare war on the United States, at a time later to be determined?

Colonel BRATTON. No, sir. And I think the message that you have just referred to must be the "Winds" code message that the Navy admits that they received on or about the 6th of December.

General RUSSELL. But they did not send it to you?

Colonel BRATTON. Did not send it to me.

General RUSSELL. The record from which we have been reading to you, Colonel, states that:

Finally, at 10:15 a. m. (Washington time) December 7, '41, we received positive information from the Signal Intelligence Service (War Department) that the Japanese declaration of war would be presented to the Secretary of State at one p. m. (Washington time) that date.

Now, we have gotten into a conflict.

Colonel BRATTON. Well, this is a faulty memory on the part of whoever made that statement. The record shows something entirely different, sir.

General GRUNERT. That is what I want to get at.

Colonel BRATTON. The record shows clearly that the message was received during the night of the 6th-7th of December and translated in the Navy, and we were given a copy of the naval translation. You can get the original document on that, sir.

General RUSSELL. Where from?

[90] Colonel BRATTON. From G-2.

General RUSSELL. It is not in the Summary of Far Eastern Documents which you have with you and to which you have referred previously?

Colonel BRATTON. No, sir.

General FRANK. Since this document entitled "Summary of Far Eastern Documents," which is a part of the files of G-2 of the War Department, contains so much essential information of the situation in the Pacific in 1941, it is highly desirable that this document be made in its entirety available to this Board. It is requested, therefore, that upon your return to the War Department you request G-2 to furnish the Board with a copy of this.

Colonel BRATTON. Yes, sir. And to further identify this document I would like to make a statement for the record as to how it came into being: It was prepared in G-2 as the result of a request made upon the Chief of Staff by the President on July 14, 1943, in which the former requested copies of the dispatches of our military attaches which estimate or express any opinion regarding the probability or improbability of an outbreak of war or which refer in any way to the estimates of potential military strength of any of the countries involved. The countries which concerned the President were Germany, Japan, Italy, Bulgaria, Austria, Occupied France, Belgium, England, and Russia. He indicated his interest in dispatches from January 1, 1937, until such time as our military attaches left the first seven named countries. His interest in similar dispatches from England dated from January 1, 1937, to the [91] outbreak of the war in September 1939, and his interest in dispatches bearing on this subject from Russia dated from January 1, 1937, until the present time, that is, the time of his letter of July 14, 1943.

This letter of the President was transmitted to me by the then A. C. of S. G-2, General Strong, who instructed me to start work on a compilation of the desired documents. I was at that time the Chief of

the Intelligence Branch, M. I. S., G-2. I detailed Colonel McGuire to exercise general supervision over the assembly of European documents, and Colonel Pettigrew over the Far Eastern documents.

As stated in the explanatory note which you will find on page 1 of the Summary of Far Eastern Documents, the yearly summaries which follow on successive pages are based on information contained in intelligence documents consisting of reports, memoranda, estimates, et cetera. The summary itself was written in a chronologically arranged narrative form, supported by photostats of the original documents in the files of G-2. It was arranged in this way to facilitate the use of the document by historical researchers. The European summaries were similarly compiled and supported by photostats of the original documents. All summaries were transmitted to the Chief of Staff by a covering memorandum signed by the A. C. of S. G-2, General Strong, 20 August 1943. With the covering memorandum was transmitted a memorandum for the President, subject: Axis War Potential, for the signature of the Chief of Staff, which read as follows—

General FRANK. Is this the original document?

Colonel BRATTON. This is a carbon copy of the original [92] document.

General FRANK. Yes. How many pages are in it?

Colonel BRATTON. 37 pages, and it is supported by 15 volumes of photostats.

General GRUNERT. The Board desires that the witness, in transmitting the Board's request to G-2 for a copy of that document, inform G-2 that that document will be considered as top secret before the Board.

Colonel BRATTON. Yes, sir.

General GRUNERT. In other words, it will be considered and so handled as is your testimony.

Colonel BRATTON. Yes, sir.

General GRUNERT. Are there any other questions? Can you think of anything else you want to develop with him?

Colonel TOULMIN. Here is this message, if you want to ask questions about that.

Major CLAUSEN. The Mori message.

General RUSSELL. Colonel, I hand you a transcript of a telephone message and ask that you read it as a basis for a question or two I wish to ask. I will tell you before you read it that it is supposed or it comes to us as having been intercepted by agencies in Hawaii, and it purports to be a telephone conversation between a Dr. Mori, or someone representing him, in Honolulu, and a Japanese official in the homeland of the Empire.

Major CLAUSEN. Do you wish to identify the document by exhibit number, sir?

General RUSSELL. It is our exhibit, sir, whatever it is there in the corner (indicating): Exhibit No. 21.

[93] Colonel, have you just read the exhibit which I handed you a moment ago?

Colonel BRATTON. Yes, sir.

General RUSSELL. There are references in there to flowers and some other things. Do any of the terms of this telephone message indicate to you that they might have been code words that were at that time

being used by the Japanese Government on their telephonic conversations?

Colonel BRATTON. Not at this late date, sir. I would have to study the message in conjunction with the code itself. I may say that the code, that telephone code, is on file in G-2, and I am sure you can obtain it from them.

General FRANK. Is it a fact that there is on file in G-2 in the War Department a code that was used by the Japanese in telephone conversations?

Colonel BRATTON. Yes, sir, and the same should be on file in O. N. I. and in the S. I. S. of the Signal Corps.

General FRANK. Did this code apply to the period just prior to the Pearl Harbor incident?

Colonel BRATTON. Yes, sir.

General RUSSELL. I have no further questions.

General GRUNERT. Do you know whether or not General Miles is fully acquainted with just what you have been testifying about, the general trend, and the information that you have given us?

Colonel BRATTON. Yes, sir. General Miles was given copies of every intercept that I gave to the Chief of Staff or to the Chief of the War Plans Division or to the Secretary of State.

[94] General GRUNERT. Are there any other questions?

General FRANK. Yes.

When this message from the Navy was sent over to G-2, what was the channel through which it was communicated?

Colonel BRATTON. Which one, sir?

General FRANK. The "Winds" message, for instance.

Colonel BRATTON. I don't recall ever having gotten a "Winds" message from the Navy. You mean the message giving the Wind code?

General FRANK. Yes.

Colonel BRATTON. Or implementing the code?

General FRANK. Well, any information coming from naval sources: how did it get to you? Did it come direct to you from the Navy, or did it come through the Signal Corps?

Colonel BRATTON. That varied, sir. Sometimes, when the message was considered of sufficient importance, it was brought straight to me. Normally they channeled it through the S. I. S., who assembled them all and brought them to me in a large manila envelope, by an officer courier.

General FRANK. And "S. I. S." stands for?

Colonel BRATTON. Signal Intelligence Service, I believe.

General FRANK. Were those messages filtered in any way down in S. I. S.?

Colonel BRATTON. No, sir. They were filtered by me.

General RUSSELL. On occasions a courier would come to you directly from the Naval Department, as did occur on the morning of Sunday, December 7, with the short message about which we have talked? That was a channel of communication between the Navy and you?

[95] Colonel BRATTON. I believe so, sir.

General FRANK. All right.

General GRUNERT. Is there anything else that you think of that you might want to tell the Board for its consideration of these subjects?

Colonel BRATTON. No, sir.

General RUSSELL. How long are you going to be here, Colonel?

Colonel BRATTON. I don't know, sir. I was told General Marshall had left instructions that I was to remain here in Washington until this was over. I don't know what he means by "this."

General GRUNERT. The Board hopes that the invitation for you to tell us anything that you might have in mind will bear more fruit than it has for other witnesses.

So you think of nothing else that you think the Board should have?

Colonel BRATTON. I would like to make a statement with respect to this document (indicating) if I may, sir.

Colonel TOULMIN. Identify what you mean by "this document."

Colonel BRATTON. The document previously identified as the Summary of Far Eastern Documents.

The allegation has been made, in the press and elsewhere, in connection with the disaster at Pearl Harbor, that if G-2 had been on the job we would not have been caught so unprepared for our war with Japan. In point of fact, G-2 in general, and the Far Eastern section in particular, were very much on the job, as evidenced by the written record of [96] estimates, staff studies, memoranda, et cetera, with which G-2 served the Chief of Staff, the A. C. of S. G-2, W. P. D., O. N. I., the State Department, and other planning and policy-making agencies of the Government, to warn them of the increasing menace of the Japanese war potential and Japan's intentions.

G-2 can stand on this record and has no defense to make. I feel, however, that a part of this record as presented in the document entitled, "Summary of Far Eastern Documents," with its supporting papers, should be taken cognizance of by this investigating committee, if for no other reason than to give a clearer perspective of the events leading up to the attack on Pearl Harbor.

General GRUNERT. In that event we hope that you will use your best endeavors to get G-2 to give us such a copy.

Are there any other questions? (No response.)

If not, thank you very much for coming.

(The witness was excused, with the usual admonition.)

General RUSSELL. I introduce in evidence a memorandum dated September 29, 1944, addressed to Lt. General George Grunert, President, Army Pearl Harbor Board, from James Lawrence Fly, Chairman, Federal Communications Commission.

I introduce in evidence, also, memorandum dated September 30, 1944, also from Mr. Fly, similarly addressed to General Grunert, with attached papers.

[979] The documents are as follows:

FEDERAL COMMUNICATIONS COMMISSION,
Washington 25, D. C., Sep 29 1944.

Lt. General GEORGE GRUNERT,
President, Army Pearl Harbor Board,
Room 4743, Munitions Building,
Washington, D. C.

DEAR GENERAL GRUNERT: I am enclosing a memorandum entitled "Communications by wire and radio to and from Japan which were and were not tapped or intercepted by the Federal Communications Commission prior to the Japanese attack on Pearl Harbor on December 7, 1941," which General Russell requested of me several days ago for your Board's information.

Sincerely yours,

/s/ James Lawrence Fly,
JAMES LAWRENCE FLY,
Chairman.

Enclosure.

[98]

MEMORANDUM

To: Lt. General George Grunert, President Army Pearl Harbor Board.
 From: James Lawrence Fly, Chairman Federal Communications Commission.
 Re: Communications by wire and radio to and from Japan which were and were not tapped or intercepted by the Federal Communications Commission prior to the Japanese attack on Pearl Harbor on December 7, 1941.

1. *Communications over point-to-point circuits between the United States (including Hawaii) and Japan.*—Normal communication routes between the United States (including Hawaii) and Japan in operation on December 7, 1941 prior to the Japanese attack on Pearl Harbor are shown on the attached map. The routes shown are limited to the most direct circuits. Such possible indirect routes for communicating between United States and Japan as via London are not shown.

The United States was at peace with Japan prior to the attack on Pearl Harbor on December 7, 1941, and the Communications Act of 1934, under which the Federal Communications Commission was organized and from which it derives its powers, prohibited the tapping of wires or other interception of messages transmitted between points in the United States, including its territories, and a foreign country (Section 605). Since that prohibition upon the Commission had not been in any way superseded, the [99] Commission did not intercept any messages over the radiotelegraph, cable telegraph or radiotelephone circuits between the United States (including Hawaii) and Japan prior to December 7, 1941.

2. *Communications over point to point circuits between Japan and other foreign countries.*—The prohibition of the Communications Act against the interception of communications does not include communications transmitted between two foreign countries. Accordingly, the Commission has intercepted messages both before and after December 7, 1941 over foreign radio circuits including those between Japan and some other foreign country. The Commission, however, has no use itself for such intercepted messages in the discharge of its duties, except for purposes of identifying the traffic. Other government departments have had an interest in copies of such traffic, and the Commission has cooperated with them both in bringing to their attention any unidentified or suspicious traffic which the Commission's monitors detected in the course of their monitoring of the spectrum in order that such agencies might take appropriate action, and in making intercepts of traffic over foreign circuits which they requested.

"No request of the Commission by any government agency for traffic between Japan and any other country was outstanding on December 7, 1941 or immediately prior thereto. In February 1941, [100] however, Commission monitors detected the transmissions of two stations employing the calls WER and NVB, both of which were within the block of calls assigned to the United States by international agreement. Commission long range direction finding bearings indicated that WER was in Germany and NVB in Japan. It was subsequently established that these stations were in the Japanese military attaché circuit between Japan and Germany. Promptly after detection of this circuit, the Federal Bureau of Investigation was notified of its existence, and copies of intercepted traffic were furnished to it until October 3, 1941 when the Commission was informed that further intercepts were not desired by the Bureau. The Commission also notified the War Department of the existence of this circuit, but was advised that monitoring by the Commission was not necessary for War Department purposes.

3. *Broadcasts originating in Japan.*—The receipt, publication and use of the contents of radio broadcasts are excluded from the prohibition in the Communications Act against the interception of communications, referred to above. Following arrangements with other government departments in early 1941, the Commission was delegated the task of intercepting and reporting foreign broadcasts audible in the United States to various government agencies which had use for them. From April 1941 on, [101] the Commission's monitoring station at Portland, Oregon, intercepted an increasing volume of shortwave broadcasts from Japan in English, Japanese and other languages beamed to North America, Hawaii, Asia, Europe and elsewhere. These broadcasts were translated and reported, either in summary or verbatim form, to the War, Navy and State Departments and other government agencies, at first by occasional reports and beginning in September, 1941 by a daily report.

4. *Special weather broadcast from Japan.*—One particular intercept activity carried on by the Commission consisted of monitoring Japanese shortwave broadcasts for a special weather message from November 28, 1941 through the

time of the attack. The request by the War Department and the messages intercepted and relayed to the War or Navy Departments by the Commission are set forth in a certificate by the Secretary of the Commission dated August 18, 1944 transmitted by my letter of August 22, 1944 to Lt. Commander Powers, Judge Advocate's Office, Navy Department.

September 29, 1944.

/s/ James Lawrence Fly,
JAMES LAWRENCE FLY, *Chairman,*
Federal Communications Commission.

[102]

FEDERAL COMMUNICATIONS COMMISSION,
Washington 25, D. C., Sep 30, 1944.

Lt. General GEORGE GRUNERT

President, Army Pearl Harbor Board
Room 4743, Munitions Building
Washington, D. C.

DEAR GENERAL GRUNERT: I am enclosing a certified copy of the certificate referred to in paragraph 4 of my memorandum of September 29, 1944, to you, which General Russell has requested.

Sincerely yours,

/s/ James Lawrence Fly,
JAMES LAWRENCE FLY,
Chairman.

Enclosure

UNITED STATES OF AMERICA,
FEDERAL COMMUNICATIONS COMMISSION,
Washington, D. C., September 30, 1944.

I hereby certify that the attached is a true copy of the certificate of the Commission consisting of five sheets dated August 18, 1944, transmitted with covering letter dated August 22, 1944 of James Lawrence Fly, Chairman, Federal Communications Commission, to Lt. Commander Robert Powers, Judge Advocate's Office, Navy Department, and referred to [103] paragraph 4 of a memorandum dated September 29, 1944 from James Lawrence Fly, Chairman, Federal Communications Commission to Lt. General George Grunert, President of Army Pearl Harbor Board.

In witness whereof, I have hereunto set my hand, and caused the seal of the Federal Communications Commission to be affixed, this 30th day of September, 1944.

(SEAL)

/s/ T. J. Slowie,
T. J. SLOWIE,
Secretary.

UNITED STATES OF AMERICA,
FEDERAL COMMUNICATIONS COMMISSION,
Washington, D. C., August 18, 1944.

I hereby certify that the attached are true copies of documents described as follows:

Document No. 1 is a true copy of the weather messages which Major Wesley T. Guest (now Colonel), U. S. Army Signal Corps, requested the Commission's monitors to be on the lookout for in Tokyo broadcasts and to advise Colonel Bratton, Army Military Intelligence, if any such message was intercepted. This request was made on November 28, 1941 at approximately 2140 GMT.

Document No. 2 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at approximately 2200 GMT, December 4, 1941, which at 9:05 p. m. EST, December 4, [104] 1941, having been unable to contact Colonel Bratton's office, was telephoned to Lieutenant Brotherhood, 20-G, Watch Officer, Navy Department, who stated that he was authorized to accept messages of interest to Colonel Bratton's office.

Document No. 3 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors, at 2130 GMT, December 5,

2358 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1941, which was telephoned to Colonel Bratton at his residence at 7:50 p. m. EST, December 5, 1941.

Document No. 4 is a true copy of two weather messages intercepted by Commission monitors from Tokyo stations JLG 4 and JZJ between 0002 and 0035 GMT, December 8, 1941, and telephoned to Lt. Colonel C. C. Dusenbury, U. S. Army Service Corps, at the request of Colonel Bratton's office at approximately 8 p. m. EST, December 7, 1941. Document No. 4 also contains the Romaji version of these messages.

on file in this Commission, and that I am the proper custodian of the same.

IN WITNESS WHEREOF, I have hereunto set my hand, and caused the seal of the Federal Communications Commission to be affixed, this twenty-first day of August, 1944.

The seal of the Federal Communications Commission.

(Signed) T. J. Slowie,
T. J. SLOWIE,
Secretary.

[105]

DOCUMENT No. 1

Group one is east wind rain

Group two is north wind cloudy and

Group three is west wind clear stop

Groups repeated twice in middle and at end of broadcast

The above are the weather messages Major Wesley T. Guest requested the Commission to monitor on November 28, 1941

DOCUMENT No. 2

Tokyo today north wind slightly stronger may become cloudy tonight tomorrow slightly cloudy and fine weather

Kanagawa prefecture today north wind cloudy from afternoon more clouds

Chiba prefecture today north wind clear may become slightly cloudy ocean surface calm

Weather message from Tokyo station JVV3 transmitted at approximately 2200 GMT, December 4, 1941.

[106]

DOCUMENT No. 3

Today north wind morning cloudy afternoon clear begin cloudy evening. Tomorrow north wind and later from south. (repeated 3 times)

Weather message from Tokyo station JVV3 transmitted at approximately 2130 GMT December 5, 1941.

DOCUMENT No. 4

[TOP SECRET]**[109] PROCEEDINGS BEFORE THE ARMY PEARL
HARBOR BOARD**

MONDAY, OCTOBER 2, 1944.

**MUNITIONS BUILDING,
Washington, D. C.**

The Board, at 9 a. m., pursuant to recess on Saturday, September 30, 1944, conducted the hearing of witnesses, Lt. Gen. George Grunert, President of the Board, presiding.

Present: Lt. Gen. George Grunert, President, Maj. Gen. Henry D. Russell and Maj. Gen. Walter H. Frank, Members.

Present also: Colonel Charles W. West, Recorder; Major Henry C. Clausen, Assistant Recorder; and Colonel Harry A. Toulmin, Jr., Executive Officer.

General GRUNERT. The Board will come to order.

**TESTIMONY OF CAPTAIN L. F. SAFFORD, UNITED STATES NAVY,
OFFICE OF NAVAL OPERATIONS, NAVY DEPARTMENT, WASH-
INGTON, D. C.**

(The witness was sworn by the Recorder and advised of his rights under Article of War 24.)

Colonel WEST. Captain, will you please state to the Board your name, rank, organization, and station?

Captain SAFFORD. Present station?

Colonel WEST. Present station.

Captain SAFFORD. L. F. Safford, Captain, United States Navy, Office of Naval Operations, Navy Department. [110]

General GRUNERT. Captain, in this particular part of our investigation I shall ask General Russell to lead with the questions, and the other members will interject any that occur to them. This is General Russell here.

General RUSSELL. Captain, what duties were you performing during the calendar year 1941?

Captain SAFFORD. I was head of the Communications Security Division in Naval Operations. The name "Communications Security" was a very short term used to cover communication intelligence as well. We had direction finders and all other organizations and other activities which are comprised under the heading of communication intelligence; also had charge of preparation of codes and ciphers and surveillance over the security of naval communications.

General RUSSELL. Your duties, then, involved familiarity with the information which was obtained by Navy Intelligence and the protection of that information; is that true?

Captain SAFFORD. Yes, sir.

General RUSSELL. As such, would you have been familiar with information which was being received or gotten by Naval Intelligence Service relating to the Japanese Empire, including its interchange of communications with other nations and its instructions to its armed forces?

Captain SAFFORD. I was.

General RUSSELL. Captain, we have had already, I believe, from Commander Rochefort a description of the agencies which have been established to intercept Japanese information, and hence I will omit that from your examination.

[111] General GRUNERT. At this time I might tell the witness that his testimony here will be top secret, that it will be treated as such by the Board, and so there need be no hesitancy on that score.

Captain SAFFORD. Well, thank you, sir. I was a little bit uncertain of that point, and that is the reason I was a little bit ambiguous in my first reply, to cover it without naming it.

General RUSSELL. Captain, the evidence before the Board indicates that there were intercept stations in both the 14th and 16th Naval Districts in the Pacific; that is true, is it not?

Captain SAFFORD. That is correct.

General RUSSELL. During November 1941 did you obtain from the units in the 14th and 16th Naval Districts estimates covering the organization and distribution of the Japanese naval forces?

Captain SAFFORD. I would like to refresh my memory on one point, if I may, to get the exact date.

General RUSSELL. You may.

Captain SAFFORD. Yes, sir. That was on the 26th of November. We received, early in the morning, a message from the Commandant, 14th Naval District, reporting his estimate of the disposition of Japanese naval forces and the belief that carriers were present in the mandated islands. This message was sent for the information of the Commandant 16th Naval District. Later that day—I'd like to check that one point again—about twelve hours later that day we received a message from the Commandant 16th Naval District, which was also sent [112] to the Commander-in-Chief, Pacific Fleet, and Commandant 14th Naval District, disagreeing in part with Com. 14's estimate, particularly with reference to the carriers in the mandated islands.

General GRUNERT. May I put in the record here: the 16th was at Cavite, and the 14th at Honolulu.

Captain SAFFORD. That is correct.

General FRANK. And this date is what?

Captain SAFFORD. It is the 26th of November.

General RUSSELL. Captain, have you a copy of the messages which you received on that date and to which you have just referred?

Captain SAFFORD. I have, before me.

General RUSSELL. From what sources did you obtain the copies of these messages?

Captain SAFFORD. These were copies given to me by Op20G.

General RUSSELL. Now will you interpret that for us?

Captain SAFFORD. Op20G is the communication intelligence section, or communication division, of Naval Operations.

General RUSSELL. Is that the official source from which these messages just referred to came?

Captain SAFFORD. Yes, sir; they were the official custodians.

General RUSSELL. They were the official custodians.

Captain SAFFORD. I gave a receipt for my copy.

General RUSSELL. Would you read those two reports into the record for us, please, Captain?

[113] Captain SAFFORD. Before giving those messages, I would like to give the background for them.

On the 24th of November the Director of Naval Intelligence released a message to the Commander-in-Chief Asiatic Fleet, information to the Commander-in-Chief Pacific Fleet, and 16th Naval District, stating:

Orange naval movements as reported from individual information addressees perhaps have been conflicting because of necessarily fragmentary nature. Since Com 16 intercepts are considered most reliable, suggest other reports carefully evaluated be sent to Com 16 for action, OpNav for information; after combining all incoming reports Com 16 direct dispatches to Opnav info CINCPAC based on all information received, indicating own evaluation and providing best possible continuity. Request CINCAF issue directive as necessary to fulfill general objective.

General FRANK. CINCAF is Commander-in-Chief Asiatic Fleet?

Captain SAFFORD. Commander-in-Chief Asiatic Fleet; yes, sir.

General RUSSELL. Now let us determine whether or not we properly digested the information which you have just read. This was a message which was sent to certain addressees from the Naval Department in Washington?

Captain SAFFORD. Yes, sir.

General RUSSELL. That is true. Now, who were those addressees?

Captain SAFFORD. The full addressees: the action addressee [114] was the Commander-in-Chief Asiatic Fleet. The information addressees as listed were: Commandant 16th Naval District; Naval Attache, Chungking; Assistant Naval Attache, Shanghai; Naval Attache, Tokyo; and Commander-in-Chief Pacific Fleet.

General RUSSELL. Yes. Now, are we correct in interpreting that message, briefly, as meaning that the Naval Department here was somewhat confused in its thinking about what was going on out there, because of conflicts in messages which were reaching it from numerous Pacific sources? Is that true?

Captain SAFFORD. Yes, sir.

General RUSSELL. And then you did say there in that message that you regarded the information coming from the 16th District as being the most reliable, more so than any other?

Captain SAFFORD. Yes, sir.

General RUSSELL. And you cautioned the addressees to be careful about evaluating data before forwarding it to the Navy Department; is that true?

Captain SAFFORD. We went beyond that and told them that anything they had to send to the 16th District for action Navy Department only, information, and Com 16 would evaluate it and send it on with his own interpretation of the evaluation.

General RUSSELL. All right. Now, then, Captain—

Captain SAFFORD. I haven't got to these other two yet, but I thought that ought to come first because it came there logically.

General RUSSELL. I was going to ask you now if you would give us the messages to which we referred in the beginning.

Captain SAFFORD. Yes, sir. The first message was from [115] the Commandant 14th Naval District to Naval Operations, Information Commanders-in-Chief Pacific Fleet and Asiatic Fleet, and Commandant 16th Naval District, and the time group was 260110. This message stated:

For past month Commander Second Fleet has been organizing a task force which comprises following units: second fleet, third fleet including first and second base forces, and first defense division, combined air force, destroyer division three, air squadron seven, submarine squadron five, and possibly units of battleship division three from first fleet. In messages concerning these units South China Fleet and French Indo-China Force have appeared as well as the naval station at Sama, Bako, and Takao, the Third Base Force at Palau, and resident naval officer Palau have also been engaged in extensive communications with Second Fleet Commander. Combined air force has assembled in Takao with indications that some components have moved on to Hainan. Third Fleet units believed to be moving in direction of Takao and Bako. Second Base Force appears transporting equipment of air force to Taiwan. Takao radio said to be traffic for unidentified second fleet unit and submarine division or squadron. Cruiser division seven and destroyer squadron three appear as an advance unit and may be en route South China. There is believed to be strong concentration of submarines [116] and air groups in the Marshalls which comprise air squadron 24, at least one carrier division unit, plus probably one-third of the submarine fleet. Evaluate above to indicate strong force may be preparing to operate in Southeastern Asia while component parts may operate from Palau and Marshalls.

For information, these air squadrons were all flying boats, scouting planes, patrol planes: long-range patrol planes. They were not carrier-based planes, but they did say, "at least one carrier division unit." That is one or more carriers. It is awkwardly expressed. They mean one or more carriers, by that.

General GRUNERT. In those carrier division units they usually had two carriers, did they? That would mean the carrier and the accompanying plane guard?

Captain SAFFORD. What we now call a carrier task force. That would be the carrier and protecting cruisers and some destroyers for plane guards.

General RUSSELL. I think General Grunert's question, in effect, was to inquire as to the number of carriers in a division.

Captain SAFFORD. The number of carriers in a division would vary from two to four.

General RUSSELL. All right.

Captain SAFFORD. That was that one. The other message—

General RUSSELL. That concludes the first message?

Captain SAFFORD. That concludes the first message from Pearl Harbor.

[117] General RUSSELL. Yes.

Captain SAFFORD. Now, the second message, which came from Cavite, was from Commandant 16th Naval District, for action Commander-in-Chief Pacific Fleet, Naval Operations, Commandant 14th Naval District, Commander in Chief Asiatic Fleet, and time group was 261331:—1331 of the 26th. The first group is the date; hour; minutes:

Morning comment Com 14 to 110 of 26th.

That is reference this other one.

Traffic analyses past few days indicate Commander-in-Chief Second directing units of first, second, third fleets and submarine force in a loose knit task force organization that apparently will be divided into two sections. For purposes of clarity, units expected to operate in South China area will be referred to as "First Section" and units expected to operate in Mandates will be referred to "Second Section." Estimated units in First Section are Cruiser Division seven, Air Squadron six, Defense Division one, Destroyer Squadron three, and Submarine Squadron six. Second Section, Cruiser Division five, Carrier Division three, Ryujo, and one Maru, Destroyer Squadrons two and four, Submarine Squadron five, Destroyer Division twenty-three, First Base Force of Third Fleet, Third Base Force at Palau, Fifth Base Force at Saipan, and lesser units unidentified. Cruiser Division six and Battleship Division three may be included in First and Second Sections respectively, but status cannot be [118] clarified yet. Balance Third Fleet units in doubt but may be assumed that these vessels including Destroyer Squadron five will take station in Formosa Straits or further south. There are slight indications today that Destroyer Squadron three, Cruiser Division seven, and Submarine Squadron six are in Takao area. Combined air force units from Empire are at Pakhoi, Hoihow, Saigon, Takao, and other bases on Taiwan and China coast. Cannot confirm supposition that carriers and submarines in force are in Mandates. Our best indications are that all known First and Second Fleet carriers still in Sasebo Kure area. Our lists indicate Commander-in-Chief Combined Fleet in Nagato, Commander-in-Chief First in Hyuga, and Commander-in-Chief Second in Atago, in Kure area, Commander-in-Chief Third in Ashigara and Sasebo area, Commander-in-Chief Fifth in Chichijima area, Commander-in-Chief Sub Force in Kashima and Yokosuka area, but this considered unreliable. South China Fleet appears to have been strengthened by units from Central or North China, probably torpedo boats. Southern expeditionary force apparently being reinforced by one base force unit. Directives to the above task forces, if such, are directed to individual units and not complete groups. Special calls usually precede formation of task force used in area operations. Commander-in-Chief Second, Commander-in-Chief Third, and Commander-in-Chief [119] Southern expeditionary fleet appear to have major roles. Traffic from Navy Minister and Chief of Naval General Staff to Commanders-in-Chief of Fleet appear normal. Evaluation is considered reliable.

And that is the end of this message.

General RUSSELL. Now, Captain, as I have listened to those two messages the distinction between them seems to be in the fact that one stated rather positively that carriers were in the mandated islands, and the other regarded that bit of information as debatable; is that true?

Captain SAFFORD. As more than debatable; as erroneous.

General RUSSELL. As erroneous. So there was a report that carriers were in the Mandate, and a report on the same say that carriers were not in the Mandate?

Captain SAFFORD. That is correct, sir.

General RUSSELL. Yes. Has the consideration of any data reaching the Naval Department subsequent to the 26th day of November 1941 enabled the Naval Department to determine which of those two reports was accurate?

Captain SAFFORD. Yes, sir. There were copies of the daily intelligence bulletin which were furnished—

General RUSSELL. I am afraid you didn't understand the question. Now does the Naval Department think that carriers were in the Mandates at that time or that they were not?

Captain SAFFORD. They were not.

General RUSSELL. Now, when did you get an additional message relating to the Japanese probabilities after these two of November 26, 1941?

[120] Captain SAFFORD. That was the last word that we heard from our advance bases up until the time of the attack.

General RUSSELL. Now, Captain, in order to hurry the examination along, I have before me the testimony which you gave during the investigation conducted by Admiral Hart. I refer to page 358 of that testimony. There is a statement in the testimony:

On November 24, 1941, we learned that November 29, 1941, Tokyo time, was definitely the governing date for offensive military operations of some nature.

Apparently there is no further explanation in this testimony. Now, would you enlighten the Board on just where this information came from, what record exists of such information, and so forth?

Captain SAFFORD. Yes, sir. What date was that?

General RUSSELL. This was the November 24th date where the 29th of November was fixed as the governing date for offensive military action.

Captain SAFFORD. That was from the series of messages, the first of which we received on November 5th, and it may be identified by S. I. S. 24373 (that is the Army identification number) which says:

It is absolutely necessary that all arrangements for the signing of this agreement be completed by the 25th of this month.

And added in parentheses:

Of utmost secrecy.

On November 12th S. I. S. No. 24373 told us:

The United States still not fully aware of the [121] exceedingly criticalness of the situation here. The date set is a definite deadline. The situation is nearing a climax. Time is indeed becoming short.

Those were two messages from Tokyo, incidentally.

On November 22nd, from S. I. S. No. 25138, we learned that Tokyo had informed Ambassador Nomura:

There are reasons beyond your ability to guess why we wanted to settle Japanese-American relations by the 25th, but if the signing can be completed by the 29th—

and he repeated it in words, to make certain of no mistake.

—we have decided to wait until that date. This time we mean it, that the deadline absolutely cannot be changed. After that things are automatically going to happen.

And on November 24th, in S. I. S. 25178, Tokyo stated, referring to the previous message I just quoted from:

The time limit is in Tokyo time.

General RUSSELL. Will you define "S. I. S." for us?

Captain SAFFORD. That is an abbreviation for "Signal Intelligence Service," and that is the number put on these documents which were in the files of the Signal Intelligence Service in the Army, and I think later on they were turned over to G-2 for final custody.

General RUSSELL. The S. I. S., Signal Intelligence Service, was an agency of the Army?

Captain SAFFORD. That was an agency of the Army; yes, sir.

General RUSSELL. How does it come to pass that this [122] information furnished by S. I. S. is in your files?

Captain SAFFORD. The communication intelligence organization of the Navy and the S. I. S. of the Army were working in cooperation on

this matter for over a year. We had divided up interception of Japanese messages to insure that no circuits were left uncovered and that we had a minimum of duplication consistent with adequate coverage. We exchanged the messages between the interested services. Then there was arrangement made on the diplomatic messages that the Army processed them on the even days of the month, and the Navy processed them on the odd days of the month, but both services got copies of the translations and handled their own dissemination of intelligence from that point.

General RUSSELL. Captain, you have been reading to the Board from a record which you have before you. Who prepared that record?

Captain SAFFORD. I prepared that message myself.

General RUSSELL. From what source or sources did you derive the information which you have placed in that record?

Captain SAFFORD. This was prepared by me back in November, December of last year, and about January to March of this year, and this was prepared from original sources. I borrowed the files from Op20G, went through the stuff, and prepared these briefs which have served to prompt my memory on this or anything else that might be coming at the same time. Most of those messages at the bottom had both the S. I. S. number and the Navy's identification number, which is a JD number. So we have those complete.

[123] General RUSSELL. It is true, then, that you had access to the original messages which came to the Navy from S. I. S. when you prepared this memorandum?

Captain SAFFORD. I had access to the original copies which have been distributed for information and then returned to file.

General RUSSELL. The information which you are testifying about this morning and data that you are giving to the Board—you can certify that this is the information in those original files?

Captain SAFFORD. I can certify that this is the information and that it is my interpretation of the brief. I would have to get the meat of maybe a five-page message boiled down to a single sentence.

General RUSSELL. All right. Now, the record from which I was reading a moment ago states that:

On November 26, we received specific evidence of Japan's intention to wage an offensive war against both Britain and the United States.

Now, would you give to the Board the sources of the information upon which that statement was made to Admiral Hart?

Captain SAFFORD. Let me look this over.

General RUSSELL. Have you found it?

Captain SAFFORD. I am sorry I cannot explain that now. I do not have before me the brief that I had before Admiral Hart. I had a longer brief before him, and I to a certain extent pruned this one, at a time that I thought that a great deal of information would not be allowed to come before either the Army Board or the Navy Court of Inquiry. I cannot find [124] anything now that would set anything that specific as November the 26th.

General RUSSELL. Have you any independent recollection of the data upon which you base that statement to Admiral Hart?

Captain SAFFORD. Will you please read me the statement again?

General RUSSELL. The statement is:

On November 26, we received specific evidence of Japan's intention to wage an offensive war against both Britain and the United States.

And, of course, the thing the Board is interested in is, What was that specific evidence?

Captain SAFFORD. On November 26 we received—we had information that Japan was contemplating offensive action against England and the United States and possibly against Russia, though no commitments.

That is contained in S. I. S. No. 25392. That was a message which was sent from Tokyo on November 19, 1941, the day before Tokyo delivered its note of November 20th to Washington, and this said that—I will check that more carefully. That if diplomatic——

General RUSSELL. What are you reading from there?

Captain SAFFORD. I am reading from a dispatch we got two days later, but I have not got a copy of this other with me. I did not bring in any of these original sources with me.

General RUSSELL. All right.

Captain SAFFORD. I can tell you——

General RUSSELL. Now, let us not——

Captain SAFFORD. It said that——

[125] General RUSSELL. What said?

Captain SAFFORD. This message, which is S. I. S. No. 25392, said that Japan would announce her intentions in regard to war or possibly breaking off diplomatic relations with Russia, England including the Netherlands East Indies, and the United States by means of a word sent five times in the middle and at the end of their information broadcast, which is in Morse code; and in a later message they sent the schedule on which this warning would be broadcast; and the specific words were: "East" meant United States; "West" meant England including the Netherlands East Indies; and "North" meant Russia. We had that. The 26th (I think it was seven days old at the time we got it) we were able to work it out.

Two days later——

General RUSSELL. Two days later from what date?

Captain SAFFORD. On November 28th, 1941, we read another message dated November 19, which is S. I. S. 25432—I have that Navy translation, incidentally—giving a "Winds" code to be used in their voice broadcasts; and that said Japan-United States was "East wind rain"; Japan-Russia, "North wind cloudy"; and Japan-British including Netherlands East Indies, "West wind clear."

The voice was longer than what is set up for the Morse.

We also received on the 28th, from the Commander-in-Chief Asiatic Fleet, their message to the Navy Department, information Commander-in-Chief Pacific Fleet, the Commandants 14th and 16th Districts, No. 281430:

Following Tokyo to net. Intercept. Translation received from Singapore. If diplomatic relations are [126] on verge of being severed following words repeated five times at beginning and end of ordinary Tokyo news broadcast will have significance as follows:

Higashi higashi: Japanese-American

Kita kita: Russia

Nishi nishi: England including occupation of Thai or invasion of Malaya and Netherlands East Indies.

On Japanese-language foreign news broadcasts the following sentences, repeated twice in the middle and twice at the end of the broadcasts, will be used:

America: Higashi no kaze komura

England: Nishi no kaze hare

British and Com 16 monitoring above broadcasts.

And that is the end of the message.

Incidentally, there is a mistake in the message, because they apparently left out a whole line in coding, and there is no mention of Russia, and the word set up for America was a combination of what started for "America" and ended up for "Russia"; but that doesn't matter, because we understood that perfectly, already having decoded the messages ourselves and translated them.

In connection with that, on the 3rd of December the Navy Department handled a message from the Naval Attaché of Batavia that was originated by Colonel Thorpe in Batavia and addressed to General Miles in the War Department, and he gave a version of the "Winds" code in a tip-off as given to him by the Dutch authorities, and it was much stronger, and the Dutch translation says their reference is to war, not a question of [127] diplomatic relations becoming critical. That message was from Alusna, Batavia (Naval Attaché in Batavia) 031030.

And on the 4th—

General RUSSELL. Now let us see. 4th of what?

Captain SAFFORD. The 4th of December.

General RUSSELL. When? '41?

Captain SAFFORD. '41. Similar information came from the State Department, having been submitted by Consul General Foote, in Batavia, message No. 220, dated 4 December 1941, to the State Department.

General RUSSELL. Now, Captain, let us summarize what we have just been discussing. The testimony which you have just given us in response to my question about specific evidence on this November 26 message, to this time, relates, as I understand it, almost in its entirety, to the intercept of certain information, which information defined the Japanese code words to be flashed for information as to the relation between the Japanese Empire and the United States, Russia, and the British, with certain other people lined up with the British; is that true?

Captain SAFFORD. That is correct, sir.

General RUSSELL. To this time nothing has been testified as to any implementing message on this code? And by "implementing" I mean: if your record stopped at the point to which you have testified now, there would be nothing in that to indicate what disposition the Japanese Empire had at that time toward the United States, Britain, or Russia?

Captain SAFFORD. Nothing that I have testified.

[128] General RUSSELL. Till this time?

Captain SAFFORD. To this time.

General RUSSELL. Yes. It is true, however, Captain, that the fact that these codes about which you have testified, existed, and the purposes for which they were brought into existence, indicated the possibility, if not the probability, of break in diplomatic relations or the waging of offensive war against one or more of the three powers,

to wit, the United States, the British and her sources, and Russia; is that true?

Captain SAFFORD. That is correct as to any or all of the three named.

General RUSSELL. And that, of course, is particularly true on the subject of the deadline message about which you testified?

Captain SAFFORD. That made the deadline message mean a lot more, and the deadline message made that mean a lot more.

General RUSSELL. Now, am I correct in stating that this information about which you have testified, relating to this code and its possible meaning, all came from S. I. S. or these other sources which you have described?

Captain SAFFORD. Yes, sir; all of it came through S. I. S. or the Naval Communication Intelligence organization.

General RUSSELL. A moment ago when I interrupted you, you were about to read a message.

Captain SAFFORD. Yes, sir.

General RUSSELL. Will you return to that message and read that now, please, sir?

[129] Captain SAFFORD. That is the message from Colonel Thorpe, and this is Naval Attaché Alusna, Batavia (That is just the abbreviation addressee) 031030, addressed to Naval Operations. Message reads:

From Thorpe for Miles, War Department. Code intercept. Japan will notify her Consuls of war decision in her foreign broadcast as weather report at end. East wind rain: United States. North wind cloudy: Russia. West wind clear: England, with attack on Thailand, Malaya, and Dutch East Indies. Will be repeated twice or may use compass directions only. In this case words will be introduced five times in general text.

That is the end of the message. This message combined the information of two messages sent out from Tokyo.

I will see if I have Foote's message there now. Yes, I have Mr. Foote's also, on the 4th, and this is headed: "Batavia," dated December 4, 1941, received 9:19 a. m., Secretary of State, Washington, No. 220, December 4, 10 a. m. The message follows:

War Department at Bandoeng claims intercepted and decoded following from Ministry Foreign Affairs Tokyo: When crisis leading to worst arises, following will be broadcast at end weather reports:

1. East wind rain: war with the United States.
2. North wind cloudy: war with Russia.
3. West wind clear: war with Britain, including attack on Thailand or Malaya and Dutch Indies.

If spoken twice burn codes and secret papers. [130] Same re following: From Japan Ambassador Bangkok to Consul General Batavia: When threat of crises exists, following will be used five times in text of general reports and radio broadcasts:

1. Higashi, east: America.
2. Kita, north: Russia.
3. Nishi, west: Britain, with advance into Thailand and attack on Malaya and Dutch East Indies.

Thorpe and Slawson cabled the above to War Department. I attached little or no importance to it and view it with some suspicion. Such have been common since 1936.

Signed "Foote."

That is the end of the message.

General RUSSELL. Then, it is true that from S. I. S. and from those two messages which you have just read the same information came,

and the S. I. S. information apparently was sent to you or you received it on two or three different occasions there, two or three different reports, as I recall your testimony.

Captain SAFFORD. That is correct, except they were Navy translations, and we gave them to S. I. S.

General RUSSELL. Yes.

Captain SAFFORD. They happened to be Navy translations.

General RUSSELL. Where did they pick them up?

Captain SAFFORD. We intercepted the messages at Bainbridge Island, Washington, near Bremerton, and they were forwarded to Washington by teletype.

General RUSSELL. Whom were those messages from and to [131] whom were they being sent, if you recall?

Captain SAFFORD. They were from the Foreign Office in Tokyo and addressed to Jap Consuls all over the world. These particular ones which we got I think were addressed to America. I am not just certain. I know that message was relayed all over the world.

General RUSSELL. Where are those messages now, Captain, those S. I. S. messages to which you have referred?

Captain SAFFORD. The S. I. S. messages I believe are in the custody of the G-2, General Staff, and the same messages except filed under the Navy number are out at 20G, that communication annex on the corner of Massachusetts Avenue and Nebraska Avenue.

General RUSSELL. In other words, your testimony is now to the effect that, insofar as you know, copies or the originals of these messages which we will describe as the S. I. S. messages are filed both with the Navy and the Army?

Captain SAFFORD. That is correct, sir.

General RUSSELL. Now, in order to keep the record more or less logical, before we deal with the Nomura message to our state, the paper of November 26, I am going to ask you to tell us about the follow-up on this code about which you have been talking, whether or not on or about December 4th you did receive information which indicated that the Japanese Empire had employed this code and the intercepted messages indicated final decisions affecting the United States, Russia, Britain; one or more of these powers.

Captain SAFFORD. Yes, sir, we did. That was received in the morning of Thursday, December 4, 1941. It was received [132] about 8 o'clock at one of our East Coast intercept stations and sent in to the Navy Department by teletype. I saw it when I first came to the office. I, it seemed, had no more than sat down to my desk when Lieutenant Commander Kramer, who was our senior language officer, and Lieutenant (junior grade) Murray, who was the watch officer from my section, came into my office, and Murray held up a yellow teletype sheet and said, "Here it is," and they put it on the desk for me, and it was a message, oh, I would say of 200 words or so, in Japanese, with this "Winds" code, you might say, contained in it and underscored, and the writing at the bottom in lead pencil in Kramer's handwriting, "War with England, war with America, peace with Russia."

The message as received was not the way we expected it, because they had mixed up their voice procedure with the Morse code message. It was the full thing; it wasn't just the one word; it was the "East wind rain" and all the rest of it. And to further confuse it they

gave a negative form of "North wind cloudy." What it was I don't know, but it didn't look like anything we had sent, and there was some confusion as to what they meant by it; but we knew from other sources that they were definitely not going to attack Russia at that particular time, and that was very clear. And that original message was immediately taken up by the watch officer, Lieutenant (junior grade) Murray, and given to Admiral Noyes, in accord with some special orders which had been issued for the occasion.

General RUSSELL. Where is that original message now, Captain?

[133] Captain SAFFORD. That original message cannot be located and has not been seen since the time it was given to Admiral Noyes, unless it was given to the Roberts Commission and filed with their papers.

General RUSSELL. What record of that message was made in the office with which you were associated at that time?

Captain SAFFORD. Unfortunately, we cannot find any written record of the message. We have looked now for more than six months.

General RUSSELL. What was done in connection with the delivery of that message to the War Department, if anything?

Captain SAFFORD. The duplicate copy from the teletype was taken and translated in normal fashion, and four copies of the translation interpretation made. Two were sent out to the War Department and I presume sent over that morning, because we made two or three delivery trips a day, and we were then in the Navy Department, and the Army unit was in the Munitions Building, so we were very convenient to each other. In fact, we had a special telephone line, a trunk line which did not go through any switchboards; so, anything important, we would pick up the receiver and talk right to the other party, get them immediately, which we used if we couldn't have a special courier or if anything hot came up. And also I know that in the Navy Department that copy was distributed around noon, in connection with the daily routine distribution of translations, and that went to the Chief of Naval Operations, Assistant Chief of Naval Operations, Director of Naval Communications, Director of Naval Intelligence, and the Director of War Plans Division, also went to the State Department and to the White House.

[134] General FRANK. And this was on what date?

Captain SAFFORD. On the 4th of December 1941.

General RUSSELL. Have you helped or been active at all in this search which has been made in the Naval Department to discover this original message.

Captain SAFFORD. I have. As a last resort I requested copies of the message repeatedly from 20G, and on the last occasion I asked the officer in charge, who was Captain Stone, to stir his people up a little harder and see if they couldn't make one more search and discover it. And when Captain Stone discovered it couldn't be found, he called for—required written statements for anybody who might have any notice of that; and though the written statements disclosed a lot of destruction of other messages and things—not messages, but the intercepts; not the translations—nothing ever came to light on that message, either the carbon copy of the original incoming message, which should have been filed with the work sheet, or of the translation. And one copy of the translation should have been filed under the JD num-

ber, which I think is 7001, because that number is missing and unaccounted for, and that falls very close to the proper date. It actually comes in with the 3rd, but things sometime got a little bit out as far as putting those numbers on was concerned. And the other should be filed under the date and with the translation. We had a double file.

The last time I saw that message after the attack on Pearl Harbor about the 15th of December, Admiral Noyes called for the assembling of all important messages into one file, to show as evidence to the Roberts Commission; and Kramer [135] assembled them, and I checked them over for completeness and to see that we strained out the unimportant ones; and that "Winds" translation, the "Winds execute," was included in those. I do not recall whether that ever came back or not. So far as I know, it may even be with the original papers of the Roberts Commission. It never came back that I know of, and we have never seen it since, and that is the last I have seen of it.

We also asked the people in the Army on several occasions if they could run it down and give us a copy. We were trying to find out the exact date of it and the exact wording of the message, to run this thing down and not make the thing a question depending upon my memory or the memory of Kramer or the memory of Murray, who do distinctly recall it.

General FRANK. To what specific office in the War Department was that message delivered; do you know?

Captain SAFFORD. That message and all messages were delivered to the people in the Signal Intelligence Service. It probably went to Major Doud, who was in charge of the Japanese section of the S. I. S. at that time.

General FRANK. It was not transmitted to G-2? It was transmitted to the Signal Intelligence Service?

Captain SAFFORD. Yes, sir; and from them to G-2 and any other distribution they made. They usually gave those to Colonel Bratton, who was the head of their Far Eastern Section. He normally handled the dissemination and distribution himself.

General GRUNERT. This message originated on the East Coast, didn't it? Have they any record of it?

Captain SAFFORD. All of this—

[136] General FRANK. West Coast.

Major CLAUSEN. West Coast.

General GRUNERT. Where did it originate?

Captain SAFFORD. It came from Tokyo, but it was intercepted on an East Coast station.

General GRUNERT. East Coast.

Captain SAFFORD. And all the station logs unfortunately had been destroyed sometime during '43. The ones that had been sent into the Navy Department had all been burned up. Every time they moved in connection with expansion a lot of stuff got burnt.

General GRUNERT. That is S. O. P., is it? Standing Operating Procedure?

Captain SAFFORD. More or less. And the station logs had been retained for some time, but they had all been destroyed within the year. When we started looking for it, the only station logs that remained intact were those from the Bainbridge Island, Washington, station, and we looked through there on the off chance they might have had it, but they didn't.

Colonel TOULMIN. May I ask him a question? Are you through?

General GRUNERT. I have a question here, but you may proceed.

Colonel TOULMIN. Captain, you stated in your last long answer that a copy of this December 4th message, this final message from Japan, was sent to the White House. What proof have you of the fact that it did go to the White House?

Captain SAFFORD. Everything we got from November 4th— [137] I mean, from November 12th on, was sent to the White House.

Colonel TOULMIN. To whom was it sent in the White House?

Captain SAFFORD. It was taken over personally by Commander Kramer and was given by him to the Naval Aide to the President, Admiral Beardall, and Admiral Beardall took it in to the President, and when the President was through with them and returned them he gave them back to Kramer. Sometimes Kramer gave them to Admiral Beardall in the Naval Department; sometimes he took them to the White House.

Colonel TOULMIN. And the copies that were shown to the President came to the White House from the Navy Department?

Captain SAFFORD. Yes. It was the same copy that everybody else saw in the Navy Department.

Colonel TOULMIN. It was circulated copy?

Captain SAFFORD. It was circulated copy.

Colonel TOULMIN. Did the President get it first or did he get it last?

Captain SAFFORD. Normally he got it last.

Colonel TOULMIN. What date would you say that under that procedure he would have gotten the December 4th message?

Captain SAFFORD. On December 4th.

Colonel TOULMIN. Not later than that date?

Captain SAFFORD. Not later than that. There was a regular routine that we went through, including a trip to the downtown post office to pick up the messages, have them photographed, and return, and it was all worked in on that trip. There were several more messages such as that, in addition to the White House, and Commander Kramer went downtown and picked them up on the way back. If he gave [138] them to Admiral Beardall here, why, he took a little bit longer coming back. Sometimes he was late coming back from the White House, didn't come back until late in the evening.

Colonel TOULMIN. Was the Secretary of State, Mr. Hull, on this circulatory list?

Captain SAFFORD. Yes, sir.

- Colonel TOULMIN. But he was shown them by the Army through a special arrangement?

Captain SAFFORD. At one time we had taken a month's duty on it, and that had gotten them into trouble, and all orders were based on that arrangement. Now, from the 12th of November the orders were made by the Navy Department. From then on we would show everything to the President, and then in turn the Army would show everything to Secretary Hull. Colonel Bratton took those in to him, and so again it was a matter of a routine daily delivery of everything.

Colonel TOULMIN. Was the showing of such message by the Army to Secretary Hull coincident with the showing of the message to the President by the Navy?

Captain SAFFORD. Coincident but independent; might be quicker, and might be later.

Colonel TOULMIN. But it would be substantially within the same period?

Captain SAFFORD. But it would be substantially within the same day.

Colonel TOULMIN. That is all.

General GRUNERT. In that connection, I am interested in a statement made by you that indicated to me that at sometime in the not too distance past it was not intended to give the Navy Court of Inquiry and the Army Board certain secret information. Were there any instructions on that subject? [139] And, if so, what instructions lifted that ban?

Captain SAFFORD. It is a rather long story. Admiral Kimmel's counsel or Admiral Kimmel requested the Secretary of the Navy to furnish him a copy of Admiral Hart's report, which was done, and on the basis of that he requested permission for his counsel—I think it was Captain Lavender who actually did it—to inspect all the files out at 20G, communications intelligence files, to see what information had been in existence in the Navy Department. This was done, and Captain Lavender submitted a request for certified translations, photographs of roughly sixty of these messages. They were prepared and turned over to the Director of Naval Communications; and in the meantime, since the Army had an interest in it, somebody in S. I. S. was notified, and they protested; and I can't recall the names, but a Colonel and a Major came over from G-2 to see Admiral Sherman and protested against permitting top secret stuff to be made a part of any official record; and I was called in on the thing. So were Captain Rochefort and Captain Murphy, who was Acting Director of Naval Communications, and all interested parties.

Admiral Sherman said that he would recommend to uphold the objection, and Secretary Forrestal issued an order in writing—or Acting Secretary Forrestal—that this stuff was not to be made available to this inquiry. And I went on leave at that point, and when I came back from leave, or some time, the Secretary—excuse me. I am mixed up. It was Secretary Bard who disapproved it, and when Secretary Forrestal came back from London he reversed the decision and said to make [140] this stuff available, and so it was all introduced as evidence before the Navy Court of Inquiry, these selected sixty-odd messages, before I appeared on the witness stand, but I know all about it because I was called in before Admiral Sherman to give my opinion as to the advisability, and so forth.

Colonel TOULMIN. Was anything further heard from the Army in protest of this decision of Secretary Forrestal?

Captain SAFFORD. Not that I have ever heard.

General FRANK. Who has official custody of these sixty messages at the moment?

Captain SAFFORD. The Recorder of the Navy Court of Inquiry. That is Commander Harold Biesmeier.

General FRANK. If it was the desire of these Boards to get a copy of those sixty messages, to whom should the request be made?

Captain SAFFORD. I would state, to the Secretary of the Navy, in the case of the Army.

Colonel TOULMIN. May I ask him just one question :

In these sixty messages will we find this message of December 4th which you said heretofore was missing, or is it still missing?

Captain SAFFORD. That is still missing.

General RUSSELL. I want to ask a question about that: When it went to 20G it was filed?

Captain SAFFORD. Yes, sir.

General RUSSELL. And now it is out of 20G's files; is that true?

Captain SAFFORD. The original distribution copies were collected for the Roberts Commission, at Admiral Noyes' order, [141] because a great many of them had initials of at least Admiral Ingersoll, who used to very frequently initial something. He was the only one who ever did. I don't know why he did it, what it indicated, but his initial is on them, showing that at least he saw them, and those were the originals that he has. There should have been a duplicate made to take its place. They were trying to turn loose of everything because there were duplicates prepared of everything. That is the only message in the whole file that is missing that couldn't be located.

General RUSSELL. Well, now, let us have JD 7001. Tell us what JD 7001 is.

Captain SAFFORD. Well, the JD was just an arbitrary designation for a file among the S. I. S. files, put on Army copies, and they were all given a serial number for quicker use and identification, so we can refer them to that then and not spill any beans.

General RUSSELL. Well, what I mean now, Captain, is: Was there a file over there in the Navy Department which was called the JD file in which you had papers?

Captain SAFFORD. Yes, sir. That is at 20G too. That file is complete from the very first one, from No. 1 up until the time that the Navy gave this up and turned the whole thing over to the Army sometime in '42.

General RUSSELL. What is the point, then? In 20G you have a 20G file where you put all these messages; and also in 20G you have a JG file where you put duplicates of all these messages; is that right?

[142] Captain SAFFORD. Yes, sir. One set, the original distribution copy—they were all filed by date of origin, and they were the ones that we used for dissemination, that were circulated; and then very often, if a previous message was referred to, that message would be taken out again and appended to the original message, so the higher authority could see exactly what they were talking about, and not have to be talking on our briefs.

General RUSSELL. Well, now, let us talk cases.

Captain SAFFORD. Yes, sir.

General RUSSELL. I want to know if over there in 20G you had a place where you had 20G files of messages, and then over here some other place you had a JD file which was separate and distinct from the one I have just discussed.

Captain SAFFORD. Yes, sir.

General RUSSELL. But you had messages over there in the JD file?

Captain SAFFORD. We had. Yes, sir; that is correct.

General RUSSELL. And they were the same as the ones in the 20G file?

Captain SAFFORD. Yes, sir, but they were in a different order.

General RUSSELL. All right. Now, this message of December 4th, when it went to the JD file, was given the number, according to your testimony, of 7001?

Captain SAFFORD. It probably was.

General RUSSELL. You don't know that?

Captain SAFFORD. Not to know; only circumstantial evidence.

General RUSSELL. Well, in JD 7000 in that file now?

[143] Captain SAFFORD. JD 7000 is there, and 7002.

General RUSSELL. But 7001 just isn't there?

Captain SAFFORD. The whole file for the month of December 1941 is present or accounted for except 7001.

General RUSSELL. Now let us talk about 20G, which is some other place in this office. Is this December 5th message the only one that is out of those files?

Captain SAFFORD. That is the only one that we looked for that we couldn't find. It is possible that there will be others missing which we haven't looked for, but we couldn't find that serial number. We looked all through the month to make certain. That is the only one that is missing or unaccounted for. The Army had a similar system. They filed their paper on a similar idea.

General RUSSELL. A little while ago, in response to questions from Colonel Toulmin about the delivery of copies of this message of December 4th to the White House and to the State Department, your response was to the effect that this was a normal routine procedure on and after November 4, 1941?

Captain SAFFORD. November 12, sir.

General RUSSELL. November 12, '41. Now, you are testifying, Captain, that this particular message of December 4th went over there because of routine, or do you have any knowledge of this particular message as having gone over there?

Captain SAFFORD. I have no particular knowledge of that message having been circulated other than it was the routine to circulate everything. Also, that was included when Kramer collected the messages which had been distributed before; that message was among those present, and that was turned over to [144] Admiral Noyes about the 15th of December, 1941, for the purpose of presenting to the Roberts Commission as evidence.

General RUSSELL. The last time, then, that you have seen the message, you say, the message of December 4th about which you are testifying now, was on or about the 15th of December, 1941, when Admiral Noyes was collecting certain information to deliver to the Roberts Commission?

Captain SAFFORD. That is correct, sir.

General RUSSELL. And did you see this message of December 4th among the messages that had been collected by Admiral Noyes to deliver to the Roberts Commission?

Captain SAFFORD. Yes, sir; that was among those.

Colonel TOULMIN. Where is Kramer now?

Captain SAFFORD. He is in the Pacific somewhere.

Colonel TOULMIN. You don't know?

Captain SAFFORD. I think he is at Honolulu. I am not certain. He was at Noumea.

General RUSSELL. Did anyone other than Commander Kramer deliver these messages to the White House, that you know of?

Captain SAFFORD. During the month of December—from November 12 on, all deliveries to the White House were made by Kramer or by Admiral Beardall—or through Admiral Beardall. I think Kramer saw the President himself on only one or two occasions.

General RUSSELL. Captain, you have no doubt in your mind that that "Wind" message of December 4th contained information as to the disposition of the Japanese Empire toward the American Government?

[145] Captain SAFFORD. I am absolutely convinced now, and I was at the time.

General RUSSELL. Yes, sir.

Captain SAFFORD. This isn't second guessing at all.

General RUSSELL. In your testimony before Admiral Hart, which I will show you, you gave the Japanese expressions which apparently were those in that message of December 4; is that right?

Captain SAFFORD. Yes, sir.

General RUSSELL. Reference to that record, the Hart record, which I have just shown you, indicates that you testified before Admiral Hart on or about what date?

Captain SAFFORD. Late in April, as I recall.

General RUSSELL. I think it is there somewhere, (indicating).

Captain SAFFORD. April 29th.

General RUSSELL. Now let us turn back to the message. From what source did you obtain these Japanese expressions or words which are found in your evidence given to Admiral Hart?

Captain SAFFORD. I got those from the messages setting up the "Winds" code, plus my recollection of the events: that two came exactly as we expected them, that is, the one for America and for England, and also the negative form of the Japanese for "North wind cloudy." I do not know enough about Japanese to be able to give that from memory. I mean, I remember that it was exactly what we expected to get on those two occasions, and garbled up on the Russian business.

General RUSSELL. Then, the memorandum from which you refreshed your recollection at the time that you testified [146] before Admiral Hart, as a matter of fact, was the code that you had discovered prior to November 28, 1941, and you took that language from that Japanese code and compiled from recollection the message of December 4th and gave that to Admiral Hart as being the message of December 4th; that is the truth?

Captain SAFFORD. That is correct, it being the essential or the substance of what we were interested in, because there was a lot more which was just straight Japanese news, and I couldn't make head or tail of it.

General RUSSELL. You don't know of any reason why, when this message reached the War Department, a different construction should have been placed upon it to the effect that nothing was in the message as to the probable intentions of the Japanese Empire with respect to the United States Government?

Captain SAFFORD. I do not, and I had never heard that any such thought existed.

General RUSSELL. If I am stating that that thought did exist or that we have evidence to that effect, this would be the first time that you have ever heard it?

Captain SAFFORD. This would be the first time that I have heard of it. I might say that we often differed on translations of Japanese messages, and the very important ones were always retranslated by the other service independently, as a checkup; and if there was a marked difference both translations were given to higher authority to let them make their choice. But we received nothing back from the War Department indicating that they were not satisfied with our translation.

[147] General RUSSELL. At about the time that these messages were being received, say in December prior to Pearl Harbor and shortly thereafter—and I have reference now to this message of December 4th—do you recall having discussed that message with any officer of the Army who was charged with the receipt of such messages and their evaluation?

Captain SAFFORD. I do not recollect any discussion of it with Army officers. I do know that somebody from my office discussed the interception with the Army, because when Colonel Guest requested the F. C. C. to watch for that message at their intercept station at Portland he gave them the telephone number of the 20G watch officer so that if it came at night he could get it in without losing any time. As a matter of fact, again next night, on the evening of the 4th, the F. C. C. did pick up a message that was apparently just part of a routine weather broadcast, and that was phoned over to the watch officer, Brotherhood, Lieutenant (junior grade) Brotherhood, about 9 o'clock on the evening of December the 4th, and that caused a lot of confusion because talking in veiled language we got the two things mixed up. The false "Winds" message was mixed up with the true one. There was a lot of confusion in our minds until Brotherhood came back from Honolulu and we had a chance to talk with him in the last couple of weeks, and we were straightened out in a moment on that one.

General RUSSELL. Could that have confused the thinking in the War Department as to the full force and effect and meaning of the "Winds" message of December 4th?

Captain SAFFORD. I don't see how it could have, because [148] our message came in and came twelve hours before the other one; but, as I say, they might have disagreed with our translation or they might have disagreed with our evaluation. The evaluation was out of our hands, and that is a function of Naval Intelligence, and they were supposed to discuss that with Military Intelligence, and if they disagreed with us they never told us.

Colonel TOULMIN. May I ask him a question there?

General RUSSELL. Yes.

Colonel TOULMIN. Captain, as I understood your testimony, the Japanese Ambassador in one message indicated that the United States statement of its position on the 26th of November, 1941, as given by Secretary Hull to the Ambassador, was an ultimatum. Was I correct in understanding your testimony something to that effect?

Captain SAFFORD. Will you please give the question again?

General RUSSELL. Before we answer that, Colonel Toulmin has gone into a subject I was about to go into that is wholly dissociated

from the "Winds" message. Now, is there anything else we want to develop on the "Winds" message?

General GRUNERT. What I want to find out is: Have you ever talked to Kramer about this message since, about its being missing or about its interpretation or about its delivery to the President?

Captain SAFFORD. Kramer has been gone from the country for more than a year and a half. In fact, he has been gone for some time. I discussed it at length just before he left. We didn't know it was missing then, and I have written to Kramer [149] about it since, to refresh my memory on things I wasn't clear on; but with censorship and everything, and top secret stuff, the information which was sent had to be extremely vague both ways. I didn't discuss that particularly with Kramer. I never asked Kramer particularly if he showed that particular message to the White House or not. He never said it hadn't been.

General RUSSELL. In your discussions of this message with Kramer was there ever expressed by Kramer any doubt as to its existence and as to the interpretation of the message which you have placed on it?

Captain SAFFORD. There never has by Kramer, and Murray has also assured me of its existence, because for a while it looked as though my memory had been playing me tricks, because a lot of the people knew about it by hearsay but had not seen it themselves. It was kept very secret and was rushed through very fast.

General RUSSELL. Well, the question I asked: Were you and Kramer, in all of these conversations, in agreement that the message came in as you have described it to us, and were you in agreement as to its interpretation and as to its general effect?

Captain SAFFORD. Yes, sir; Kramer and I were in complete agreement.

Colonel TOULMIN. I should like to find out to whom this "Colonel and Major" refers.

Major CLAUSEN. Sir, you mentioned that certain information you assumed was not going to come before the Army Board or the Navy Court of Inquiry.

Captain SAFFORD. Yes.

Major CLAUSEN. And that later on you discussed or there [150] were discussions with a Colonel and a Major from G-2. You do not recall those names at this time?

Captain SAFFORD. I do not recall the names.

Major CLAUSEN. Did you talk with these men yourself?

Captain SAFFORD. Only generally, in the presence of Admiral Sherman. Generally everybody addressed their remarks to Admiral Sherman.

Major CLAUSEN. Could you ascertain from the records who these men were?

Captain SAFFORD. I believe I can.

Major CLAUSEN. Will you do that, and let us know?

Captain SAFFORD. Yes, sir. As a matter of fact, I think Biesmeier was there.

Major CLAUSEN. Yes, sir; if you will do that.

Now, you assumed that that information would not come before this Board or the Navy Board of Inquiry. Is there other information that you assumed would not come before the Boards?

Captain SAFFORD. No, sir. That was objected to because it was top secret classification and that if it became public it would be very detrimental to the war effort.

Major CLAUSEN. Is there other information of the same character that has been withheld, to your knowledge?

Captain SAFFORD. No, sir.

General GRUNERT. I suggest we have a short recess at this point.

(There was a brief recess.)

Colonel TOULMIN. Would you read my question to the Captain, please?

[151] The REPORTER (reading):

Captain, as I understood your testimony, the Japanese Ambassador in one message indicated that the United States statement of its position on the 26th of November, 1941, as given by Secretary Hull to the Ambassador, was an ultimatum. Was I correct in understanding your testimony something to that effect?

Captain SAFFORD. No, sir. I am sorry if I created that impression. I said that Kramer and I regarded that message as an ultimatum, and that Ambassador Nomura sent a message in which he said that he had failed his Emperor again and that his humiliation was complete.

Colonel TOULMIN. And that message of Nomura was sent after the 26th meeting?

Captain SAFFORD. It was sent after the message, I believe: the message after the one in which Nomura transmitted Secretary Hull's note of November 26, 1941.

Colonel TOULMIN. That is all I want.

General RUSSELL. Was that all, as you recall, that was said in Nomura's message at that time?

Captain SAFFORD. If you let me check on that, sir (examining papers).

Speaking entirely from memory, Nomura made some comment to the effect that Tokyo, of course, could not accept America's proposal.

General RUSSELL. Was a record made in the Navy Department of this particular message of Nomura's at that time?

Captain SAFFORD. No more so than for the other message [152] of the same time. The official evaluation of all of this was the function of Naval Intelligence, and I have no idea what they might have done.

General RUSSELL. That is not the point. Is there any reason why we couldn't obtain a copy of Nomura's message, about which you are now testifying, from the records of the Navy Department?

Captain SAFFORD. Oh, yes, sir; they are in existence.

General RUSSELL. Do you think that this particular message is among those sixty messages to which reference has been made already?

Captain SAFFORD. I think it very likely, but I couldn't say for certain.

General RUSSELL. In your testimony before Admiral Hart, Captain, you stated that:

At 9:00 p. m. (Washington time), December 6, 1941, we received positive information that Japan would declare war against the United States, at a time to be specified thereafter.

Could you give the Board the basis for that statement?

Captain SAFFORD. Yes, sir. It is contained in two messages dated December 6, 1941, one of which may be identified as JD No. 7149, I

believe (I am giving that from memory; it isn't quoted here); and the other one is S. I. S. 25843. The first message stated that the Japanese Government—

General FRANK. Will you identify it?

Captain SAFFORD. What?

General FRANK. Will you identify it as to which one it is?

Captain SAFFORD. The one which I have as JD No. 7149 also [153] can be identified as Tokyo Serial No. 901; it advised Nomura and Kurusu that the Japanese Government's reply to the American Government's memorandum of November 26, 1941, would be contained in Serial No. 902, which would be very long, in fourteen parts, and in English; that this was to be typed smooth and held extremely secret, and was to be delivered to the American Government only on further orders which were to be given in the case.

S. I. S. 25843, which is Tokyo Serial No. 902, was the Japanese declaration of war, which was presented to Secretary Hull in the afternoon of December 7, 1941, about three-quarters of an hour or so after the Japanese attack on Pearl Harbor. By 9 p. m. on December 6, 1941, we had received the first thirteen parts of that, and they were very abusive in language, accused the United States of all kinds of plots against Japan, and there was no doubt in our minds that that was a declaration of war, and we couldn't see the reason for withholding the fourteenth part. The fourteenth part came in somewhere around four or five a. m., it was enciphered about twelve hours later and that was distributed about 10 a. m.

General RUSSELL. Wait a minute.

Captain SAFFORD. It wasn't filed. It was filed about twelve hours after the other thing. We will put it that way. The Jap Government held that fourteenth part up specifically.

General RUSSELL. Now, Captain, you stated that the early message indicated that the later message, which was the long reply of the Japanese Government, would be received and would be sent in English?

Captain SAFFORD. In English, yes, sir.

[154] General RUSSELL. Well, did it actually come in in English?

Captain SAFFORD. It came in in English, so there was no delay on translation, no question as to meanings.

General RUSSELL. And then your testimony is that at 9 o'clock on Saturday on night before the attack at 1:30 p. m. the next day, you had thirteen-fourteenths or the first thirteen parts of the Japanese reply?

Captain SAFFORD. Yes, sir.

General RUSSELL. Now, then, you state that the remainder or the fourteenth part came in at four or five a. m., which was Sunday morning preceding the attack at one o'clock on the same day?

Captain SAFFORD. Yes, sir.

General RUSSELL. Is that true?

Captain SAFFORD. That is correct.

General RUSSELL. How did it come in, the fourteenth part? Was it received in plain English too?

Captain SAFFORD. That was also in plain English.

General RUSSELL. So this entire message which was the reply of the Japanese Government to the Secretary of State's message of No-

vember 26, '41, was in the possession of the Navy Department at four or five a. m. on December 7, 1941?

Captain SAFFORD. Yes, sir.

General FRANK. In plain English?

Captain SAFFORD. In plain English.

General RUSSELL. I regard that information as material, and want to develop it just a little further.

[155] Captain SAFFORD. Yes, sir.

General RUSSELL. As this message about which we are talking now appears in the book issued by the State Department, commonly referred to as the "White Paper," page 832 et sequentia, it has numberings which apparently are somewhat different from those referred to by you in your previous testimony. I am going to read paragraph 7 at page 838 of the book to which I have just referred, and then ask you whether or not you recall that paragraph as being the fourteenth part of the message which was received on or about four or five a. m. on the morning of December 7th.

Captain SAFFORD. Yes, sir.

General RUSSELL. I am reading from the book, paragraph 7, at page 838.

Captain SAFFORD. Yes, sir.

General RUSSELL. (Reading:)

(Excerpt from message of Japanese Government published in "White Paper" page 838, is as follows:)

Obviously it is the intention of the American Government to conspire with Great Britain and other countries to obstruct Japan's efforts toward the establishment of peace through the creation of a new order in East Asia, and especially to preserve Anglo-American rights and interests by keeping Japan and China at war. This intention has been revealed clearly during the course of the present negotiation. Thus, the earnest hope of the Japanese Government to adjust Japanese-American relations and to preserve [156] and promote the peace of the Pacific through cooperation with the American Government has finally been lost.

Paragraph not numbered:

The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations.

From your memory can you, or not, identify that as the fourteenth part of the message to which you have referred?

Captain SAFFORD. That is the fourteenth part, and the "part" referred to the way that it was broken up for coding and radio transmission, not to the way they were numbered inside.

Paragraph 7 and the other unnumbered paragraph, in other words, were part 14th of that long message.

General RUSSELL. Yes. As it was broken up for sending?

Captain SAFFORD. For convenience in coding and sending.

General RUSSELL. You couldn't be mistaken about the fact that this language which I have just read you was in the possession of the Navy Department as early as four or five o'clock on that Sunday morning, could you?

Captain SAFFORD. No, sir. The intercepted message was received by them and was broken down and decoded and written smooth by about seven a. m.

General RUSSELL. What did you mean a moment ago when you used the term "twelve hours"? I am somewhat confused about that.

[157] Captain SAFFORD. The Japanese filed the first thirteen parts of the message twelve hours before they filed Part 14, so they were in and coded and distributed a long time before the Part 14 ever reached us. In fact we were afraid that we had missed Part 14, and the people on watch put in some very worried hours until it came in.

General FRANK. If it came in plain English, what do you mean by saying that it was coded?

Captain SAFFORD. Well, it came in in the Japanese code, I mean, but it wasn't in Japanese, and we had to break down their cipher and strip it all off and then clear it up with the garbled and the abbreviations and everything. But it came out in English; it didn't come out in Japanese that had to be translated by a language officer. It wasn't in clear.

General RUSSELL. Oh, all right. Now, what time did you have the first thirteen parts in clear?

Captain SAFFORD. We had them and typed up smooth ready for distribution about nine p. m. on the evening of December 6, 1941.

General RUSSELL. When did you have the last or the fourteenth section typed and ready for distribution?

Captain SAFFORD. At seven a. m. December 7, 1941.

General RUSSELL. Were they distributed?

Captain SAFFORD. The first thirteen parts were distributed that evening. Major Doud, who came down to assist, was given one or more copies for the War Department, and he was the authorized representative of the War Department; and what happened beyond that, we do not know, except that Colonel Bratton got a copy into the hands of the Secretary of State [158] by about ten p. m.

General RUSSELL. On December 6th?

Captain SAFFORD. On December 6, 1941, Kramer telephoned, phoned to the Director of Naval Intelligence, Admiral Wilkinson, and was told to be at the White House and deliver a copy there and then come right out to Admiral Wilkinson's house. Kramer got an official car and made that trip. The President was in a conference or holding a dinner party or something, so Kramer gave a copy to the White House aide and told him it was very urgent and to get it in to the President at the earliest possible moment.

Kramer reached Admiral Wilkinson's house about ten and found Admiral Beardall, the Naval Aide to the President, there at a dinner party. Admiral Turner, the Director of War Plans, was given a copy a little later. I am not certain of the circumstances, though I think Kramer went to his house.

Kramer got to Admiral Ingersoll's house about midnight and showed him a copy which Admiral Ingersoll read and initialed, I believe. Admiral Wilkinson phoned Admiral Stark about the thing, and also Admiral Turner phoned Admiral Stark about the thing, but so far as I know Admiral Stark did not see it that night and did not see it until the next morning.

When Kramer left he was given orders to be present with the message in Admiral Stark's office at nine o'clock Sunday morning, and then Kramer came back to the Navy Department about one a. m. to see if by chance Part 14 had come in, and to see if there were any

other developments, and told them about his appointment, told them to give him a call the next day and that [159] he would be down, and then went home and got some very much needed sleep, because he had been up on his feet since eight a. m. the previous morning.

When Part 14 came in, and another message which I haven't referred to here, but it may be identified as S. I. S. 25850 and was marked in the heading, "Urgent—Very Important," and said, when translated, "Submit our reply to the United States Government one p. m. on the 7th, your time," the men on watch realized that they had something particularly urgent, and they were restricted by orders signed by Admiral Noyes from sending out any information on their own authority. So all they could do was call Kramer and urge him to get down as soon as he could, and Kramer got down there sometime before nine o'clock and took all the information on hand up to Admiral Stark's office.

There is some question as to this S. I. S. 25850, just when that was ready for distribution. Lieutenant Pering, who was on watch, insisted that that had been sent over to the Army as soon as decoded, translated by Major Doud over there, and returned and was ready for delivery by 7:15 a. m., and that Kramer took it with him on his first trip.

Kramer told me—or as I remember from nearly two years—that he took that message on his second trip. It only makes a difference of an hour when they got the thing.

After delivering the message to the Chief of Naval Operations or to his aide, Kramer went over to the White House and left a copy for the President with Admiral Beardall, who was there then, and then went to Secretary Hull's office and sent in a copy for Secretary Knox.

[160] General RUSSELL. Captain, you have testified rather definitely about the delivery of these first thirteen parts early in the evening of December 6th.

Captain SAFFORD. Yes, sir.

General RUSSELL. Thirteen parts of the message in the early evening, and you stated that all those deliveries were made by Kramer?

Captain SAFFORD. Kramer personally.

General RUSSELL. Yes. You weren't with him?

Captain SAFFORD. I was not with him; no, sir.

General RUSSELL. He was alone?

Captain SAFFORD. He was alone except for the driver of the car.

General RUSSELL. So your testifying as to that delivery is based on hearsay?

Captain SAFFORD. On Kramer's statements; the statements of Kramer and the driver of the station wagon who took him around.

General RUSSELL. When did he make these statements upon which you base your evidence now?

Captain SAFFORD. Kramer made his statements the 8th or 9th of December immediately after the event, when I discussed it fully with him. I called for statements. I talked to everybody concerned, to see if my people had been negligent in any way, that this thing had in any way been our fault. I made a very careful investigation.

General RUSSELL. Did you make any records of that investigation, Captain?

Captain SAFFORD. No, sir.

[161] General RUSSELL. No written record at all?

Captain SAFFORD. No written records.

General RUSSELL. You filed no report of that investigation with anyone?

Captain SAFFORD. No, sir.

General RUSSELL. Now, you have been testifying this morning quite considerably from this typewritten report which you have before you. I believe you have already sworn as to when you prepared that, haven't you?

Captain SAFFORD. Yes, I did, except for one thing. I will have to correct that. The original brief was prepared as stated. This final brief was prepared in August 1944, and is a condensation from the longer record prepared earlier. There is no new matter in it.

General RUSSELL. Now I think we have cleared up the long message, the incidents surrounding the receipt and delivery of the message which we will refer to as the reply message of the Japanese, which was the long 14-part message; and then you have testified as fully, I assume, as you can about the receipt of S. I. S. 25850, which you received in the Navy Department and which instructed the Japanese Ambassadors to deliver the long message at one p. m. that day.

Captain SAFFORD. Yes, sir.

General RUSSELL. We have cleared those things up rather fully.

Now, in your testimony before Admiral Hart, before us, appears this language which I think we must explore to some extent to clarify our record.

[162] Colonel TOULMIN. Are you going off this subject?

General RUSSELL. I was going off this subject.

Colonel TOULMIN. May I ask a question?

General RUSSELL. Yes.

Colonel TOULMIN. We would like to be very clear about this, Captain, and for that reason I am going to ask one more question:

As I got your testimony as to the delivery of the first thirteen parts of this message from the Japanese, that copy of thirteen parts was delivered to Major Doud on the evening of December 6th shortly after seven p. m., at which time it was written out smooth?

Captain SAFFORD. No, sir; nine p. m.

Colonel TOULMIN. Nine p. m. All right. So we have, now, Major Doud visiting the Navy Department and receiving the thirteen parts just after nine p. m. on December 6; is that correct?

Captain SAFFORD. That is correct.

Colonel TOULMIN. Was anybody with Major Doud?

General FRANK. And this was given to him all translated and written out in English at nine p. m., December 6?

Captain SAFFORD. December 6; correct, sir.

Colonel TOULMIN. And was anybody with him?

Captain SAFFORD. Major Doud came in somewhere around four o'clock, I believe, and brought over a War Department stenographer who helped type these messages, and he stayed around until the job was done, and then started the distribution. So Army and Navy began, or could have begun, dissemination simultaneously. I have the young lady's name somewhere, but I [163] don't know it right now. I could find it out for you.

Colonel TOULMIN. Will you supply it to the Recorder of this Board, please?

Captain SAFFORD. I will get that. And also Mr. Rowlett, who was a civilian then but is a Lieutenant Colonel in the Reserve now, came down, who was working over in the War Department, and he had two or three assistants helping him, and they took out two parts of the message and sent them over to us.

Colonel TOULMIN. Now let us go to the part that Colonel Bratton played on the evening of December 6, 1941. You have stated that Colonel Bratton got a copy of these thirteen parts in English, translated, and delivered them to the Secretary of State prior to 10 p. m.

Captain SAFFORD. No, sir.

Colonel TOULMIN. Is that correct?

Captain SAFFORD. I said about 10 p. m.

Colonel TOULMIN. Well, on or about 10 p. m. on December 6 Colonel Bratton delivered a clear English copy of the first thirteen parts of this Japanese message to the Secretary of State, Mr. Hull?

Captain SAFFORD. That is correct, sir.

Colonel TOULMIN. Do you know whether he delivered it to him in person?

Captain SAFFORD. I do not, sir. That's all I know about it.

Colonel TOULMIN. Now, did Colonel Bratton come to the Navy Department to pick up this copy for this delivery to the Secretary of State?

[164] Captain SAFFORD. No, he did not. He did not come near the Navy Department that night.

Colonel TOULMIN. How do you know that Colonel Bratton did this?

Captain SAFFORD. Kramer told me that the only thing he knew about Army dissemination was that Major Doud was given a copy, the Army copies, at 9 p. m., and that by 10 or 10:30 p. m. Bratton somehow had got a copy to Secretary Hull, and that's all he knew about it.

Colonel TOULMIN. Where did he find Secretary Hull?

Captain SAFFORD. I do not know, sir.

Colonel TOULMIN. How many copies were delivered to Major Doud, on the evening of December 6, of these thirteen parts?

Captain SAFFORD. At least two and probably more, because this was the only occasion on which we made more than four copies of the translation. Personal copies were made for everybody who Kramer and Major Doud thought would require them.

Colonel TOULMIN. And approximately what time did Kramer get to the White House with the copy of the thirteen paragraphs in English?

Captain SAFFORD. Approximately between nine-thirty and ten.

Colonel TOULMIN. On December 6th?

Captain SAFFORD. On December 6, 1941.

Colonel TOULMIN. And then he went to the home of Admiral whom?

Captain SAFFORD. Admiral Wilkinson.

[165] Colonel TOULMIN. Admiral Wilkinson.

Captain SAFFORD. The Director of Naval Intelligence.

Colonel TOULMIN. And there he met the President's Naval Aide?

Captain SAFFORD. Yes, sir.

Colonel TOULMIN. And that was approximately ten p. m. on December 6, 1941?

Captain SAFFORD. Yes, sir.

Colonel TOULMIN. And thereafter Kramer went to Admiral Ingersoll and arrived about twelve p. m.?

Captain SAFFORD. About twelve p. m.

Colonel TOULMIN. And then nothing more was done with the Admirals and the copy until nine a. m. the following morning, in Admiral Stark's office; is that correct?

Captain SAFFORD. Except that Admiral Turner got a copy before midnight, either at his home or at Admiral Wilkinson's home.

Colonel TOULMIN. All right. Now, to make the record clear, will you please state the official position of each one of these Admirals that you have just now mentioned in this sequence of events?

Captain SAFFORD. Admiral Beardall was Naval Aide to the President, Admiral Wilkinson was Director of Naval Intelligence, Admiral Ingersoll was Assistant Chief of Naval Operations, Admiral Stark was Chief of Naval Operations, and Admiral Turner was Director of War Plans.

Colonel TOULMIN. When was this information as to the thirteen parts of the Japanese message first transmitted to [166] Admiral Kimmel at Pearl Harbor?

Captain SAFFORD. That was never transmitted.

Colonel TOULMIN. Now will you give a similar history of the movements and deliveries of the fourteenth part of this message, that is, the concluding part?

Captain SAFFORD. The fourteen part: Kramer left his office shortly before nine a. m. on Sunday, December 7, 1941, with Part 14 of the long message and all other translations which were on hand at that time; and according to one man's memory that included the message which said, "Deliver this to the State Department at one p. m., your time." According to my memory of what Mr. Kramer told me, that was not delivered—picked up—until an hour later. Kramer first went to Admiral Stark's office and gave the message either to Admiral Stark in person or to his Aide. He then went to the White House and gave the messages to the Naval Aide to the President. He then went to the State Department and gave the messages to Secretary Knox, or at least sent them in to Secretary Knox.

The previous evening Secretary Hull had called Secretary Stimson and Secretary Knox on the telephone and arranged a conference at his office in the State Department at ten a. m. on Sunday, December 7, 1941, and requested that Kramer and Bratton be there.

Kramer left the State Department shortly after ten a. m. and returned to the Navy Department about ten-twenty a. m. There he found some messages which had come back from the War Department translated, and also another message, which may be identified as S. I. S. 25856; and the translation of that, as distributed, stated, "Relations between Japan and England are [167] not in accordance with expectations."

That was another secret way of getting the news around to the Japanese Consuls. That was sent to every Japanese Consulate in North and South America. The translation unfortunately was incorrect. It should have included America and should have been much

stronger than that. But this was not called to the Navy Department's attention until long afterward. The War Department again did not agree with our translation. Kramer took this message around, and possibly the other message which said, "Submit our reply to the U. S. Government at one p. m. on the 7th, your time," and reached the Chief of Naval Operations around ten-thirty, and then next the White House, where he again gave the copy to Admiral Beardall for the President, and finally reached the State Department about 11 a. m. with it.

There is another matter which I would like to add: that at the time Kramer submitted SIS 25850 to Secretary Knox he sent a note in with it saying, in effect, that this means a sunrise attack on Pearl Harbor today and possibly a midnight attack on Manila.

General RUSSELL. How do you know that?

Captain SAFFORD. Kramer told me.

General RUSSELL. When did he tell you?

Captain SAFFORD. Kramer told me that just before he left Washington to go to Honolulu for duty. He had not dared—

General FRANK. Which was when?

Captain SAFFORD. Which was the spring of 1943, as I recall. He had not dared to let anybody know that up until that time.

[168] General RUSSELL. Are there any further questions about these messages now, before we go to December 7th, the other message?

Colonel TOULMIN. I am content.

General RUSSELL. Captain, I will repeat the question which I withdrew from the record a little while ago.

Captain SAFFORD. Yes, sir.

General RUSSELL. Reading now from your evidence to Admiral Hart:

Finally, at 10:15 a. m. (Washington time), December 7, 1941, we received positive information from the Signal Intelligence Service (War Department) that the Japanese declaration of war would be presented to the Secretary of State at 1:00 p. m. (Washington time) that date.

Do you recall that testimony?

Captain SAFFORD. Yes, sir.

General RUSSELL. Would you please give the Board the basis of that statement?

Captain SAFFORD. The basis of that is the translation of this document, S. I. S. 25850, and it also may be identified as Tokyo Serial No. 907, dated December 1941, addressed to the Embassy, Washington.

General RUSSELL. Now, that is S. I. S. 25850?

Captain SAFFORD. Yes, sir.

General RUSSELL. A moment ago when you testified from that message, the only substantial thing that I recall was to the effect that the Japanese Ambassadors had been instructed to [169] deliver the message at one p. m.

Captain SAFFORD. That is correct.

General RUSSELL. Now, therefore, your statement to Admiral Hart was based exclusively on S. I. S. 25850?

Captain SAFFORD. And 25843, which was the 14-part message.

General RUSSELL. Oh, yes. Then, this message 25850 did not reach you until about 10:15 A. on Sunday?

Captain SAFFORD. That is according to my recollection of what Kramer told me. And yet, Pering and Brotherhood stated, and both

insist, that that was available for distribution by 7:15 a. m. and that Kramer took it on his first trip, an hour earlier. It only makes a difference of an hour either way.

General RUSSELL. With Part 14?

Captain SAFFORD. Part 14.

General RUSSELL. Well, all right. Now I want to ask you about another message, then, which apparently you did not testify about. That clarifies the record on that.

There is information in this record to the effect that on or about 8:30 A. (8:30 A. M.) on the 7th of December there was delivered to Colonel Bratton, about whom you have testified and whom you apparently know, from the Navy or by the Navy (it was delivered to Colonel Bratton by the Navy) a message to the effect that the Japanese had been instructed to deliver the ultimatum at one p. m. December 7, '41, and to destroy their code machine.

Captain SAFFORD. Their remaining code machine; that is correct, sir.

General RUSSELL. Their remaining code machine. Now, with this statement from me, do you now associate [170] what I have just stated with S. I. S. 25850, or was that an entirely different message?

Captain SAFFORD. I recall a message directing the destruction of their code machine, and I believe that was included as a second sentence of 25850, but could not swear to it. It might have been a separate message.

General RUSSELL. Then, Captain, there is some confusion as to whether or not the Navy sent this message to Bratton or whether Bratton sent it to the Navy, assuming that we are discussing only one message, to wit, S. I. S. 25850. Could you throw any light on that?

Captain SAFFORD. About four or five messages came in between four and five a. m.; that we broke them down into the raw Japanese and then sent them over to the Army for translation. No. 25850 had already been translated by Lieutenant Brotherhood, who got the correct meaning out of it and realized how important it was; but Brotherhood was just a beginner in Japanese, and his translations could not be trusted, and it had to go over to the War Department for translation by a qualified language officer.

General RUSSELL. If the record here shows that a message similar to 25850 was received in the War Department about eight-thirty, would that or not be consistent with the facts as you now remember them as they developed in the Navy Department?

Captain SAFFORD. I think that would be consistent, on the whole, and more consistent with Kramer's recollection than with Pering's recollection of it.

General RUSSELL. Where now is there a record of S. I. S. [171] 25850?

Captain SAFFORD. That is on file in the Navy under the JD 7145, and I believe it is also on file in the War Department.

General RUSSELL. Do you know whether or not this message is one of those which has been referred to as the sixty messages recently delivered to the Board of Inquiry of the Navy?

Captain SAFFORD. Very definitely; yes, sir; that one was. Also 25843 and the other one which is identified as Tokyo Serial No. 901.

General RUSSELL. Captain, have you a list of these sixty messages about which you have testified?

Captain SAFFORD. Let's see. I have a list, I believe, of the numbers of 29 of them, the ones which I had thought important, which I had briefed: in other words, on my going over it about half the ones I thought important, and half I didn't see the significance at all of being briefed. I haven't got it here, but I have got it in my office. I can send the list over if you would like it, sir.

General RUSSELL. Now let me ask you this: Have you got the original list of sixty, as well as the list of 29 selected messages, over there in your office?

Captain SAFFORD. I do not have it, but I believe that the Judge Advocate of the Court must have it, and I believe the Director of Naval Communications has a copy. I haven't a personal copy of it.

General RUSSELL. But you do have the list of 29 that you selected?

Captain SAFFORD. I do have the ones that I thought were [172] important, because I had to check them over.

General RUSSELL. Does that list contain descriptions of sufficient clarity and definiteness and fullness for us to identify the messages and get some conception of what they contain?

Captain SAFFORD. The list merely gave the JD file number of them. That was done on purpose so as not to let anything out of the bag on it, and I have them briefed here.

General RUSSELL. Captain, you have now no record at all which contains the contents of this "Wind" message of December 3rd or 4th, 1941?

Captain SAFFORD. That is correct.

General RUSSELL. You tell the Board that you do not know whether that message is in existence or not?

Captain SAFFORD. There is a possibility that the original distribution copy of that message is in existence in the Navy Department in the hands or in the safe of some high official, probably the Vice Chief of Naval Operations if it is in existence, possibly the Secretary of the Navy. Admiral Hart made a statement to me which implied that he had sighted it and that I was not justified in the statement that all copies of the "Winds" message had been destroyed, or all the Navy Department copies had been destroyed.

General RUSSELL. Are you in a position to tell this Board that that message, to wit, the "Winds" message of December 3rd or the 4th of December, '41, is not included in the sixty messages recently submitted to the Court of Inquiry of the Navy now investigating the incidents surrounding the attack on Pearl Harbor?

[173] Captain SAFFORD. That is correct, sir; that is not included in those sixty messages. A separate request was submitted for the "Winds" message, and they were unable to find it. I was called in at the time to tell everything I knew about it, and I advised them they had better check first with the F. C. C. for the original because I thought at the time the F. C. C. had actually intercepted and got something that was pretty much like it but not the real thing. So I happen to know about that. They were not able to find it. A determined search was made for it.

General RUSSELL. General, I think this about exhausts my examination of this witness.

General GRUNERT. Are there any other questions?

Major CLAUSEN. I have one, sir.

General GRUNERT. All right.

Major CLAUSEN. In connection with the answer that you just gave to General Russell you stated that Admiral Hart informed you he had cited a distribution list. Do you recall that?

Captain SAFFORD. No, sir. That he had sighted the actual "Winds" message.

Major CLAUSEN. That he had cited the message in a written report that he rendered?

Captain SAFFORD. No, sir. He said to me, "I have just come from the front office, and I have seen your 'Winds' message. Now, don't make statements that you can't verify." This is of the time I came in to verify my testimony, so I withdrew from my testimony any statement to the effect relative then to other copies having been destroyed, because I didn't [174] know where I stood then.

Major CLAUSEN. Is it clear from the record what portion of the message containing fourteen parts was the fourteenth part?

General RUSSELL. I read the language, and he testified that that was the fourteenth part.

Captain SAFFORD. It was the last numbered paragraph plus the unnumbered paragraph where they got polite.

General RUSSELL. In order that we might be definite about it, I will show you the book to which we referred in connection with that message.

Captain SAFFORD. Yes, sir; and I have checked this same book against the original, so it begins at paragraph 7.

General FRANK. Paragraph 7 was the fourteenth part received?

Captain SAFFORD. Yes, sir.

General RUSSELL. Paragraph 7 in this book?

Captain SAFFORD. And was labeled "Part 14" in the heading.

General RUSSELL. Captain, you have had long association with this work that you have testified about this morning; is that correct?

Captain SAFFORD. Yes, sir.

General RUSSELL. About what time did you go into this work?

Captain SAFFORD. In 1924.

General RUSSELL. '24. You have had approximately twenty years thereafter?

[175] Captain SAFFORD. Except as broken by sea duty; I have had about fourteen years of it.

General RUSSELL. Yes. Now, some question has arisen—or probably that is not accurate; the Board is debating the effect on the war effort of a public disclosure of the contents of the "Winds" message. Assuming that the Japanese Empire knew that the American Government was in possession of those facts which are contained in that "Winds" message, would it indicate anything to them which might cause them to make changes which would make it more difficult for us to obtain Japanese information now?

Captain SAFFORD. No, sir, not the "Winds" message or this other so-called hidden-word or stop-code message. The setup for those two was sent in what they call a low-grade cipher held by all their Consuls. Everybody was solving that. The Dutch solved it, the British solved it in Singapore, and we solved it ourselves—both of them—and they

must know that we have been reading those messages, and I believe that that particular system is not in use any more, anyhow. It is not the high-class machine which is a literal gold mine at the present time. This other stuff it would be very bad to let public, but there were two things—

General RUSSELL. Identify "this other stuff" right now for us.

Captain SAFFORD. Well, I mean such as 25843 and 25850.

Colonel TOULMIN. What are they?

Captain SAFFORD. That is the declaration of war and "Submit our reply to the U. S. Government at one p. m. on the 7th, your time." Now, that is in their machine which they [176] think no one can read, and they are still talking their fool heads off in it, particularly from Germany.

But this other message, this 25856, if we will insert the proper translation instead of the erroneous one, which the Navy did, and the "Winds" message were in the clear, because those were on their J 19, which even the Dutch were reading.

General RUSSELL. That is the "Winds" message?

Captain SAFFORD. That is the "Winds" message and this other one.

General RUSSELL. Now, have you testified on the record, Captain, as to the messages which you received which you believe we should not permit the Japanese Empire to know that we know about?

Captain SAFFORD. The Japanese Empire should not be permitted to know about any messages thus far mentioned except the "Winds" message and No. 25856.

General FRANK. Which is?

Captain SAFFORD. Which is, according to the Army translation: Relations between Japan and England and Japan and America are serious, on the verge of crisis, or on the verge of war.

General RUSSELL. Well, of course, the fact that we know about their sending us their reply of December 7th—that is published in the book here.

Captain SAFFORD. That has been hinted at.

General RUSSELL. It is in this book.

Captain SAFFORD. Yes, unfortunately.

General RUSSELL. How about, Captain, this Nomura [177] statement when he transmitted to the Japanese Government Secretary Hull's message of November 26?

General FRANK. In which he spoke of his embarrassment.

Captain SAFFORD. Yes. That was in a separate message. That was in a high-class system.

General RUSSELL. That was in their high-class system?

Captain SAFFORD. High-class system. Nomura used that exclusively. The only times the low-grade system was used were to Conulates or minor Embassies that did not hold their high-grade system.

General RUSSELL. It seems now, Captain, that the probabilities are that this message of December 7th and which came here sometime in the early morning hours, that they were going to deliver the ultimatum at one o'clock, and told them to destroy the code machines, must be this message 25850, which is JD 7145.

Captain SAFFORD. 7145; yes, sir.

Colonel TOULMIN. May I ask the Captain a question?

General RUSSELL. Yes.

Colonel TOULMIN. Captain, I would like to ask you: What messages which were reported in the Roberts printed report were those that emanated from Japan in their highest type of code?

Captain SAFFORD. Every one that was mentioned in the Roberts report was sent in the Japanese highest-cipher system.

Colonel TOULMIN. Therefore, the fact that those messages were known through this publication of this Roberts report would indicate to the Japanese that somebody had been reading their code, would it not?

[178] Captain SAFFORD. Yes, sir, and so would——

Colonel TOULMIN. What was the answer?

Captain SAFFORD. Yes, sir. And I was going to add: and so would Ernest Lindley's book, "How War Came." That lets a lot more secrets out of the bag.

Colonel TOULMIN. When was that published?

Captain SAFFORD. I think that was 1943.

Colonel TOULMIN. If these two, the book and the report——

Captain SAFFORD. Maybe it was 1942. 1942 or '43.

Colonel TOULMIN. I am puzzled. If the report of the Roberts Commission that has been published and this book that has been published contain messages which are translations and therefore a breakdown of the highest code of the Japanese, isn't it a fact that the Japanese are fully advised that somebody has been reading their code, and that somebody being the United States?

Captain SAFFORD. That was my personal belief at the time it came up for decision. In fact, all four Navy members stated that they did not think that release of these messages to investigation would jeopardize the conduct of the war.

Colonel TOULMIN. What point is there now, therefore, in suppressing any of these messages if the fact of their translation is now known to the Japanese?

Captain SAFFORD. There is an implication in that that I would rather not go into.

Colonel TOULMIN. I am content.

General GRUNERT. Well, it appears to me that the Japanese are not so dumb as all that. If they think that we [179] have broken one or more of their high codes, then why do they continue to use those codes and allow us to do damage to them through knowledge gained by those codes? It doesn't make sense.

Colonel TOULMIN. That is what puzzles me.

General GRUNERT. Are there any other questions? No response.)

If not, Captain, do you think of anything else that you might open up on that would be of interest to the Board?

Captain SAFFORD. Yes, sir; I have two or three things I would like to mention.

In the first place, to go back to the "Winds" message, when that one came in and was sent up to Admiral Noyes, it is my opinion and my belief that Admiral Noyes phoned it around to all interested parties. He phoned personally. I have no proof of it, but I mean that was presumably the reason it was sent up to him and not being taken around in the ordinary method, so he could save time by phoning it.

General GRUNERT. Was that phoning secret?

Captain SAFFORD. Well, we had an interphone in the Navy Department. He could talk to anybody there without going through any switchboards, which is used for all secret messages.

General GRUNERT. All right; go ahead.

Captain SAFFORD. And let's see. I have some more points.

Another point of great interest: that afternoon of the 7th of December, after the attack, we translated this message, which is S. I. S. No. 25866 and in the lowest-grade system that they had. This came from Budapest, incidentally, and it said:

[180] On the 6th the American Minister presented to the Hungarian Government a British Government communique to the effect that a state of war would break out on the 7th.

General RUSSELL. What was that?

Captain SAFFORD. It is on the 6th. This is the Jap Minister in Budapest reporting back to Tokyo:

On the 6th the American Minister presented to the Hungarian Government a British Government communique to the effect that a state of war would break out on the 7th.

That is, it may have no relation, and it may have significance with stuff I don't know. I am just telling you for that.

The next thing is: in connection with S. I. S. 25843 and its real meaning and significance, we learned the following on December 15th, which is contained in S. I. S. No. 26308. That was the 15th of December, 1941. Tokyo was referring to Nomura's presentation of the Japanese declaration of war to the U. S. Government (which, incidentally, they called a "declaration of war") and the part I am quoting says:

We really supposed that the negotiations had been broken off first and the shooting had taken place after this. The President's speech was trying to hide the fact that the United States had been taken by surprise and failed in the first step.

That was being circulated to their embassies for propaganda purposes.

There is another message which wasn't translated until November 25, 1943, although it was dated December 9, 1941, [181] and that was an Army message distributed in "magic" summary No. 609, and bears a further short title of "SSA. No. D-3108." This is a discussion of events leading up to the war, in three parts, of the negotiations April to July. "B" is preliminary decision for war. They began preparations for all-out war in September 1941. And "C" the final decisions; and, referring to the American note of November 26, 1941, it is stated:

In short, the United States proposals agreed with everything that we regarded as inconsistent with the preservation of peace in the Pacific areas. They also would have made the Tripartite Pact a dead letter. This United States answer at one fell swoop showed us how utterly ridiculous and useless had been the conferences which had been held since April, and completely swept away all understandings reached. We saw now that future negotiations would be of no purpose or could only fit in with the delaying policy of the United States. Consequently the supreme war command immediately decided upon war. On 1 December the imperial decree was issued.

General RUSSELL. Where did that come from?

Captain SAFFORD. That was from the War Ministry, Tokyo.

General RUSSELL. "Magic"?

Captain SAFFORD. "Magic." That is an Army investigation. The Navy has not got this, at least as far as I know. They may have got it by now.

In the Roberts report there is reference on page 8, in the last paragraph, to three messages sent by the Navy [182] Department to the Commander-in-Chief of the Pacific Fleet in early December 1941. I was in on them all, and I would like to state what happened, as a matter of record, if you are interested.

On December 1, 1941, we received a message, S. I. S. No. 25606, stating:

The four offices in London, Hong Kong, Singapore, Manila have been instructed to abandon the use of the code machines and dispose of them. The machine in Batavia has been returned to Japan.

That, incidentally, was the high-grade machine which we have been discussing. It also gave some instructions on destroying surplus copies of other things which are not important. No action was taken on that.

On December 3rd, an S. I. S. No. 25640. We learned from the message sent the previous day that Washington had also been ordered to destroy everything they had except one copy of their high-grade machine; and on the 3rd we received a signal from Admiralty London that London had already complied.

I knew from conversations with Kramer, who was attached to the Far Eastern Section of Naval Intelligence under Commander McCullom though actually working down in my office under me, that McCullom was greatly worried by the lack of information that was being sent to the Commander-in-Chief of the Pacific Fleet; and on the 3rd somehow I learned or discovered that no warning of this had been sent, so I called McCullom on the phone and I asked him if he had read the messages which we had been getting in the last three days, [183] and he said he had, and I said, "Do you appreciate their significance?"

And he said, "I do."

And then I said, "Are you people in Naval Intelligence doing anything to get a warning out to the Pacific Fleet?"

And McCullom said, "We," emphasizing it, "are doing everything that we," again emphasized, "can to get the news out to the Fleet."

That was the end of the conversation, but as a result of that McCullom finally succeeded in getting a message sent, which is referred to in the Roberts report as the war warning of December 3rd, and the message reads:—oh: message was released by the Director of Naval Intelligence, Admiral Wilkinson, and may be identified as OpNav No. 031850, addressed to the Commander-in-Chief Asiatic Fleet, Commander-in-Chief Pacific Fleet, Commandant 14th Naval District, Commandant 16th Naval District:

Highly reliable information has been received that categoric and urgent instructions were sent yesterday to the Japanese diplomatic and consular posts at Hong Kong, Singapore, Batavia, Manila, Washington, and London to destroy most of their codes and ciphers at once and to burn all other important confidential and secret documents.

Then it adds in the second sentence, which has been crossed through by pencil and I do not know whether it was sent in the coded outgoing copy or not:

From foregoing infer that Orange plans early action in Southeast Asia.

[184] Well, this destruction of codes immediately threw the "Winds" message into prominence. Before, we couldn't understand why they had this setup arranged. It seemed a foolish thing to do, excepting we never can understand the Japs, but they had this in mind, I think: Well, all right, one step short of war. They are destroying their codes to play safe, but they are still reserving the decision as to peace or war to come in the "Winds" message, which was the reason that, from the first on, we thought the "Winds" message was so highly important, and yet that information did not get out to either Commander-in-Chief Pacific Fleet or Commander-in-Chief Asiatic Fleet until 48 hours after we had the news, and then only because of some back seat driving on my part and turning the screws on McCullom to make one more desperate effort to get the information released.

As a result of the "Winds" message I wrote out four messages which were released that afternoon between 3 p. m. and 3:19 p. m. The first was released by Admiral Noyes and the other three by Admiral Ingersoll.

General RUSSELL. On what date?

Captain SAFFORD. On December 4, 1941. And these instructed the Naval Attaches at Tokyo and Peiping and also at Bangkok and Shanghai. It said—are you interested in that? I will give you the whole text then. That was from OpNav No. 042019:

Supplementing my 040330 action addresses also destroy all secret and confidential files except those essential for current purposes and all other papers [185] which in the hands of an enemy would be a disadvantage to the United States.

That was sent to information Commander-in-Chief Asiatic Fleet but was not sent to Commander-in-Chief Pacific Fleet.

042182—

General FRANK. On what date was it sent to the Asiatic Fleet?

Captain SAFFORD. On the 4th of December.

Another one the 4th of December from OpNav to Commander-in-Chief Asiatic Fleet, and the Serial No. 042018:

Communications room should now be stripped of all secret and confidential publications and papers which in the hands of an enemy would be a disadvantage to the United States, retaining for essential purposes the minimum number of cryptographic channels at your discretion. Report those retained.

General FRANK. Did those go to the Asiatic?

Captain SAFFORD. Those went.

General FRANK. Did information copies of that go to the Pacific Fleet?

Captain SAFFORD. No, that also did not go to the Pacific Fleet.

Then we sent this message from Naval Operations to Commander-in-Chief Pacific Fleet, Commander-in-Chief Asiatic Fleet, Commandant 16th Naval District, Commandant 14th Naval District, Naval Station Guam, and Naval Station Samoa. This is 4 December 1941:

[186] 042000 CSP 903, 905 and RIP 66 less changes 1 and 2 effective immediately with indicators GONID secret and JYREC confidential available all purposes communications with Guam and Samoa. Guam and Samoa destroy RIP 65 plus changes to RIP 66 immediately. Other addresses may continue to use except with stations mentioned.

That, incidentally, was sent priority. It was sent to the complete distribution list for RIP 66 and RIP 65, which was a special cipher

which we were using between our intercept and direction finder stations in the Pacific Ocean area; and, knowing that the Japs were about to hit us and that Guam was only a hundred miles or so from Jap territory, and not to be defended except against sabotage, according to War Plans, we wanted to clean house early there. That was the message as written by me, and bears my initial.

General FRANK. And it was sent?

Captain SAFFORD. It was sent priority. This other message was sent following time 17 minutes later and was sent with deferred priority.

This next message which I will read was reference in the Roberts report:

From OpNav to Navsta Guam, December 4, 1941. Information Commander-in-Chief Asiatic Fleet, Commander-in-Chief Pacific Fleet, Commandant 14th District, and Commandant 16th District, and reference number 042017. Guam destroy all secret and confidential publications and other classified matter except that [187] essential for current purposes and special intelligence, retaining minimum cryptographic channels necessary for essential communications with Commander-in-Chief Asiatic, Commander-in-Chief Pacific, Commandant 14th, and Commandant 16th Naval District, and Naval Operations. Be prepared to destroy instantly in event of emergency all classified matter you retain. Report cryptic channels retained.

Now, that is referred to in the Roberts report as a war warning.

General FRANK. And that was sent to whom?

Captain SAFFORD. That was sent to Navy Station Guam for action, and for information of the Commanders-in-Chief Pacific Fleet, Asiatic Fleet, and the Commandants of the 14th and 16th Districts. That was sent deferred because it was sent in the new RIP 66 which had just been made effective by the previous message, and we had to send it slow so the other message would get there first and they could be able to read this message. We were putting a new cryptographic system into effect; and by Navy regulations or by communication instructions deferred messages are not expected to be delivered until the beginning of working hours the next morning. In other words, any message which comes in in deferred priority automatically is not going to be considered a war warning, regardless of how you stated it. The original—the message as transmitted was a rewrite by Admiral Noyes. My original message said: Guam destroy all cryptographic aids except this system and current edition of direction finder code, which was what would be necessary to [188] keep them going the next two or three days. My message might have contained a degree of warning which is lacking in this one, and the reason for sending it was this "Winds execute" message; and that is why I know that the "Winds execute" message was received on the 4th and not on the 3rd or the 5th, because when I finally was able to get my hands on copies of these messages it placed me with the date, because these messages were written up and released as a direct consequence of that "Winds" message.

The final message was on the 6th, if I can see that (examining papers). The night before, just about closing hours, one of the girls in the Registered Publication Section discovered that a force had been sent to reinforce Wake Island, and they just had a lot of registered publications with them; and I asked them to make a complete inventory, and they stayed up until about one o'clock, one officer or two

officers and two civilians, and the next morning they gave me an inventory of 150 different registered publications on that little island where, you see, they had almost nothing. And at that time war was right around the corner, and I wrote a message which said in substance, addressed to the Commander-in-Chief Pacific Fleet and information of the senior officer on Wake:

In view of imminence of war destroy all registered publications on Wake Island except this system and current editions of aircraft code and direction finder code.

General FRANK. And that was sent on what date?

Captain SAFFORD. That message was not sent, sir. That [189] message was rewritten; and when I took that up to the Director of Naval Communications for his release, or at least approval, he said, "What do you mean by using such language as that?"

And I said, "Admiral, the war is just a matter of days, if not of hours."

He says, "You may think there is going to be a war, but I think they are bluffing."

I said, "Well, Admiral, if all these publications on Wake are captured we will never be able to explain it."

And thereupon he rewrote the message and left out any reference to Wake Island or the 150 publications exposed to capture, which included all our reserve publications for the next six months, and this is what actually was sent out:

OpNav to Commander-in-Chief Pacific Fleet, information Commander-in-Chief Asiatic Fleet, 061743.

It is released by Admiral Ingersoll and dated December 6, 1941, and when this was sent up for release the inventory of publications on Wake went with it.

In view of the international situation and the exposed position of the outlying Pacific islands you may authorize the destruction by them of secret and confidential documents now or under later conditions of greater urgency. Means of communication to support our current operations and special intelligence should, of course, be maintained until the last moment.

And that was sent deferred precedence, which meant delivery [190] by nine o'clock on Monday morning, December 8, 1941.

General FRANK. Now wait a minute. That is across the international date line, isn't it?

Captain SAFFORD. Well, it would be—No, sir; Wake is this side of the international date line, I am quite certain.

General FRANK. All right.

General RUSSELL. I don't know.

Captain SAFFORD. But we know this was addressed to the Commander-in-Chief Pacific Fleet. He still had to relay the news out to Wake. I don't know what time it got there, but no action was taken on it until long after the attack on Pearl Harbor; and then, because we had sent an ambiguous message, the fleet communication officer sent another ambiguous message. The net result was that when Wake was captured, I believe the 24th of December, some of the cryptographic aids fell into Japanese hands, and it was reported at the time by Commandant 14th Naval District, and later on some of the alphabet strips were captured at Kiska in some of the abandoned Japanese dugouts.

Now, that message was referred to as a war warning in the Roberts report, and also they changed it around and took the liberty of inserting, I think the word was "acute." Let me check that. No. "Tense."

In view of the tense situation.

I have read you the exact wording of the message that went out.

General RUSSELL. Will you refer to the Roberts report? I find that reference to "tense situation," Captain. I don't find handily the reference to the December 6 message being a [191] war warning. It may be there.

Captain SAFFORD. Well, it said at the top of the page:

The foregoing messages did not create in the minds of the responsible officers in the Hawaiian area apprehension as to probable imminence of air raids.

General RUSSELL. Very well. I see what you are talking about.

Captain SAFFORD. Yes.

General GRUNERT. That appears to cover about all that we are after. We thank you very much for giving us this entire morning.

Captain SAFFORD. Just may I add one thing to the statement?

General GRUNERT. Yes.

Captain SAFFORD. If you have not called Colonel Sadtler as a witness, I think he should appear before the Board, because he knows a great deal, which I prefer not to put in his mouth, as to the inside happenings.

General GRUNERT. Colonel S-a-d-t-l-e-r?

Captain SAFFORD. Otis K. Sadtler. He probably will not thank me for mentioning his name, but—

General RUSSELL. He is down at the Army Ground Forces now, isn't he?

Captain SAFFORD. I think he is at Army War College. He was on duty in the Signal Corps Headquarters at the time of Pearl Harbor, and he does know a great deal of what went on.

(Thereupon at 12:30 p. m., the Board, having concluded the hearing of the testimony of the witness, proceeded to other business.)

[192]

AFTERNOON SESSION

PENTAGON BUILDING, *Washington, D. C.*

(The Board, at 2 o'clock p. m., continued the hearing of witnesses, as follows:)

TESTIMONY OF GENERAL GEORGE C. MARSHALL, CHIEF OF STAFF, WAR DEPARTMENT, WASHINGTON, D. C.—Resumed

Colonel WEST. General Marshall, the witness is here on rehearing. It will not be necessary to swear him again, but the witness is reminded that he is still under oath.

General GRUNERT. General, probably the best way to continue this would be, if you so desire, to take that list of questions we sent over, and answer them one after the other, or any way you want.

General MARSHALL. That is agreeable to me.

General GRUNERT. I think that would be probably the quickest way to wind this thing up.

General MARSHALL. The first question given me is this:

Will you state the reasons, if any, which prompted you to select General Short to command the Hawaiian Department?

My answer is: From the evidence we possessed, General Short had demonstrated his fitness for command. He had served overseas in the First World War, he had served in the Philippines, in Alaska, in Puerto Rico, and had been an instructor at the Infantry School and the Command and General Staff School. During the five years which preceded his [193] assignment to the Hawaiian Department, he had commanded successively infantry brigades at Fort Ontario, New York, and Fort Wadsworth, New York, the First Division at Fort Hamilton, New York, the First Army Corps at Columbia, South Carolina, and the larger force in the first of the extensive Army maneuvers of the 1940-43 period. The officers under whom he had served since 1937 had recommended him for a division command in time of war; 1940, General Drum recommended him to command a division or a corps.

That is his efficiency report. In other words, that statement of General Drum is from the efficiency report.

The next question was:

Are you sufficiently acquainted with the services rendered by him in the capacity of the Commanding General of the Hawaiian Department from the date of his assignment until the 6th day of December 1941 so as to express an opinion as to the character of such services?

I had reason to believe that he was performing his duties in an energetic and efficient manner. This view was based upon the letters and reports which I received, many of which have been recorded by the Board.

Another question:

If you have the bases for rating those services, will you please state to the Board whether or not you regarded them entirely satisfactory?

I regarded his services as entirely satisfactory.

[194] Another question:

On the 20th day of October 1941, the War Department sent to General Short the following radiogram:

"Following War Department estimate of Japanese situation for your information. Tension between the United States and Japan remains strained but no, repeat no, abrupt change in foreign policy seems imminent."

Do you know of any other information sent to General Short by the War Department from the date of this radiogram until the 27th day of November 1941, at which time Message No. 472 was dispatched to him? If you know of any other information on the Japanese situation sent to General Short during that period of time, won't you please give the Army Pearl Harbor Board the benefit of it?"

My answer: The Navy message of November 24th to Admiral Kimmel, one of the addressees, stated that I had seen it and concurred in it, and asked that General Short be informed. This message warned of the possibility of a surprise aggressive movement by the Japanese.

On the 27th of November War Department G-2 sent to Hawaii some additional data from its continuing political, economic, and combat digest of Japan. Nothing in the nature of a warning was sent by G-2 during this period except for their message of November 27.

[195] Another question:

Do you believe that you were kept fully informed by the State Department on the development of the relations between the Japanese Empire and the American Government?

I do.

Another question:

When were you informed of the delivery by the Secretary of State to the Japanese Ambassadors of the memorandum of the 26th of November 1941, which memorandum was described as an outline of proposed basis for agreement between the United States and Japan?

My answer: I do not recall.

Another question:

When did you first know that the Secretary of War was told by the Secretary of State on the morning of 27 November 1941 that he had broken the whole matter off, as he put it, "I have washed my hands of it and it is now in the hands of you and Knox, the Army and Navy"?

I do not recall.

Question:

It is in the record that you left Washington for the Carolina Maneuvers on the 26th day of November 1941. Did you prepare or direct the preparation of a message to be sent to overseas commanders prior to your departure for the Carolina Maneuvers?

Answer: My recollection is that on the morning of the [196] 26th of November, before leaving Washington, Admiral Stark and I agreed, at a joint board meeting, on the necessity for dispatching a further warning to Commanders on the Japanese front, particularly to the Philippines, and that we there discussed the draft of such a message. In my previous testimony I stated that I had a rather distinct recollection of considering two of the statements in the warning or alert message of November 27. More recently I found a memorandum from General Gerow dated the 27th of November, 1941, which indicates that the sending of such a message had been discussed at a joint board meeting the morning of November 26th. This quite evidently was the basis for my recollection of having some knowledge of the November 27th message prior to its dispatch.

Another question:

Do you recall when you first saw the message to General Short of November 27, 1941, No. 472?

Answer: I do not recall when I first saw the message, but it almost certainly was shown to me on the 28th, on my return from the Carolinas. The files show that a copy of the message to the Philippines was sent to my office by General Gerow on the 27th and received there on the 28th. They also contain another copy of the same message, with an attached note reading: "Show to the C S"—that is the Chief of Staff—"when he returns. S. W"—that is the Secretary of War—"approved sending this." Near it in the files is a copy of the message sent to Hawaii, initialed by me, but bearing no stamp or other mark to indicate when I saw it. The presumption [197] is that I saw it on the 28th.

Question:

Do you recall under what circumstances and by whom this message was shown to you?

I think my previous answer gives whatever I have on that subject. Another question :

Do you regard that message as containing all of the information with respect to the Japanese and instructions necessary to be sent to General Short for the accomplishment of his mission in the Hawaiian Department at that time?

The answer is : I do.

In further reference to that question, I have here the headings for the secret, ultrasecret information for the Far East, for Europe, and for the diplomatic summary. They all have this general heading, "Top Secret," which means the extreme of secrecy observed by the War and Navy Departments, and so understood by the British.

They have, under the heading, "Note:" four paragraphs alternating red and black. The first one reads :

No one, without express permission from the proper authorities, may disseminate the information reported in this Summary or communicate it to any other person.

Now, in black is another paragraph :

Those authorized to disseminate such information must employ only the most secure means, must take every [198] precaution to avoid compromising the source, and must limit dissemination to the minimum number of secure and responsible persons who need the information in order to discharge their duties.

The next is in red :

No action is to be taken on information herein reported, regardless of temporary advantage, if such action might have the effect of revealing the existence of the source to the enemy.

I might state, in connection with that paragraph, that there have been cases where convoys have been permitted to go into the most serious situations rather than diverting them from the assemblage of the so-called wolf packs because of the fear that that would convey to the Germans that we had some means of knowing just how this was managed. Here at the present time, the German submarine activity in the Atlantic being on the decided decrease, we have a series of sinkings going on in the Philippines and elsewhere in that general region which are timed entirely on this particular information. The hazard is to what extent we can continue uninterruptedly proceeding on that basis without conveying to the Japanese the fact that we have some means of reading the schedule for the convoy. We are continuing to use it for the reason that from this secret information, secret source of information, we learn of the Japanese thought as to how we are obtaining knowledge of these convoy movements. They think it is done by spies and by observation posts in the Philippines and along those other coasts, of which we had a great deal in the Solomons, and Australian lookout posts, and in New Britain, [199] New Ireland, and New Guinea. So long as they show they think that it is some such methods as that, we feel free to go ahead; but if there is any danger of our giving away our sources, then we would have to hold off somewhat on seizing each opportunity, for fear we would lose tremendous long-term advantages. That is what is meant in these instructions when it says, "No action is to be taken on information herein reported, regardless of temporary advantage."

General GRUNERT. Those instructions come from where?

General MARSHALL. That is in agreed instructions between ourselves in the War Department and the Navy Department and the British. It was necessary for us to show them, in the most positive manner, how we would guard their information, which they were very reluctant to give to us. They would give us the results, just as we gave it to General Short and Admiral Kimmel, without giving us their source on which these statements were based; and we were, oh, I guess a year and a half or two years breaking down their reluctance to tell us that.

I might say, we have had a continuing very delicate situation with the Russians where we have told them that we had good reason—not good reason—we had the best evidence that certain actions were going to be taken by the Germans against them, but we couldn't tell them why, and there was quite a long debate as to whether we should not go into the whole thing, but that was felt most dangerous from two points of view. One was, we were spreading the thing out, and we didn't know who all would become involved in it; and, more particularly, they would probably get infuriated because they [200] hadn't had it from the start. So it has been a matter all the time of guarding this thing so that we have it tomorrow and do not expend it today and lose tomorrow.

The fourth paragraph, which is in black, says:

The enemy knows that we attempt to exploit these sources. He does not know, and must not be permitted to learn, either the degree of our success or the particular sources with which we have been successful.

If you would care to have one of these, here it is.

I might further add to that that we have a cover like this (indicating); it looks different from anything else; of which a copy will be given you.

General RUSSELL. All three of those were alike, weren't they?

General MARSHALL. They were all different; the headings were different. There are three different headings there. One is "Europe," one is "Diplomatic," and one is "Far East."

Question:

Upon your appearance before the Army Pearl Harbor Board, Monday, 7 August 1944, you testified about the Report of General Short in response to the direction in the message of 27 November to report measures taken. In this testimony you were not certain as to whether or not you saw General Short's Report. Your language is "I have no recollection at all. The presumption would be that I had seen it."

Have you in any way refreshed your memory on this subject so as to change the answer just quoted?

[201] I have not.

Another question:

The message from General Short making such report indicates that it was stamped in the Office of the Chief of Staff with the following entry: "Noted—Chief of Staff." It does not contain your signature. Will you please state to the Board who was authorized to place this stamp upon the message?

Answer: The Secretary of the General Staff and his commissioned assistants. The replies from General MacArthur and General Short in the files appear stapled together, the one from General Short underneath. My initials appear on the MacArthur message but not on the Short message. Whether or not I saw the Short message I could not say.

Question :

Would the placing of this stamp upon the message indicate to others in the War Department that you had seen the message and noted its contents?

It would.

Did you know that General Short had ordered his Command into an alert for sabotage only, and that this condition of readiness obtained during the entire period 27 November-6 December inclusive?

No.

Question :

Is it now apparent that the message of 27 November 1941 from the Chief of Staff to the Commanding General of the Hawaiian Department (No. 472), was [202] misunderstood or misconstrued by the Commanding General of the Hawaiian Department and did not accomplish the desired and intended results?

I know that it did not accomplish the desired results.

Question :

Is it now apparent that the Report of General Short to the War Department, in compliance with the instructions in the above message to report measures taken, was misunderstood or misconstrued by the War Department and did not accomplish the desired and intended results?

Answer : The message was quite evidently misunderstood. The term "liaison with Navy" evidently meant one thing to General Short and another to the War Department.

Another question :

Were any steps taken by the War Department between 27 November and 7 December 1941 to determine the state of readiness of the Command of the Hawaiian Department?

the

27 No. previous testimony before the Army Pearl Harbor Board you read into addressed joint statement signed by you and Admiral Stark which was dated

ment are 21. It is on the subject of the Far Eastern situation and is a. Do you President? President. The following questions relating to that joint agree-

[203] I do date when this joint statement was delivered to the morning of Novem.

that afternoon, would the fact of a joint board meeting on the 26th, or on my return on 24, and my departure from Washington

Question :

Did you know at the time of its're probably the latter. of State's memorandum of 26 Nove. bassadors?

I must have known, I think, ad bee. ident that the Secretary negotiations were nearing an impasse, 26th of N the Japanese Am. evidently directed the preparation of, be use Admira. draft of the 27th or 28th I warning on that day, the 26th.

I will repeat that: I must have known the negotiations were nearing an impasse the 26th of November I. and I evidently directed the preparation because Admiral Stark November warning on that day, the 26th. draft of the 27th of

The following is quoted from that statement :

"After consultation with each other, United States, British authorities in the Far East agreed that joint military coup Dutch military action against

Japan should be undertaken only in case Japan attacks or directly threatens the territory or mandated territory of the United States, the British Commonwealth, or the Netherlands East Indies, or should the Japanese move forces into Thailand west of 100° East or south of 10° North, Portuguese Timor, New Caledonia, or the Loyalty Islands." [204]

Question :

Who constituted the military authorities representing the United States in entering into this agreement?

The agreement was reached in the so-called American-British-Dutch staff conversations held at Singapore in April of 1941. United States Army officers participated on my instructions and with the approval of the Secretary of War. U. S. participants were:

Captain Purnell, U. S. Navy; Chief of Staff of the U. S. Asiatic Fleet.

Colonel A. C. McBride, United States Army; Assistant Chief of Staff of the military forces in the Philippines.

Captain A. M. R. Allen, U. S. Navy; the U. S. naval observer in Singapore.

Lieutenant Colonel F. G. Brink, U. S. Army; U. S. military observer at Singapore.

Question:

What was the extent of his authority to bind the United States to take counter action against Japan in event the contingencies described in the above quotation or any one of them should come to pass?

The United States participants, of course, had no authority to bind their Government to any particular course of action.

The following recommendations were made by you and Admiral Stark in this joint agreement:

[205] "It is recommended that:

"prior to the completion of the Philippine reinforcements, military action be considered only if Japan attacks or directly threatens United British, or Dutch territory as above outlined;

"In case of a Japanese advance into Thailand, Japan be warned. The United States, the British, and the Dutch Governments that advance indicated may lead to war; prior to such warning no joint action be taken.

"steps be taken at once to consummate agreements with the Government for the issuance of such warning."

the Secretary of State was described above, in

Question:

Was the sending of the memorandum to the Japanese Ambassadors, by the State Department did not conflict with these recommendations. The position from which we

The answer is: Not merely to threaten the Japanese with a proposal.

Question: Were the instructions given to the commanders in the Pacific area to avoid disclosure of the first act, [206] the result of instructions from such sources?

The Chief of Naval Operations, Admiral Stark, and I advised the President on the 1st of November and again on the 27th of November that in our present war with Japan should be avoided while we were building up our defensive forces in the Far East. It was essential

that we gain all the time that we could. While the instructions to avoid commission of the first overt act and alarming the population were in accordance with the policy of the Government, it is also true that this policy was in harmony with the recommendations Admiral Stark and I made to the President.

Upon whose decision was General Short relieved of Command of the Hawaiian Department?

Mine, in conjunction with the desire of the Secretary of War.

Would you furnish the Army Pearl Harbor Board a copy of the order for his relief?

Copy of the order is furnished herewith.

General RUSSELL. Do you know of any evidence to indicate that the Japanese have up until this time broken our code to the point that they are obtaining the same information relatively that we are, by observing—

General MARSHALL. What was the first of your questions?

General RUSSELL. Do you know of any evidence to this time to substantiate the fact that the Japanese may have broken our codes and may be obtaining information from us?

General MARSHALL. We have no evidence of that nature that [207] I can recall.

General RUSSELL. There has been some evidence—this is covering a detail which is apparently new—to the effect that when Nomura sent the memorandum of the 26th to Japan, that along with it he sent some statement to the effect that he had failed the Emperor, or words to that effect. Do you know anything about that message?

General MARSHALL. I don't know whether I have a faint recollection or not. I've got something wandering in my mind, but that ought to be obtainable right here in the records.

General GRUNERT. Are there any other questions regarding the questions that have been asked by the Board and answered? There appear to be none.

General, have you anything else that you would like to give to the Board that may be of assistance to the Board in coming to conclusions under its mission? For instance, you just started to mention something when we asked the last few questions.

General MARSHALL. I do not know of anything else I might give the Board to help them in arriving at a conclusion, other than to comment on the fact that at the time all this happened we were always confronted with the Japanese method of infiltration, taking advantage of our apparent reluctance to become involved in war and the British inability to give any strength to their garrisons in the Far East. We always had to guess or estimate as to what the procedure would be, whether they would proceed to an open rupture or whether they would pile up advantages to such a point that all the cards would be in their hands when the actual rupture occurred. We on our [208] side were confronted with the problem of preparing ourselves, particularly in the Philippines, Panama, and Alaska, as rapidly as possible before any break might occur. So our state of mind was measured between those general considerations throughout all of this procedure.

Further, our facilities, of course, at that time were not vaguely to be compared to our facilities and organization today, in the matter

of this secret material. We can get a mass of that culled through in a few hours by these thousands of people we have employed: some 10,000 by us and 6,000 by the Navy and 30-odd thousand by the British. No such forces as that were available in those days, and no machinery of the nature they have now.

In some respects the remarkable part about this procedure was that the critical messages were absorbed so quickly. That is the most astonishing part of it. Also, the tragic part that a message which became available—that is, monitored, transmitted, deciphered, and translated, pertaining directly to Hawaii and the Harbor—was not available, didn't come in to us until the following day.

The picture, the procedure, and of course the state of mind all have changed greatly through the period of the war. Once war is declared, you know your enemy is your enemy. The cards, as it were, are on the table and you can proceed at top speed with regard to all matters. Any problems at this time were those of uncertainty, a repetition of such incidents in the past, from the past, and our fears of what might be done in the way of a general planned arrangement or agreement between the Germans and the Japanese which would cover the [209] United States as well as our foreign garrisons.

For example, we expected, and so far as we could we were fully prepared for, a general sabotage program throughout the United States. To be of any real effect it had to happen practically all at one time, because we would suppress it, of course, wherever it arose. But we rather anticipated that would be done, and when virtually no act of any kind anywhere occurred we concluded this was held in abeyance for some more critical moment, and to that extent we became even more suspicious as to just when this, what we regarded as almost certain effort, would be made.

I do not think that helps very much toward your conclusions, but it is merely an effort of mine to reconstruct the state of mind of all of us at the period regarding which your Board is investigating.

General GRUNERT. Has the Board any subjects which they would like to bring up wherein the Chief of Staff could assist us?

General RUSSELL. It is suggested by the other members of the Board, General Marshall: there are two or three things that I shall ask about.

The Board is in possession of information recently relating to certain messages that apparently were picked up through this source that you have discussed with us rather fully, one particular message on or about December 4th which has been described as the "Winds" message. What information did you have at that time, if you can recall, about this particular message?

General MARSHALL. Well, as nearly as I can reconstruct [210] what I think my recollection is, in opposition to what I have refreshed my mind with from records since, I would say that my recollection at this time was merely that there was a "Winds" message which indicated that certain things were to be done when it was received, and there were certain phases of it that related to different nations.

General RUSSELL. Well, may I interject: On your last appearance before the Board, on Friday last, wasn't there read into the record at that time a memorandum which set forth the details about that "Winds" message?

General MARSHALL. That is correct. And I thought you were asking me about by memory?

General RUSSELL. No.

General MARSHALL. That isn't so much memory. I had gotten ahold of the records from which I was reading.

General RUSSELL. I recall that now.

Well, our second question is along the same line, and we shall just explore those phases briefly.

It has come to the attention of the Board that on Saturday night, December 6, probably as early as 9 p. m., thirteen of the fourteen sections of the Japanese reply to our memorandum of November 26 were in the possession of the Naval Department and translated and ready for delivery; that the probabilities are that that message was in the hands of some agency of the War Department on that evening of December 6. Do you recall being shown that message prior to your arrival in your office at approximately 11:30 a. m. on the morning of the 7th?

General MARSHALL. No, I don't recall that. And, [211] incidentally, I am quite certain I arrived at the office before 11:30 on that morning. My recollection is merely what I was told that morning about the deciphering and translating and preparation of this message. It was not—I don't believe it was—until I was before the Navy Court here recently that I knew this had come in, had been made available to the Secretary of State, the larger portion of that message, the night before. I may have known it at the time of the Roberts Commission, but I have no recollection of knowing that early.

General RUSSELL. The evidence which is before the Board at this time is to the effect that as early as 8:30, possibly not later than 9 a. m., on the morning of December 7th, the message which indicated that the ultimatum would be delivered by the Japanese Ambassadors at one o'clock on that day, and that the code machines were being destroyed, was in the hands of a Colonel——

General MARSHALL. Bratton?

General RUSSELL. Bratton of G-2, the General Staff, and that his energies from that time until your arrival in the office and General Miles' arrival in the office were devoted exclusively to locating you and General Miles.

Now the question: Was there anyone of the General Staff other than yourself with authority to have dispatched to the overseas departmental commanders a message which would have told them of these recent developments, and including the reply of the Japanese to our message of November 26, and particularly as to the substance of this message of December 7th relative to the delivery of the ultimatum and the destruction of the code machines?

[212] General MARSHALL. That would depend, I think, entirely on the officer concerned. There is no specific regulation about who, of those in charge of principal affairs, can do what in time of great emergency. It depends on the judgment of the individual. If the Deputy Chief of Staff were here, if the head of the War Plans Division were here, if possibly the Assistant Chief of Staff G-2 were aware of this and of the possibilities of delay, they might have acted. It is very hard to answer, because you are inevitably involved in hindsight regarding a great catastrophe, and I can only answer it in that way.

I remember very distinctly the message from Colonel Bratton because it came to me as I was coming out of a shower, as my habit was to ride at 8:30 on Sunday morning, and it takes me about fifty min-

utes to go around the only available loop to ride in. It takes me about eight or ten minutes to get a shower and dress. And when the message came from Colonel Bratton he wanted to come out there, and I said, "No. I am on my way down to the War Department." And it couldn't have been more than five or ten minutes at the outside before I had left to come down here. I have a very clear recollection of that because naturally I thought about it at the time.

General GRUNERT. From one source of evidence it appears that in the Navy there were definite instructions that such things had to come to the Chief of Naval Operations and could not be transmitted to the Commander-in-Chief of the Fleet without his O. K. We wanted to find out whether or not any such instructions were issued to the Army.

[213] General MARSHALL. We had no rules of that kind here at all, and we have no rules yet. These matters of the higher officials of the War Department are based on good common sense, for which the man is selected. If some particularly critical thing comes up—it is generally a local affairs of great political import—we will sometimes say that will not be touched.

General GRUNERT. Well, isn't this also of great political import? Was it not?

General MARSHALL. No, not—well, not political on the outside.

General GRUNERT. International, in foreign countries?

General MARSHALL. The political import I am talking about pertains purely to the home front.

General GRUNERT. Yes, sir.

General MARSHALL. And not to international affairs; talking about local reactions to specific things, and there is no immediacy involved in that.

General FRANK. Here was a message, however, where the time of its delivery by two hours would have made an awful lot of difference.

General MARSHALL. Oh, yes.

General FRANK. And they waited for the one top man to get it.

General MARSHALL. Yes.

General FRANK. And the Board wondered if there were any restrictions imposed on topside organization.

General MARSHALL. None that I know of. We haven't any such restrictions now. As a matter of fact, you will see on [214] the War Department side that two messages were sent about sabotage without my knowledge at all.

General FRANK. And by the same token by which good common sense ought to have handled it, it would seem that good common sense ought to have told somebody to have gotten that thing out.

General GRUNERT. Colonel Bratton didn't have any such authority, did he?

General MARSHALL. No, I would say that he did not.

General GRUNERT. And General Miles did not get to your conference until after you had been in the office for some time; is that right?

General MARSHALL. I don't recall that. I would say again that I do not think that Colonel Bratton could have acted on that evidence. I will say now, he certainly would not have been reprimanded for doing it, but I think that it would be expecting a good bit of him, a man who was not on the operative end at all but was merely on the transmittal end, to have taken such action.

General FRANK. There was a Major Doud the night of December 6, and copies of that message that night and the President.

General MARSHALL. Yes. Was that a part of the translation very distinct recollection of their English? Because I have this particular morning that they were explaining to me at the time during the night doing translating here had spent quite a bit of time a naval deciphered message.

General FRANK. But the Navy had delivered it in English at 9 p. m. the night before, and any translation that ensued was—

[215] General MARSHALL. Consisted of the Army checking on the naval translation. General FRANK. Therefore, it was available and delivered to the Secretary of State in the manner in which the Navy had sent and then it would seem that somebody over in the War Department was a little skeptical about the Navy translation. Yet it was a hot message and might have been used the night before.

General MARSHALL. What is your question?

General FRANK. I just wondered what, if any, check had been made on the reason for not delivering that the night before. Why was it held up from the War Department when it was delivered to the Secretary of State and the President?

General MARSHALL. I think I said, a little bit before, that I was not aware of the fact that this message had been available the night before, until, I think, the time of the Roberts Commission, and maybe not until more recently. So far as I personally was concerned, from the instant this thing happened my attention was entirely focused on recovering the situation rather than investigating and setting up things in the past, insofar as related to a defect of War Department system.

General RUSSELL. What investigations have been conducted in the General Staff—and this question is suggested by your last remark—looking to errors of omission or weaknesses in the system here in the War Department since Pearl Harbor?

[216] General MARSHALL. There have been investigations from time to time, particularly by the Secretary of the General Staff, as to procedure. He is involved in that constantly in the various sections of the General Staff of the War Department and sometimes things outside of that. There was one board consisting of about ten members, and then a steering committee consisting of Mr. McCloy, the Assistant Secretary of War, General McNarney's principal man, that is, General McNarney's executive officer, and one or two others. Hence there was a searching examination, covering several months, on organization and procedure, matters of that sort.

I have sent memorandums from time to time to the Assistant Chief of Staff G-2, particularly General Strong, in regard to improving their set-up, the rapidity of action; not directed solely to this, but to the general operations of the G-2 section; and finally it culminated in this very heavy Board that spent several months going through it. But it has been, like all the other branches of the War Department General Staff, under a pretty continuous investigation and changes all the time. But handling of this secret information, as I explained here a little while ago, has been an evolution where we struggled for the most

effective way of p.

viduals, to what extent it for the rapid unde...
 sibility of really getting it should be screened so that...
 that you did nothing but the facts and not being so...
 doing it in a way that protected things and didn't operate...
 of course, have been relieved from source. From time to time...
 they were not quick enough on the General Staff where we thought...
 display the requisite judgment in what [217] their feet and didn't.

General RUSSELL. We had in mind what did.

as my question went, I did have in mind—particularly, I assume—so far
 might have been provoked by the Pearl Harbor investigation which
 say in that connection there is some evidence being incident. And I will
 has not been evaluated to this time, that G-2 made the Board, which
 over there, but we do not have a copy. We are going to make an effort
 to get it. I didn't know whether there was any other investigation

General MARSHALL. You dropped your voice at the not.
 tence. I didn't get it. You did not know—

General RUSSELL. I say, we have not seen the investigation of the sen-
 nor do we know whether any other investigation similar in nature
 the one that we have heard about in G-2 has been made.

General MARSHALL. What was the one you have heard about?

General RUSSELL. It was our information that shortly after Decem-
 ber 7, 1941, G-2 did record a lot of things that had happened; and
 sometime later—and my impression now is, in the comparatively
 recent past—a rather thorough investigation of the situation was made
 over there.

General MARSHALL. I don't remember.

General GRUNERT. It appears to have been engendered by questions
 asked by the Board of G-2 witnesses.

General MARSHALL. Well, you mean very recently?

General GRUNERT. Yes.

General MARSHALL. Oh, yes. I thought you were talking about in
 the past here.

[218] General GRUNERT. And during what we know of that
 investigation it appears that as a result of that investigation they
 have found a lot of things that they did not transmit to the Board and
 that are just coming to the knowledge of the Board here in the last
 week.

General MARSHALL. Yes.

General GRUNERT. Not intentionally withheld, I suppose, unless
 they thought that the Board should not have these top secret matters.

General MARSHALL. The present Chief of Staff G-2 (of course, who
 was not here at the time, or was here I think in the War Plans Divi-
 sion; I don't remember; he wasn't connected with G-2) investigated,
 I believe, to determine what was the procedure at the time, because
 he couldn't answer any direct questions; and we brought Bratton
 back from overseas because he was present in the section at the time
 and, of course, General Miles was available up in Boston. That, I
 presume, is what you refer to.

General GRUNERT. Well, in a way, but we gave each one of the G-2
 witnesses an opportunity to tell the Board anything in their mind, of
 their knowledge, that may assist us in coming to conclusions. We
 have given every witness that opportunity. Now, evidently they

either forgot or didn't recall, or else at least they didn't tell us this information which we have gotten of late.

General MARSHALL. These were men that were in the G-2 at the time?

General GRUNERT. One is General Miles, included.

[219] General MARSHALL. And who?

General GRUNERT. General Miles was one of them.

General MARSHALL. Oh, yes. Well, I don't know. I have never seen Miles or talked to him.

General GRUNERT. In the Navy and the Naval witnesses we also developed the fact that at one time there was an inclination on the part of one Acting Secretary of the Navy to deny such information to the Court of Inquiry, but later on that was overruled by the Secretary of the Navy when he came back, and they therefore loosened up on that information. Of course, naturally, the Board thought that, well, if they held out from the Board information which is now coming up, what do we know but what something else is being held out?

General FRANK. And information that is rather vital, too.

General MARSHALL. Well, I don't know.

General GRUNERT. I cannot imagine that it is intentional.

General MARSHALL. The only thing that I can think of in connection with that is that everybody that is concerned with this top secret thing is very cagey about saying anything about it.

General GRUNERT. That is what I attribute it to.

General MARSHALL. And naturally he feels no freedom whatever to speak about it unless he is specifically authorized.

I have nothing else I can think of.

General GRUNERT. The memorandum of September 30, 1944, submitted to General Marshall, is as follows:

[220]

WASHINGTON 25, D. C.,
30 September 1944.

Memorandum for: General George C. Marshall, Chief of Staff.

Subject: Army Pearl Harbor Board.

1. Enclosed herewith is the list of questions which the Army Pearl Harbor Board requests be answered by you either by a signed statement (to be returned to the Board by Monday 2 October 1944) or at a rehearing (now scheduled for 1400 Monday 2 October 1944).

2. The Board has decided to record your hearing of 29 September 1944, together with any future testimony or evidence bearing on top secret matters, in a separate record as a supplement to the main record. Further, any report made by the Board with reference thereto will be separated from the main report.

3. It is requested that the Board be informed by 1200 hours Monday, 2 October 1944, whether you desire to submit a signed statement or be reheard as scheduled.

For the Board:

GEORGE GRUNERT,
Lieut. General, U. S. A.,
President.

1 Incl.

[221] Will you state the reasons, if any, which prompted you to select General Short to command the Hawaiian Department?

2. Are you sufficiently acquainted with the services rendered by him in the capacity of the Commanding General of the Hawaiian Department from the date of his assignment until the 6th day of December 1941 so as to express an opinion as to the character of such services?

3. If you have the bases for rating those services, will you please state to the Board whether or not you regarded them entirely satisfactory?

4. On the 20th day of October 1941, the War Department sent to General Short the following radiogram:

"Following War Department estimate of Japanese situation for your information. Tension between the United States and Japan remains strained but no, repeat no, abrupt change in foreign policy seems imminent."

Do you know of any other information sent to General Short by the War Department from the date of this radiogram until the 27th day of November 1941, at which time Message No. 472 was dispatched to him? If you know of any other information on the Japanese situation sent to General Short during that period of time, won't you please give the Army Pearl Harbor Board the benefit of it?

[222] 5. Do you believe that you were kept fully informed by the State Department on the development of the relations between the Japanese Empire and the American Government?

6. When were you informed of the delivery by the Secretary of State to the Japanese Ambassadors of the memorandum of the 26th of November 1941, which memorandum was described as an outline of proposed basis for agreement between the United States and Japan?

7. When did you first know that the Secretary of War was told by the Secretary of State on the morning of 27 November 1941 that he had broken the whole matter off, as he put it, "I have washed my hands of it and it is now in the hands of you and Knox, the Army and Navy"?

8. It is in the Record that you left Washington for the Carolina Maneuvers on the 26th day of November 1941. Did you prepare or direct the preparation of a message to be sent to overseas commanders prior to your departure for the Carolina Maneuvers?

9. Do you recall when you first saw the message to General Short of November 27, 1941, No. 472?

10. Do you recall under what circumstances and by whom this message was shown to you?

11. Do you regard that message as containing all of the information with respect to the Japanese and instructions necessary to be sent to General Short for [223] the accomplishment of his mission in the Hawaiian Department at that time?

12. Upon your appearance before the Army Pearl Harbor Board, Monday, 7 August 1944, you testified about the Report of General Short in response to the direction in the message of 27 November to report measures taken. In this testimony you were not certain as to whether or not you saw General Short's Report. Your language is "I have no recollection at all. The presumption would be that I had seen it."

Have you in any way refreshed your memory on this subject so as to change the answer just quoted?

13. The message from General Short making such report indicates that it was stamped in the Office of the Chief of Staff with the following entry: "Noted—Chief of Staff." It does not contain your signature. Will you please state to the Board who was authorized to place this stamp upon the message?

14. Would the placing of this stamp upon the message indicate to others in the War Department that you had seen the message and noted its contents?

15. Did you know that General Short had ordered his Command into an alert for sabotage only, and that this condition of readiness obtained during the entire period 27 November–6 December inclusive?

16. Is it now apparent that the message of 27 November 1941 from the Chief of Staff to the Commanding General of the Hawaiian Department (No. 472), was misunderstood or misconstrued by the Commanding General [224] of the Hawaiian Department and did not accomplish the desired and intended results?

17. Is it now apparent that the Report of General Short to the War Department, in compliance with the instructions in the above message to report measures taken, was misunderstood or misconstrued by the War Department and did not accomplish the desired and intended results?

18. Were any steps taken by the War Department between 27 November and 7 December 1941 to determine the state of readiness of the Command of the Hawaiian Department?

19. In your previous testimony before the Army Pearl Harbor Board you read into the record a joint statement signed by you and Admiral Stark which

was dated 27 November 1941. It is on the subject of the Far Eastern situation and is addressed to the President. The following questions relating to that joint agreement are submitted:

a. Do you know the date when this joint statement was delivered to the President?

b. Did you know at the time of its delivery to the President that the Secretary of State's memorandum of 26 November had been sent to the Japanese Ambassadors?

c. The following is quoted from that statement:

"After consultation with each other [225] United States, British and Dutch military authorities in the Far East agreed that joint military counter action against Japan should be undertaken only in case Japan attacks or directly threatens the territory or mandated territory of the United States, the British Commonwealth, or the Netherlands East Indies, or should the Japanese move forces into Thailand west of 100° East of or south of 10° North, Portuguese Timor, New Caledonia, or the Loyalty Islands."

(1) Who constituted the military authorities representing the United States in entering into this agreement?

(2) What was the extent of his authority to bind the United States to take counter action against Japan in event the contingencies described in the above quotation or any one of them should come to pass?

d. The following recommendations were made by you and Admiral Stark in this joint agreement:

"It is recommended that:

"prior to the completion of the Philippine reinforcements, military counter action be considered only if Japan attacks or directly threatens United States, British or Dutch territory as above outlined:

"in case of a Japanese advance into Thailand, Japan be warned by the United States, the British, and the Dutch Governments that advance beyond the lines indicated may lead to war; prior to such [226] warning no joint military opposition be taken.

"steps be taken at once to consummate agreements with the British and Dutch for the issuance of such warning."

Was the sending of the memorandum of 26 November by the Secretary of State to the Japanese Ambassadors, which memorandum was described above, in conflict with these recommendations?

20. Were there any restrictions imposed upon the War Department relating to its activities in the Pacific by either the President or the State Department? Specifically, were the injunctions to commanders in the Pacific area to avoid commission of the first overt act, alarming the population in Hawaii, disclosing intent, etc., the result of instructions from such sources?

21. Upon whose decision was General Short relieved of Command of the Hawaiian Department?

22. Would you furnish the Army Pearl Harbor Board a copy of the order for his relief?

(Thereupon the witness was excused, with the usual admonition.)

[227]

MUNITIONS BUILDING,
Washington, D. C.

TESTIMONY OF COLONEL RUFUS S. BRATTON—Recalled

Colonel WEST. As the witness, Colonel Bratton, is appearing again, or being recalled, and he has already been sworn, it will not be necessary to swear him again, but he is reminded he is still under oath.

Colonel BRATTON. Yes, sir.

General GRUNERT. Colonel, I think General Russell has some questions to ask, and I will turn you over to him.

General RUSSELL. Colonel, when you were here as a witness before the Board recently, you referred to a document, which you described as a secret summary of Far Eastern documents. The Board at that time

requested that you take steps to make that document available to us, as evidence; is that true?

Colonel BRATTON. Yes, sir.

General RUSSELL. Have you brought that document into the Board meeting with you today?

Colonel BRATTON. I have brought a photostat copy of the original summary, dated 20 August 1943, which is on file in War Department G-2. In addition to this document you have before you, there are 16 volumes of photographs, or photostats, of the original documents which were used in preparing this summary. They will be made available to you later, sir.

General RUSSELL. What can we obtain from those additional documents which you have referred to as 16 in number, that is not briefed and condensed in the document which you are submitting to the Board?

Colonel BRATTON. Nothing except verification of the statements contained in this summary, and knowledge as to the [228] distribution given the documents themselves. In most cases the officers or offices to whom copies of the original documents were routed are indicated on the document itself. While the distribution is not indicated on the original documents, it may be assumed that copies were sent to OPD and to ONI in every case, as that was our standard operating procedure at the time. Those documents that were thought to be of interest to the State Department, copies were sent to the State Department; those of particular interest for the Chief of Staff were shown to him; documents of interest to the Department of Commerce, copies were sent to that Department; and so on; but in every case, copies went to OPD and to ONI.

General RUSSELL. Colonel, I don't know that it is clear in the record, or to all Members of the Board, just what the relation is between the document which you have brought here, and which we are going to tender in evidence, and these 16 other volumes that you have described.

Colonel BRATTON. The 16 other volumes are the original documents upon which this summarization was based. The documents themselves in many cases have a distribution list thereon which indicates the routing of the various copies of those documents. Where no such distribution list is shown, it may be assumed that copies went always to WPD and to ONI. Occasionally, when the matter was considered sufficiently important, copies were sent to the Chief of Staff, and to the President.

General FRANK. Does this volume contain all the basic information?

Colonel BRATTON. Yes, sir.

General FRANK. And, in the back of this volume, is a list [229] of the volumes that are on file in G-2 of the War Department, the 16 volumes?

Colonel BRATTON. Yes, sir; but do not misunderstand me, it does not contain the list of all of the documents bearing on the Far East that are on file in G-2.

General FRANK. No; I am talking about the 16 volumes.

Colonel BRATTON. Yes, sir.

General FRANK. So that if, at any time, in reading this summary, this Board, or any other agency, wanted to refer to any of those 16 volumes, they could be obtained from G-2 of the War Department?

Colonel BRATTON. Yes, sir.

General RUSSELL. I introduce this document in evidence, which was produced, here, at the request of General Frank, as a Member of the Board, on September 30, 1944.

(The Summary of Far Eastern Documents, requested by General Frank, page 90, volume "B", was marked as Exhibit "A", and was received in evidence.)

General RUSSELL. Now, Colonel, let us spot these documents that are over in G-2, for a minute, that are not in this memorandum that you have just given us, these critical messages that are described as having reached G-2, and the critical messages sent by G-2, in November and early December, 1941. Where are they, now?

Colonel BRATTON. The translated intercepts, you refer to, are on file in G-2, War Department.

General RUSSELL. Do these translated intercepts indicate the time that they were received in the office of G-2 and the delivering agency?

[230] Colonel BRATTON. No, sir; they indicate in each case, however, the date of transmittal, the date and agency by whom translated.

General RUSSELL. What do you mean by the term "transmittal"—transmittal to G-2, or transmittal from G-2?

Colonel BRATTON. No, sir; from the sender to the receiver; a message from him.

General RUSSELL. I understand.

Colonel BRATTON. Just like any other telegram or cablegram would show.

General GRUNERT. Would that record also show the time that the translation was completed?

Colonel BRATTON. Yes, sir; and in practically every case that date will be approximately the day of receipt in G-2. A message might have been translated by the Navy, last night, and it would be received by G-2, the following morning; but there would be no longer gap than that.

General RUSSELL. Is there an index in G-2's office of these messages about which we are talking now?

Colonel BRATTON. That, I don't know, sir.

General GRUNERT. How, then, could they find any particular message that they are after, if the files do not show such index?

Colonel BRATTON. I cannot answer this, first-hand, General. I don't know, of my own knowledge.

General FRANK. Who is the custodian?

Colonel BRATTON. Since some time in 1942, I think.

General FRANK. Who was the custodian previous to him? Were you ever custodian of these files?

Colonel BRATTON. Yes, sir.

[231] General FRANK. When?

Colonel BRATTON. Up until some time in the early part of 1942, when the so-called "special branch" was set up in G-2 for the handling of this type of material.

General FRANK. Didn't you have them filed, indexed, and catalogued?

Colonel BRATTON. I did, sir.

General RUSSELL. What has happened to those files and indexes?

Colonel BRATTON. I assume that with the machinery they now have set up to handle this material, it is filed, indexed, cross-indexed, and catalogued in every possible way.

General RUSSELL. Have you seen any of those documents that we are now talking about since you came back to the States recently?

Colonel BRATTON. Yes, sir.

General FRANK. How did you find them?

Colonel BRATTON. I did not find them, sir. They were handed to me, one by one, to ask if I remembered seeing such and such a document, did I have knowledge of it, and so on, and so forth.

General FRANK. Was that when you were a witness before this G-2 investigating board?

Colonel BRATTON. Yes, sir.

General FRANK. You have not been allowed to get into the file by yourself?

Colonel BRATTON. I have been given everything that I asked for.

General FRANK. But you have not been roaming around in [232] those files?

Colonel BRATTON. No, sir.

General RUSSELL. Well, let us be a little more specific. When you were here last, Colonel, you talked about the message that went out to Colonel Fielder on about the 5th day of December 1941?

Colonel BRATTON. Yes, sir.

General RUSSELL. I may be incorrect, but, as I recall, you stated that you would look up that message for us and see if you could get it for us; is that true?

Colonel BRATTON. I did, sir; but I was not able to get it.

General RUSSELL. Did you see it?

Colonel BRATTON. Yes, sir; I saw it.

General RUSSELL. It is there?

Colonel BRATTON. I saw it as late as this morning.

General RUSSELL. And it is over there in the files, but they won't let you have it?

Colonel BRATTON. Well, they wouldn't let me bring it over here, if that is what you mean, sir.

General RUSSELL. Now, do you know who has issued the instructions that we are not to be given those messages, Colonel?

Colonel BRATTON. No, sir. I mean by that, I don't know the ultimate authority.

General RUSSELL. Colonel, we do want to talk to you about one or two other things, about which you do know. You were over in G-2 on the morning of December 7, 1941, weren't you?

[233] Colonel BRATTON. Yes, sir.

General RUSSELL. Do you recall what time you got into the office that morning? I think you have testified that, before, but I have forgotten.

Colonel BRATTON. I reached the office, that morning, some time between 7 and 8 o'clock, I believe, sir.

General RUSSELL. Did you know a Major Doud?

Colonel BRATTON. Yes, sir.

General RUSSELL. Was Major Doud in the office, that morning, when you reached it?

Colonel BRATTON. Not that I recall. I saw him later on in the day.

General RUSSELL. When you first reached the office, that morning, did you find the 13 of the 14 parts of the Japanese reply to Mr. Hull's memorandum of November 26, 1941?

Colonel BRATTON. My recollection is not very clear on that, sir. We kept a 24-hour watch in my section of G-2 around about this time, for obvious reasons. Certain trusted assistants of mine helped me in receiving and combing out these intercepts and arranging them for distribution, and at that time or at about that time they were coming in at all hours of the day and night, and it may be that a part of that document you refer to had reached my desk before I got there. I remember that a long message, which was the Japanese reply, in 14 parts, about 20 pages, started coming in, the afternoon of the sixth, and I delivered, that night, the parts that had come in by that time. I believe that I didn't get the last part—that is, the 14th part—until the morning of the 7th.

General RUSSELL. Whom did you deliver them to that night?

[234] Colonel BRATTON. To the office of the Chief of Staff: the ACofS; G-2; WPD; and the State Department. I gave the Secretary of State's copy to the watch officer in the State Department, with the request that it be gotten to Mr. Hull immediately.

General RUSSELL. Did you do that, personally?

Colonel BRATTON. I gave it personally to the watch officer in the State Department, in a locked pouch.

General RUSSELL. About what time?

Colonel BRATTON. I would say about half past ten, although I am not certain.

General RUSSELL. Do you recall when you placed the parts that did come in, on the desk of the Chief of Staff?

Colonel BRATTON. No, sir.

General RUSSELL. Was it before midnight?

Colonel BRATTON. I don't remember, sir.

General RUSSELL. Was it during the night?

Colonel BRATTON. It must have been, because he had it on his desk when I saw him on the morning of the 7th.

General RUSSELL. You stated, a moment ago, that you made distribution on the night of the 6th to G-2, the Chief of Staff, and the Secretary of State; was not that the effect of your testimony a moment ago?

Colonel BRATTON. Yes, sir.

General RUSSELL. Do you have any independent recollection of when you put this document on the desk of either G-2 or of the Chief of Staff?

Colonel BRATTON. No, sir; I don't remember.

General RUSSELL. Are there any records in the office of G-2 now which will show when that was done? [235]

Colonel BRATTON. No, sir.

General RUSSELL. Now, I believe you state that the next morning you saw that on the Chief of Staff's desk, referring to this long message.

Colonel BRATTON. Yes; he had a copy on his desk.

General RUSSELL. And that was about 11:25, when you saw that, there?

Colonel BRATTON. Yes, sir.

General RUSSELL. Was your testimony, on Saturday, to the effect that you waited for the Chief of Staff in the outer room of his office on that morning?

Colonel BRATTON. Yes, sir. I was either in the office of the Secretary to the General Staff, or out in the hall, waiting for the Chief of Staff to arrive.

General RUSSELL. How do you fix the time so accurately as being about 11:25 a. m.?

Colonel BRATTON. I kept looking at the clock on the wall and at my watch. I was anxious for the Chief of Staff to get there.

General RUSSELL. Then, I believe that later on, about the 10th of December, which was three or four days later, you wrote a memorandum of the occurrences, and, as I recall, there appears in that memorandum which you dictated into the record, the statement that the Chief of Staff came in, about 11:25.

Colonel BRATTON. Yes, sir.

General FRANK. Or at least, you went in to the Chief of Staff, at 11:25—which, or was it both?

Colonel BRATTON. Both. I saw him as soon as he got there. [236] I was waiting for him.

General RUSSELL. Now, when was this Clarke investigation made, that we are talking about, now? Recently?

Colonel BRATTON. It has been going on for some days, sir. I appeared before this "board", I presume it is, in G-2, on the morning of the 14th of September, for the first time, and I have talked to the members of the Board practically every day since then.

Colonel TOULMIN. Colonel, I would like to get an answer to this important question. When you got the 13 parts of this vital message from Japan, on the evening of the 6th, about 9 or 10 o'clock as I understand, and you placed a copy on the Chief of Staff's desk, why was it the Chief of Staff was not called by you or somebody else and immediately advised of the receipt of this important message, instead of waiting until some time the next morning, before his attention was called to it?

Colonel BRATTON. Those of us who had been reading these intercepts knew that this long statement from the Japanese foreign office was on the way. We suspected that it was in the nature of an ultimatum. The ultimatum itself was actually in part 14 of the message, which I didn't get until the early morning of the 7th of December.

Colonel TOULMIN. I am aware of that, but you don't answer my question. Why weren't the first 13 parts, which were considered important enough by the Navy to be delivered to the President and to every one of the important Admirals in the Navy Department, delivered by the War Department officers to the Chief of Staff, and his attention called to it, so he could [237] have taken some action upon it? That's what puzzles me.

Colonel BRATTON. You are referring, now, to the Japanese reply?

Colonel TOULMIN. To the 13 parts.

Colonel BRATTON. Yes—not to the short message?

Colonel TOULMIN. Not to the short message. I am talking about the evening of December 6, and they were in English by 9 or 10 o'clock. The President of the United States and the leading Admirals of the Navy Department all had that message before midnight, most

of them by 10 or 11 o'clock. You had it in the early evening, also. What I am trying to find out is why it was that the Chief of Staff was not called and advised, as were others, that this important document had been received. In view of the tenor of its contents, it hardly needed the 14th paragraph, to be conclusive as to its intent and contents; and why did not the Chief of Staff get that message?

Colonel BRATTON. I am trying to remember, sir, what I did with the copies that went to General Miles and General Marshall and General Gerow. I can't verify it or prove it, at this time, but my recollection is that those three officers got their copies the evening of the 6th.

Colonel TOULMIN. By "the three officers," you mean whom?

Colonel BRATTON. General Marshall, General Miles, and General Gerow. Now, it was my practice to deliver to them their copies before I went to the State Department.

Colonel TOULMIN. That was your practice?

Colonel BRATTON. Yes, sir.

Colonel TOULMIN. Did you deliver this copy, for instance, to General Marshall, personally, on the evening of the 6th?

[238] Colonel BRATTON. No; I very seldom delivered it to him, in person. I gave it to his secretary, in a locked bag.

Colonel TOULMIN. And you gave it to General Miles in what way, on the evening of the 6th?

Colonel BRATTON. I generally took them into his office and handed them to him, and if he wasn't there, I left it with the executive officer, Major, now Colonel Smith.

Colonel TOULMIN. We are now talking about the evening before, Saturday evening, December 6.

Colonel BRATTON. Yes.

Colonel TOULMIN. Is it your recollection you handed this important, long, 13-part message to General Miles on that evening?

Colonel BRATTON. Yes, sir.

Colonel TOULMIN. Is it your recollection that you handed that long, 13-part message, on that evening, to the Secretary to the Chief of Staff?

Colonel BRATTON. Yes, sir.

Colonel TOULMIN. And it is your recollection that you handed it on that evening of December 6 to General Gerow, or some representative of General Gerow?

Colonel BRATTON. Yes.

Colonel TOULMIN. Did you hand it to General Gerow directly, or to his Secretary?

Colonel BRATTON. To his executive officer.

Colonel TOULMIN. Who was he?

Colonel BRATTON. The executive?

Colonel TOULMIN. Yes.

Colonel BRATTON. Colonel Gailey.

[239] Colonel TOULMIN. And what is the name of the Secretary of the Chief of Staff?

Colonel BRATTON. Colonel Smith, Bedell Smith, now Lieutenant General.

Colonel TOULMIN. And after this, you then went over and delivered it to the Secretary of State in the locked pouch, for and on his behalf, is that right?

Colonel BRATTON. Yes, to the watch officer in the State Department.

Colonel TOULMIN. To the watch officer, about 10 or 10:30, on that Saturday evening, December 6?

Colonel BRATTON. That is correct.

Colonel TOULMIN. Now, having made these deliveries, Colonel, to these four recipients, the Chief of Staff, the Chief of G-2, the Chief of the War Plans Division, and the Secretary of State, did you get any reaction to that message, until the following day?

Colonel BRATTON. What do you mean by "reaction," Colonel?

Colonel TOULMIN. Did they answer it, did they act upon it, did they mention it, did they discuss it, did they call you, did they look at it, to your knowledge? Or, put it in the negative—did they do nothing about it, so far as you know?

Colonel BRATTON. I had some discussions of the message, as I remember now, with General Miles, indicating to him that the final part was yet to come. It did not come in until the following morning. The reaction from General Marshall was a reading and a discussion of the entire communication.

General FRANK. That night?

Colonel BRATTON. No.

[240] General FRANK. Or the following morning?

Colonel BRATTON. The following morning.

Colonel TOULMIN. Let us confine ourselves to the night of December 6, now.

Colonel BRATTON. Sir?

Colonel TOULMIN. Let us confine ourselves to the night of December 6, for the moment, at least. Now, did you talk to General Miles?

Colonel BRATTON. I did not talk to General Marshall the night of the 6th.

Colonel TOULMIN. Did you talk to General Miles on the night of the 6th?

Colonel BRATTON. My recollection is that I did, sir.

Colonel TOULMIN. You talked to him on the phone, or in his office?

Colonel BRATTON. No, I believe I talked to him in his office.

Colonel TOULMIN. And did he read this document in your presence, then and there, on the night of December 6?

Colonel BRATTON. My recollection is that he did; yes, sir.

Colonel TOULMIN. And at about what time did you hand it to him and he read the document?

Colonel BRATTON. That, I don't remember.

Colonel TOULMIN. Was it about 9 or 10 o'clock, or something of that sort?

Colonel BRATTON. I don't remember, sir.

General FRANK. Was it before you went to the State Department?

Colonel BRATTON. Yes.

[241] Colonel TOULMIN. Then it must have been somewhere between 7 and 10:30 o'clock on the evening of December 6, is that right?

Colonel BRATTON. It must have been.

Colonel TOULMIN. And did General Miles comment upon the message after he read it, to you?

Colonel BRATTON. Oh, yes! We discussed it at some length.

Colonel TOULMIN. And was anything done so far as you know about it at that time?

Colonel BRATTON. That night?

Colonel TOULMIN. Yes, that night.

Colonel BRATTON. No, sir; not that I know of.

Colonel TOULMIN. General Miles took no action in your presence to call the Chief of Staff, then, did he?

Colonel BRATTON. Not that I know of; not in my presence.

Colonel TOULMIN. Now, that leaves General Gerow. Did you have any contact with General Gerow, other than to hand it to his executive officer?

Colonel BRATTON. I don't remember that I did, sir.

Colonel TOULMIN. Did you get any reaction from General Gerow, that evening?

Colonel BRATTON. No, sir.

Colonel TOULMIN. And how about General Smith? Did you get any reaction from him, or any action, rather?

Colonel BRATTON. No. General Smith did not have access to these pouches. You mean General Bedell Smith?

Colonel TOULMIN. Yes.

Colonel BRATTON. He didn't have a key to the bag.

[242] General RUSSELL. What was his relation?

Colonel BRATTON. General Marshall's secretary.

General RUSSELL. Well, he is the man to whom you gave General Marshall's copy, was he not?

Colonel BRATTON. Yes; but it was in a locked pouch, to which General Marshall had the key.

General RUSSELL. Do you know what Bedell Smith did with it?

Colonel BRATTON. No, sir.

Colonel TOULMIN. Did you tell him that it was an important document in the locked pouch?

Colonel BRATTON. Yes, sir.

Colonel TOULMIN. And that the Chief of Staff should know about it?

Colonel BRATTON. Should see it right away.

Colonel TOULMIN. What was General Smith's response—that he would get in touch with the Chief of Staff, or would not?

Colonel BRATTON. It must have been, because if it had been otherwise, it would have registered on my memory.

Colonel TOULMIN. And about what time in the evening was it when General Smith was told there was an important document in that locked pouch for General Marshall, and that his attention should be called to it?

Colonel BRATTON. I don't remember that, sir.

Colonel TOULMIN. And that was on the evening of December 6?

Colonel BRATTON. Yes.

[243] Colonel TOULMIN. 1941?

Colonel BRATTON. Yes, sir.

Colonel TOULMIN. That is all on that, I think.

Major CLAUSEN. I have one question to the same point. Did you, after this evening of December 6, receive verification that it had been given to the Chief of Staff on the evening of the 6th of December?

Colonel BRATTON. No. I don't know whether it was or not.

General GRUNERT. In your discussion of this long message, the 13 "chapters," we will call them, with General Miles, did General Miles

personally attempt to find out what the Chief of Staff wanted to do about it, that night?

Colonel BRATTON. I don't know, sir.

General GRUNERT. I have no further questions.

Is there anything else that you think of that you now would like to acquaint the Board with? We always give every witness an opportunity to get something off his chest if he has something that he is waiting for a chance to tell.

Colonel BRATTON. Yes, sir. If you have in evidence this particular message, I strongly recommend that you secure the 30 or 40 other messages which preceded it; that is, the exchanges between the Ambassador in Washington and the foreign minister in Tokyo.

General GRUNERT. And that would lead us where?

Colonel BRATTON. And consider the picture that lay before all of our policy-making and planning officials, from the Secretary of State down through the Secretary of War, to the Chief of the War Plans Division. They all had the same picture; and it was a picture that was being painted over a period of [244] weeks, if not months.

General BRUNERT. But this culminating bit of information appeared to put the finishing touch on that picture.

General RUSSELL. There was one other "daub," as I get it—the short message which told them to destroy their code machines and to deliver the ultimatum at 1 o'clock. That was the final one, was it not?

Colonel BRATTON. Yes, sir.

General GRUNERT. I think the Board has the picture. Just how far we will go from here, we will decide.

All right. Thank you very much.

(The witness was excused, with the usual admonition.)

(Thereupon, at 5:30 p. m., the Board proceeded to other business.)

[TOP SECRET]

[246] PROCEEDINGS BEFORE THE ARMY PEARL
HARBOR BOARD

FRIDAY, OCTOBER 6, 1944.

MUNITIONS BUILDING,
Washington, D. C.

The Board, at 9:10 a. m., pursuant to recess, conducted the further hearing of witnesses, Lt. Gen. George Grunert, President of the Board, presiding.

Present: Lt. Gen. George Grunert, President; Maj. Gen. Henry D. Russell and Maj. Gen. Walter H. Frank, Members.

Present also: Colonel Charles W. West, Recorder; Major Henry C. Clausen, Assistant Recorder; and Colonel Harry A. Toulmin, Jr., Executive Officer.

General GRUNERT. The Board will come to order.

TESTIMONY OF OTIS K. SADTLER, 03577, COLONEL, SIGNAL CORPS,
GROUND SIGNAL OFFICER; WAR COLLEGE, WASHINGTON, D. C.

(The witness was sworn by the Recorder and advised of his rights under Article of War 24.)

Colonel WEST. Colonel, will you please state to the Board your name, rank, organization, and station.

Colonel SADTLER. Otis K. Sadtler, 03577, Colonel, Signal Corps; Ground Signal Officer; War College, Washington, D. C.

General GRUNERT. Colonel, in this special part of our investigation, General Russell will propound the questions, and the other Members of the Board will fill in wherever they see fit.

Colonel SADTLER. Yes, sir.

[247] General RUSSELL. Colonel Sadtler, as suggested by General Frank, I want to advise you that the evidence which you give this morning will be regarded as top secret testimony, that it is being impounded in a separate file, and is being made available to a very limited number of selected people who are on the Board or closely associated with the Board, in this investigation, with such other people as may be designated by the War Department.

What is your present assignment, Colonel?

Colonel SADTLER. Signal officer of the ground forces.

General RUSSELL. How long have you been in the Signal Corps as a signal officer?

Colonel SADTLER. About 27 years.

General RUSSELL. Where were you and what was your assignment, in 1941?

Colonel SADTLER. From January 1, 1941, until about the 7th of August 1941, I was signal officer of the Second Corps, at Wilmington, Delaware. I was then ordered to duty in the Chief Signal Office, and had charge of military codes and ciphers, the message center, training, the schools, pictorial publicity, photographic work—in general, the military end of the Signal Corps.

General RUSSELL. Colonel, in connection with the duties which you have just described as having been performed by you in the year 1941, after you came to Washington, did you see the messages concerning the relations between the American Government and the Japanese empire, which passed through the office over which you had supervision?

Colonel SADTLER. Yes, sir. In general I saw most all of [248] those messages. In other words, I saw most of the information that was obtained through our code-deciphering department.

General RUSSELL. Did you give attention to the substance of those messages at any time, or were you primarily or solely interested in a proper deciphering, interpretation, and delivery?

Colonel SADTLER. In general my position was one of operations only. In other words, we were concerned primarily with the collection of data that came to our attention through various intercept means, and we were not concerned with the evaluation or the analysis of the content of those messages.

General RUSSELL. Colonel, what agencies were in operation, intercepting data, which were placed in the messages with which your office had contact, after your coming to Washington in 1941?

Colonel SADTLER. I am not sure that I quite understand your question, General.

General RUSSELL. Well, let me express it another way. It was rather broken down into parts.

The Army had certain means for intercepting information, the Navy had certain means for intercepting information, and the information thus intercepted reached the agency over which you had control, for processing; is that true?

Colonel SADTLER. Yes, sir. The two agencies that had a complete exchange of information, due to agreements that were made between the two services, were the Army and Navy. The Federal Communications Commission had an intercept service, as also did the Coast Guard, but that was under the Navy at the time, so I suppose you can call them a Navy agency.

General RUSSELL. You have referred to a working plan or agreement between the Army and Navy. Briefly, what was that?

[249] Colonel SADTLER. That any information we obtained, we gave them a copy, and anything which they obtained, they gave us a copy; and whenever our translators were on duty and theirs were not, or theirs were on duty and ours were not, the stuff would be exchanged, for processing.

General RUSSELL. What was the history as it relates to the number of messages reaching you, or those associated with you, for processing, late in November and early in December 1941, relating to the Japanese-American negotiations? Did they become more numerous, or fewer?

Colonel SADTLER. Yes, sir; the messages regarding the relations between Japan and the United States did increase materially.

General FRANK. On what date? Leading up to what date, about?

Colonel SADTLER. I don't know. It seems to me that when I first came to the office, I was warned that the messages beginning to come, on the relations between Japan and the United States, were getting more tense, the condition.

General FRANK. Who warned you of that?

Colonel SADTLER. General Mauborne, the retired Chief Signal Officer at that time. The information began to assume rather serious proportions regarding the tense and strained relations between the two countries, and the number of messages about warnings of conditions that might obtain in case of hostilities really reached a climax around the middle of November, to such an extent that we were of the opinion that there might be a declaration of war between Japan and the United States on Sunday, November 30. This, as you all know, proved to be a [250] "dud," and on Monday, December 1, if I recall the date correctly, messages that morning began coming in from Tokyo telling the consuls to destroy their codes and to reply to Tokyo with one code word when they had so complied with their directive. If I recall correctly, that word was "Haruna." It is the same name as that battleship that Colin Kelly was alleged to have sunk.

About December 3, Tokyo notified the embassy pertaining to the destruction of their codes, at once.

General FRANK. The embassy in Washington?

Colonel SADTLER. The Japanese embassy in Washington, regarding the destruction of their codes. Now, those messages were important as showing the trend of conditions.

Along about November 20—this date I am not sure about—somewheres after November 20 there was a message I think intercepted by the Federal Communications Commission, one in voice, and one in CW, to the effect that the Japanese were notifying their nationals of possible war between Japan, Great Britain, the United States, and Russia. This message stated upon the advent three code words would be broadcast; one meaning "north wind cold," "east wind rain," "south wind fair," or anyhow, there were three messages that had meteorological data contained therein, and these three messages, the first word meant "Japan and United States," "Japan and Russia," "Japan and Great Britain," would go to war, and they were notifying their nationals throughout the world that when this "Winds" message as it has been now called was implemented, war would be declared between Japan and one of those three countries.

I made arrangements at that time, through Colonel Wesley [251] Guest, who was one of my officers, to contact the Federal Communications Commission to ask that their intercept service listen in, in Japanese broadcasts, for the implementation of that particular message. The Federal Communications Commission complied, and arranged for a telephone communication between their broadcast station and Colonel Bratton, who was the liaison officer between our Code and Cipher section and G-2, and, if I remember rightly, he was the officer in charge of the Far Eastern force at that time.

General FRANK. Just for the purpose of keeping the record straight, he was the liaison officer between G-2 and your Code and Cipher section, is that correct?

Colonel SADTLER. Yes. In other words, all information that we obtained we turned over to Colonel Bratton.

General FRANK. Go ahead.

Colonel SADTLER. We paid a great deal of attention to that message, and then when the directive came from Tokyo regarding the destruction of codes, that message began to assume some importance, or a great deal of importance.

General FRANK. That is, in the estimation of the people who were handling it?

Colonel SADTLER. That was in the estimation of General Miles, Colonel Bratton, and myself; others, maybe; I don't know.

On the morning of the 5th of December, Admiral Noyes, who was Chief of Naval Communications at that time, time, called me, about 9:30, with words to the effect, "Sadtler, the message is in!" I asked him which one it was, and he said he didn't know, but he thought it was the one that meant war between Japan and Great Britain. I asked him for the Japanese word, and he said he [252] didn't know it, but to please tell G-2.

I went immediately to General Miles's office and told him that the word was in. He said, "Wait a minute, I will call Colonel Bratton," and in a very short while Colonel Bratton came into the office, and we sat down at General Miles's desk. There were General Miles, Colonel Bratton; some officer, I don't know who it was. I think he has since been identified as General Roderick, who is now dead; and myself.

I then reported what General Noyes had told me, and Colonel Bratton took out his little notebook, and he said, "Which one of these three words is it?" And I said, "I don't know, but Admiral Noyes says it is the one meaning war between Japan and Great Britain." "Well," he said, "do you think you can verify that word? This may be a false alarm." I says, "I will go back and call Admiral Noyes on the secret phone."

I got Admiral Noyes, and he said, "I don't know," and I said, "Can you verify it?" He said, "I can't do it right now, as I have to attend a meeting in the Office of the Chief of Naval Operations," or some place, I don't know where; but he was unable to verify that at the time, "and," he says, "I will do it later." I says, "I think 'later' will be too late!" I went back to General Miles's office and told them that Admiral Noyes was unable to verify the word at that time, that he had to go to a meeting, but he was positive that it was the word meaning Japan and Great Britain, and it was the implementation of that "Winds" message. I would like to add here that my memory is a little bit faulty as to whether it was not Japan and Great Britain. It may have been Japan and Russia, but I am positive it was not Japan and the United States.

[253] I went back to my office. Rather, General Miles said. "Well, I don't know what we will do. You keep on the lookout for anything that comes in and let us know just as soon as possible."

I went back to the office, and then I went down to see General Gerow, who was head of the War Plans, told him to the effect of what Admiral Noyes had said, and didn't he think we should send a message to Hawaii. I don't mean Hawaii—to Panama, the Philippines, and Hawaii. He says, "I think they have had plenty of notification." And the matter dropped.

I then went in to the Secretary of the General Staff and talked to Colonel Smith about the same thing, and he asked me what I had done, and I told him I had talked to G-2 and War Plans; and he didn't want to discuss it further.

Some time about—I don't know whether it was the 5th or 6th of December, or at that period, Tokyo notified the Japanese embassy at Washington to destroy their remaining codes, which was done on Saturday afternoon, and duly reported in the Sunday STAR on December 7.

General RUSSELL. Have you finished that line, Colonel?

Colonel SADTLER. Yes, sir; I think that is enough.

General RUSSELL. I wanted to ask one or two questions about it. Now, Colonel, as I understand your testimony, you had accomplished your mission or fulfilled your job when you delivered these messages to the office of G-2, is that correct?

Colonel SADTLER. Yes, sir.

General RUSSELL. On this particular day of December 5, 1941, you went further, and discussed the message with Gerow, of the War Plans Division, and Smith, who was Secretary of the [254] General Staff?

Colonel SADTLER. Secretary of the General Staff.

General RUSSELL. Would you tell the Board why you went the "second mile" and discussed this message with the War Plans Division and Secretary of the General Staff?

Colonel SADTLER. I was sure war was coming, and coming very quickly. On December 4—that's Thursday—I represented the Chief Signal Officer at the Defense Communications Board, which was composed of Mr. Fly, Mr. Breckinridge Long; Assistant Secretary of the Treasury, Mr. Gaston; the Chief Signal Officer, and the Chief of Naval Operations.

Just before that meeting, Mr. Gaston asked me what I thought about war being declared, and I said that I thought they would have war within 48 hours. He turned to Captain Redmont, who represented Admiral Noyes at that meeting, and asked him what he thought, and he said he agreed with Colonel Sadtler.

General RUSSELL. Then your reply to the question that I asked, requesting the reason for your going to Gerow and Smith, is that you felt that war was very imminent, and, prompted by that feeling, you communicated with these two operating officers?

Colonel SADTLER. That's about right; yes, sir.

General RUSSELL. And in the conversation with Gerow, you suggested action, which he gave his reasons for not taking?

Colonel SADTLER. Which were to the effect that they had had plenty of warning.

General FRANK. Was there anybody besides Miles, Bratton, Gerow, and Bedell Smith, with whom you talked about this matter?

Colonel SADTLER. Except that unknown officer, who was in General Miles's room, that day.

[255] General FRANK. That you thought was Roderick?

Colonel SADTLER. Which I thought was Roderick.

General FRANK. That constitutes the whole coterie with whom you had any discussion about this?

Colonel SADTLER. I think so.

General GRUNERT. And, of course, the Navy.

General FRANK. I am talking about the Army.

General RUSSELL. Now, about one or two other messages, Colonel. Do you have any recollection of messages which may have reached the agency that you were controlling and have described, on the evening of December 6 and the morning of December 7? I will identify them a little further.

It has come to the attention of the Board that some time on the evening of December 6, probably around 9 or 10 o'clock, there were received by some government agency the first 13 of 14 parts of the reply of the Japanese government to Mr. Hull's note of November 26, 1941. Did that clear through your agency?

Colonel SADTLER. I don't know, sir.

General RUSSELL. It is also in the record that some time in the morning, December 7, the last, the 14th part of this reply reached War Department agencies, and the time for delivery of the entire reply was received in a message, as well as some further instructions about the destruction of codes or code machines. Do you have any recollection of those December 7 messages which I have described?

Colonel SADTLER. No, sir; I did not go to work on the morning of December 7.

General GRUNERT. How about the night of the 6th? Were you there?

[256] Colonel SADTLER. No, sir; I was not. I heard about these things after that, on about the 8th or 9th, General. I did not know anything about them at the time.

General RUSSELL. Now, Colonel, in order that the questions which I am about to ask may be intelligible to you—and you may supply in your answers such deficiencies as exist in my questions, because I am unfamiliar with the subject—I want to state to you that on the 5th day of December 1941, G-2 states that a message was sent to G-2 of the Hawaiian Department, Colonel Fielder.

The substance of that message may be material or immaterial. It was to the effect that Fielder contact Rochefort, of the Navy. It has come to the attention of the Board, informally, to this time, that Colonel Fielder, G-2 of the Hawaiian Department, has denied rather recently that he received that message.

Now, the questions. Would there be in the records of the transmitting agency, to-wit, the signal set-up here at Washington, any information, or the lack of information, which would indicate the delivery or non-delivery of that message which I have just described?

Colonel SADTLER. No, sir.

General RUSSELL. At the time of the sending of the message, assuming that it was December 5, 1941, would there have been in the message center or elsewhere in Washington information indicating that this alleged message had reached the receiving agency in Honolulu?

Colonel SADTLER. Yes, sir.

Colonel RUSSELL. Had that message not reached the receiving agency in Honolulu, what would have been its impact [257] on the system here in Washington?

Colonel SADTLER. There would have been a number missing, in the series of messages sent on that trick.

General RUSSELL. What steps would have been taken to determine just what happened to the missing message, on this end?

Colonel SADTLER. There would have been a complete search made of everything, to find out where that message had been mislaid.

General RUSSELL. Do you know whether or not there was a missing message to Honolulu on that day, and whether or not a search was made to determine the facts surrounding such missing message, if one in fact developed?

Colonel SADTLER. No, sir. I did not know, nor did I hear, of anything concerning a missing message on that date.

General RUSSELL. Is it possible for you at this time, or for anyone else, to make an investigation in the message center or signal service in Washington and determine whether or not there was a missing message to Honolulu on that day?

Colonel SADTLER. I doubt if that information could be obtained today, in so far as the Signal Corps, there, is concerned.

General RUSSELL. Do you think that if a message, transmitted from your agencies in Washington on the 5th of December 1941 to Honolulu, had not reached the receiving agency—I am referring to the receiving signal agency, now, in Honolulu—that such fact would have been called to your attention, had such message not been discovered?

Colonel SADTLER. I doubt it. It would probably have been—it was Colonel French's business to keep track of those [258] messages. He was actually in charge of the message center, at the time.

General FRANK. He was the man immediately in charge?

Colonel SADTLER. That is right; the man immediately in charge of the message center at that time.

General RUSSELL. Is there anything else you might say on that line which would enlighten us on this investigation which we are now making, as indicated by our questions to you?

Colonel SADTLER. As far as that message is concerned, I think there is a presumption of law, isn't there, that a letter mailed is always received at its destination? I think there is less chance of the message being lost, less chance of messages being lost, than of a letter mailed being lost.

General RUSSELL. I believe those are the questions that I had outlined to ask this witness. There may be something else.

General GRUNERT. Are there any other questions?

Is there anything else that you think of along this subject, that you think you ought to unburden yourself on to the Board? Ofttimes there exists something that the witnesses would like to say that they sometimes do not say, because they have not been asked questions.

General FRANK. Or, it may be, they have not been asked the right question.

General GRUNERT. Probably true. And if there is any other information that you could volunteer that might help us, we would be glad to get it.

Colonel SADTLER. No, sir; I don't think of anything, right now.

General GRUNERT. All right.

[259] Colonel SADTLER. I can do a lot of talking, General, on things that I don't know anything about.

General GRUNERT. That is what people usually do.

All right. Thank you, very much.

(The witness was excused, with the usual admonition.)

2434 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

General GRUNERT. At this time I would like introduce into the secret record a series of communications, the first of which is a letter of September 29, 1944, addressed to the Honorable Henry L. Stimson, Secretary of War, signed by Walter C. Short.

(The letter from Walter C. Short to Hon. Henry L. Stimson, Secretary of War, dated September 29, 1944, is as follows:)

Copy

(Stamped:) SECRET

3141 SOUTHWESTERN BOULEVARD,
Dallas 5, Texas, September 29, 1944.

Honorable HENRY L. STIMSON,
Secretary of War, Washington, D. C.

DEAR MR. SECRETARY: The testimony which was taken before the so-called Roberts Commission and that currently being taken in the hearing now pending before the Army Pearl Harbor Board was recently made available to me. Upon examining these records, to which none of the exhibits have been attached, I fail to find a disclosure of certain vital information which high Washington officials appear to have had prior to December 7, 1941, of the imminence of an attack by the Japanese. Such [260] information was not made available to me in the exercise of my command in the Hawaiian Islands. As I understand that the Army Pearl Harbor Board is now about to complete its hearings and since this important factual data is not included in the testimony of the Board thus far furnished to me, I feel compelled to call this matter to your attention.

From statements in the records of these two hearings, it is to be noted that a knowledge of pertinent facts which are not later disclosed in the record is inferred. This important factual information is essential to a full appraisal of the situation. I specifically refer to the following instances: On pages 318 and 319 of the testimony taken before the Roberts Commission the questions asked by Justice Roberts indicate that as chairman of the commission he was in possession of facts of the utmost importance to this case which pointed to a definite warning of an attack against Pearl Harbor which apparently was known to officials in Washington from certain intercepted Japanese code messages. So far as I have been able to learn these facts are not a part of the record of these hearings.

Again in the testimony of Admiral Kimmel before the Army Pearl Harbor Board (Vol. XVI, page 1811) it is clearly indicated that certain vital information was in the hands of the War and Navy Departments regarding the imminence of an attack, which information was certainly not transmitted to me. The information upon which he based this statement is likewise not a part of the record of the hearings. Without a doubt he would not have made such a statement if he did not have evidence to support it.

[261] It is also respectfully pointed out that General Marshall had some important information on which he relied at the time he sent me the coded telegram (referred to at Vol. IV, page 309, of Pearl Harbor Board testimony) under date of December 7, 1941, which unfortunately did not reach me until seven hours after the attack. The information upon which General Marshall must have relied in sending this message likewise does not appear in the record before the Board thus far furnished me.

The facts upon which these actions and statements were based clearly go to the very essence of the present inquiry. I believe, therefore, you will readily agree that a full and complete disclosure of all the information which was in the hands of Washington officials prior to December 7, 1941, with regard to the imminence of an attack, should be obtained and made a matter of record in the proceedings of the current investigation as they are of the utmost importance in appraising this entire situation.

As the perfecting of the record in this investigation is of course of great importance to me personally, I urge that no steps be left unturned to make a complete investigation of the same, so that all of the evidence concerning this matter is in the record of the hearings of the Board. It is therefore urgently requested that the Board delay the completion of its proceedings until such time as this can be accomplished. In this connection I request also that my counsel be given access to all War Department records which would be pertinent to this matter.

Furthermore, if a thorough investigation of the War [262] Department records by the Board and by my counsel do not disclose the facts and evidence upon which the statements and actions above referred to were made, I request

that an appropriate call be made upon any other source which might have such pertinent information, particularly the Navy Department, and that they be required to furnish and make all such evidence available to the Board and to my counsel.

The War Department has denied my request to have a representative at the Board proceedings and to cross-examine witnesses and therefore unless my requests herein is granted there is no means available to me by which I may be assured that all the pertinent evidence will be made available to the Board and to me.

Sincerely.

/t/ WALTER C. SHORT,
Major General, U. S. Army, Retired.

(Stamped:) SECRET.

General GRUNERT. The next is a letter of October 2, 1944, to Major General Walter C. Short, U. S. A., Retired, signed by Henry L. Stimson, Secretary of War.

(The letter from Henry L. Stimson, Secretary of War, to Major General Walter C. Short, U. S. A., Retired, dated October 2, 1944, is as follows:)

(Stamped:) CONFIDENTIAL

OCTOBER 2, 1944.

Major General WALTER C. SHORT, USA, Retired,
3141 Southwestern Boulevard,
[263] Dallas 5, Texas.

DEAR GENERAL SHORT: Your letter of 29 September 1944 is being placed in the hands of the Army Pearl Harbor Board.

This Board was appointed by my order to ascertain and report to me the facts relating to the attack upon the Territory of Hawaii on 7 December 1941, and to make such recommendations as it may deem proper. You may therefore rest assured that the Board is exploring all sources of evidence bearing upon the subject.

I am directing General Grunert to permit your Military Counsel to examine its exhibits in the presence of a member of the Board. No copies of these exhibits, however, may be made.

I am also directing that appropriate warnings relating to military security be given to your counsel for the information and guidance of all concerned.

Sincerely yours.

(Stamped) HENRY L. STIMSON,
Secretary of War.

(Stamped:) CONFIDENTIAL.

General GRUNERT. The next is a memorandum of October 3, 1944, "WDOSA 201 Short, W. C. (2 Oct. 44)," entitled "Memorandum for General Grunert," from the Deputy Chief of Staff.

(The "Memorandum for General Grunert," from the Deputy Chief of Staff, dated October 3, 1944, is as follows:)

[264] (Stamped:) CONFIDENTIAL.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington 25, D. C., October 3, 1944.

WDOSA 201 Short, W. C. (2 Oct 44)

Memorandum for General Grunert:

Enclosed is a copy of a letter dated September 29, 1944, signed by Major General Walter C. Short, Retired, along with a reply to General Short which has been signed by the Secretary of War.

The Secretary of War directs that these be forwarded for appropriate action by your Board.

/s/ Joseph T. McNarney,
/t/ JOSEPH T. MCNARNEY,
Lieutenant General, U. S. Army,
Deputy Chief of Staff.

Enc.

(Stamped:) CONFIDENTIAL.

2436 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

General GRUNERT. The next is a top-secret letter dated 3 October 1944, to the Deputy Chief of Staff, from the President of the Army Pearl Harbor Board.

(The letter to the Deputy Chief of Staff, U. S. Army, from the President of the Army Pearl Harbor Board, dated 3 October 1944, is as follows:)

(Stamped:) TOP SECRET.
[265]

WAR DEPARTMENT,
HEADQUARTERS ARMY PEARL HARBOR BOARD,
4747 Munitions Building, Washington, 3 October 1944.

SECRET.

Subject: Army Pearl Harbor records.

To: Deputy Chief of Staff, U. S. Army.

1. Reference: Memorandum of October 3, 1944 (WDOSA 201 Short, W. C. (2 Oct. 44) to me as President, Army Pearl Harbor Board, with which you inclose a copy of a letter dated Sept. 29, 1944, from Major General Walter C. Short, retired, along with a copy of the reply thereto by the Secretary of War, and in which it is stated: "The Secretary of War directs that these be forwarded for appropriate action by your Board."

2. The Secretary of War in his reply of October 2, 1944, to General Short, states in part:

"I am directing General Grunert to permit your Military Counsel to examine its exhibits in the presence of a member of the Board. No copies of these exhibits, however, may be made."

"I am also directing that appropriate warnings relating to military security be given to your counsel for the information and guidance of all concerned."

3. In the course of its investigations the Board, only recently, ran across some leads to information pertinent to the issue which when developed resulted in testimony and some exhibits concerning matters which in the past have [266] been and continue to be of the utmost secrecy, the disclosure of which might disrupt and at least seriously delay our war effort.

To guard these secrets and to avoid any possible disclosure thereof by the Board in its basic report and exhibits, the Board informed the Chief of Staff that all testimony and exhibits relating thereto, together with the Board's report thereon, would be placed in a secret supplement (stamped:) TOP SECRET

(Page:)

-2-

to the basic report, and that all stenographic notes would be impounded and filed therewith. Further, from inception to completion such records are known only to members of the Board and to three reporters and not to others connected with the Board and one member of the Board has been specially charged with their safeguarding.

4. In view of the above the Board requests authority to withhold from General Short and his counsel the records referred to, both as to copies of transcripts of testimony and exhibits.

5. It is requested that the decision with reference to the subject matter of this letter be communicated to the Board in writing.

6. *Please expedite.*

For the Board.

[t] GEORGE GRUNERT,
Lt. Gen., U. S. Army, President.

GG/ehp

[267] General GRUNERT. The next is a memorandum of 4 October 1944, to the President of the Army Pearl Harbor Board, from the Deputy Chief of Staff.

(The memorandum for the President of the Army Pearl Harbor Board, from the Deputy Chief of Staff, dated 4 October 1944, is as follows:)

(Stamped:)

CONFIDENTIAL.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington 25, D. C., 4 October 1944.

Memorandum for the President, Army Pearl Harbor Board:

Subject: Army Pearl Harbor Records.

1. In your letter of 3 October 1944, subject "Army Pearl Harbor Records", the Board requested authority to withhold from General Short and his counsel

certain highly secret records. This request in effect asked that the Secretary of War reverse the decision which he made in his reply of October 2, 1944, to General Short, particularly that part of the reply which you quoted in your letter.

2. You are informed that the Secretary of War thoroughly considered this question prior to his reply to General Short and is not disposed to reverse his considered opinion.

3. It is desired, therefore, that the Army Pearl Harbor Board comply with the instructions of the Secretary of War as issued.

[s] Joseph T. McNarney,
[t] JOSEPH T. MCNARNEY,
Lieutenant General, U. S. Army,
Deputy Chief of Staff.

(Stamped :) CONFIDENTIAL.

[268] General GRUNERT. The final one is a statement of warning issued to Brig. Gen. Thomas H. Green, Military Counsel for General Short, in compliance with the directive of the Secretary of War, as contained in the last paragraph of his letter of October 2, 1944, to Major General Short, Retired.

(The statement of warning to Brig. Gen. Thomas H. Green, military counsel for General Walter C. Short, is as follows:)

Statement of warning issued to Brig. Gen. Thomas H. Green, Military Counsel for General Short, in compliance with the directive of the Secretary of War as contained in the last paragraph of his letter of October 2, 1944, to Major General Walter C. Short, U. S. A. Retired. (Transcribed on page ----, volume ----, this record.)

General GRUNERT. General Green, I hand you for perusal a copy of the Secretary of War's letter of October 2, 1944, to General Short, the last two paragraphs of which read as follows:

"I am directing General Grunert to permit your Military Counsel to examine its exhibits in the presence of a member of the Board. No copies of these exhibits, however, may be made.

"I am also directing that appropriate warnings relating to military security be given to your counsel for the information and guidance of all concerned."

In my capacity as President of the Board I wrote the Deputy Chief of Staff in effect to ascertain whether this directive of the Secretary of War included the Board's top-secret file. He replied in effect that it did.

[269] So I now inform you concerning this file.

The Board has taken testimony and has some exhibits which deal with ultra-secret matters. These are in a separate file and record.

I explain to you briefly that the matters so considered as top secret are of the utmost value to the United Nations' war effort. Any disclosure concerning them or even a suggestion of their existence may cause a serious disruption of the war effort and at the least may delay the winning of the war for many months.

These secrets pertain primarily to the breaking of the enemy codes and ciphers and intercepts thereof of which the enemy does not appear to have knowledge and which are daily in use and which periodically result in victories for our side. They are as vital now as in 1941.

But very few persons have this knowledge, which is most zealously guarded, and every additional admission to the group having such knowledge adds to the danger of leaks.

This is the "warning" which applies to the paragraph referred to in the Secretary's letter. In addition thereto I warn you regarding the necessity of safeguarding other secret information which you may glean from the files of other exhibits.

A strict interpretation of the authority granted by the Secretary of War in his letter of October 4, 1944, to General Short limits this authority only to you as General Short's Military Counsel. While I realize that you may desire to communicate with General Short on information gleaned, I must caution you that General Short has not been granted the [270] authority to know what has been disclosed to you in this warning to you nor to be informed of what you glean by an examination of the secret records and files. If such authority is desired I can only refer you to the Secretary of War.

Now do you solemnly swear that you have been appropriately warned relating to the military security concerning these matters. So help you God. If so, please sign this statement.

Done at Washington, D. C., this 5th day of October, 1944, and signed in the presence of the co-signed, Lieutenant General George Grunert, President Army Pearl Harbor Board.

/s/ Thomas H. Green,
/t/ THOMAS H. GREEN,
Brigadier General, U. S. Army,
Military Counsel for General Short.

/s/ George Grunert,
/t/ GEORGE GRUNERT,
Lieutenant General, U. S. Army,
President, Army Pearl Harbor Board.

(Brief recess.)

[271] **TESTIMONY OF LT. COL. ERNEST W. GIBSON, GENERAL STAFF CORPS; M. I. S., G-2, PENTAGON BUILDING, WASHINGTON, D. C.**

(The witness was sworn by the Recorder and advised of his rights under Article of War 24.)

Colonel WEST. Colonel, will you please state to the Board your name, rank, organization, and station?

Colonel GIBSON. Ernest W. Gibson, Serial No. 0175884, Lieutenant Colonel, General Staff Corps; at present on duty in M. I. S., in G-2, Pentagon Building, Washington.

General GRUNERT. Colonel, in this particular part of developing just a few points in our investigation, General Russell will propound the questions, and the other members of the Board will ask such as may occur to them.

Colonel GIBSON. Yes, sir.

General GRUNERT. General Russell.

General RUSSELL. Colonel, within the past few days have you been given a special assignment by G-2 to develop certain information relating to the Japanese-American relations in the year 1941?

Colonel GIBSON. Yes, sir.

General RUSSELL. Have you examined the files of G-2 for the purpose of developing that information?

Colonel GIBSON. I have examined some of the files of G-2; I should hate to say I had examined them all, because they are pretty well spread around, but I have made or caused to be made a rather extensive search of the files.

General RUSSELL. Have you had a conference with me, or conferences with me, in the last two or three days for the purpose of giving to me the benefit of that search and aiding [272] me in selecting from that the data which I thought should be brought to the attention of the Board?

Colonel GIBSON. Yes, sir. Day before yesterday, in the first instance, and yesterday a rather lengthy conference in which certain lines of evidence were indicated to be desired, and we agreed on what you would like to have, and I went to work to get it together for you.

General RUSSELL. You did have copies furnished of the information which I requested, and have delivered those copies to me?

Colonel GIBSON. Yes, sir. You delivered two letters yesterday that were for the approval of General McNarney, and the material requested by you in those two letters, save for an analysis that Colonel Clarke and myself are in the process of making, has been delivered to you.

General RUSSELL. Is it your expectation to deliver us that analysis as soon as it is completed by you and Colonel Clarke?

Colonel GIBSON. Yes.

General RUSSELL. Specifically, Colonel, I made a request about the existence in the files of the G-2 section of a message which is referred to at times as the implementing "Wind" message.

Colonel GIBSON. Yes.

General RUSSELL. Would you please state for the record whether or not you made a search for such implementing message in the records of G-2?

Colonel GIBSON. Sir, we made an exhaustive search. When the "Winds" message so-called was first received by G-2, the [273] records indicate that the F. C. C. was asked to monitor for that message; and shortly thereafter, early in December, I think the second—my memory may be faulty, but I think it was the second—the Army Signal Corps itself started to monitor for the "Winds" implement message, and there is absolutely no record or absolutely no evidence of any kind to indicate that either the Army Signal Corps or the F. C. C. received an implementing message to the "Winds" message prior to the instant of the attack on Pearl Harbor.

General RUSSELL. Thank you.

Before we go to the second request, do you want to ask him on this?

General FRANK. No.

Colonel GIBSON. I might go on further on that same line. There is no record either, of any shape, that the Army G-2 or the Army Signal Intelligence, which was then working very closely with Naval Communications, ever received from the Navy any implementing message. That is, in the ordinary course of procedure at that time the Navy furnished the Army copies of messages, and they were numbered. There are no missing numbers; there is nothing to indicate that any such thing was ever furnished the Army by the Navy.

General RUSSELL. Go to another message.

General FRANK. Just a minute. Is there anything to indicate that there was any message sent over there by the F. C. C.?

Colonel GIBSON. There were certain messages sent by the F. C. C., General, but they were not, upon analysis, implements of the "Winds" message. They were—I believe on two occasions the F. C. C. sent over messages that they had intercepted, but [274] they were not in the "Winds" code, when analyzed. And so my answer to you is: No, there was nothing ever received by the War Department from the F. C. C. prior to Pearl Harbor which was an implementation of that "Winds" message.

General RUSSELL. Well, Colonel, in order that this may be general and all-inclusive, I will ask you whether or not in your search you have discovered any record at all in the office of G-2 which might be construed as implementing the "Winds" message.

Colonel GIBSON. Absolutely none.

General RUSSELL. Now, there was a second message to which attention of G-2 was directed, that related to information on the presence in the Mandated Islands at some time shortly before December 7, '41, of a Japanese task force in which were aircraft carriers. Did you make a search for a record of that sort of information in G-2?

Colonel GIBSON. Yes, sir. There is a record of a document prepared by the A. C. of S. G-2 for the Chief of Staff based on information furnished by O. N. I. of the Naval Department, which indicates some naval concentrations in the Marshalls and at certain other areas as well.

General RUSSELL. Does that memorandum to the Chief of Staff indicate aircraft carriers in that task force or in that assembly of naval strength in the Marshalls?

Colonel GIBSON. May I look at this book to refresh my recollection? I am not sure whether it does or not. I am not even sure that this is in there. Yes, here it is.

No. The answer is "No."

General RUSSELL. "No." All right. Thank you.

[275] Colonel GIBSON. I might say, searching the records for that information, most of that information came to O. N. I. from the—in fact, all of it from the 14th Naval District, which is at Hawaii.

General RUSSELL. I have no further questions of the Colonel.

General FRANK. There is information available that there was an implementing message flashed by the Japanese. Are you conversant with the fact that such information exists?

Colonel GIBSON. I have got it second-hand, General, from sundry reports in the Navy Department, that such did exist. I have no first-hand knowledge of it; no, sir.

General FRANK. Do I understand that you are making an investigation, a survey, on the messages that were passed along about the time war was declared?

Colonel GIBSON. We are making, for G-2's own purposes, studies for future use and analysis of the sources that were available to G-2 between October 1, '41, and Pearl Harbor, what those sources revealed, what dissemination or use was made of the information revealed from those sources.

General FRANK. Well, the facts seem to be, from testimony before the Board, that Admiral Noyes received a report with respect to the reception of an implementing message. Do you have that information?

Colonel GIBSON. Yes, sir; I have heard—I have it second-hand; yes, sir. I have a story from the Navy that is entirely second-hand, sir. I am perfectly willing—

General FRANK. Now, another thing: There was an arrangement through which the Army received a copy of every [276] message—they were supposed to receive a copy of every message pertaining to this situation that was received by the Navy, and the Army sent to the Navy a copy of every message pertaining to this situation that was received by the Army.

Colonel GIBSON. Yes, sir. We have searched the numbers very thoroughly to see if there is anything missing, and, General, there isn't.

General FRANK. Therefore, the only information available seems to be verbal information on the memory of the people who are here who were concerned with that at the time?

Colonel GIBSON. Yes, sir.

General FRANK. Is that correct?

Colonel GIBSON. Yes, sir. And the only information I have been able in my investigation to dig up is information that Colonel Sadtler

and Colonel Bratton have testified—and I assume they have testified here—except I have a story from the Navy Department.

General FRANK. What is that?

Colonel GIBSON. It is hearsay.

General FRANK. Well, that is all right. Let us have it as hearsay, then.

Colonel GIBSON. The story is, as it was told to me, that an implementing message did come in the night of 3-4 December to the Navy Department, was picked up by a naval station on the East Coast; that on seeing it either Commander McCullom, who was in O. N. I. at the time, or Admiral Wilkinson became greatly disturbed and drafted a serious warning message of about 500-word length; that Admiral Wilkinson took that message to Admiral Noyes, and Noyes said, in substance, "They [277] have been alerted enough," and disapproved sending that. Wilkinson disagreed with him thoroughly and said, "It ought to be sent, and I am going higher." And he left Admiral Noyes' office and went to either Admiral Stark or Admiral Ingersoll and whatever happened after that I don't know, I didn't get, but the message apparently was never sent.

General FRANK. But so far as any written, typewritten, or printed record is concerned, there is absolutely nothing existing that can be located on this subject?

Colonel GIBSON. As far as I know. And I assure you we have made a very careful search. I can even give you a written certificate of the search that we had made in certain places.

General GRUNERT. And your search indicated to you, because of the lack of any missing numbered files, that probably that message, if there was such a message, had never been received by G-2?

Colonel GIBSON. That is what it indicated to me, sir. Yes, sir.

General GRUNERT. Are there any other questions? (No response.)

Do you think of anything else that you might want to tell the Board?

Colonel GIBSON. No, sir.

General GRUNERT. Thank you very much.

Colonel GIBSON. I wasn't here at the time, thank goodness.

(The witness was excused, with the usual admonition.)

[278] **TESTIMONY OF COLONEL RUFUS BRATTON, 03726, INFANTRY, HEADQUARTERS COMMANDANT, COMMANDING OFFICER, SPECIAL TROOPS, HEADQUARTERS, THIRD ARMY, E. T. O.—**
Resumed

Colonel WEST. As Colonel Bratton, the witness, has appeared before the Board before and already been sworn, it will not be necessary to swear him again, but the witness is reminded he is still under oath.

Colonel BRATTON. Yes, sir.

General GRUNERT. Colonel, I shall let General Russell go ahead on his particular subject to be developed for this hearing.

General RUSSELL. Colonel, you were here and testified before the Board on the 30th of September rather fully, and a number of details were cleared up in that testimony as to your relation to things which I shall not go over again today. I do want to place in the record now, for emphasis, if it is necessary, just what your specialties were with

respect to the relations between Japan and America in the fall of 1941.

Colonel BRATTON. I was the Chief of the Far Eastern Section of the Intelligence Branch of War Department G-2.

General RUSSELL. Before we ask you some general questions, Colonel, I want to ask you whether or not, since your former appearance before this Board September 30, 1944, you have studied the records of G-2 and have found some data that you did not have when you were here before.

Colonel BRATTON. Yes, sir. I should like to say at this time that all this happened three years ago, and my memory as to my actions and reactions to any specific paper or [279] incident may not be as clear and accurate as it should be, but I have found that in going through certain files and records in G-2 my memory has been refreshed on a number of incidents through the discovery of documents that I had forgotten about, and I have a number of such documents here this morning to present to the Board.

General RUSSELL. Now, Colonel, there are two messages that I want to talk to you about. I first want to ask you whether or not since refreshing your memory and since the further study of the records of G-2 you desire to change in any way or add to your discussion of what is known as the "Wind" implementing message which is alleged to have been in existence on or about the 4th or 5th of December, '41.

Colonel BRATTON. Yes, sir. When I last appeared before the Board I was somewhat puzzled by what I considered at that time an over-emphasis placed by the Board on two messages. One was the implementation of the winds-weather code. The other was this 14-part ultimatum. I was considerably puzzled at the time by the insistence of the Board that these were vitally important documents, and I had the feeling that there was something missing, that they had no longer the significance after the 3rd of December, in my mind, that the Board attributed to them. I find, I think I know now why I had this feeling.

A search of the files in G-2 as of the day before yesterday and yesterday brought to light a carbon copy of a chronologically arranged series of extracts from intercepted Japanese communications which I prepared sometime after Pearl Harbor for the Chief of Staff. In glancing through this document I find that there was a message which I had forgotten [280] when I appeared before you last: dispatch from Tokyo on the 2nd of December, to the Japanese Ambassador in Washington. It was interpreted, or rather it was translated on the 3rd and presumably placed in my hands on that date.

General FRANK. During what month?

General RUSSELL. December 3, 1941, Colonel?

Colonel BRATTON. December 1941, sir. And it is listed here on my paper as S. I. S. 25640, and the extract that I have on this paper reads as follows:

(Extract from message of December 2, 1941, Tokyo to Japanese Ambassador in Washington, is as follows:)

Among the telegraphic codes with which your office is equipped burn those now being used in connection with the machine. Burn every old code. Stop at once using the machine and destroy it completely. Burn all the codes Kosaka brought you.

After the receipt of this translation any further intercepts that were brought to me would simply contribute toward the climax that I saw coming. This was it.

General RUSSELL. The construction which you placed on that message, in your official capacity, was that it meant war?

Colonel BRATTON. Yes, sir.

General RUSSELL. Colonel, there has been evidence before the Board—and I address myself again to the implementing "Winds" message, for purposes—there has been evidence before the Board of a rather extensive search through the records of [281] G-2, the War Department, to locate, if possible, some written documents or some written data relating to that implementing message. Do you know anything of that search?

Colonel BRATTON. I know that the search was made, sir, at my insistence, and I know that it has been unsuccessful. They have not found any such message has come through the Army communication system or the F. C. C.

General RUSSELL. Or any other. Now, you were called into General Miles' office to discuss the information which had reached the War Department from the Navy Department relating to this "Wind" implementing message, were you not?

Colonel BRATTON. I have a vague recollection of meeting Colonel Sadtler in General Miles' office, I think on the morning of the 5th of December, sir.

General RUSSELL. Yes. I am re-asking you that; it is in your evidence already, but for emphasis, and I will go away from it now.

Now, a message about which some evidence has been given, but the actual message itself is before the Board now for the first time. I am going to show you this message and ask you to identify it, and after you have identified it I shall ask you some other questions in connection with it.

Colonel BRATTON. Yes, sir; I am familiar with this message. I wrote it.

General RUSSELL. You wrote that message?

Colonel BRATTON. Yes, sir.

General RUSSELL. For the purpose of identification of the message which the witness has just stated that he wrote, it is a secret cablegram signed "Miles," addressed to the [282] Assistant Chief of Staff, Headquarters G-2, Hawaiian Department. It is numbered 519 and directs G-2 of the Hawaiian Department to contact Commander Rochefort of the Navy. It is dated December 5, 1941. A photostatic copy of the message is brought to the Board in two parts, one part showing the front of the message, the other part showing the back of the message. On the back of the message is entered, "1941, December 5, a. m. 11:47."

Now, Colonel, in connection with your further investigation to determine the facts and circumstances surrounding the sending of this message of December 5th which we have just discussed, to G-2 of the Hawaiian Department, have you discovered any confirmation of that secret cablegram?

Colonel BRATTON. Yes, sir.

General RUSSELL. Would you tell the Board what it is, and read it into the record for us, please?

Colonel BRATTON. I find in the G-2 files a paraphrase of this message bearing the stamp, "Mailed G-2 WDGS December 5, 1941. Our No. 32."

General RUSSELL. Will you now read what was said in that confirming letter?

Colonel BRATTON. This, as I say, is a paraphrase of the actual message. It is addressed to the Assistant Chief of Staff, Headquarters G-2, Hawaiian Department, Honolulu Territory. It is No. 519, sent out December 5, 1941, and it reads as follows:

[283] (Paraphrase of message dated December 5, 1941, to Assistant Chief of Staff, Headquarters G-2, Hawaiian Department, is as follows:)

Commander Rochefort, who can be located through the 14th Naval District, has some information on Japanese broadcasts in which weather reports are mentioned that you must obtain. Contact him at once.

General RUSSELL. Colonel, I want to ask you why it came to pass that this message was sent from G-2 of the War Department to G-2 of the Hawaiian Department, and not from some agency of the War Department to the Commanding General of the Hawaiian Department.

Colonel BRATTON. Upon receipt of the translated intercept which I have read, S. I. S. No. 25640, I took copies of this intercept to General Miles and to General Gerow and discussed it at some length with both of them. I had a feeling that further warnings or alerts should be sent out to our overseas commands. General Gerow felt that sufficient warning had been sent out. General Miles felt that he couldn't go over General Gerow's decision to send no additional warning, because of a policy which was then in effect that War Department G-2 would send out no intelligence to the G-2s of tactical commands or overseas departments which might produce an operational reaction, without the complete concurrence of the War Plans Division.

I still felt uneasy about this thing and went over to the Navy where I had a conference with Commander McCullum, the head of the Far Eastern Section in O. N. I. He felt as I did, that further warnings should be sent out, and said that he [284] was going to write one up and try to get the Chief of Naval Operations to dispatch it.

I discovered from Commander McCullum that their S. I. S. man in Honolulu, a Commander Rochefort, knew everything that we did about this, had all the information that we had, and was listening for this Japanese winds-weather broadcast. He suggested that as a way out of our difficulty I instruct our G-2 in Hawaii to go to Rochefort at once and have a talk with him, as in a short period of time Rochefort could tell Colonel Fielder, our G-2, exactly what was going on and what we knew.

I managed to get General Miles to O. K. this message to G-2 in Hawaii because he and I both thought that we could get that message out without violating any of the policies that were then in effect about getting concurrences from OPD.

I also had a message sent to the Canal Zone on the night of the 5th, to the G-2 out there. I had forgotten about this message until I found it in the file this morning. The document that I lay before you now is in the files of G-2. It is a paraphrase of an outgoing message, No. 512, sent December 5, 1941, to G-2, Panama Canal Department. It reads as follows:

[285] (Message dated December 5, 1941, to G-2, Panama Canal Department, is as follows:)

In the event severance of diplomatic relations is near, this office will notify you. Japanese-U. S. relations are now very difficult.

Signed, "Miles"

This paper bears the stamp, "Mailed G-2 WDGS December 5, 1941," and it has our number 86 on it, I think.

I can't find the message in the files, but I am morally certain that a similar message went to Manila. So that in any case Manila, Hawaii, and Panama had been alerted by us on the 5th.

[286] General RUSSELL. Colonel, this action on the 5th, the message to G-2, Hawaiian Department, and the message to the Panama Canal Zone, resulted from the code-destruction message of December 3, and the conversations about the "wind" implementing message of December 5, is that true?

Colonel BRATTON. To the best of my recollection and belief they were the results of my receipt of this order to the Japanese ambassador to destroy his code and his machine.

General RUSSELL. In your message to G-2 of the Hawaiian Department you make a reference to a "weather" reference—"broadcast reference weather"?

Colonel BRATTON. Yes, sir.

General RUSSELL. So apparently, when you said that, you had in mind not only the destruction of the machines in Washington but also the possibility of the implementing "weather" messages, is that true?

Colonel BRATTON. Yes, sir. As you see, I had been told by Commander McCullum that Commander Rochefort had the same intercepts that we had, and this was just a device on my part to bring Fielder and Rochefort together.

General FRANK. After you had been prevented from sending a warning message, by Gerow?

Colonel BRATTON. I couldn't get it out any other way.

General RUSSELL. Colonel, I want to clarify another message of his.

Colonel BRATTON. General, may I interrupt you just a moment, sir? I am not quite through with the 5th, yet. There is another action that I took, that I did not bring out, yet.

General RUSSELL. All right, go ahead. We will come back [287] to November 3. We will date back.

Colonel BRATTON. On December 3, I also sent the military attache in Tokyo instructions to destroy his codes and ciphers. I find confirmation of this fact in the files of G-2, in the paraphrase of an outgoing message, No. 40, sent December 3, 1941, addressed to the military attache, American Embassy, Tokyo, Japan, reading as follows: (Message, Dec. 3, 1941. Col. Bratton to Attaché, Tokyo:)

Memorize emergency key word No. 2 for use of SIGNUD without, repeat without, indicators. Destroy document STOP SIGNNQ SIGPAP and SIGNDT should be retained and used for all communications except as last resort. When these documents should be destroyed and memorized SIGNUD used STOP Destroy all other War Department ciphers and codes at once and notify by code word BINAB STOP Early rupture of diplomatic relations with Japan has been indicated. State Department informed. You may advise ambassador.

A similar message was sent to the military attache in Peiping, China, on December 3, and information thereof given to our military observers in Hong Kong and Chunking.

2446 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

General RUSSELL. Colonel, when you finish this period, December 5, I want to go back to this information which was sent to the Hawaiian Department on November 3, 1941. Are you through now with your November?

Colonel BRATTON. Yes, sir.

General RUSSELL. I have here, Colonel, a memorandum dated November 3, 1941:

"Subject: Information Received from the Orient.

"Distribution: All Corps areas, all Departments, Alaska, FBI, ONI, State."

[288] What is meant by "State"—State Department?

Colonel BRATTON. State Department, sir.

General RUSSELL. The last item of the distribution list is "File." To that was attached, when it was delivered to me by G-2, the letter of transmittal:

Subject: Letter of transmittal.

That is dated November 5, 1941, to Assistant Chief of Staff, G-2, Headquarters, Hawaiian Department; the letter of transmittal being in the following language:

SUMMARY OF INFORMATION

The following information received from the Orient, dated August 26, 1941, is considered reliable :

[290] 1. Mr. HIROTA, a presiding officer at directors' meeting of the Black Dragon Society, told of an order issued by War Minister TOJO (now Premier) "to complete full preparation to meet any emergency with United States in the Pacific. All guns to be mounted in the islands of the Pacific under Japanese mandate. The full preparation to be completed in November."

2. HIROTA and others are said to have stated: "War with United States would best begin in December or in February."

3. "Very soon," they say, "the Cabinet will be changed. The new Cabinet would likely start war within sixty days."

G2 Note: Full name of individual mentioned above is KOKI HIROTA, who is reported to be a member of the House of Peers, former Premier of Japan and Director of the Bureau of Intelligence, U. S. Section.

General RUSSELL. I will ask you if that was given to me from the files of G-2, and if you have seen it before this morning?

Colonel BRATTON. Yes, sir. I can identify this as a photostat of the document in the files of G-2. I have seen it, prior to this morning.

Colonel TOULMIN. You mean you have seen the original document prior to this morning?

Colonel BRATTON. Yes—the original document of which, I have seen prior to this date.

General RUSSELL. I have here one other letter which relates to the Hawaiian Department—and I am questioning you particularly about the Hawaiian Department, now. This is a letter which purports to have been written by Kendall J. Fielder, Lieutenant Colonel of Infantry, Acting Assistant [292] Chief of Staff, G-2; subject, "Summaries of Information." It is dated 6 September 1941, and is addressed to the War Department General Staff, Military Intelligence Division G-2, Washington, D. C. The stamp indicates that it was received by G-2 September 17, 1941, and I will read it into the record. I believe I will introduce it as an exhibit, later.

(The letter from Kendall J. Fielder to War Department General Staff, dated September 1941, is as follows:)

CONFIDENTIAL

General RUSSELL. Did you see the original of that in the office of G-2 of the War Department at any time, Colonel?

Colonel BRATTON. Yes, sir; I have seen the original of this in the files.

General RUSSELL. So much for specific messages, Colonel.

Now, there have been furnished to this Board not only the messages and letters about which I have interrogated you in the past few

minutes, and not only the secret summary of Far Eastern documents, which was identified by you on the occasion of your last appearance before this Board, 3 October 1944; but there have been furnished to the Board from the same source approxi- [294] mately 45, maybe 46, other messages, which I have not discussed with you in detail, and which I will not read to you at this time.

Now, Colonel, in connection with my investigation of these G-2 records, in the last two or three days, I prepared letters which were submitted to the Chief of Staff over the signature of the President of this Board, General Grunert, in which I requested in addition to the messages which you have just discussed with me a number of other messages, some 45 in number, all of which have been delivered to us and are now in our possession.

I also asked for a memorandum for the Chief of Staff, dated September 2, 1941, subject, "Conversation between the military attache and the Chief, Far Eastern Section." Have you got that with you?

Colonel BRATTON. Yes, sir.

General RUSSELL. Would you make that available to the Board at this time, and read it into the record?

Colonel BRATTON. This is the original document, dated September 2, 1941:

(The memorandum dated September 2, 1941, for the Chief of Staff, relative to "Conversation Between Military Attache and the Chief, Far Eastern Section," is as follows:)

Memorandum for the Chief of Staff:

Subject: Conversation between the Japanese military attache and the Chief of the Far Eastern Section.

Coincident with the Japanese Ambassador's call on the President on the morning of August 28, 1941, Maj. Gen. Saburo Isoda, Japanese military attache, called by appointment on Colonel R. S. Bratton, Chief of the Far Eastern Section, Intelligence Branch, this division. The following [295] are notes of Colonel Bratton on the visit:

"I have known General Isoda and been associated with him under various circumstances for 18 years. In consequence our conversation was friendly, informal, and entirely off the record. General Isoda stated that, like the ambassador, he was exploring ways and means to relieve the Japanese-United States tension and bring about better relations between the two countries.

"During the course of a conversation which lasted for an hour and a half, General Isoda made statements to the following effect:

"a. Due to restrictions imposed by our Export Control, the Japanese have begun to use a portion of their war reserve of petroleum.

"b. He, the naval attache, the ambassador, and the entire embassy staff are in accord in an earnest desire to better United States-Japanese relations.

"c. Japan made a great mistake in joining the Axis.

"d. The Army frequently gets out from under control of the civilian government and has to be restrained by imperial command.

"e."

This is the important paragraph:

"e. Japan has her back to the wall. She can be pushed just so far, then will have to fight us to save her national honor and integrity, though war with the United States is the last thing desired by Japan."

[296] Now, begin my quotation again:

"When asked flatly my opinion as to what assurances on the part of Japan would be acceptable to the United States Government at this time, I told him that Prince Konoye (then premier of Japan) if he comes to talk with the President must come with imperial sanction and armed with authority to speak for and on behalf of the armed forces of Japan, as well as on behalf of the civilian government. I said that in my opinion nothing short of this would be productive of lasting results or be acceptable to the President. General Isoda received this statement of opinion on my part with entire good will, expressed

his pleasure over the opportunity of having a frank talk, and stated his desire to have other and more frequent talks in the future. I in turn assured him that I would be glad to meet him in a private and unofficial capacity at any time."

2. General Isoda's visit clearly parallels the conversations now in progress between the Japanese ambassador and the State Department. In effect he speaks for the Japanese embassy, the entire staff of which is sincerely working for the betterment of Japanese-American relations. He obviously did not feel empowered to speak for the Japanese Army.

[S] **SHERMAN MILES,**
Brigadier General, U. S. Army,
Acting Assistant Chief of Staff, G-2.

Distribution: Secretary of War, Chief of Staff, War Plans Division, Office of Naval Intelligence.

[297] General RUSSELL. Colonel, a great deal of documentary evidence has been submitted to this Board within the past two or three days by the G-2 section of the General Staff of the War Department, all of which documentary evidence relates to the negotiations between the American and Japanese Governments, and the general situation in the Pacific in the year 1941. The data which have come to our attention indicate that the G-2 section of the War Department, in the fall of 1941, did have in its possession a great deal of information touching the relations between the Japanese government and the American Government. The question now is what actions were taken on this information, including the dissemination of the information, as to whom it was sent, the compilation of estimates based on such information, and so forth.

Colonel BRATTON. All the information that we had was presented in one form or another to the policy-making and planning agencies of the Government.

General RUSSELL. Would you please define them or name them at this time?

Colonel BRATTON. The officials to whom I refer include the President, the Secretary of State, the Secretary of War, the Chief of Staff, and the Chief of the War Plans Division. In most instances, copies of our intelligence, in whatever form it was presented, were sent to the office of Naval Intelligence, to keep them abreast of our trend of thought.

As to the intercepts, and in translations of Japanese intercepts, they were handled in a special way, which I think should be stated at this time. In 1941, certainly in the latter part of it, I was the custodian and the disseminator of this type [298] of intelligence. In previous years, I had used these translated intercepts as the bases for memoranda to the Chief of Staff, the Secretary of State, the Chief of the War Plans Division, or whatever person I considered most interested in the contents of the original document; but in the latter part of 1941 the system that we were following, by order of the Chief of Staff, was as follows:

The translations, made either in the Signal Corps SIS section or in the corresponding section of Naval Communications, were sent to me in sextuplet, six copies of each one. Out of the mass of material that came to my desk in this form, say 10 to 20 percent was of intelligence value; the remainder dealt with administrative or personal matters, at the embassy, or dealt with requests and requisitions for stationery or this, that, or the other thing, and that material I de-

stroyed by burning. The remaining "fimsies" containing military intelligence of value to our Government officials was arranged in cardboard folders, which in turn were placed in locked dispatch cases, one for the Secretary of State, one for the Secretary of War, one for the Chief of Staff, one for the ACofS, G-2, and one for the ACofS, WPD.

I delivered these pouches in person to the officers concerned, who had keys to the pouches. In the case of the Chief of Staff, he frequently was not in his office; in which case I left the pouch with one of his secretaries, generally the head secretary, who at that time was Colonel Bedell Smith.

Toward the latter part of November, or in November and December 1941, these translated intercepts were of such value and importance that it was my practice in each case to remind [299] the secretary, General Staff, that these were important documents and should be shown to the Chief of Staff without any delay.

General FRANK. And that secretary was Colonel Bedell Smith?

Colonel BRATTON. He had a number of secretaries in there. There was Major Max Taylor, Colonel Bedell Smith, Colonel Sexton, and one or two others, but at that time Colonel Smith was the senior secretary. I dealt with him whenever possible. On numerous occasions I would go to the Chief of the War Plans Division and to the ACofS G-2, and stand by while they read the contents of these folders, in case they wished to question me about any of them. And I had an arrangement with Colonel Smith, the Secretary of the General Staff, as to how he could get me on the telephone at any time in case the Chief of Staff wished to be briefed on any of them.

The folder which went to the Secretary of State I delivered in person to his confidential secretary, and obtained a receipt therefor. I collected all of these pouches on my next visit, or on my next round the following day, and destroyed the contents of them by burning, and retaining in my file a complete copy of everything that had been seen by all of these officials.

At this time the Navy was serving the President; that is, they took a locked pouch over there and gave it to the naval aide to the President, who in turn would take the contents of the pouch into the President, see that he read it, bring it back out, and return the book to the Navy.

During this period the President, the Secretary of State, the Secretary of War, the Chief, the ACofS G-2, and the Chief of the War Plans Division all saw the same material, they all [300] read the same translations, as fast as I could get them to them.

General RUSSELL. Does that plan of dissemination apply, Colonel, to this collection of photostatic messages which have been delivered to the Board by ACofS G-2's office at the War Department?

Colonel BRATTON. It does, sir; in every case.

General RUSSELL. Prior to making this last answer, you had taken the photostatic copies of these, some 45 messages, out and looked at them, is that true?

Colonel BRATTON. Yes, sir.

General RUSSELL. Now, Colonel, you have testified about the distribution which you made on these messages and related data which were described in the question. I am going to ask you whether or not any estimates were made on this information and sent to any-

one, in the nature of summaries, or reports, with expressions as to the attention that should be given to such data, indicating any probable Japanese action.

Colonel BRATTON. Yes, sir; we always used this material, sometimes separately, as the base of a special memorandum or staff study, but always in our over-all strategic estimates and studies there was incorporated therein the knowledge that we had secured therefrom.

General RUSSELL. I will ask you if on yesterday, 5 October 1944, in an office of the G-2 section in the Pentagon building, you exhibited to me a number of folders, possibly a dozen in number, in which you stated that copies of such documents as I have just asked you about were contained?

Colonel BRATTON. Yes, sir. These volumes that I showed you yesterday are G-2's file of what at that time were known as [301] "intelligence bulletins," and they run in number from one on up into the hundreds. Some of these bulletins, but by no means all of them, have been extracted and are incorporated in the summary of Far Eastern documents which you have before you.

There are many others, however, which I feel would be of interest to the Board, as indicating the trend of thought in G-2 as to the possibilities of war with Japan. As an illustration of the contents of these documents, not incorporated in the summary, I cite two instances: IB No. 20, which is a memorandum for ACofS WPD, dated January 27, 1941, which gives G-2's estimate of Japan's intentions with respect to Alaska and the Aleutians. G-2 therein informed WPD that in its opinion if we did not occupy and hold the outer Aleutians, the Japanese would, upon the outbreak of hostilities. WPD took no action upon our estimate and recommendation, with the result that we later had to fight two costly campaigns to regain Attu and Kiska.

As another illustration, IB 48, dated March 19, 1941, a memorandum for the Chief of Staff, informed him that strong pressure was being put on Japan by Germany to cause her to attack Britain in Asia, with the ultimate intention of involving us in a declaration of war. This came right out of the intercepts. The intercept was the basis for this, and G-2 went on to recommend that the Department Commander in the Philippine Department, General Grunert, at that time, be designated Commander-in-Chief of the U. S. Army forces in the Far East, with a temporary rank of Lieutenant General, as a means of improving civilian morale in the Philippines and enhancing out prestige in the western Pacific, with consequent deterrent effect on Japan, and so on.

[302] General GRUNERT. What was the date of that?

Colonel BRATTON. March 14, 1941.

General FRANK. What was the distribution given to those things?

Colonel BRATTON. Very wide. Here is a symbol of that. Here, for instance, is IB 122. Its subject is, "The effectiveness of foreign air forces in performing strategic missions," which went to the Secretary of War, the Assistant Secretary of War, the Assistant Secretary of War for Air, the Chief of Staff, the Chief of the Army Air Forces, the Chief of the Air Corps, the War Plans Division, the Director of Naval Intelligence, and to Major General Embick.

General GRUNERT. In other words, the distribution on those matters was to the higher-ups in Washington, but not to the lower echelons not in Washington?

Colonel BRATTON. They did not go out to the field, sir. On numerous occasions, copies of these went to the President and to the Secretary of State.

General FRANK. At any time was there any consideration given to sending special envoys or special representatives for personal conference with the commanders in the theatres like Hawaii and the Philippines, to advise them of the information that was picked up in these "hot" messages?

Colonel BRATTON. I don't remember that there was, sir. We felt considerably hampered in G-2 by two restrictions that were placed upon us. The first I have mentioned as the policy which prevented us from giving out intelligence to G-2s in tactical units or in overseas departments, which might have the effect of bringing about operational results. The other re- [303] striction was imposed on us by the Navy, who refused to allow us to send any of this intercept intelligence out to any of our people in the field over the Army net, using any Army code or cipher. Our procedure in cases of that sort was for General Miles to go to the head of ONI and request through him that the Navy communicate certain information to their opposite numbers in the field, in Manila, in Hawaii, or in Panama.

General FRANK. Do you know how much of that actually was communicated to the commanders in the field?

Colonel BRATTON. I cannot answer that definitely at this time, sir. I remember a number of occasions where I instigated, myself, the dissemination of certain vital information in that way. I can't be more specific than that.

General RUSSELL. How did it come, then, Colonel, that on the 7th of December we sent out that hurry-up mid-day message without the Navy's consent?

Colonel BRATTON. It was with the Navy's knowledge and consent. If you will examine the record, you will find General Marshall called Admiral Stark on the telephone and told him of the message which he proposed to send, and that Admiral Stark later asked that a sentence be added, in his behalf.

General RUSSELL. I know, but wasn't that message of December 7 sent in Army code?

Colonel BRATTON. Yes, sir.

General RUSSELL. So, if it became urgent enough, we disregarded our Navy request and sent the stuff?

Colonel BRATTON. Yes.

General FRANK. In this information that was available as a result of this "hot" information, did there exist parts of it [304] that were of value from an operating point of view?

Colonel BRATTON. From a naval operating point of view, yes, in many cases.

General FRANK. How about it, from an Army air operating point of view?

Colonel BRATTON. From an Army air operational point of view, in some cases.

General FRANK. And you were not allowed to communicate this to the commanders?

Colonel BRATTON. Well, I never received a definite prohibition on the thing, but every time that I tried to send a message of this sort, and the Navy found out about it, the Chief of Naval operations would call up the Chief of Staff on the telephone and object most vociferously and emphatically. He in turn would call the ACofS G-2 and object strenuously, and by the time it got to me, who had sent the message, it was disapproval expressed in no uncertain terms—put it that way. And I in each case would be instructed not to do it again.

General GRUNERT. What do you suppose was back of it? Fear of the code?

Colonel BRATTON. Yes, sir; and fear of the Japanese breaking our Army code, and finding out that we were reading their own. It was a security measure.

General FRANK. Information did then exist and was available here in the War Department, which was not communicated to the commander in the field, that would have been of value to him to carry out his operations, is that correct?

Colonel BRATTON. That was the function of the War Plans Division, not of G-2.

[305] General FRANK. But you had the information?

Colonel BRATTON. So did they.

General FRANK. I think the record takes care of that.

Colonel BRATTON. And I may say that on numerous occasions I would go in to confer with General Gerow, one of his principal section chiefs, about certain information that we had, and I have frequently urged that action be taken. General Miles has done the same thing. We used to have repeated conferences with our opposite numbers in OPD about the vital information that we had. Sometimes OPD reacted favorably to our recommendations, sometimes not, but we were concealing nothing from them. We were not sitting on this information. It was there for anybody to read and act on.

General GRUNERT. I have one question here. In the Roberts Commission report, it states, here:

(Excerpt from Roberts Commission Report, *re* 3 messages:)

The Navy Department sent three messages to the Commander-in-Chief of the Pacific Fleet. The first, of December 3, 1941, stated that it was believed certain Japanese consulates were destroying their codes and burning secret documents. The second, of December 4, 1941, instructed the addressee to destroy confidential documents and means of confidential communication, retaining only such as were necessary, the latter to be destroyed in the event of emergency (this was sent to the Commander-in-Chief of the Pacific Fleet for information only) and the third, of December 6, 1941, directing that in view of the tense situation, the naval command on the outlying islands might be authorized to destroy confidential papers then or later under conditions of greater emergency, and that those [306] essential to continued operation should be retained until the last moment.

Were those three messages, in your opinion, based on what they could get through this intercept file?

Colonel BRATTON. Yes, sir.

General GRUNERT. If they went to the Commander-in-Chief of the Pacific Fleet, the Commanding General of the Hawaiian Department was supposed to have been informed through the Commander-in-Chief

of the Pacific Fleet? That was a general understanding on all those messages that went from one to the other, or that went to one or the other; they were supposed to inform their opposite numbers so as to avoid the same kind of message going to two recipients for fear of damaging or breaking the code, is that right?

Colonel BRATTON. That was my understanding of the relations that existed at the time; yes, sir.

General GRUNERT. So there was some information that go to Hawaii concerning warnings, as to these intercepted messages?

Colonel BRATTON. Yes, sir.

General GRUNERT. Although you didn't get any particular ones through?

Have you anything else?

General RUSSELL. I have one specific question, then I will be through.

You have discussed with us heretofore, Colonel, this delivery of those 13 parts of the Japanese reply of December 6.

Colonel BRATTON. Yes, sir.

General RUSSELL. As I recall your testimony, you stated [307] that you delivered it to this man Smith on Saturday night, is that correct?

Colonel BRATTON. That is correct, sir, to the best of my knowledge and belief. My recollection is that I found Colonel Smith in his office. It may have been one of the other secretaries, but my recollection is that it was Colonel Smith, and that I told him that this was a very important paper, and that General Marshall should see it at once. My recollection is that he said he would send it out to the General's quarters by courier. In any event, my mind was at rest about the Chief of Staff, I didn't worry about him any more that night.

General GRUNERT. Had this occurred frequently in the past?

Colonel BRATTON. Yes, sir.

General GRUNERT. So it was just a normal thing to say, "Here is a pouch that has got important stuff in it"?

Colonel BRATTON. No. When I thought that the Chief of Staff should see it at once, I made a point of telling Smith so, and he would say, "All right, I will send it out by a special courier."

General GRUNERT. Did that happen very frequently?

Colonel BRATTON. It happened several times; yes, sir.

General GRUNERT. Now, about this time, most everything was important?

Colonel BRATTON. Most everything was important; and I was further urged on by the fact that if the Chief of Naval Operations ever got one of these things before General Marshall did and called him up to discuss it on the telephone with him, and the General hadn't gotten his copy, we all caught hell.

General GRUNERT. I suppose it worked the other way, too.

[308] Colonel BRATTON. I saw to it that General Marshall got his copy just as fast as I could get it to him.

General RUSSELL. I believe your testimony was to the effect that the short message of December 7th came and you sat with it in your hand outside the General's office until he came in, and you handed it to him. That was on Saturday.

Colonel Bratton. I handed it to him, that morning.

General RUSSELL. That is all I have.

General GRUNERT. Are there any other questions?

Major CLAUSEN. I just wondered if the Colonel would make available to the Board this chronological summary from which he has testified, which apparently is in such shape as to show these messages very vividly.

General RUSSELL. So far as I am concerned, I think that is all.

General GRUNERT. Are there any other questions of this witness? If not, this is the third time we thank you for coming.

(The witness was excused, with the usual admonition.)

General RUSSELL. I desire at this time to introduce a copy of the telegram referred to in my questioning of Colonel Bratton, it being a telegram dated December 5, 1941, signed "Miles," and addressed to the Assistant Chief of Staff Headquarters, G-2, Hawaiian Department.

(The telegram signed "Miles", to the Assistant Chief of Staff Headquarters, G-2, Hawaiian Department, dated December 5, 1941, is as follows:)

[310] General RUSSELL. I introduce, as Exhibit "B", the file heretofore referred to, containing the following numbered SIS messages, procured from the files of the office of the Assistant Chief of Staff, G-2, of the War Department:

23260 Sept. 24, 1941

23570 Oct. 14, 1941

23516 Oct. 14, 1941

23631	Oct. 16, 1941
23859	Oct. 22, 1941
24373	Nov. 5, 1941
25322	Nov. 14, 1941 (2 sheets)
25644	Nov. 15, 1941
24878	Nov. 16, 1941
25773	Nov. 18, 1941
25817	Nov. 18, 1941
25392	Nov. 19, 1941
25040	Nov. 19, 1941
25432	Nov. 19, 1941
25138	Nov. 22, 1941
25435	Nov. 26, 1941
25344	Nov. 26, 1941 (2 sheets)
25349	Nov. 26, 1941
25480	Nov. 26, 1941
25436	Nov. 26, 1941
25145	Nov. 28, 1941
25496	Nov. 29, 1941
25554	Nov. 30, 1941
25553	Nov. 30, 1941
25552	Nov. 30, 1941
[311]	25497 Nov. 30, 1941 (2 sheets)
25555	Nov. 30, 1941
25787	Dec. 1, 1941
25605	Dec. 1, 1941
25545	Dec. 1, 1941
25727	Dec. 1, 1941
25783	Dec. 1, 1941
25659-B	Dec. 2, 1941
25660	Dec. 2, 1941 (2 sheets)
25640	Dec. 2, 1941
25785	Dec. 3, 1941
25807	Dec. 4, 1941
27065	Dec. 2, 1941
25843	Dec. 4, 1941
25836	Dec. 5, 1941
25838	Dec. 6, 1941
25843	Dec. 6, 1941 (13 sheets)
26158	Dec. 6, 1941
25846	Dec. 6, 1941
25854	Dec. 7, 1941
25850	Dec. 7, 1941
25856	Dec. 7, 1941.

(The file of SIS messages referred to, procured from the office of Assistant Chief of Staff, G-2, marked Exhibit "B", was introduced in evidence.)

(Whereupon, at 1:10 p. m., the Board, having concluded the hearing of witnesses, proceeded to other business.)

[1] STATEMENT BY MAJOR GENERAL WALTER C. SHORT OF EVENTS AND CONDITIONS LEADING UP TO THE JAPANESE ATTACK, DECEMBER 7, 1941

The following radiogram from the Chief of Staff was received October 16, 1941—Exhibit "A":

Note for commanding general Hawaiian department:

The following is a paraphrase of a dispatch from the Chief of Naval Operations which I have been directed to pass to you quote:

Japanese cabinet resignation creates a grave situation x if a new cabinet is formed it probably will be anti-American and strongly nationalistic x if the Konoye cabinet remains it will operate under a new mandate which will not include rapprochement with the United States x either way hostilities between Japan and Russia are strongly possible x since Britain and the US are held responsible by Japan for her present situation there is also a possibility that Japan may attack these two powers x view of these possibilities *you will take due precautions including such preparatory deployments as will not disclose strategic intention nor constitute provocative actions against Japan x.*

The following radiogram from the Chief of Staff was received 2:22 P. M., November 27th—Exhibit "B":

"Hawn Dept, Ft. Shafter, TH:

472 27th negotiations with Japan appear to be terminated to all practical purposes with only the barest possibilities that the Japanese Government might come back and offer to continue stop Japanese future action unpredictable but hostile action possible at any moment stop If hostilities cannot comma repeat cannot comma be avoided the United States desires that Japan commit the first overt act stop This policy should not comma repeat not comma be construed as restricting you to a course of action that might jeopardize your defense stop Prior to hostile Japanese action you are directed to undertake such reconnaissance and other measures as you deem necessary but these measures should be carried out so as *not* comma repeat *not* comma to alarm civil population or disclose intent stop Report measures taken stop Should hostilities occur you will carry out the tasks assigned the Rainbow Five so far as they pertain to Japan stop Limit dissemination of this highly secret information to minimum essential officers.

MARSHALL,
116P/27.

[2] Upon receipt of the above radiogram, I gave consideration to the type of an alert which I should order, and, after talking the matter over with the Chief of Staff, Alert #1 was ordered by telephone and put into effect at once.

Standing Operation Procedure, Headquarters Hawaiian Department, 5 November 1941.—Exhibit "C":

"SECTION II—ALERTS

13. All defense measures are classified under one of the three (3) Alerts as indicated below. Operations under any Alert will be initiated by a Department order, except in case of a surprise hostile attack. See paragraph f (8) below.

2460 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

14. **ALERT NO. 1.** *a.* This alert is a defense against acts of sabotage and uprisings within the islands, with no threat from without.

b. At DEPARTMENT HEADQUARTERS, all General and Special Staff Sections will continue with their usual duties at their present stations, pending further orders.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(3) Protect the SCHOFIELD BARRACKS reservation and all vital installations (except those on garrisoned Army and Navy Reservations), in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 14 *h* (2) below.

Command and Fire Control Cable System.

Railway and Highway Bridges.

Water supply for SCHOFIELD BARRACKS.

Radio Station at PUU MANAWAHUA.

WAI'AU Generating Plant.

Telephone Exchanges at WAI'PAHU, WAHIAWA, WAI'ALUA (in HALE-IWA), LAIE and KANEOHE.

Electric sub-stations at WAHIAWA, WAI'ALUA, KAHUKU, KAILUA, WAIPIO AND EWA, and electric power lines from WAIPIO, WAHIAWA, SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station BELLOWS FIELD.

[3] Cold Storage Plant in WAHIAWA.

Pumping Stations at MOANALUA and KAPAHULU.

(4) the 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

e. The HAWAIIAN COAST ARTILLERY COMMAND will:

(1) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(2) Protect all vital installations on posts and reservations of the command.

(3) Protect the Radio Beacon on Sand Island.

(4) Provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

f. The HAWAIIAN AIR FORCE will:

(1) Protect all vital installations on posts of OAHU garrisoned by air forces.

(2) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders.

g. The DISTRICT COMMANDERS, assisted by the Air Corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, in addition to his normal duties, assisted by the Division Provost Marshals, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

(3) Establish liaison with the local police force.

i. The STATION COMPLEMENTS OF HICKAM, WHEELER and BELLOWS FIELDS, under command of the Hawaiian Air Force, will assist in the protection of all vital installations on their respective posts.

j. TERRITORIAL HOME GUARD. Upon the formation of the Territorial Home Guard, recently authorized by the TERRITORIAL Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations.

[4] 15. **ALERT NO. 2.** *a.* This alert is applicable to a more serious condition than Alert No. 1. Security against attacks from hostile sub-surface, surface, and aircraft, in addition to defense against acts of sabotage and uprisings, is provided.

b. At DEPARTMENT HEADQUARTERS, only the G-2 and G-3 Sections will be required to operate on a 24-hour basis. All other sections of the General and Special Staffs will continue with their normal schedule.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain available all units at fifty percent (50%) of their present strength, except those required under (3), (4) and (5) below.

(3) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(4) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1.

Command and Fire Control Cable System.

Railway and Highway Bridges.

Water supply for SCHOFIELD BARRACKS.

Radio Station at PUU MANAWAHUA.

WAIAU Generating Plant.

Telephone exchanges at WAIPAHA, WAHIAWA, WAIALUA (in HALE-IWA), LAIE and KANEOHE.

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO, WAHIAWA, SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station BELLOWS FIELD.

Cold Storage Plant in WAHIAWA.

Pumping Stations at MOANALUA and KAPAHULU.

(5) The 25th Infantry Division will assist the Navy in guarding the Pumping Stations at AIEA and HALAWA.

[5] (6) Place 240 mm howitzers in position, establish the necessary guards and, when directed, place ammunition at positions.

(7) Release Field Artillery units manning seacoast armament (155 mm guns) to Hawaiian Coast Artillery Command.

(8) See Territorial Home Guard, paragraph 15 l below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Field Artillery, will:

(1) Occupy initial seacoast and antiaircraft defense positions, except that railway batteries will remain at FORT KAMEHAMEHA or where emplaced.

(2) Release the 53d AA Brigade to the Interceptor Command for operational control.

(3) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(4) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 15 k (1) below.

(5) Support Naval forces within range of seacoast armament.

(6) Prevent approach of and landing from hostile vessels.

(7) Coordinate all seacoast intelligence agencies.

(8) Coordinate seacoast defense with the Inshore Patrol.

(9) Protect the Radio Beacon on Sand Island.

(10) Provide Army personnel required to operate the Harbor Control Post.

f. The Hawaiian Air Force will:

(1) Maintain aircraft and crews in condition of readiness as directed by this headquarters.

(2) Release without delay all pursuit aircraft to the Interceptor Command.

(3) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(4) Disperse bombers with crews.

(5) Disperse pursuit planes with crews to bunkers.

(6) Protect all vital installations on posts on OAHU garrisoned by air forces.

(7) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 15 g below.

(8) In case of surprise hostile attack:

[8] (a) Release to Navy for operational control all bombers in condition of readiness "A". The bomber commander will report to the Commander of Patrol Wing X TWO.

(b) Receive all available shore based Naval and Marine Corps fighter planes in appropriate condition of readiness and release them to the Interceptor Command for operational control.

2462 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, hostile attacks, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

- (1) Regulate traffic on OAHU.
- (2) Assist the 25th Infantry Division in posting guards on vital installations.
- (3) Establish liaison with the local police force.
- (4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.
- (5) Be prepared to establish facilities for gathering and caring for refugees.
- (6) Protect FORT SHAFTER. See paragraph 15 k (1).

i. The DEPARTMENT SIGNAL OFFICER will:

- (1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.
- (2) Insure that joint Army-Navy communications are in readiness for immediate employment.

j. The INTERCEPTOR COMMAND will:

Coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the Aircraft Warning Service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control, to include:

- (1) Arrival and departure of *all* friendly aircraft.
- (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.
- (3) Transmission of appropriate warnings to all interested agencies.

k. STATION COMPLEMENTS:

(1) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(2) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

l. TERRITORIAL HOME GUARD. Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 15 d (4) and g above.

16. ALERT NO. 3. a. This alert requires the occupation of all field positions by all units, prepared for maximum defense of OAHU and the Army installations on outlying islands.

b. At DEPARTMENT HEADQUARTERS:

(1) All sections of the forward echelon will occupy their stations at forward command post, prepared to operate on a 24-hour basis.

(2) All sections of the rear echelon will continue their usual duties at their present stations. Blackout instructions will be complied with.

c. DEPARTMENT TROOPS will remain in condition of mobile readiness at their permanent stations, pending instructions from this headquarters

d. Each INFANTRY DIVISION will:

- (1) Defend its assigned sector on OAHU.
- (2) Protect all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard.
- (3) Release all available Bands to the Commanding Officer, SCHOFIELD BARRACKS.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) Place 240 mm howitzers in position.

(6) Release Field Artillery units manning seacoast armament (155 mm guns) to Hawaiian Coast Artillery Command. See paragraph 16 e below.

(7) See Territorial Home Guard, paragraph 16 m below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Detachment Field [8] Artillery, will:

- (1) Occupy initial seacoast and antiaircraft positions.
- (2) Support Naval forces within range of seacoast armament.
- (3) Prevent approach of and landing from hostile vessels.

- (4) Support the Infantry Divisions.
- (5) Coordinate all seacoast intelligence agencies.
- (6) Coordinate seacoast defense with the Inshore Patrol.
- (7) Provide the Army personnel required to operate the Harbor Control Post.
- (8) Release the 53d AA Brigade to the Interceptor Command for operational control.

(9) Protect all vital installations on post and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 16 l (2) below.

(10) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

f. The HAWAIIAN AIR FORCE will:

- (1) Destroy enemy aircraft.
- (2) Carry out bombing missions as directed.
- (3) Cooperate with Naval air forces.
- (4) On OAHU, defend all posts garrisoned by air forces against sabotage, air and ground attacks.
- (5) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 16 h below.
- (6) Arm all planes, except that normally bombs will not be loaded on ships dispatched to outlying islands.
- (7) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.
- (8) Disperse bombers with crews.
- (9) Disperse pursuit planes with crews to bunkers.
- (10) Perform observation, command and photographic missions.
- (11) Release without delay all pursuit aircraft to the Interceptor Command.

g. G-5 will be prepared to establish the following:

- (1) Food administration.
- (2) A Labor Procurement Service.

h. The DISTRICT COMMANDERS OF HAWAII, MAUI (includes MOLOKAI) and KAUAI Districts, assisted by the air corps detachments present within the districts, will:

Defend the air fields against acts of sabotage, hostile attacks, and maintain order in the civil community.

i. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

- (1) Regulate traffic on OAHU.
- (2) Assist the 25th Infantry Division in posting guards on vital installations.
- (3) Establish liaison with the local police force.
- (4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.
- (5) Be prepared to establish facilities for gathering and caring for refugees.
- (6) Protect FORT SHAFTER. See paragraph 16 l (2) below.

j. The INTERCEPTOR COMMAND will coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the aircraft warning service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control to include:

- (1) Arrival and departure of all friendly aircraft.
- (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.

(3) Transmission of appropriate warnings to all interested agencies.

k. The DEPARTMENT SIGNAL OFFICER will:

- (1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.
- (2) Insure the joint Army-Navy communications are in readiness for immediate employment.

(3) Be prepared to assume control over essential civilian communications.

l. STATION COMPLEMENTS:

(1) The SCHOFIELD BARRACKS Complement will protect all vital installations on the SCHOFIELD Reservation.

(2) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and [10] Tripler General Hospital.

(3) The HICKAM, WHEELER and BELLOWS FIELD[▼] Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

m. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 16 *d* (2) and *h* above."

Alert #1 is a defense against acts of sabotage and uprising within the islands with no threat from without. In addition to the duties prescribed in Alert #1, the Aircraft Warning Service was directed to operate all mobile aircraft warning stations from two hours before dawn to one hour after dawn.

My reasons for ordering Alert #1 rather than Alert #2, which is applicable to a condition more serious than Alert #1, security against attacks from hostile sub-surface, surface and aircraft, in addition to defense against acts of sabotage and uprising, were as follows:

1. There was a strong probability of sabotage by the Japanese population in Hawaii.

2. I had no information to indicate the probability of an attack.

3. Alert #2 or Alert #3, which provides for the maximum defense of OAHU and of army installations on outlying islands, interfere very seriously with training.

These three reasons will be discussed in detail:

1. Defense against sabotage can be carried out better where there is not too much dispersion of the command. Where the defense is against sabotage only, the planes are grouped on the landing mats and the apron, while in a defense against air attack the pursuit planes would be dispersed in their bunkers and the bombardment planes would be sent to landing fields on outlying islands or placed in the air if time were available. If time were not available, they would remain in their bunkers. From this can be seen that the action for the two different types of defense is quite different. Since sabotage was considered far more probable [11] than air attack, the planes were dispersed to all of the landing fields on the island of OAHU, but were not placed in bunkers. This was especially desirable as man-proof fencing and flood-lights had not as yet been provided for the fields. \$240,000.00 for this purpose was requested on May 15, 1941, and the authorization of \$102,000.00 was made on July 11th and \$91,975.00 on August 12, 1941. Orders for the material had to be placed in the mainland as it was not available in the Hawaiian Islands. Owing to the difficulties of obtaining priorities, both for material and for shipping, the District Engineer has not yet received the material. The Constructing Quartermaster was allotted funds for fencing of other than air fields, and a small amount of the material had been received and installed prior to December 7th.

2. The Hawaiian Department is provided with no means of collecting information as to the location of Japanese or other ships throughout the world and is not responsible for distant reconnaissance. The "Joint Coastal Frontier Defense Plan, Hawaiian Coastal Frontier, Hawaiian Department and Fourteenth Naval District"—Section I, par. 3, 18 and 21, definitely place the responsibility for such reconnaissance upon the Commandant of the Fourteenth Naval District. The following quotation makes this evident:

EXTRACT from "Joint Coastal Frontier Defense Plan"—Exhibit "D":

"3. *METHOD OF COORDINATION.* The Commanding General of the Hawaiian Department and the Commandant of the Fourteenth Naval District have determined that in this joint plan the method of coordination will be by mutual cooperation and that this method will apply to all activities wherein the Army and the Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Action of the Army and Navy, 1935, Chapter 2, paragraph 9 *b*.

* * * * *

18. NAVY. The Commandant, FOURTEENTH NAVAL DISTRICT, shall provide for:

* * * * *

i. Distant reconnaissance.

* * * * *

21. This agreement to take effect at once and to remain effective until notice in writing by either party of its renouncement, in part or in whole, or until dis-

approved in part or in whole by either the War or the Navy Department. This HCF-41 (JCD-42) supercedes HCF-39 (JCD-13) except that the annexes, Nos. 1 to VII of latter remain effective and constitute annexes 1 to VII inclusive, of this plan."

[12] Annex #7 to the "Joint Coastal Frontier Defense Plan" provides as follows—Exhibit "E":

"When the Commanding General of the Hawaiian Department and the Naval Base Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action, each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans:

1. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

2. Defensive Air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation, it is withdrawn by the Naval Base Defense Officer and reverts to Navy control.

3. When Naval forces are insufficient for long distance patrol and search operations, and army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

4. In the special instance in which army pursuit protection is requested for the protection of friendly surface ships, the force assigned for this situation will pass to the tactical control of the Navy until completion of the mission".

These documents make it clearly evident that the Hawaiian Department had no responsibility for distant reconnaissance, and that when army bombardment planes are actually placed under the command of the Navy whenever they operate upon distant reconnaissance missions, they receive their mission and all instructions from the [13] Naval Commander, and report to him upon the completion of their mission. This method of procedure has been followed strictly since March 21, 1941, including the period since December 7th.

3. If upon consideration of the available facts the calling of Alert No. 1 would be sufficient to handle the situation Alert No. 2 or No. 3 should not be called because to do so would seriously interfere with the training of the command. When the troops are in battle positions it is practically impossible to carry on any orderly training. With the number of new men in the command it is highly important to conduct their training regularly. This was particularly true of the Hawaiian Air Force on November 27th due to the fact that they had been given the mission of training combat crews and ferrying B-17 planes from the mainland to the Philippine Islands. September 8th the Hawaiian Air Force sent nine (9) trained combat teams to the Philippine Islands. Previous to November 27th eighteen (18) trained combat teams had been sent to the mainland, and seventeen (17) more combat teams were ready to go to the mainland for ferrying purposes. In addition, twelve (12) combat crews had to be trained for planes that were expected at an early date in this Department. With only six (6) B-17 planes available for training combat teams, it was imperative that the Commanding General of the Hawaiian Air Force make the maximum use of these planes for training, and any order that would take them out of training for any considerable period would prevent him from carrying out the ferrying mission that had been assigned to him.

2466 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

I replied as follows to the radiogram from the Chief of Staff of November 27th—Exhibit "F":

"CHIEF OF STAFF,
War Department,
Washington, D. C.:

Reurad four seven two twenty seventh report department alerted to prevent sabotage period liaison with navy

SHORT".

Upon receipt of my radiogram of November 28th, I received the following reply from The Adjutant General—Exhibit "G":

"Hawn Dept., Ft. Shafter, TH:

482 28th critical situation demands that all precautions be taken immediately against subversive activities within field of investigative responsibility of [14] War Department Paren See paragraph three MID SC thirty dash forty five End paren Stop Also desired that you initiate forthwith all additional measures necessary to provide for protection of your establishments comma property comma and equipment against sabotage comma protection of your personnel against subversive propaganda and protection of all activities against espionage Stop This does not repeat not mean that any illegal measures are authorized Stop Protective measures should be confined to those essential to security comma avoiding unnecessary publicity and alarm Stop To insure speed of transmission identical telegrams are being sent to all air stations but this does not repeat not affect your responsibility under existing instructions.

ADAMS".

This par. of MID SC 30-45 referred to in the above mentioned radiogram is attached as Exhibit "H", and this paragraph refers wholly to subversive activities.

Careful consideration of the radiograms of October 16th, November 27th and November 28th discloses that the War Department emphasizes that action taken would not alarm the civil population, would not disclose strategic intention, constitute provocative actions against Japan, and would avoid unnecessary publicity. Alert #2 or #3 would have disclosed tactical positions and given more publicity to preparations and might have alarmed the civil population.

If the War Department at that time had considered it necessary to alert the Hawaiian Department against air and ground attack, it undoubtedly would have so directed instead of sending a long radiogram outlining the various steps that should be taken in connection with sabotage and subversive activities.

In my radiogram of November 29th I replied to the radiogram of the War Department of November 28th, and explained in detail the steps I was taking to prevent sabotage and subversive activities, and of the authority that I had obtained from the Governor of Hawaii and of the Mayor of the City and County of Honolulu to legalize all the steps which I had taken—Exhibit "I":

SHORT"

EVENTS TRANSPIRING FROM NOVEMBER 27TH TO DECEMBER 6TH

From November 27th to December 6th the troops remained on the Alert for sabotage, and carried on routine training with the men not required to be on duty during this Alert. The Aircraft Warning Service operated daily from two hours before daylight until one hour after daylight. It also carried out this usual practice, closing the information center at 7:00 A. M., December 7th. Routine training was also carried out by this Detachment from 7:00 to 11:00 A. M. except on Sunday. Memorandum of the Signal Officer, Hawaiian Department, states as follows--Exhibit "J":

Subject: Detector Operation.

To: Department Signal Officer.

1. On November 27, 1941, after conference with Assistant Chief of Staff G-3, and receiving instructions to operate all mobile detectors from two hours before dawn until one hour after dawn, I, as Acting Department Signal Officer, gave immediate instructions [16] to Captain TELLIEY, Commanding Officer of the Aircraft Warning Company, to initiate the above detector operation so long Alert No. 1 was in force.

2. The detectors in question operated daily thereafter during the prescribed period except when having occasional operational trouble. In addition, the six detector stations operated daily except Sundays from 7:00 A. M. to 11:00 A. M. for routine training. Daily except Saturday and Sunday, to hours 12:00 noon until 4:00 P. M. were devoted to training and maintenance work.

(Signed) W. H. Murphy,
W. H. MURPHY,
Lt. Col., Sig. C.

During the period November 27th to December 6th I had conferences with the Commander-in-Chief of the United States Fleet and the Commandant of the Fourteenth Naval District as follows:

November 27th: Conference on the reinforcement of the marine garrisons at Midway and Wake Islands by squadrons of army pursuit planes. I was accompanied on this conference by Major General Frederick L. Martin, Commanding General of the Hawaiian Air Force, and Lt. Colonel James A. Mollison, Chief of Staff of the Hawaiian Air Force.

December 1st: Conference relative to the relief of the marine garrisons on the islands of Midway and Wake, and the taking over of the defense of Canton Island by the army.

December 2nd: Conference with the Commander-in-Chief of the United States Fleet with reference to a letter that he was sending to the Chief of Naval Operations relative to the relief of the marines at Midway and Wake by the army.

December 3rd: Conference with reference to a radiogram I was sending to the War Department relative to the relief of the marines at Midway and Wake by the army.

December 4th: Major Fleming, of my staff, conferred with Col. Pfeiffer, Fleet Marine Officer on the Staff of the Commander-in-Chief of the United States Fleet relative to the use of marine 5" guns at Canton Island.

At these conferences the Commander-in-Chief of the United States Fleet and the Commandant of the Fourteenth Naval District had ample opportunity to acquaint me with information of the location of Japanese carriers, which would render possible an attack on the island of OAHU. If they believed carriers so

2468 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

located, they unquestionably [17] would have discussed the possible danger to any troops attempting to effect a relief at Midway and Wake. There is at least a strong inference that they had no such knowledge of the location of the Japanese carriers which would have rendered an attack possible. The fact that the Commandant of the Fourteenth Naval District did not request the employment under naval command of army bombardment planes for distant reconnaissance, as provided for by the "Joint Coastal Frontier Defense Plan" indicates that they were satisfied with their information with reference to Japanese carriers, and there was nothing new in the situation to cause me to change from an Alert for sabotage to an Alert for defense against an air attack. The following certificate shows that no request was made by the Commandant of the Fourteenth Naval District to the Hawaiian Air Force for long range aerial reconnaissance—Exhibit "K":

HICKAM FIELD, T. H., 20 December 1941.

I, JAMES A. MOLLISON, certify that during the period of 27 November 1941 to 7 December 1941 the Navy made no requests to the Hawaiian Air Force for in shore or long range aerial reconnaissances.

(Signed) Jas. A. Mollison,
JAS. A. MOLLISON,
Lt. Col., A. C.,
H. A. F. C/S.

To what extent such reconnaissance was made by the Navy planes is not known.

At the conference on November 27th, a staff officer of the Commander-in-Chief of the United States Fleet made a statement about the improbability of a Japanese air attack in the presence of the Commander-in-Chief. This statement is covered by certificate of Lt. Col. James A. Mollison, as follows—Exhibit "L":

"I certify that on November 27, 1941, I accompanied General Short and General Martin to Admiral Kimmel's office for conference relative to sending Army pursuits planes to Midway and Wake. As this would unquestionably weaken the defenses of Oahu, Admiral Kimmel asked a question of Captain McMorris, his War Plans Officer, which was substantially as follows:

Admiral KIMMEL: McMorris, what is your idea of the chances of a surprise raid on Oahu?

Captain McMORRIS: I should say none Admiral—.

(Signed) JAMES A. MOLLISON,
Lt. Col., A. C.

[18] December 5th one B-24 plane arrived at Hickam Field from the mainland. This plane had insufficient armament for combat, only one .30 caliber and two .50 caliber guns in the tail, and was without ammunition for the guns that were installed. In spite of the fact that this plane arrived without being in condition to fire, the following radiogram was received from the War Department—Exhibit "M":

"COMMANDING GENERAL, HAWAIIAN DEPARTMENT,
Ft. Shafter, TH.:

Four six five twenty sixth.

ADAMS.

The combination of the arrival of the plane in this condition and of the instructions for it to be placed in instant readiness for firing during the remainder of the journey plainly indicates that the War Department considered Honolulu not the subject of a probable attack, and that flying from the mainland to Honolulu the hazard of carrying the extra weight of ammunition was greater than the possibility of being attacked by the Japanese.

After the receipt of radiogram 46526, quoted above, the following radiogram was sent—Exhibit "N":

CHIEF OF THE ARMY AIR FORCES,
Washington, D. C.:

Reference secret photographic mission of two B twenty fours Stop One of B twenty fours [19] Lieutenant Faulkner which landed Hickam this date short following equipment considered essential to safety and success of mission colon fifty caliber machine guns comma mounts comma adapters and accessories for upper hemisphere semicolon fifty caliber tunnel gun comma adapter and accessories semicolon fifty caliber guns comma adapters comma mounts and accessories for starboard and port sides semicolon second thirty caliber nose gun comma adapter and accessories Stop Guns can be removed from our equipment and ammunition is available Stop Strongly recommend that second B twenty four bring necessary equipment from mainland for installation on both planes prior their departure from Hickam field Stop Plane being held here until satisfactorily armed Stop Subject plane has no armor plate installation Stop Except for removal of passenger seats plane equipped as for ferry service North Atlantic Signed MARTIN HAF 141.

SHORT

In spite of radiogram quoted above, airplanes continued to be dispatched from the mainland without ammunition and with guns not in condition to fire. Twelve B-17 airplanes, under orders from the War Department, left the mainland in two squadrons at 9:30 P. M., Dec. 6th, Pacific time (12:30 A. M., Dec. 7th, Eastern time) and 10:30 P. M., Dec. 6th, Pacific time (1:30 A. M., Dec. 7th, Eastern time). None of these guns were equipped with ammunition for the defensive armament. Machine guns were still cosmolined and had not been bore-sighted. Ferry crews were skeletonized, consisting of pilot, co-pilot, navigator, engineer and radio operator. Such crews were incapable of manning gun positions, even if the guns had been properly prepared for combat and supplied with ammunition. (Exhibit "O"). The inference is plain that up to 1:30 A. M., December 7th, the War Department felt that the hazard of carrying the extra weight in ammunition was greater than the danger of an attack by the Japanese. These planes actually arrived at Hickam Field in the midst of the first attack. Four of the twelve planes were destroyed by the Japanese without being able to fight. Had the War Department considered an attack by the Japanese probable, these planes would not have been permitted to leave the mainland without ammunition, and without guns in condition to be fired. Up to that moment the War Department had given me no indication of a crisis in the American-Japanese relations.

Later in the morning of December 7th apparently alarming news was received and the Chief of Staff sent the following message to me by *commercial radio*—Exhibit "P":

[20] "Hawn Dept.,
Ft. Shafter, T. H.:

529 7th Japanese are presenting at one PM eastern standard time today what amounts to an ultimatum also they are under orders to destroy their code machine immediately Stop Just what significance the hour set may have we do not know but be on alert accordingly Stop Inform naval authorities of this communication

MARSHALL".

The message was filed at 12:18 P. M., December 7th, Eastern time (6:48 A. M., December 7th, Honolulu time). It was received by the R. C. A. in Honolulu at 7:33 A. M., December 7th, and delivered to the Signal Office, Fort Shafter, at 11:45 A. M. (Delivery probably delayed by the Japanese attack). The deci-

2470 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

phered message was delivered to the Adjutant General, Hawaiian Department, at 2:58 P. M., December 7th. Thus this important message was received seven hours after the attack. If the message had been telephoned by secret telephone direct to me as an urgent message in the clear without loss of time for encoding there would have been time to warm up the planes and put them in the air, thus, in all probability, avoiding a large loss of planes in the initial attack at 8:00 A. M. The fact that the War Department sent this message by radio in code instead of telephoning it in the clear and putting it through in the minimum amount of time indicates that the War Department, even as late as 6:48 A. M., December 7th, Honolulu time, did not consider an attack on Honolulu as very probable.

When the Chief of Staff, War Department, was informed by the Chief of Staff, Hawaiian Department, by secret commercial telephone of the first attack, he inquired if the message with regard to the Japanese ultimatum had been received prior to the attack. He was informed that it had not been received up to the time of that conversation.

On December 9th the following radiogram was received from the War Department—Exhibit "Q":

"Hawn Dept., Ft. Shafter, T. H.:

Five four nine ninth please advise immediately exact time of receipt of our number five two nine repeat five two nine December seven at Honolulu exact time deciphered message transmitted by Signal Corps to staff and by what staff officer received.

COTTON, Acting".

The following reply was made by this Headquarters—Exhibit "R":

[21] "Re your five four nine radio five two nine delivered Honolulu via RCA seven thirty three morning seventh Stop Received signal office Fort Shafter eleven forty five morning seventh paren this time approximate but within five minutes paren Stop Deciphered message received by adjutant general HQ Hawn Dept two fifty eight afternoon seventh

SHORT.

Two instances occurred early on the morning of December 7th, which, if interpreted differently at the time, might have had a very great result upon the action that followed.

About 7:15 A. M. a two-man submarine entered Pearl Harbor and was destroyed by ships on duty. Had the Naval authorities foreseen this as a possible forerunner of an air attack and notified the army, time would have been available for the dispersion of the planes. However, the naval authorities did not connect this submarine attack with a possible general attack. The army was not notified until after the attack at 8:00.

After the Air Craft Warning Service Information Center was closed at 7:00 A. M., December 7th, the OPANA station remained in operation for further practice. At 7:20 A. M. a very significant event occurred, as shown by the following affidavits—

Exhibit "8":

"FORT SHAFTER, T. H.

Territory of Hawaii, ss:

Personally appeared before me, the undersigned, authority for administering oaths of this nature, one Grover C. White, Jr. O-396182, 2nd Lieut., Signal Corps, Signal Company, Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

1. At the request of the Control Officer and Naval Liaison Officer the AWS agreed to operate its detectors beyond the daily period of two hours before until one hour after dawn. The first schedule required operation of all stations from 4 A. M. to 6 P. M. This schedule was modified to the hours of 4 A. M. to 4 P. M. A temporary schedule was next devised which required all stations to operate from 4 A. M. to 11 A. M. and to have "staggered" operation, i. e., 3 stations from 11 A. M. to 1 P. M., the remaining 3 stations from 1 P. M. to 4 P. M. On Saturday, December 6, 1941, I contacted the Control Officer to request authority to have all stations operate from 4 A. M. to 7 A. M. only on Sunday, December 7, 1941; this was agreed to by the Control Officer.

2. Staff Sergeant Stanley J. Wichas, SCAWH, acting RDF Officer, reports that he saw nothing that could be construed as suspicious in the information received by [22] the AWS Information Center from 4 A. M. to Sunday, December 7, 1941. This is verified by Lt. Kermit A. Tyler, Air Corps, who was the only officer in the Information Center from 4 A. M. to 7 A. M.

3. At approximately 7:20 A. M. a report was received from a Detector station at Opana that a large number of planes was approaching Oahu on a course North 3 degrees East at a distance of approximately 192 miles. This information was immediately transmitted by the switchboard operator, Pfc. Joseph McDonald to Lt. Tyler, who talked to Opana about the flight. The statement of Pfc. Joseph McDonald, SCAWH, the switchboard operator is attached.

4. The Navy Liaison Officer's position within the Information Center was not manned when I reached the Information Center at about 8:30 A. M. This position was manned shortly thereafter by Technical Sergeant Merle E. Stouffer, SCAWH, who remained on the position until approximately 4:30 P. M. when the position was taken over by Naval Officers. Further the deponent sayeth not.

Summary Court.

"FORT SHAFTER, T. H.,

ss:
Territory of Hawaii,

Personally appeared before me, the undersigned authority for administering oaths of this nature, one Joseph P. McDonald, 13006145, Pvt. 1cl, Signal Company, Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

I was on duty as telephone operator at the AWS Information Center on Sunday morning, December 7, 1941. I received a telephone call from Opana at 7:20 A. M. stating that a large number of planes were heading towards Oahu from North 3 points east. I gave the information to Lt. Kermit A. Tyler, Air Corps, 78th Pursuit Squadron, Wheeler Field, T. H., and the Lieutenant talked with private Lockhard at the Opana station. Lt. Tyler said that it wasn't anything of importance. At that time the planes were 132 miles out. I asked if we shouldn't advise Corporal Beatty and have the plotters come back. The Opana Unit stressed the fact that it was a very large number of planes and they seemed excited. Lt. Tyler [23] said that it was not necessary to call the plotters or get in touch with anyone. Further the deponent sayeth not.

(Signed) Joseph P. McDonald,
JOSEPH P. McDONALD,
Sig. Co., Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of December A. D. 1941 at Fort Shafter, T. H.

(Signed) Adam R. Huggins,
ADAM R. HUGGINS,
2nd Lieut., Signal Corps,
Summary Court.

STATEMENT OF LIEUT. KERMIT A. TYLER

20 DECEMBER 1941.

On Wednesday, 3 December 1941, I was first detailed to learn the operation of the plotting board in the Interception Control Center. I reported for duty at 1210, just as the crew on duty was leaving. I spoke with Lt. White, Signal Corps, a few minutes and he showed me the operating positions for Navy, Bombardment, Antiaircraft, Controller's position and Aircraft Warning Service. I remained on duty until 1600. Only a telephone operator was on duty with me.

On Sunday, 7 December 1941, I was on duty from 0400 to 0800 as Pursuit Officer at the Interceptor Control Center. From 0400 until approximately 0610 there were no plots indicated on the interception board. From that time until 0700 a number of plots appeared on the control board at various points surrounding the Island of Oahu. I particularly remember at least one plot South of Kauai and I believe there was one South of Molokai. There were two plots at some distance north of Oahu and which I remember seeing on the historical record. At the time, I questioned the plotter of the historical record who stated that he makes a record of all plots as they come in. There were a number of plots over and around the Island of Oahu. Having seen the plotters work once

2472 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

before with about the same general layout, this did not seem irregular to me. At 0700 all of the men except the telephone operator folded up their equipment and left. At about 0700 the operator at the OPANA RDF Station called me and said that the instrument indicated a large number of planes at 132 miles to the North. Thinking it must be a returning naval patrol, a flight of Hickam bombing planes, or possibly a flight of B-17 planes from the coast, I dismissed it as nothing unusual. (It is common knowledge that when Honolulu radio stations are testing by playing Hawaiian music throughout the night that coincidentally B-17s are apt to come in using the station [24] for radio direction finding. The radio station was testing on the morning of 7 December, 0230-0400). At about 0750 I heard some airplanes outside and looking toward Pearl Harbor saw what I thought to be the navy practicing dive bombing runs. At a little after 0800, Sergeant Eugene Starry, A. C., Wheeler Field, called me to tell me that Wheeler Field had been attacked. I immediately had the telephone operator call all men back to duty. Most of the men had returned to duty by 0820 when Major L. N. Tindal arrived and took charge of the Control Center. I remained on duty assisting Major K. P. Bergquist and Major L. N. Tindal as Pursuit Control Officer until about 1615, 8 December 1941, with the exception of rest periods from 2000 to 2400, 7 December, and 0600 to 1000, 8 December.

(Signed) Kermit A. Tyler,
KERMIT A. TYLER,
1st Lieut., Air Corps.

Had Lieut. Tyler alerted the Hawaiian Air Force instead of deciding that the planes were friendly, there would have been time to disperse the planes but not to get them in the air as they were not warmed up. Dispersion, in all probability, would have decreased the loss in planes, but would not have prevented the attack on Pearl Harbor.

ACTION AT TIME OF ATTACK

At 7:55 A. M., December 7th, the enemy planes attacked Hickam Field, Pearl Harbor and Wheeler Field. At 9:00 a second attack was made, and a third about 11:00 A. M., each lasting approximately fifteen minutes. At 8:03 A. M. the Chief of Staff reported the attack, and by 8:10 order had been given to all units (major echelons) by telephone to put Alert #3 in effect.

Antiaircraft Artillery: All antiaircraft batteries had skeleton crews guarding them. All units had in their possession ammunition for rifles, pistols, automatic rifles and machine guns. 3" ammunition had been placed in positions accessible to all batteries except four batteries of the 64th C. A. C. (AA). The first of these batteries began drawing ammunition at the Aliamanu Crater at 8:15 A. M. At 10:15 all these batteries had drawn the initial unit of fire.

The automatic weapon batteries at Fort Kamehameha, Pearl Harbor and Camp Malakole took the enemy planes under firing during the eight o'clock raid. The first 3" gun fire was opened at 8:30, and all batteries of the south group were in action by 10:00 A. M. East group opened fire between 11:00 A. M. and 12:00 noon. (For detailed firing of batteries, see Exhibit "S").

[25] *Hawaiian Air Force:* During the first attack men started pulling planes out of the fire, and at 8:50 the serviceable pursuit planes took off. At 11:40 A. M. the serviceable bombers took off on a mission under naval control.

Before the attack December 7th status of planes in Hawaiian Department was as follows:

Pursuit planes in commission.....	80	
Pursuit planes out of commission.....	69	
Reconnaissance planes in commission.....	6	
Reconnaissance planes out of commission.....	7	
Bombers in commission.....	39	
Bombers out of commission.....	33	
Damaged in Raid:		
Pursuit planes.....	88	
Reconnaissance planes.....	6	
Bombers.....	34	
Status as of December 20th, 1941:	<i>In commission</i>	<i>Reparable locally</i>
Pursuit planes.....	61	22
Reconnaissance.....	6	2
Bombers ¹	50	13

¹ Includes 29 bombers from mainland.

Exhibit "T"

A comprehensive study of the losses inflicted on the enemy by the army places the number of enemy planes brought down by aviation and antiaircraft fire at twenty-nine (29)

Exhibit "U"

24th Division: Troops of the 24th Division at Schofield were attacked at 8:10 A. M. Men with automatic rifles returned the enemy's fire. At 8:30 A. M. the Division started moving to its battle positions, and all units were in position by 5:00 P. M. and had one unit of ammunition on the position. The second unit of fire was issued during the night.

25th Division: The 25th Division opened antiaircraft fire at 8:30 A. M. It also started to move to battle positions at 8:30 A. M., and completed movement to position by 4:00 P. M. and had issued one unit of fire. The second unit of fire was issued during the night.

All movement and action of troops was carried out as prescribed in [26] standing operating procedure (See Exhibit "B") without confusion. The value of planning and training with everyone made familiar with the plans was brought out very clearly.

At 9:00 A. M. the first civilian surgical teams began reporting at Tripler General Hospital.

At 12:00 noon the Civilian Relief Committee began the evacuation of Hickam Field, Wheeler Field and Schofield, and continued throughout the afternoon and part of the evening. Most of the women and children were moved to school buildings, although a few from these posts and all of the women and children from Shafter, Tripler, Ordnance Depot and Signal Depot were sheltered in the incomplected underground Interceptor Command Post.

During December 7th the foreign agents previously listed by F. B. I. and G-2 were arrested and confined at the Immigration and Quarantine Stations as follows:

Japanese	370
Germans	98
Italians	14
Total	482

The 804th Engineers began clearing the runways at Hickam Field and Wheeler Field as soon as the first attack was over. The fire fighters, while still fighting fire, assisted in moving the debris. During the evening of the 7th the District Engineer began repairing broken water pipes and other utilities at Hickam Field.

Governor Poindexter put the M-Day Bill in effect on December 7th, and on December 8th declared martial law and requested the Department Commander to assume the responsibility as Military Governor.

December 8th the District Engineer took over all building materials, supplies and equipment, called all construction companies into service and started the construction of bunkers and the extension of runways at the air fields. On the 9th he started construction of evacuation camps for army dependents and civilians. December 8th the Department Engineer distributed material to the troops and got field fortifications under way. December 9th he started construction of slit trenches on posts and in the vicinity of school buildings and parks in the city, and started plans for construction of shelters throughout the city.

Martial law was placed in effect on December 8th, and the following action was taken:

1. Courts were closed.
2. All civilian officials were asked to remain in their positions and carry on the work of their offices.
- [27] 3. An Advisory Committee headed by Governor Poindexter was appointed.
4. A Military Commission and Provost Court were appointed.
5. The sale of intoxicating liquors, beer and wine was prohibited.

[28] EFFORTS TO IMPROVE DEFENSES OF HAWAIIAN ISLANDS

My efforts to improve the defenses of the Hawaiian Islands has a bearing upon all work under me since assuming command of the Hawaiian Department, February 7, 1941. The following are some of the most important items taken up and the action taken by the War Department. Each item is supported by exhibits.

2474 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1. The need for additional facilities and troops in this Department became evident very soon after arrival. On February 19th a letter was transmitted to the Chief of Staff of the Army outlining some of the deficiencies discovered and recommending action which should be taken to correct them. Among these points were:

- (1) Cooperation with the Navy,
- (2) Dispersion and protection of aircraft and repair, maintenance and servicing of aircraft,
- (3) Improvement of anti-aircraft defense,
- (4) Improvement of the harbor defense artillery,
- (5) Improvement of the situation regarding searchlights,
- (6) Roads and trails,
- (7) Necessary bombproof construction,
- (8) Increase in the number of engineer troops.

A copy of this letter is attached as Exhibit "V".

2. On February 19, 1941, a secret letter was submitted to the War Department, subject: "Dispersion and Protection of Aircraft", file Engr. 452. This letter explains the urgent necessity of providing protective bunkers for bombardment and pursuit aviation in this Department and recommended that funds in the amount of \$1,565,600.00 be allotted for this purpose. This cost included the costs of the necessary taxiways and hard standings to permit the dispersion of planes at Hickam Field. A large part of the ground surrounding the landing mat at Hickam Field is made up of a soft fill and it is not possible to disperse planes onto this ground without the provision of taxiways and hard standings. This correspondence was indorsed back to this Department by the 6th Ind., AG 600.12 (2-19-41) MC-G, September 12, 1941, which stated that the plans for revetments had been approved and that funds in the amount of \$1,358,000.00 [29] would be available about January 1, 1942. At the time of the attack on December 7th, no money had been received for this project and it was impossible to adequately disperse the planes at Hickam Field. Construction of these bunkers was initiated immediately after the attack under the Emergency Authority granted.—Exhibit "W".

3. It was apparent that the facilities of the Hawaiian Air Depot which had been constructed in a very concentrated area at Hickam Field would be extremely vulnerable to an attack. As a result, a letter was submitted to the War Department on September 10, 1941, file Engr. 600.96, subject: "Underground Repair Facilities Hawaiian Air Depot", which strongly recommended the approval of bombproof facilities for the repair of aircraft in this Department, and requested funds in the amount of \$3,480,650.00. This correspondence was indorsed back by 1st Ind., file AG 600.12 (9-10-41) MC-G, Adjutant General's Office, October 27, 1941, stating that due to the cost of providing bombproof facilities that it was the War Department's policy not to provide them, and suggesting that splinterproof installations be provided. During the attack of December 7th, the Air Depot was one of the main targets and suffered tremendous damage. Construction of an underground bombproof facility was started under the Emergency Authority subsequent to the attack. Steps have also been taken to decentralize the Hawaiian Air Depot to several smaller shops around the island.—Exhibit "X".

4. Fortifications and Camouflage Funds.—A letter was submitted to the War Department on July 28th, file AG 121.2, subject: "Reallocation of Special Field Exercise Funds", requesting that these funds be made available for purchase of fortification and camouflage equipment. This letter was answered by confidential radiogram No. 31, August 12, 1941, stating these special field exercise funds could not be made available for this purpose. This radiogram was followed by letter dated August 13, 1941, file AG 353 (7-28-41) MC-D, subject: "Reallocation of Special Field Exercise Funds for Field Fortification and Camouflage Projects", in which it was stated that the interest of the Hawaiian Department in providing field fortifications was appreciated by the War Department, but that funds could not be allotted for this purpose. This letter was returned by 1st Ind. this headquarters, file AG 353 (7-28-41) MC-D, September 14, 1941, again recommending an immediate allotment of \$125,000.00 for field fortification and camouflage purposes. In 2nd Ind. to [30] the same correspondence September 26, 1941, the Adjutant General stated that the allotment could not be made. Also on this same subject, this headquarters submitted to the War Department a clipper letter on October 28, 1941, file Engr. 400.312, subject: "Funds for Field Fortification and Camouflage Material", which recapitulated the previous correspondence on this subject, and requested an allotment of

\$1,445,542.00 be made available immediately for the purpose of fortification and camouflage materials. No funds had been received for this purpose at the time of the attack.—Exhibit "Y".

5. Camouflage: The necessity of camouflaging treatment of all airfields in this Department was brought to the War Department's attention in letter File Engr. 000.91, July 15, 1941, subject: "Request for Funds for Camouflage of Wheeler Field". This letter stated, "There is definite need for camouflage treatment on all airfields in the Hawaiian Department. Up to this time no camouflage treatment had been undertaken at any airfield in this Department." This proposal was finally approved in 3rd Ind., file AG 007.5 (7-12-41) MC-G from the Adjutant General's Office to the Chief of Engineers which directed that funds in the amount of \$56,210.00 be included in the next budget estimate for Wheeler Field. At the time of the attack on December 7th, no funds had been received for this purpose. The question of camouflage was also submitted to the War Department by letter this headquarters February 27, 1941, file Engr. 000.91, subjects "Camouflage of Defense Installations". This project was approved by 4th Ind., AG 007.5 (2-27-41) MC-E, Adjutant General's Office June 27, 1941. At the time of the attack, no funds for this purpose had been received, and although considerable work had been done by troop labor to camouflage these installations, its effectiveness was limited by our inability to buy the necessary materials.—Exhibit "Z".

6. The revised Roads and Trails Project was submitted by letter this headquarters, file Engr. 611, February 19, 1941, which recommended that funds in the amount of \$1,370,000.00 be allotted for construction of the military roads, railroads and trails in this Department. At the time of the attack, only \$350,000.00 had been allotted for this purpose.—Exhibit "1A".

7. The need for additional airports was brought to the War Department's attention in letters file Engr. 600.12, according to the following [31] Schedule:

(1) Bellows Field.....	April 5, 1941
(2) Barking Sands.....	May 2, 1941
(3) Hilo Airport.....	May 2, 1941
(4) Homestead Field.....	May 2, 1941
(5) Morse Field.....	May 2, 1941
(6) Haleiwa.....	May 22, 1941
(7) Burns Field.....	May 22, 1941
(8) Lanai.....	May 22, 1941
(9) Parker Ranch.....	June 2, 1941
(10) Kipapa.....	May 14, 1941

At the time of the attack no funds had been allotted specifically for construction at these airfields. The War Department disapproved the proposed site at Kipapa and directed construction at Kahuku. This relocation required protracted negotiations with the Fourteenth Naval District which had a bombing range on the Kahuku site. These negotiations were completed only a short time before the attack, but as no funds had been received, no construction had been started. In this connection, several expedients had to be adopted due to the non-availability of funds. Construction work at Molokai, Burns, Morse and Barking Sands was actually done by troop labor using materials provided by the WPA. The need of an additional airdrome on Oahu was recognized as acute. The only possibility for immediate development was in improving the field at Bellows, and the only funds which had been made available for construction work at Bellows Field applied to housing only. The project letter on Bellows Field included a request for funds for improvement of runways, installation of gasoline storage and other facilities to make this a first class operating base. As stated, no funds had been allotted for these improvements. Since the need for these vital facilities was acute, this Department authorized the District Engineer to proceed with their construction, utilizing any funds which might be available to his office. At the time of the attack, provision had been made for gasoline storage at Bellows and a 5000' runway was about half done, and the District Engineer was able to complete this runway by Thursday night following the attack. Bellows Field is now a useable base, but all construction which [32] has been done to make this an operating base has been done without any funds being allotted by the War Department. The improvement of other airdromes on Oahu at either the Kipapa or Kahuku area or at Haleiwa had not been undertaken at the time of the attack because no funds had ever been allotted for this purpose.—Exhibit "1B".

8. Kaneohe Bay Defenses: It was recognized that the preceding arrangement under which the Army disclaimed any responsibility for the defense of the new

Naval Air Station at Kaneohe Bay was a mistake. A letter was prepared and transmitted to the War Department on the 18th of February 1941, subject: "Defense of Naval Air Station Kaneohe Bay, Oahu, T. H." file 381. This letter informed the War Department that this Department had assumed responsibility for the defense of this area. This subject was again covered in letter this headquarters, file Engr. 600.96, dated April 14, 1941, subject: "Protection of Seacoast Defense Batteries" to the Adjutant General, and recommendation was made that a 12-inch gun battery similar to Battery Closson be obtained and shipped to this Department for installation in the Kaneohe Bay area. The War Department recognized the need of this protection for Kaneohe Bay, but was unable to supply a 12-inch gun battery for this. The project for the permanent defenses at Kaneohe Bay was submitted by letter of this headquarters 31 July 1941, file AG 381/20 Kaneohe Bay project, subject: "Coast Artillery Armament for Naval Air Station Kaneohe Bay", which recommended both additional personnel and additional armament required. This was answered by 3rd Ind. Adjutant General's Office, file AG 381 (7-31-41) MC-D, October 30, 1941, which approved the temporary utilization of armament now on hand in this Department. This indorsement also stated that the reinforcements of peace or war garrison of the Hawaiian Department for the beach and land defense of this area was not contemplated. The project for the utilization of temporary armament was submitted on the 18th of September 1941, file Engr 662/4 x 662/7 which recommended the provision of funds for the construction of Panama mounts for three 155-mm batteries and a railroad gun emplacement, and requested that funds in the amount of \$215,265.00 be allotted for the construction of these positions. This matter was also followed up in radiogram No. 320 this headquarters, September 18, 1941, which recommended that funds in the amount of \$215,265.00 be made available for the construction at Kaneohe Bay and also that \$117,256.00 be made available for the completion of the project for [33] construction of railroad gun positions. At the time of the attack no funds had been allotted for this construction. Exhibit "1C".

9. The necessity of improvement of the landing strips at Wheeler Field was brought to the War Department's attention by letter this headquarters, file Engr. 686/d, 21 June, 1941. In 2nd Ind. on this correspondence, from the Office of the Chief of the Air Corps, August 25, 1941, question was raised as to the adequacy of the second proposed north-south runway, and the statement was made that no funds were available at that time for the construction and improvements recommended. In 2nd Ind. Chief of the Air Corps, Washington, D. C., September 2, 1941, to this Department, statement was made that \$25,000.00 had been requested for the leveling of the main runway at Wheeler Field. At the time of the attack, however, no funds had been received for the improvement of this landing strip. Some improvements had been made utilizing troop labor of the 804th Engineers; however, due to the lack of funds these improvements were limited and did not adequately solve the problem.—Exhibit "1D".

10. The Aircraft Warning Service is probably the most important single project for the defense of Oahu. At the time of the attack, however, none of the three fixed stations in the original project had been completed due to the impossibility of securing materials under the priorities system. The Kaala station, for example, depended for its construction on construction of the cableway approach. In radiogram 3009 on June 10th, this headquarters reported to the War Department that this cableway material could not be delivered unless a higher priority rating was received, and in War Department radio 904, June 26th, the Adjutant General reported that this priority rating had been advanced to an A-1-c rating. With this rating it was not possible to secure the material to install this installation and the others expeditiously. Revised estimates for engineer construction of the superseding project of six fixed stations and six mobile stations and preliminary estimates for the cost of the signal communications involved in this revised project, were submitted by letter this headquarters 29 September, 1941, file Sig 676.3. Pending the allotment of these additional funds, this Department authorized the District Engineer to proceed with construction of AWS stations with any funds available to his office. At the time of the attack, however, due to this priority difficulty, none of the three original fixed stations were in operation.—Exhibit "1E".

[34] 11. The entire construction program in this Department has been delayed due to the situation regarding priorities. It was extremely difficult to secure materials for the construction program, not only those which were ordered specifically for a defense project, but particularly those materials which are ordinarily purchased as an "over the counter" transaction. From a study of

the priorities situation, and also of the shipping situation, it became evident in June that the local dealers who ordinarily maintain stocks and materials necessary for defense projects would not be able to secure delivery from the mainland until after a purchase order from a Government agency had been placed. This meant that after the priority was placed, if the item was not available in local stock that there would be a delay of from six weeks to two months even under the most favorable conditions before mainland delivery could be effected. To remedy this situation a letter was sent to the War Department by clipper airmail, file Engr. 523.07, subject: "Priorities and Preference Ratings," July 3, 1941. This letter presented the problem in detail and recommended to the War Department that action be taken to correct this situation. The letter was followed up by radio on the 14th of August, and was answered by 1st and 2nd Inds. from the Priorities Committee dated August 18, 1941, and the Adjutant General dated August 26, 1941. The problem was again presented to the War Department by letter dated October 23, 1941, file Engr. 523.07, which recommended that the Office of Production Management be opened in Honolulu. In 2nd Ind. on this correspondence, the Priorities Committee advised that the Office of Production Management had been requested to establish a field office in Hawaii. This field office had not been established at the time of the attack and due to this difficulty in securing materials, many of our projects were not completed at the time of the attack.—Exhibit "1F".

12. Another effort was made to solve this supply problem by securing funds for the advance procurement of certain essential materials. It was originally requested in clipper airmail letter this headquarters July 28, 1941, file Engr. 600.12, which recommended that a revolving fund of \$1,000,000.00 be set up to permit the advance procurement of essential materials before the specific allotments had been made for individual projects. This letter had not [35] been answered on the 13th of September when a follow-up radiogram was sent to the War Department, and on the same day the matter was brought to the personal attention of the Deputy Chief of Staff in the War Department, who very quickly secured a solution of the problem by the allotment of \$500,000.00 for the advance purchase of essential materials. Before these materials could be secured, however, the \$500,000.00 was diverted by the War Department for the construction of housing at Kaneohe Bay, with the result that on the day of the attack, no reserve supplies of materials other than lumber had been accumulated.—Exhibit "1G".

13. The following letter shows appreciation by the Deputy Chief of Staff for Air of the difficulties in the carrying out of the project for the creation of air fields to permit ferrying of planes to the Philippine Islands, and of the rapidity with which the arrangements were completed.—Exhibit "1H".

NOVEMBER 27, 1941

Lieutenant General WALTER C. SHORT, U. S. A.,
Headquarters Hawaiian Department,
Office of the Department Commander,
Fort Shafter, T. H.

DEAR SHORT: The copy of your report on the additional air routes has been received. The quantity of details requiring coordination, and the distances involved in the projects make the short time consumed in getting rolling almost unbelievably short.

I extend you my personal thanks for the effort you have expended on this job and the results you are getting.

The way things are working out now, it looks as if we will be using trans-Pacific airways almost continuously from now on. Our plans are O. K. for 4-engine bombers, but what are the prospects for medium bombers? Do you think we should even study that phase of trans-Pacific operations?

Best regards.

Sincerely,

/s/ H. H. ARNOLD,
Major General, U. S. A.,
Deputy Chief of Staff for Air.

[36] 14. Increase in Engineer Troops:

February 10, 1941.—TAG sent 3d Ind., file AG 320.2 (11-1-40) M-C saying that 3d Engineer Regiment was to be increased. Regular Army personnel not available to further increase Engineer Regiment. Selectees prohibited from being sent and it was not possible to aid in creating Engineer Battalion here as requested. On 19 Feb. 1941, letter to TAG file Engr. 322.03 requested that War Department

2478 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

send an Eng. Regiment (Aviation) and an Eng. Regiment (General Service) here. 1st Ind., May 15th, A. G. 320.2 (2-19-41) MC-C-M; TAG, stated that 34th Eng. Regiment (C) would be activated and that the personnel would probably arrive in June. This Regiment was to take the place of the Regiment (General Service) requested. On June 18th, letter AG 320.2 (6-5-41) MR-MC, the War Department issued orders expanding 804 Eng. Company to the 804th Eng. Battalion. The troops for the 804th Eng. Battalion arrived in this Department 21 July 1941. Previous instructions concerning the activation of the 34th Eng. Battalion had been rescinded with the result that the unit was not activated until 17 October 1941. It had not been completely trained and lacked many items of equipment at the time of the attack. See Exhibit "1 I".

15. Increase in Coast Artillery Troops:

February 18, 1941.—Letter written to TAG urgently requesting two (2) Regiments CA Mobile; 1 Battalion CA (AA) gun, Mobile (less searchlight battery); one Regiment CA (TD) 155 mm. gun; AA filler replacements (90 officers and 2064 enlisted men); Harbor Defense Artillery reinforcements (150 officers and 2700 enlisted men). TAG replied by first indorsement May 10, 1941, file AG 320.2 (2-18-41) (55) that the Hawaiian Department CA Garrison would be augmented with a total of 276 officers and 5734 enlisted men between June 1941 and March 1942, as follows: (See Exhibit "1J").

June 1941

- (1) AA fillers, 60 officers, 1337 enlisted men.
- (2) 98 CA 62 officers, 1329 enlisted men
- (3) Second Battalion, 97 CA less Battery H (Gun) Battery E (SL) (17 officers, 359 enlisted men).

[37] November 1941:

- (1) 97 CA less 2 Battalion, 3 Battalion—(48 officers, 885 enlisted men).
- (2) Battery H, 97 CA (4 officers, 134 enlisted men).
- (3) Medical Personnel, 98 CA (7 officers, 49 enlisted men).

March 1941:

- (1) AA fillers (24 officers, 661 enlisted men).
- (2) 3 Battalion, 97 CA (37 mm. gun) less Battery M, 3 Battalion, 98 CA (37 mm. gun) less Battery M (54 officers, 980 enlisted men).

February 25th, 1941.—Letter written to TAG, file AG 320.2/57 (Exhibit 1J) requesting increase in enlisted men in 251st C. A. Regiment NG from 1181 to 1450. Disapproved by TAG March 8, 1941 (Exhibit 1J) 1st indorsement, file 320.2/57.

February 25th, 1941.—Letter written to TAG, file 320.2/58 (Exhibit 1J) requesting following reinforcements of Hawaiian Department:

- (1) That CAC requested February 18th (Exhibit 1J) be given priority.
- (2) That 11th F. A. be organized under T/O dated November 1, 1940.
- (3) One Tank Battalion.
- (4) Two (2) M. P. Companies for guarding air fields.
- (5) Reinforcements of Inf. Regiments so as to be organized under T/O

November 1, 1940.

- (6) That 11th F. A. Brig. (less 11 F. A.) be reinforced and organized under T/O November 1, 1940.

TAG replied by first indorsement, file 320.2 (2-25-41) (58) (Exhibit 1J) that CAC and Engineering increases would be considered separately; that reinforcements for F. A. and Inf. Regiments were not considered urgent; that Tank Battalion and 2 M. P. Companies for Hawaiian Department were disapproved; and that any reorganization of units was to be accomplished by reducing size of existing units and by carrying others as inactive. On May 28th, orders for the shipment of CAC increases were rescinded, file 320.2/70. On July 15, letter from TAG, file 320.2/82m (Exhibit 1J) activated the following units:

[38] 97th CA Headquarters and Headquarters Battery, 2 Battalions, and Batteries F and G.

98th CA Regimental Headquarters Battery (less band); Headquarters and Headquarters Battery 1st and 2nd Battalions, and Batteries A, B, C, D, F, G and H.

16. Increase in Air Corps Strength:

April 9th, 1941.—Letter from TAG, file 320.2 (3-5-41) (61) (Exhibit 1K) directing that Air Defense Command be set up. First indorsement, May 3, 1941 (Exhibit 1K) to TAG called attention to the fact that the plan was presented to War Department in letter of April 25th, 1941, Paragraph 7 "Reorganization of Forces in Hawaiian Department" (Exhibit 1K).

April 24th, 1941.—Letter written to TAG from COHAF (thru channels) file 320.2/94 (Exhibit 1K) subject "Air Base Group" requesting:

- (1) Bellows Field as permanent Air Corps Station
- (2) Permanent Station 15 Pursuit Group
- (3) A redistribution of Air Base Groups
- (4) That two Air Base Groups be authorized.

By second indorsement TAG to COHD dated June 26th, 1941, file 320.2 (4-24-41) (94) (Exhibit 1K):

(1) War Department stated that Troop Unit Basis FY 1942 provided for two additional material squadrons for HAF. This is believed to provide sufficient air base units to care for Bellows Field.

(2) Organization of Air Base Unit for 15th Pursuit Group held in obeyance pending decision on new station. By third indorsement CGHD to TAG, file 320.2/94 (Exhibit 1K) request was made for two additional material squadrons to be stationed at Bellows Field. On August 7th, 1941, radio file 320.2/100 (Exhibit 1K) was sent to Chief of Air Corps requesting Headquarters Detachment in absence of Air Base Group. On August 15th Radio No. 380 (Exhibit 1K) was sent to TAG requesting information of status of Air Base Groups for Bellows Field. Administrative situation there very difficult. In answer, Chief of Air Corps sent radio no. 172, file 320.2/108c (Exhibit 1K) stating [39] not favorably considered because it would exceed the 59,000 allotted and also that TAG had been requested to activate Headquarters Detachment. On September 27th, 1941, by letter (exhibit 1K) from TAG, file 320.2/108d, subject "Activation of Air Corps Unit" a Headquarters Detachment was authorized at Bellows Field but personnel had to be furnished by the Department.

On August 30, 1941, Radio No. 779, file 320.2/108 (Exhibit 1K) was received asking:

- (1) What are total AC personnel requirements.
- (2) Total requirements for personnel for arms and services with AC.
- (3) Number AB groups needed and their locations.

On September 9, 1941, Radio No. 272 to TAG, file 320.2/108a (Exhibit 1K) answering Radio No. 779 requesting the following:

- (1) Two AB Groups (one for Bellows, one for Kahuku)
- (2) Air Corps enlisted men now in Department sufficient to organize these groups.
- (3) One Squadron (HB) (Exhibit 1K) consisting of 27 officers, 220 enlisted men to replace 14th Bombardment Squadron transferred to Phillippine Islands.
- (4) Personnel for Bellows. Medical Department (1 officer, 7 enlisted men) Dental Corps (1 officer) Quartermaster (1 officer, 30 men) Ordnance Dept. (1 A. B. Co. of 4 officers and 60 enlisted men).
- (5) Personnel for Kahuku Point. Medical Department (3 officers, 12 enlisted men) Dental Corps (1 officer) Quartermaster (1 officer, 30 enlisted men) Signal Corps (10 enlisted men specialists)
- (6) Following personnel needed: Air Corps (3871 enlisted men) Medical Corps (6 officers, 36 enlisted men); Dental Corps (1); Quartermaster (4 officers, 70 enlisted men). 3 AB Squadrons one each at Barking Sands, Kauai; Morse Field; Hilo, Hawaii.
- (7) Near Future. Two (2) additional AB Squadrons—(1) Lanai (under construction) (2) Parker Ranch (project to be submitted).

On November 8th Radio no. 786 was sent to TAG, file 320.2/126 (exhibit 1K) requesting immediate assignment.

- (1) Three airdepot Groups to HAF
- (2) Procurement of civilian employees impossible and discharge of enlisted men for employment does not help.

[40] (3) 30% tactical planes grounded due to shortage in depot maintenance. Becoming acute.

(4) Must have personnel and material at once. No personnel available here for activation of units.

On November 15th Radio no. 402, file 320.2/126a, (exhibit 1K) from TAG stating that three Air Depot Groups were under advisement but that groups not available now. If and when available, will it come within strength of war garrison?

On November 19th Radio no. 889, file 320.2/126b (exhibit 1K) to TAG—Increase of three Air Depot Groups will not come within authorized war garrison

but should be furnished as soon as possible due to shortage in personnel. War garrison must be increased to accommodate Air Base Groups.

On November 18th the War Department activated Seventh Airways Squadron from existing personnel in Department, file 320.2/127 (exhibit 1K). On November 18th Radio no. 873, file 320.2/128 (exhibit no. 1K) was sent to TAG requesting Station Complements at Hickam, Wheeler, Morse Field and Barking Sands. Urgently requested. On November 25th 1941 Radio no. 455, file 320.2/128a (exhibit 1K) from TAG stated that until war garrison limitation was lifted, no additional personnel could be sent to the Hawaiian Department.

17. Reorganization Hawaiian Division & Increase in War Garrison April 25th, 1941. Letter written to TAG, file 220.3/37, (exhibit 1L) requesting that two triangular divisions be organized from the Hawaiian Division (Square) and the organization of station complements be made at Schofield Barracks and Fort Shafter; also Air Defense Command is to be created. By first indorsement dated July 29, 1941, file 320.3 (4-25-41) (37) (exhibit 1L). TAG returned this letter without action.

May 29th, 1941. TAG sent radio no. 837, file 320.3/37a (exhibit 1L) stating that the initial war garrison would be reduced to 58,000. Reductions would come from troops other than Air Corps, Anti aircraft, and Aircraft Warning Service.

[41] June 5th, 1941.—Letter was written to TAG, file 320.3/37b (Exhibit 1L) subject "War Garrison for Initial War Operations" stating

- (1) That Table I, (Exhibit 1L) shows forces recommending totaling 59,425.
- (2) Statement that proper defense of Kaneohe Bay, Airfields, beaches and provisions for mobile reserve cannot be successful with only 59,000 troops.
- (3) Statement of minimum increase for Kaneohe Bay as follows: 1 Regiment Inf; 1 Regiment Field Artillery, 155 How (T. D.); 1 Battalion C. A. 155 guns plus one additional battery; 1 Regiment C. A. (AA); 1 Battery C. A. 12" Barbette guns.
- (4) Urgently requested that strength be increased from 58,000 to approximately 71,500 as follows: 2 Inf. Regiments; 1 Regiment Field Artillery, 155 How 1 Regiment CA (AA) SM; 1 Battalion CA 155 guns; 1 Battery CA 12" Barbette guns . . . total 11,279.
- (5) Again recommended that station complements for Schofield Barracks and Fort Shafter be organized. This would give an increase of 731 officers and men for Schofield Barracks and 131 officers and men for Fort Shafter.
- (6) Plans are to be submitted in the near future for garrisons each of outlying islands with a force consisting of approximately 1 regiment of Infantry and a composite battalion of Field Artillery, all of which will not be within war garrison strength.

On July 22, 1941, 1st indorsement to exhibit 1L file 320.3/37b (Exhibit 1L) TAG said

- (1) War Garrison of 59,425 recommended by CGHD is reduced to 57,429 and augmented by following units: 1 Regiment CA (AA) SM (less 1 gun battalion, band, basics), 1 Battalion CA 155 M guns with 1 additional Battery, 1 Battery CA.
- (2) Recommendation of war garrison for 71,500 officers and men is disapproved.

(3) Troops in excess of 59,690 authorized will be sent to Hawaii only in case the situation develops a need and if such troops are available.

18. May 2nd, 1941.—Letter written to TAG, file 320.3/38 (Exhibit 1M) subject "Organization of Anti Aircraft Artillery Brigade" requesting authority to activate the Headquarters and Headquarters Battery 53 CA Brig. and the Intelligence Battery, 53rd CA Brig. about June 1, 1941.

June 12, 1941.—First indorsement from TAG to CGHD, file 320.2 (5/2/41) (38) (exhibit 1M) gives authority to activate.

[42] 19. November 6, 1941.—Radio No. 759 to Chief Ordnance, file 320.2/121 (exhibit 1N) stated that 6-37 mm. batteries now in Hawaiian Department. Plans made for six more by March, 1942, but only twenty (20) guns on hand. When and in what quantities will the one hundred (100) 37 mm. guns listed under 1941 funds be sent? Reply not yet received.

20. *STANDING OPERATING PROCEDURE.* Before February 7, 1941, Field Orders No. 1 (Landing Operations) No. 1W (Sabotage) and 1 NS (Naval Security) had been prepared. It was found during Maneuvers, May 1941, that these field orders were too cumbersome. On July 14th, 1941, a tentative Standing Operating Procedure, Hawaiian Department was issued to each officer in the Department with instructions that any suggested changes were to be reported to

Department Headquarters by August 15, 1941. During the preparation of the final form of the Standing Operating Procedure, the tentative S. O. P. was in effect. The final form was issued on November 5, 1941. Each unit knew its mission in the event Alert No. 1, 2 or 3 was put into effect. Due to this planning (the S. O. P.) each unit was able to act quickly and promptly when the air raid took place on December 7, 1941.

EFFORTS TO BETTER PREPARE THE CIVILIAN COMMUNITY FOR DEFENSE

[43] Soon after taking command of the Hawaiian Department I made a survey with reference to possible defense measures to enable the civilian population to meet any emergency which might arise. I had been asked to speak to the Chamber of Commerce on Army Day, April 6th, and decided that this day was the best opportunity to obtain publicity, as practically all the important business men of Oahu were present on this occasion. I proposed the following items of prime importance:

1. Production and storage of food.
2. Organization of doctors and nurses for care of injured and wounded.
3. Organization of an auxiliary to the police force to guard utilities and prevent sabotage.
4. Preparation of plans and provision for evacuation of women and children and preparation of shelters for workers in the vicinity of central industries.

(For complete remarks on this occasion, see Exhibit "10".)

Production and storage of food: As a result of my talk and support by the papers and certain men of importance in the community, the storage of food in the pantry of the home was put into effect at once, and the purchases from the retailers increased about 20% during the first month.

For some years a study had been made of food production required and possible in the islands. A committee completed this work, and made definite assignment of acreage and crops to all plantations on the Islands. Plantation managers and the five big companies which act as factors for the various plantations all agreed to this plan. Necessary implements for changing from cane and pine-apples to truck gardening were listed for each plantation. Orders for seed for planting the first crop were placed with firms in the mainland, orders to be filled upon telegraphic advice.—Exhibit "1P".

On December 10th, after completion of the inventory of food on hand, a meeting was held with the Presidents of the five big companies and of the Governor's Food Committee. The District Engineer was directed to purchase the seed and equipment at once, as it was believed the matter could be handled in less time in this manner instead of having each plantation make purchases.

The committee on storage of food determined the articles and tonnage of the essential elements of diet necessary to provide for the civil population for six months. The cost of these items was estimated to be \$2,500,000 for human consumption and \$900,000 for feed for dairy cattle and poultry. This matter was taken up with the War Department.

Governor Poindexter and Delegate Sam King gave the storage of food their full support. However, the item was eliminated by the Bureau of the Budget and no action was gotten through Congress. The purchase of this emergency food reserve by the Department of Agriculture and the allocation of shipping therefor was authorized December 17th. Recent press dispatches indicate that the President has made an allotment for food production.

Organization of Doctors and Nurses for care of injured and wounded: The Medical Society of Honolulu got squarely behind my effort to prepare the doctors and nurses for an emergency. Twenty (20) civilian-aid station groups were organized and have had considerable practice in setting up their stations. They actually functioned efficiently on December 7th. Sixteen (16) surgical teams were organized. They started reporting at 9:00 A. M. December 7th, and by 9:30 all were employed. They are representative of the leading surgeons, anesthetists, etc., in the city. The regular operating staff at Tripler General Hospital was operating at 8:45 A. M.

After several conferences the Red Cross agreed to purchase and store in Honolulu \$200,000.00 worth of medicines and surgical supplies and equipment. Much of the equipment and supplies had been received prior to December 7th.

Buildings suitable for hospitals were surveyed, and many of these have actually been equipped and operated since December 7th.

Organization of auxiliary police force: The organization of an auxiliary police force was effected and placed under the command of Major Douglas King by the

2482 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mayor of Honolulu. This force was given some training in taking over leading utilities and the use of firearms. It proved to be a very efficient force immediately after the raid.

Auxiliary fire fighters and fire wardens have been organized. Requests for fire-fighting equipment have been made to the Office of Civilian Defense, and also sent direct by the Governor to the same organization.

[45]

Evacuation and shelters: Detailed plans were drawn for evacuation camps, for trenches in parks, schools, etc., and for splinter-proof shelters in the vicinity of public utilities. A request for \$2,800,000 for construction of these camps and shelters was made through the War Department and also direct by Governor Poindexter. The funds were not provided until after the attack December 7th. Since that date the President has made funds available to the Governor of the Territory of Hawaii for this purpose.—Exhibit "1Q"

M-DAY BILL

At the request of the Senate of the Territory of Hawaii I appeared before that body and explained the value and the necessity for the passage of the M-Day bill. The passage was effected in the next few days and the measure was signed by the Governor. The bill enabled the Governor to organize emergency committees and carry out many things of great benefit in the medical work, evacuation and police work immediately following the attack on December 7th.

LETTERS FROM CIVILIANS WITH REFERENCE TO MY EFFORTS TO IMPROVE CIVILIAN DEFENSE

The following copies of letters have been received: Exhibit "1R"

HONOLULU, T. H., December 22, 1941.

The PRESIDENT, *The White House, Washington, D. C.*

SIR: We, the undersigned, representing substantial business and social organizations in Hawaii, and having had for many years in many ways a vital interest in the armed forces stationed in Hawaii, do hereby wish to express our sincere appreciation of the services rendered to this Territory and to our Nation by Lieutenant General Walter C. Short.

We have found him at all times to be most cooperative and furthermore he has exercised a vigorous leadership in causing this community to prepare for an emergency such as exists at present. Almost a year ago he laid out a plan for this purpose and has taken all steps practicable toward carrying out such plan.

General Short's thorough foresight and his forceful presentation of his ideas to our "Territorial Legislature, to our local officials, and to our community in general have been very largely responsible for (a) the enactment of a sound "M-Day" Bill; (b) for the provision of a Territorial Guard; (c) for the de- [46] cision to increase stored food and to produce food; and (d) for the prevention of sabotage. He has shown a correct and sympathetic attitude toward the problems of the civil community in assuring cooperation of civilians.

He has maintained a high morale in his Command and has conducted "alerts" from time to time. He has proceeded with preparing the troops and with plans, now looking for financing from federal funds, for adequate and safe storage of sufficient supplies and equipment of all sorts for their use in a probable emergency.

We are encouraged by the fact that a committee has been appointed to go into various phases of the entire case, believing that the excellent men you have selected will render a just report, fair to all concerned.

Meanwhile, we wish to express to yourself and to all concerned our high esteem and our full confidence in the character and ability of General Walter C. Short as a citizen and as an officer, whatever his assignment may be.

This letter is prepared without the knowledge or consent of General Short or any other officials, merely in our hope that no unwarranted discredit may accrue to the record of such a conscientious and able officer, through adverse publicity or otherwise. This concern is in no way lessened by our vital interest in the adequate defense of Hawaii and our Nation.

With very best respects and wishes, we are

Yours very truly,

Lester Petrie, City of Honolulu, Mayor; C. R. Hemenway, President, Hawaiian Trust Co., Ltd.; A. L. Dean, Vice-President, Alexander & Baldwin, Ltd.; Walter F. Dillingham, President, Oahu Railway & Land Co.; F. D. Lowrey, President, Lewers & Cook,

Ltd.; H. H. Warner, Asst. Food Administrator, O. C. D.; J. B. Poindexter, Governor of Hawaii; S. B. Kemp, Chief Justice, Supreme Court; T. G. S. Walker, Director, Civilian Defense for Oahu; John E. Russell, President, Theo H. Davies & Co., Ltd.; George S. Waterhouse, Ex. Vice-President, Bishop National of Hawaii and Honolulu; Cyril F. Damon, Ex. Vice-President, Bishop Trust Co., Ltd.; Briant H. Wells, Executive Vice-President, Hawaiian Sugar Planters Association; H. A. Walker, President, American Factors, Ltd.; S. M. Lowrey, Treasurer, American Factors, Ltd.; P. E. Spalding, President C. Brewer & Co., Ltd.; Frank E. Midkiff, Trustee, Bernice P. Bishop Estate; Edouard R. L. Doty, Terr. Director of Civilian Defense; James Winne, Mgr. Mdse. Dept., Alexander & Baldwin, Ltd. (now acting as Food Administrator and Supply Officer).

C. C. to General Walter C. Short.

[47]

MAJOR DISASTER COUNCIL

CITY AND COUNTY OF HONOLULU

Office of the Director, Island of Oahu

HONOLULU, HAWAII, December 20, 1941.

Lt. General WALTER C. SHORT,
Fort Shafter.

DEAR GENERAL SHORT: Please allow me to express my sincere regret that our contact through Civilian Defense Plans has terminated.

It was greatly due to your help and backing that our Civilian Organizations were so far advanced that they were able to function so splendidly during the attack.

You will always be able to recollect that your determination to have our Civilian Groups Prepared saved many lives of our Sailors and Soldiers through the organized effort of our Civilian Defense Medical committee and the many trucks that we had ready to be turned into ambulances at a minute's notice.

Please be assured that you will carry the sincere thanks and Aloha of your many friends here who realize the distress you saved by urging and helping us to be prepared.

Yours very sincerely,

(s) T. G. S. Walker,
T. G. S. WALKER,
Director, Civilian Defense, Island of Oahu.

[47a]

SEAL OF THE TERRITORY OF HAWAII

TERRITORY OF HAWAII

Executive Chambers

HONOLULU

23 DECEMBER 1941.

Lieutenant General WALTER C. SHORT,
Fort Shafter, T. H.

MY DEAR GENERAL SHORT: Having noted in the public press that an investigation is being made as to the military preparedness of the Army and Navy in Hawaii on December 7, 1941, I believe it appropriate that I make to you a statement as to the state of preparedness of the civil communities of these Islands for war when they were so insidiously and treacherously attacked on December 7, 1941.

The citizens of the Hawaiian Islands have always appreciated that these Islands were important to National Defense from a military standpoint, but it has been only since your arrival in these Islands on February 5, 1941 that it has been brought home to the civil population the importance of the part it would play in the event of a war in the Pacific. On December 7th, the citizens of these Islands met the hour of their test in such a manner as to make me proud to be the Chief Executive of these Islands. Your foresight in urging the population to prepare to meet the possible vicissitudes of war and the joint efforts of the Army and civil population in planning and preparing for this emergency was magnificently rewarded.

2484 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

It may be of interest to point out in detail some of the plans and preparations which bore fruit on December 7, 1941.

(1) *The enactment of the Hawaiian Defense Act* by a special session of Legislature called for that purpose. This legislation permits a mobilization of the entire civil economy of the Islands in the interest of National Defense or in the event of disaster. By virtue of this act, civilian [47b] defense was planned and many of its phases were brought to such a point of preparation that they were able to go into action immediately and to function effectively on December 7, 1941.

(2) *The production and conservation of food:* Householders were persistently urged to stock their shelves in canned food. It is estimated that this resulted in increasing the available food supply of the Hawaiian Islands by more than twenty percent. Federal appropriation was requested for procurement and storage for food reserve. This appropriation has, since December 7, 1941, been authorized. By agreement with plantation owners, plans were made for the procurement and storage of seed and the planting of certain large areas with quick growing food crops. Agreements were also made for the growing, in normal times, of these crops not usually grown in marketable quantities. In furtherance of this plan, the War Department was induced to permit the purchase of Island grown potatoes for the use of the Army although the price was above that of mainland potatoes. In anticipation of the receipt of reserve supplies of food asked for in the emergency, the Army supported a certificate of necessity for building an adequate warehouse to meet these needs. This warehouse is now available for the storage of food supply when it arrives.

(3) *The medical facilities* for the care of the injured and wounded during any disaster was one of the first things accomplished by the civilians of these Islands for an emergency. This resulted in mobilizing the entire medical profession of the Islands with all its medical facilities. Approximately three thousand persons were given training and instruction in First-Aid as required by the Red Cross. The persons thus trained assisted in carrying out the arduous tasks of evacuation. Twenty First-Aid units were organized, each unit consisting of personnel of about one hundred and twenty. An ambulance corps of one hundred and forty improvised ambulances were organized. The performance of their tasks by these groups was one of the highlights of the civil defense efforts on December 7, 1941.

(4) *Plans for the evacuation of women and children and the [47c] preparation of shelters* for workers in essential industries had reached a high state of perfection on December 7, 1941, and the evacuation of women and children from areas attacked was accomplished in a most admirable manner.

(5) *An auxiliary police force* to guard utilities and to prevent sabotage was organized at an early date in our preparation and it was able to function instantly when called upon to do so on the morning of December 7th. Their work of this force was exceptional and excellent.

(6) *Legislation authorizing a home guard* was enacted at the special session of the Territorial Legislature. It was well planned and so organized that 1400 of such home guardsmen could and were placed on duty thereby relieving members of the Army for other military duty.

(7) *There were many other matters* too numerous to detail here which were planned and accomplished at your instigation. Important among these was the bringing home to the public the urgent necessity for cooperation and public service in times of emergency.

All of the foregoing required tremendous effort on the part of the local authorities, the citizenry and military authorities. All such efforts have been rewarded since December 7, 1941, in that Territorial and City Governments and all phases of the public welfare have overcome all obstacles and have operated smoothly as a direct result of prior planning and training.

It is my belief that the public has confidence in the military and civil authorities. The fact that the Japanese Government has seen fit to inflict a treacherous attack has not in any way diminished the faith of this community in your demonstrated abilities. I wish to state that the magnificent way in which the Territory of Hawaii met its problem in its crucial hour was in a large measure due to your foresight. I am deeply grateful for your efforts on behalf of the Territory.

You are at liberty to use this letter in any way which you see fit. THIS IS A TRUE COPY.

Very sincerely yours,

(S) J. B. POINDEXTER,
Governor of Hawaii.

L. W. TRUMAN,
Captain, Infantry.

[48] I have presented many of my actions, both with reference to the military defense of the islands and the preparations of the civil community for defense, to show that I have taken both a very active and an intelligent part in this work from the time of my arrival in the Hawaiian Department.

I should be very glad if this Committee would see fit to call before it a number of officers of my command, preferably from officers of high enough rank to know what I have accomplished, and from staff officers who are familiar with the work that has been carried out during the past ten months. I would also like very much to have the Governor and some of the leading business men called before the Commission to tell what the civil community thinks of the work that I have done over the past ten months.

CONCLUSIONS

1. The radiogram from the War Department thru CINCUS fleet UCS of October 16th emphasized that measures taken by me during the grave situation of the Japanese negotiations should not disclose strategic intention nor constitute provocative actions against Japan.

The radiogram of November 27th reiterated that action should be carried out so as "not repeat not to disclose intent", not alarm civil population, and avoid unnecessary publicity.

When the War Department was notified that the Hawaiian Department was alerted against sabotage it not only did not indicate that the command should be alerted against a hostile surface, sub-surface, ground or air attack, but replied emphasizing the necessity for protection against sabotage and subversive measures. This, taken in connection with the two previous radiograms mentioned, indicated to me a tacit consent to the alert against sabotage ordered by the Hawaiian Department.

2. The Hawaiian Department is not provided with an agency for locating enemy ships in various parts of the world. Such information as it may acquire on this subject must be obtained from the Fourteenth Naval District or from the War Department.

The "Joint Coastal Frontier Defense Plan, Hawaiian Coastal Frontier" places upon the Commandant of the Fourteenth Naval District the responsibility for distant reconnaissance. Annex #7 to the "Joint Coastal Frontier Defense Plan" provides that when naval forces are insufficient for long distance patrol and search operations and army aircraft are made available, these will be under the tactical control of the naval command during search operations. That means that the army planes receive their missions and all instructions from the naval commander and carry out the search as he deems necessary in order to carry out his responsibility for distant reconnaissance.

[49] During the period November 27th to December 6th, the Navy made no request for army planes to participate in distance reconnaissance. To me this meant that they had definite information of the location of enemy carriers re that the number unaccounted for was such that naval planes could make the necessary reconnaissance without the assistance from the army. During this period I was in frequent conferences with the Commander in Chief of the United States Fleet and the commandant of the Fourteenth Naval District, and at no time was anything said to indicate that they feared the possibility of an attack by the Japanese by air. In fact, the sentiment was expressed by a naval staff officer that there was no probability of such an attack. With a large part of the United States Navy in Hawaiian waters and with their sources of information, I was convinced that the Navy would be able either to intercept any carrier attempting to approach Oahu or at least to obtain such information from task forces or by reconnaissance as to make them aware of the presence of carriers in the Hawaiian waters and of the possibility of an air attack.

3. Action of the War Department on December 5th and as late as 1:30 A. M., Eastern standard time, December 7th, in dispatching planes from the mainland to Honolulu without ammunition indicated that the War Department did not believe in the probability of an early Japanese attack upon Honolulu.

I felt that I had a right to expect the War Department to furnish me by the most rapid means possible information should a real crisis arise in Japanese relations. I did not expect that when the crisis arose the desire for secrecy would be considered more important than the element of time. Had the message in regard to the Japanese ultimatum and the burning of their code machines been given me by telephone as an urgent message in the clear without loss of time for encoding and decoding, etc., I, in all probability, would have had approximately two hours in which to make detailed preparations to meet an immediate attack.

2486 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4. I feel that my work in the Hawaiian Department should be judged by my activities throughout the complete period from the assumption of command on February 7, until my relief upon December 16th. I believe that any careful examination of my work during that period will prove that I have worked very seriously at the job and have accomplished measures of very considerable importance. I do not see how I could better have carried out what appeared to be the desires of the War Department unless I was supposed to know more than the War Department about the danger of Japanese attack and more than the Navy Department about the location of the Japanese carriers. To have taken more steps in preparation against a Japanese attack than I did would have alarmed the civil population and caused publicity contrary [50] to War Department instructions. I do not believe that I should be found guilty even of an error in judgment because I did not have the vision to foresee that the War Department would not notify me of a crisis in the least possible time and that the Navy with its large fleet in Hawaiian waters would not be able to carry out its mission of intercepting Japanese carriers, or at least detecting their presence in Hawaiian waters and informing me of the fact.

NOTE FOR COMMANDING GENERAL HAWAIIAN DEPARTMENT:

THE FOLLOWING IS A PARAPHRASE OF A DISPATCH FROM THE CHIEF OF NAVAL OPERATIONS WHICH I HAVE BEEN DIRECTED TO PASS TO YOU QUOTE:

Japanese cabinet resignation creates a grave situation x if a new cabinet is formed it probably will be anti-American and strongly nationalistic x if the Konoye cabinet remains it will operate under a new mandate which will not include rapprochement with the United States x either way hostilities between Japan and Russia are strongly possible x since Britain and the US are held responsible by Japan for her present desperate situation there is also a possibility Japan may attack these two powers x view of these possibilities you will take due precautions including such preparatory deployments as will not disclose strategic intention nor constitute provocative actions against Japan x

SECTION I—GENERAL

1. **PURPOSE.**—The purpose of a "Standing Operating Procedure" is stated in paragraph 159, FM 100-5, Field Service Regulations, Operations, and paragraph 56, FM 101-5, Staff Officers' Field Manual.

2. **UNIT PROCEDURES.**—Conforming to the Department Procedure, subordinate units and staff sections will develop appropriate Standing Operating Procedures.

3. **SHORT TITLE.**—"SOP HD" will signify this Standing Operating Procedure.

4. **DEPARTMENT HEADQUARTERS.**—Department Headquarters may operate either as a whole or in two groups. When divided, the headquarters will

consist of a forward and a rear echelon, the composition of which ordinarily will be as follows:

a. FORWARD ECHELON.—

Commanding General and Aides
General Staff (less G-1 and G-5)
Secretary to General Staff
Engineer Officer
Signal Officer
Chemical Officer
Ordnance Officer
Surgeon
Headquarters Commandant
Provost Marshal.

b. REAR ECHELON.—

G-1
G-5

Special Staff (less those in forward echelon).

5. *TACTICAL PRINCIPLES*.—See FM 31-10, Coast Defense. The chief tactical principles applicable to the problem of the defense of OAHU and the air fields on the outlying islands are as follows:

a. Complete organization of the ground

b. Position to be held lightly

c. Large reserves, held mobile, with motor transportation sufficient to transport them

d. Automatic counter-attack.

6. *SECURITY*.—Every unit is responsible for its security at all times from hostile ground or air forces. See paragraphs 233 to 273, inclusive, FM 100-5.

7. *LIAISON*.—a. *OFFICERS*.—During all operations and alerts, a liaison officer with motor transportation will be sent from each of the following units to Department Headquarters and will remain thereat except when on a mission to their own headquarters:

24th Infantry Division
25th Infantry Division
[2] Hawaiian Coast Artillery Command
Hawaiian Air Force
86th Observation Squadron
Each Department Reserve Unit.

b. *UNITS*.—Both lateral and vertical liaison are mandatory. The responsibility therefor is from right to left and from front to rear. Combat teams operating in areas where coast artillery group stations are in operation will establish liaison with those stations.

8. *ORDERS*.—a. The Department Commander will issue orders covering the action of the Infantry Divisions, the Hawaiian Air Force, the Hawaiian Coast Artillery Command, Department Reserve units and all attached troops.

b. Orders issued by the Department (except as in c below) will be brief written field orders with an operation map. Circumstances may require the issuance of an oral order, but this will be confirmed later in writing.

c. Fragmentary orders, oral or written, may be issued when appropriate. Copies of the Department Commander's decision or directives, together with a roughly sketched operation map, will be sent by staff officers to lower units as soon as issued in order that plans may be initiated prior to receipt of the field order from the Department.

d. To expedite issue and to conserve time, unit commanders and staff officers will dictate their decisions, directives, plans and orders. All commanders and staff officers will perfect themselves in the dictation of orders. Competent stenographer-clerks and draftsmen will be trained within each headquarters.

9. *MOVEMENT*.—a. In general, all troops will be moved by motor. The maximum space in trucks will be utilized for the troops (standing if necessary) since all movements are necessarily for short distances.

b. Trucks will not close up and every effort will be made to avoid halting in the open. Maximum use will be taken of overhead cover, and vehicles either in bivouac or assembly areas will always be dispersed when in the open, and will be dispersed to the maximum extent practicable when in concealed positions.

c. In tactical movements, vehicles will be maintained at maximum speed authorized by law, consistent with safety. (This may be satisfactorily accomplished by restricting the leading vehicle to 10 miles per hour less than the maximum authorized; the others, not exceeding the maximum authorized speed).

d. All tactical movements in daylight will be by infiltration, FM 25-10, the distance between vehicles being not less than 300 yards. Administrative marches will be made with not less than safe driving distance between vehicles, or any distance greater than safe driving distance which will facilitate the movement (paragraph 31, FM 25-10). When necessary, officers' control points and route markers (paragraph 94, FM 25-10) will be utilized.

e. All movements under Alert No. 1 will be administrative.

f. Motor vehicles operating at night, at the discretion of local commanders, will be (1) in convoy with standard blackout or blue lights with a shielded tail light on all vehicles, or (2) in the case of convoys traveling closed up, with standard blackout or blue lights on leading vehicle and a shielded tail light on the rear vehicle, and no lights on the others, or (3) no lights when operating on *one way* secondary roads, and cross-country, on military reservations and leased lands. On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic.

[3] g. Trucks attached to a unit for a specific mission will revert to control of the parent unit when the specific mission has been accomplished.

10. **ANTI-AIRCRAFT DEFENSE.**—a. Antiaircraft defense is a responsibility of every unit. See paragraphs 261-273, FM 100-5.

b. All Infantry units not occupying front line positions will have their automatic weapons habitually in readiness for antiaircraft defense, and all other units will be prepared likewise to engage hostile aircraft.

c. On marches, all small arms suitable for use against aircraft will be in readiness for action. When enemy air action is imminent trucks normally will halt, troops will detruck, disperse and fire on enemy planes.

d. All unit commanders will be held responsible for the following:

(1) Maintenance of air guards to give timely warning of the approach of hostile aviation.

(2) Adoption of necessary measures to prevent hostile observation and aerial photography through advantageous use of terrain, utilization of cover, and use of camouflage.

(3) Reduction of vulnerability to air attack and observation by dispersion of personnel and materiel when in bivouac or in position and by increased speed during movement.

11. **INSTALLATIONS AND ALARM SYSTEM.**—All important installations not protected by the Territorial Home Guard will be guarded by troops. An adequate alarm system will be established in connection therewith.

12. **GUIDES.**—a. In case of a relief, guides from the relieved organization will meet the incoming unit and remain with it until ordered back to their organization by the commander of the incoming unit.

b. Whenever units are ordered to another sector for support or attachment, the sector commander will provide the necessary guides to assist the supporting or attached units.

SECTION II—ALERTS

13. All defense measures are classified under one of the three (3) Alerts as indicated below. Operations under any Alert will be initiated by a Department order, except in case of a surprise hostile attack. See paragraph 15 f (8) below.

14. **ALERT NO. 1.**—a. This alert is a defense against acts of sabotage and uprisings within the islands, with no threat from without.

b. At DEPARTMENT HEADQUARTERS, all General and Special Staff Sections will continue with their usual duties at their present stations, pending further orders.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

[4] (2) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(3) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 14 *h* (2) below

Command and Fire Control Cable System, see inclosure No. 1

Railway and Highway Bridges, see inclosure No. 2

Water supply for SCHOFIELD BARRACKS

Radio Station at PUU MANAWAHUA

WAI'AU Generating Plant

Telephone Exchanges at WAIPA'U, WAHIAWA, WAI'ALUA (in HALEI'WA), LAIE and KANE'OH'E

Electric sub-stations at WAHIAWA, WAI'ALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO-WAHIAWA-SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station—BELLOWS FIELD, see inclosure No. 3

Cold Storage Plant in WAHIAWA

Pumping Stations at MOANALUA and KAPAHULU.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) See Territorial Home Guard, paragraph 14 *j* below.

e. The HAWAIIAN COAST ARTILLERY COMMAND will:

(1) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(2) Protect all vital installations on posts and reservations of the command.

(3) Protect the Radio Beacon on Sand Island.

(4) Provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

f. The HAWAIIAN AIR FORCE will:

(1) Protect all vital installations on posts on OAHU garrisoned by air forces.

(2) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 14 *g* below.

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, in addition to his normal duties, assisted by the Division Provost Marshals, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installation.

(3) Establish liaison with the local police force.

i. The STATION COMPLEMENTS of HICKAM, WHEELER and BELLOWS FIELDS, under command of the Hawaiian Air Force, will assist in the protection of all vital installations on their respective posts.

j. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 14 *d* (3) and *g* above. Instructions will be issued.

15. *ALERT NO. 2.*—*a.* This alert is applicable to a condition more serious than Alert No. 1. Security against attacks from hostile sub-surface, surface, and air-craft, in addition to defense against acts of sabotage and uprisings, is provided.

b. At DEPARTMENT HEADQUARTERS, only the G-2 and G-3 Sections will be required to operate on a 24-hour basis. All other sections of the General and Special Staffs will continue with their normal schedule.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain available all units at fifty percent (50%) of their present strength, except those required under (3), (4) and (5) below.

(3) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

2492 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(4) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 15 *h* (2) below

Command and Fire Control Cable System, see inclosure No. 1

Railway and Highway Bridges, see inclosure No. 2

Water supply for SCHOFIELD BARRACKS

Radio Station at PUU MANAWAHUA

WAI AU Generating Plant

Telephone exchanges at WAIPAHAU, WAHIAWA, WAIALUA (in HALEIWA,) LAIE and KANEOHE

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO-WAHIAWA—SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station—BELLOWS FIELD, see inclosure No. 3

Cold Storage Plant in WAHIAWA

Pumping Stations at MOANALUA and KAPAHULU.

(5) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

[6] (6) Place 240mm. howitzers in position, establish the necessary guards and, when directed, place ammunition at positions.

(7) Release Field Artillery units manning seacoast armament (155mm guns) to Hawaiian Coast Artillery Command. See paragraph 15 *e* below.

(8) See Territorial Home Guard, paragraph 15 *l* below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Field Artillery, will:

(1) Occupy initial seacoast and antiaircraft defense positions, except that railway batteries will remain at FORT KAMEHAMEHA or where emplaced.

(2) Release the 53d AA Brigade to the Interceptor Command for operational control.

(3) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(4) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 15 *k* (1) below.

(5) Support Naval forces within range of seacoast armament.

(6) Prevent approach of and landing from hostile vessels.

(7) Coordinate all seacoast intelligence agencies.

(8) Coordinate seacoast defense with the Inshore Patrol.

(9) Protect the Radio Beacon on Sand Island.

(10) Provide Army personnel required to operate the Harbor Control Post.

f. The HAWAIIAN AIR FORCE will:

(1) Maintain aircraft and crews in condition of readiness as directed by this headquarters. See paragraph 17.

(2) Release without delay all pursuit aircraft to the Interceptor Command.

(3) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(4) Disperse bombers with crews.

(5) Disperse pursuit planes with crews to bunkers.

(6) Protect all vital installations on posts on OAHU garrisoned by air forces.

(7) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 15 *g* below.

(8) In case of surprise hostile attack:

(a) Release to Navy for operational control all bombers in condition of readiness "A". The bomber commander will report to the Commander of Patrol Wing TWO.

[7] (b) Receive all available shore based Naval and Marine Corps fighter planes in appropriate condition of readiness and release them to the Interceptor Command for operational control.

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, hostile attacks, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

- (1) Regulate traffic on OAHU.
- (2) Assist the 25th Infantry Division in posting guards on vital installations.
- (3) Establish liaison with the local police force.
- (4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.
- (5) Be prepared to establish facilities for gathering and caring for refugees.
- (6) Protect FORT SHAFTER. See paragraph 15 *k* (1).

i. The DEPARTMENT SIGNAL OFFICER will:

- (1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.
- (2) Insure that joint Army-Navy communications are in readiness for immediate employment.

j. The INTERCEPTOR COMMAND will:

Coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the Aircraft Warning Service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control, to include:

- (1) Arrival and departure of *all* friendly aircraft.
- (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.

- (3) Transmission of appropriate warnings to all interested agencies.

k. STATION COMPLEMENTS:

(1) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(2) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

[8] 1. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 15 *d* (4) and *g* above. Instructions will be issued.

16. ALERT NO. 3.—*a*. This alert requires the occupation of all field positions by all units, prepared for maximum defense of OAHU and the Army installations on outlying islands.

b. At DEPARTMENT HEADQUARTERS:

(1) All sections of the forward echelon (see paragraph 4 *a*) will occupy their stations at forward command post, prepared to operate on a 24-hour basis.

(2) All sections of the rear echelon (see paragraph 4 *b*) will continue their usual duties at their present stations. Blackout instructions will be complied with.

c. DEPARTMENT TROOPS will remain in condition of mobile readiness at their permanent stations, pending instructions from this headquarters.

d. Each INFANTRY DIVISION will:

- (1) Defend its assigned sector on OAHU.
- (2) Protect all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard.

(3) Release all available Bands to the Commanding Officer, SCHOFIELD BARRACKS.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) Place 240mm howitzers in position.

(6) Release Field Artillery units manning seacoast armament (155mm guns) to Hawaiian Coast Artillery Command. See paragraph 16 *e* below.

(7) See Territorial Home Guard, paragraph 16 *m* below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Detachment Field Artillery, will:

- (1) Occupy initial seacoast and antiaircraft positions.
- (2) Support Naval forces within range of seacoast armament.
- (3) Prevent approach of and landing from hostile vessels.
- (4) Support the Infantry Divisions.
- (5) Coordinate all seacoast intelligence agencies.
- (6) Coordinate seacoast defense with the Inshore Patrol.

2494 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(7) Provide the Army personnel required to operate the Harbor Control Post.
[9] (8) Release the 53d AA Brigade to the Interceptor Command for operational control.

(9) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 16 *l* (2) below.

(10) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and anti-aircraft defense.

f. The HAWAIIAN AIR FORCE will:

(1) Destroy enemy aircraft.

(2) Carry out bombing missions as directed.

(3) Cooperate with Naval air forces.

(4) On OAHU, defend all posts garrisoned by air forces against sabotage, air and ground attacks.

(5) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 16 *h* below.

(6) Arm all planes, except that normally *bombs* will not be loaded on ships dispatched to outlying islands. See paragraph 25 *e* (8).

(7) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(8) Disperse bombers with crews.

(9) Disperse pursuit planes with crews to bunkers.

(10) Perform observation, command and photographic missions.

(11) Release without delay all pursuit aircraft to the Interceptor Command.

g. G-5 will be prepared to establish the following:

(1) A Food Administration.

(2) A Labor Procurement Service.

h. The DISTRICT COMMANDERS of HAWAII, MAUI (includes MOLO-KAI) and KAUAI Districts, assisted by the air corps detachments present within the districts, will:

Defend the air fields against acts of sabotage, hostile attacks, and maintain order in the civil community.

i. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

(3) Establish liaison with the local police force.

(4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.

(5) Be prepared to establish facilities for gathering and caring for refugees.

[10] (6) Protect FORT SHAFTER. See paragraph 16 *l* (2) below.

j. The INTERCEPTOR COMMAND will coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the aircraft warning service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control to include:

(1) Arrival and departure of *all* friendly aircraft.

(2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.

(3) Transmission of appropriate warnings to all interested agencies.

k. The DEPARTMENT SIGNAL OFFICER will:

(1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.

(2) Insure that joint Army-Navy communications are in readiness for immediate employment.

(3) Be prepared to assume control over essential civilian communications.

l. STATION COMPLEMENTS.—

(1) The SCHOFIELD BARRACKS Complement will protect all vital installations on the Schofield Reservation.

(2) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(3) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

m. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 16 d (2) and h above. Instructions will be issued.

SECTION III—CONDITION OF READINESS FOR AIRCRAFT

17. Condition of readiness for aircraft will be prescribed by a combination of a letter and a number as indicated in paragraphs a and b below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of operational readiness prescribed for that part.

a. MATERIAL READINESS.—

A—All assigned operating aircraft available and ready for a task.

[11] B—One-half of all aircraft of each functional type available and ready for a task.

C—Approximately one-quarter of all aircraft of each functional type available and ready for a task.

D—Approximately one-eighth of all aircraft of each functional type available and ready for a task.

E—All aircraft conducting routine operations, none ready for the purposes of this plan.

b. DEGREE OF OPERATIONAL READINESS.—

All times listed in this table are the maximums allowed for the first plane of a unit to be in the air armed and prepared to carry out the assigned task.

1—For pursuit and VF types: Four minutes. Types other than fighters: Fifteen minutes.

2—All types: 30 minutes.

3—All types: One hour.

4—All types: Two hours.

5—All types: Four hours.

SECTION IV—INTELLIGENCE

18. The Intelligence Standing Operating Procedure indicated below will be followed generally where applicable.

19. ESSENTIAL ELEMENTS OF ENEMY INFORMATION.—

a. Will the enemy attempt to destroy or neutralize NAVAL BASES at PEARL HARBOR, at KANEOHE BAY, and air fields on OAHU with the object of denying their use to the UNITED STATES without occupation? If so, will his air attacks be accompanied by Naval bombardment and blockading operations?

b. Will the enemy attempt to capture OAHU by expeditionary forces with the object of utilizing the NAVAL BASES at PEARL HARBOR, at KANEOHE BAY, and air fields thereon? If so, when, where, and with what strength will he make his main attack?

c. Will the enemy attempt to capture any other of the principal islands of the Hawaiian Group with the object of utilizing the air fields and establish bases thereon?

d. Will the enemy military operations be accompanied by acts of sabotage and terrorism on the part of resident sympathizers?

e. Will the enemy utilize local foreign population, local aliens or nationals of foreign origin for sabotage operations, raids to assist landing operations, or other acts of assistance?

20. MEASURES TO OBTAIN INFORMATION.—

a. NAVY.—

(1) Transmit, through the Joint Intelligence Loop, information received from the Offshore and Inshore Patrols, from any escort or attack forces formed, and from any other Naval Ships relative to:

(a) Location, composition, course, and speed of enemy units encountered, with particular reference to location of aircraft carriers and transports.

[12] (b) Indications of landings on any island of the main Hawaiian Group, with particular attention to the number and type of landing boats, and the composition of supporting Naval units.

(c) Indications of attempts to block HONOLULU and/or PEARL HARBORS.

(d) Indications of any hostile aerial activity in strength.

2496 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(e) Report damage inflicted on hostile vessels, troops and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately.

(f) Report damage by hostile Naval and air bombardment, incurred or observed. Important damage, including damage to landing fields, and use of chemicals, immediately.

(g) See paragraph 20 c below.

b. ARMY.—

(1) *Hawaiian Air Force.*—

(a) Observe all waters within an area bounded as follows:

By arcs of twenty (20) miles radii with centers at OPANA POINT, MAUI; KAUAI HEAD LIGHT, MAUI; LAUPAHOEHOE LIGHT, HAWAII; CAPE KUMUKAHI LIGHT, HAWAII; KALAE LIGHT, HAWAII; SOUTH-WEST HEADLAND, KAHŌOLAWĒ; LEAHI POINT, NIIHAU; LEHUA ISLAND, NIIHAU; KAILU POINT, KAUAI; and arc of thirty (30) miles radius with its center at KAHUKU POINT, OAHU, and the tangents connecting these arcs in the order named.

Report location, composition, course and speed of enemy units encountered. Maintain continuous contact with major subdivisions of enemy units. Particular attention to location of aircraft carriers and transports. First contact, material changes of direction, and definite location of aircraft carriers to be reported immediately by Joint Intelligence Loop; thereafter on the hour by department Intelligence Loop.

(b) Report indications of landing on any island, giving location, number, type and formation of landing boats and composition of supporting Naval group. Report, when observed, by Department Intelligence Loop.

(c) Report damage inflicted on hostile vessels, troops, and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately, by Joint Intelligence Loop.

(d) Report damage by hostile naval and air bombardment, incurred or observed by their operations. Important damage, including damage to landing fields, and use of chemicals, immediately, by Joint Intelligence Loop; other damage at 1815 by Department Intelligence Loop.

(e) Report any hostile aerial activity in strength, including number, type, direction and area of attack or observation, by Joint Intelligence Loop.

(2) *86th Observation Squadron.*—

(a) Same as for "HAWAIIAN AIR FORCE"—see 20 b (1) above.

[13] (b) Be prepared to provide, on call, observation for the control of long-range artillery fire.

(3) *Interceptor Command.*—

(a) Report immediately any and all information of hostile air force or surface vessel.

(b) Report, upon completion of action by or with enemy air force, composition of enemy forces, direction of approach, time of action, area attacked, and damage to enemy airplanes.

(4) *Each Infantry Division.*—

(a) Report location, number, type and formation of transports and landing boats and composition of supporting naval group. Report when observed thereafter hourly, on the hour, by Department Intelligence Loop.

(b) Report *enemy front lines* and boundaries between units. Report immediately any significant change. Otherwise report every two hours, on the even hour, by Department Intelligence Loop.

(c) Report location of *own front lines*. Report every two hours, on the even hour, by Department Intelligence Loop.

(d) Report all identifications. Infantry identifications are most important. Report, when observed, by Department Intelligence Loop.

(e) Report indications of landing of artillery, including caliber of same, and tanks. Report, when observed, by Department Intelligence Loop.

(f) Report damage by hostile naval and air bombardment. Important damage immediately; other damage at 1830, by Department Intelligence Loop.

(g) Report time, place, kinds and method of employment of chemicals. Report, when observed, by Department Intelligence Loop.

(h) Report weather and surf conditions on all favorable landing beaches. Report at 0300, 0700, 1200 and 1700 and 2200, by Department Intelligence Loop.

(i) The 25th Division will assign G-2 personnel to assist the Provost Marshal in the examination and questioning of enemy documents and personnel in South Sector.

(5) *Hawaiian Coast Artillery Command.*—

(a) Report immediately, by Department Intelligence Loop, initial contact with enemy units, giving location, composition and course of formation.

(b) Report immediately, by Department Intelligence Loop, when an action is begun by hostile vessels or by the seacoast artillery, giving location of naval vessels, locality being attacked, and units engaged.

(c) Report damage inflicted on hostile vessels, troops, and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately by Joint Intelligence Loop.

(d) Report upon completion of any action, by Department Intelligence Loop, important damage from hostile naval and air [14] bombardment, and report the use of chemicals immediately. Other damage at 1900 by Department Intelligence Loop.

(e) Report, when observed, by Department Intelligence Loop, location, number, type, and formation of landing boats and composition of supporting naval force.

(f) Report, when observed, by Joint Intelligence Loop, indications of attempts to block HONOLULU HARBOR, PEARL HARBOR, or KANEOHE BAY.

(g) Report as soon as practicable important damage to ground installations, including damage to use of chemical agents.

(h) Report visibility at 0400, 0700, 1200, 1700 and 2200, by Department Intelligence Loop.

(i) Any of the above reports may be transmitted by telephone when necessary to avoid delay.

(6) *District Commanders of HAWAII, MAUI and KAUAI Districts.*—Report when observed, by radio to Hawaiian Air Force, thence by Department Intelligence Loop:

(a) Nature of hostile activity, including number, type, direction and area of attack or observation.

(b) Damage by hostile naval and air bombardment.

(c) Location, number, type and formation of landing boats and composition of supporting naval group.

(d) Enemy front lines and boundaries between units.

(e) All identifications. Infantry identifications are most important.

(f) Time, place, kinds and method of employment of chemicals.

(7) *Department Signal Office.*—

Radio intercept and goniometric service. Report when obtained.

c. ALL ELEMENTS OF HAWAIIAN DEPARTMENT.—

(1) Report presence of parachute troops and assemblies of enemy nationals or sympathizers and overt acts of sabotage or terrorism, giving location, time, numbers involved, and probable intentions or damage accomplished.

(2) Report of location of floating or stranded mines, in order that this information may be relayed to the Navy. No other action, i. e., attempts at destruction, than to report location immediately, should be taken.

d. MISCELLANEOUS.—

(1) *Transmission of G-2 Information.*—

In the absence of specific instructions as to transmission, or in the event of failure or overload of specified channels, G-2 information will be transmitted by direct line, where available, or by the most expeditious routing over the circuits set forth in current Signal Operations Instructions. [15] If wire and radio signal communication are out, important intelligence information will be sent back by any means at hand: Wire circuits of near-by units, motor messenger, commandeered vehicle, any means necessary commensurate with the value of the information.

21. *MEASURES FOR HANDLING.*—

a. PRISONERS: Examination stations will be located at all Prisoner of War collection points.

b. DOCUMENTS AND CAPTURED MATERIAL.—

(1) Documents will be sent to G-2's of Department or Divisions, with the minimum of delay, by regularly scheduled messenger service.

(2) Reports of captured material will be sent to the same stations by the same means.

(3) Documents and material identifying organizations or indicating the use of chemicals are of major importance. They will be given special priority in shipment to examination stations and will be reported to Department G-2 by the most expeditious means.

2498 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(4) Liaison officers from the office of G-2, H. H. D., will be assigned to all Examination Stations, and will assist the Provost Marshal in examining enemy personnel, materiel and documents, and in determining destination of reports.

c. MAPS.—Maps will be supplied initially by the Department Engineer.

22. REPORTS AND DISTRIBUTION.—

Distribution of reports from Department Headquarters: Summaries of Intelligence at 0800, 1300, 1800 and 2300.

23. THE DEPARTMENT G-2 will:

a. Keep the Commanding General and all interested staff officers informed regarding the enemy situation and of his deductions concerning it.

b. Insure that counterintelligence measures are adequately provided for and adhered to.

c. Establish a counter-espionage service that will not only guard against the subversive activities of the external enemy, but will also enable the Department G-2 to keep the Department Commander constantly advised as to the attitude, trend of thought, and probable course of action of the civil population, particularly that of alien extraction. This service will maintain close liaison with the Department Provost Marshal, with a view to:

(1) Furnishing the Department Provost Marshal with all information gained through the counter-espionage service of value in the prevention of civil disorders, sabotage and incipient uprisings.

(2) Receiving and evaluating information relative to the internal situation collected by the Department Provost Marshal through his agencies set up for the actual control of the civil population.

d. Collect, evaluate, and disseminate information relative to assemblies of enemy nationals or sympathizers, and overt acts of sabotage and terrorism.

[16] e. Prepare propaganda and publicity for the encouragement of the loyalty and support of the civil population, particularly that of alien extraction.

24. G-2 FORMS.—

a. Estimate of the Enemy Situation, see Inclosure No. 4.

b. Periodic Reports, see page 1, Inclosure No. 5. For combat Air Force see page 2, Inclosure No. 5.

SECTION V—ADMINISTRATION

25. SUPPLY (See paragraphs 75-80, FM 100-10).—

a. SUPPLY AREAS.—

(1) Schofield Supply area includes the area of OAHU north and west of a general line extending LAE O KAOIO—PUU KAAUMAKUA—KIPAPA STREAM—KAMEHAMEHA HIGHWAY at (97.9—91.0)—KAMEHAMEHA HIGHWAY—PEARL CITY JUNCTION—PEARL HARBOR ENTRANCE.

(2) The Honolulu Supply area includes the remainder of OAHU and outlying islands.

b. CLASS I SUPPLIES (rations); including QMC class II and IV:

Schofield Supply Area—Quartermaster, SCHOFIELD BARRACKS.

Honolulu Supply Area—Hawaiian Quartermaster Depot, HONOLULU.

(1) Supplies, for a small unit of an organization, when moved nearby into a different supply area from the parent organization, may be continued thru the parent organization or may be obtained separately from the D. P. for the new supply area as warranted by the situation.

(2) Distribution will be based on consolidated daily strength reports submitted by organizations to the Depot or Quartermaster supplying the area in which the organization is stationed (copy to Dept. QM) by 0800 daily.

(3) Schedules of distribution will be arranged by issuing quartermasters by direct agreement with unit commanders supplied. Distribution schedules will be set up and copies furnished Dept. QM and G-4, H. H. D.

(4) A standard menu ration is established for Alert No. 3.

c. CLASS III SUPPLIES.—

(1) All units leaving their normal posts under any alert will take with them the authorized allowance of gasoline containers filled. Replenishment will be made in the following manner:

(a) Commanding Officer, SCHOFIELD BARRACKS will establish DPs at SCHOFIELD BARRACKS for all units operating in the SCHOFIELD BARRACKS area.

(b) Commanding officers of each post in the Honolulu Supply Area, except MALAKOLE, BELLOWS FIELD and KANEOHE, will establish DPs at their posts for the supply of all units operating in this area. MALAKOLE, BELLOWS

FIELD and KANEOHE will establish a DP at their respective posts for the supply [17] of their own units operating in the immediate vicinity of their own post.

(c) In the event units are moved, placing them in another supply area, gasoline will be supplied from the DP nearest the unit, regardless of supply area.

(d) Normally, the supply of gasoline from DPs will be by 5 and 10 gallon drums, rather than filling individual trucks.

(e) Units will furnish personnel for refilling of their containers at the DP. Post Commanders will provide suitable equipment for refilling containers.

(f) 11th Tank Company will draw aviation gasoline from the nearest Air Corps Station.

(g) Replenishment of stocks at posts will be accomplished in the normal manner. Following the period of the maneuvers, necessary monetary adjustments will be made through Department Headquarters.

(h) Class III supplies on outlying islands will be the responsibility of the District Commanders.

d. CLASS II & IV SUPPLIES (except Quartermaster Corps).—

(1) *Medical Supply*:

Schofield Supply Area—Schofield Branch, Hawaiian Medical Depot, SCHOFIELD BARRACKS.

Honolulu Supply Area—Hawaiian Medical Depot, FORT SHAFTER.

(2) *Signal Supply* (except Signal Corps aircraft radio):

Schofield and Honolulu Supply areas—Hawaiian Signal Depot, FORT SHAFTER.

(3) *Signal Supply*—aircraft radio only:

Schofield and Honolulu Supply areas—Hawaiian Air Depot, HICKAM FIELD.

(4) *Chemical Supplies*—all supply areas—Hawaiian Chemical Depot, SCHOFIELD BARRACKS.

(5) *Engineer Supplies*—all supply areas—Hawaiian Engineer Depot, SCHOFIELD BARRACKS, T. H. Distributing points for class IV supplies will include SCHOFIELD BARRACKS, FORT RUGER, FORT KAMEHAMEHA, FORT BARRETTE and North Shore in vicinity of (86.9-04.2). Credits at DP's to major echelon commanders will be announced separately to commanders concerned.

(6) *Water Supply*: Will be secured locally and will be inspected by a medical officer before use except from post and CITY of HONOLULU water systems.

(7) *Air Corps Supply*: All supply areas—Hawaiian Air Depot, HICKAM FIELD and WHEELER FIELD Branch, when so designated, for types of services announced by Commanding General, Hawaiian Air Force.

(8) *Ordnance Supply* (other than ammunition Class V).—

Schofield Supply area—Schofield Branch, Hawaiian Ordnance Depot, SCHOFIELD BARRACKS.

Honolulu Supply area—(General Storage and Shop) Hawaiian Ordnance Depot, HONOLULU.

[18] e. CLASS V SUPPLIES:

(1) Schofield Supply Area—all types—Schofield Branch, Hawaiian Ordnance Depot, SCHOFIELD BARRACKS (See (3) below).

(2) Honolulu Supply Area—all types—Ammunition Storage Area, Hawaiian Ordnance Depot. (See (3) below.)

(3) Aircraft pyrotechnics and bombs, 8-inch railway and 240mm ammunition and chemical ammunition (other than grenades)—Ammunition Storage Area, Hawaiian Ordnance Depot—all supply areas.

(4) Credits of an "initial issue" and of one "unit of fire" are automatically placed at the disposal and under the control of all major echelon commanders whenever an Alert is ordered. Quantities of various types of ammunition included in the "initial issue" and in a "unit of fire" are shown in Inclosures Nos. 6 and 7 herewith. Load of Aircraft Ammunition per airplane is indicated in Inclosure No. 8.

(5) At the time Alert No. 2 or No. 3 is ordered, all units will draw such of their "initial issue" as has not already been drawn, except that for Alert No. 2 the Infantry Divisions will draw initially only 1/5 of the "initial issue" and the balance thereof will be drawn after occupation of positions with their organic and/or sector weapons. Whenever issues cannot be made simultaneously, they will be made according to the following order of priority and according to a schedule to be mutually arranged between the Unit Supply Officer and the Supply Point concerned.

2500 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Aircraft bombs and ammunition for aircraft weapons.
Antiaircraft 3", 37mm and Machine Gun ammunition.
Ground machine gun ammunition—all types.
Other small arms ammunition.

All artillery ammunition, less antiaircraft.

(6) At the time Alert No. 1 is ordered, only small arms ammunition included in the "initial issue" will be drawn.

(7) Aircraft bombs will not be issued in "initial issue" but will be held available in bomb storage areas.

(8) Two "units of fire" of bombs and machine gun ammunition will be maintained on outlying islands for each airplane operating therefrom.

f. Dumps and Ammunition Distributing Points will be established as directed by this headquarters.

26. EVACUATION.—

a. PERSONNEL:

(1) North Sector Division by 24 Medical Bn. to Station Hospital, SCHOFIELD BARRACKS.

(2) South Sector Division by 25 Medical Bn. to Tripler General Hospital except for troops in the area west of the line: PEARL HARBOR CHANNEL—EWA JUNCTION. The latter will be evacuated to Station Hospital, SCHOFIELD BARRACKS.

(3) *Hawaiian Air Force.*—

(a) HICKAM FIELD, by the Surgeon, HICKAM FIELD to Station Hospital, HICKAM FIELD or Tripler General Hospital. [19] Additional ambulances, with drivers and orderlies, will be attached as needed.

(b) WHEELER FIELD and HALEIWA Landing Field, by Surgeon WHEELER FIELD to Station Hospital Schofield. Additional ambulances, with drivers and orderlies will be attached as needed.

(c) BELLOWS FIELD, by Surgeon, BELLOWS FIELD to Tripler General Hospital. Additional ambulances, with drivers and orderlies, as needed.

(d) Air fields on outlying islands, by vehicle to local hospital or by air to Tripler General Hospital or Station Hospital, SCHOFIELD BARRACKS. Collection by respective medical detachment. Details of evacuation to be arranged by the responsible commanders for each field.

(e) HCAC, by the Surgeon, HCAC (collection by respective medical detachments, reinforced if necessary). One ambulance company to be attached to the command prior to combat. Evacuation from the area north and west of the line: PEARL HARBOR Channel—EWA Junction—LAE O KAOIO Point to Station Hospital, SCHOFIELD BARRACKS. Evacuation from the area south and east of this line to Tripler General Hospital.

(f) KAUAI District, MAUI District and HAWAII District to local hospitals as directed by District Commanders under provisions of letter, this headquarters to each District Commander, dated 31 July 1941, subject: "Medical Service."

(g) Elements not included elsewhere: North Sector by 24th Medical Bn., on call; South Sector by 25th Medical Bn., on call.

b. ANIMALS:

(1) North Sector to Veterinary Station Hospital, SCHOFIELD BARRACKS, by provisional Veterinary Detachment attached to Hawaiian Pack Train.

(2) South Sector to Veterinary General Hospital, FORT SHAFTER, by provisional Veterinary Detachment, attached to units having animals.

c. SALVAGE: To supply points designated in paragraph 25 above for services indicated.

d. PRISONERS OF WAR.—

(1) Collecting Points—SCHOFIELD BARRACKS, FORT SHAFTER, FORT RUGER, KANEHOE BAY. To be established and operated by Department Provost Marshal, assisted by Provost Marshals, Infantry Divisions.

(2) Prisoner of War Inclosures—Establishment and operation by Department Provost Marshal, as directed by this headquarters.

27. TRAFFIC.—

The Department Provost Marshal, assisted by the Division Provost Marshals, will regulate traffic on OAHU.

28. MOTOR TRANSPORTATION.—

a. Motor pools will be established by the Infantry Divisions and the Hawaiian Coast Artillery Command. These pools will [20] consist of all available tactical vehicles and administrative vehicles, the latter obtained by reducing to a minimum administrative requirements.

b. The assignment of motor vehicles for one specific purpose will be the exception. All motors will be used to the maximum for all purposes.

c. Current movement and loading tables will be maintained by the Infantry Divisions and the Hawaiian Coast Artillery Command as follows:

(1) Number of vehicles, tactical and administrative in the pool, showing the number of men and amount of impedimenta that can be moved initially into position. See paragraph 9 above.

(2) Number of vehicles, tactical and administrative, subsequent to move into position which are available for movement of reserves, and the number of men which can be moved.

By command of Lieutenant General SHORT:

Walter C. Phillips,
WALTER C. PHILLIPS,
Lt. Col., G. S. C., Chief of Staff.

OFFICIAL:

Wm. E. Donegan,
WM. E. DONEGAN,
Lt. Col., G. S. C., Asst. Chief of Staff. G-3.

Inclosures:

- No. 1—Map, Communications Installations.
- No. 2—Map, Bridges and Police Districts.
- No. 3—Map, Electric Installations.
- No. 4—Estimate of Enemy Situation.
- No. 5—Periodic Intelligence Report Forms.
- No. 6—Allowances of Ammunition.
- No. 7—Unit of Fire.
- No. 8—Load of Aircraft Ammunition.

Inclosure No. 1

(Inclosure No. 1 is a map of Oahu showing Communications Installations as of July 7, 1941. This map is reproduced as Item No. 1 in EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

(Inclosure No. 2, in part, is a map of Oahu showing Police Districts, Railroad Bridges and Highway Bridges. This map is reproduced as Item No. 2 in EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

Inclosure No. 3

(Inclosure No. 3 is a map of Oahu showing Electric Installations and Generating Plants. This map is reproduced as Item No. 3 in EXHIBITS-ILLUSTRATIONS, Army Pearl Harbor Board.)

Inclosure No. 4

Title
Place
Date and hour

ESTIMATE OF THE ENEMY SITUATION

1. SUMMARY OF THE ENEMY SITUATION.

- a. Enemy Naval Operations.—Movements (by fleet or groups).
- b. Enemy land operations.
 - (1) Enemy activities in forward areas and new identifications.
 - (2) Movements, concentrations and establishments in rear areas.
 - (3) Sabotage.
 - (4) Terrain, weather, visibility and surf as they affect the enemy.

2. CONCLUSIONS.

- a. Enemy capabilities.—An enumeration of lines of action open to the enemy which may affect accomplishment of the mission of the command.
- (b) (1) A statement of the relative probability of adoption of the foregoing lines of action when such statement can be justified.
- (2) Reasons justifying any statement made in (1) above.

Chief of section.

PERIODIC REPORTS

No. -----

Maps. (Those needed for an understanding of the report.)

1. ENEMY SITUATION AT END OF PERIOD.

- a. Enemy front line (or nearest elements).—Location and nature.
- b. Defensive organization.—Trenches, emplacements, observation posts, command posts, obstacles, etc.
- c. Units in contact.—Composition of units, with identificationis if known; location of their flanks, estimated combat efficiency (strength, training, physical condition, morale, and other pertinent factors).
- d. Artillery.—Location and calibers.
- e. Reserves and other forces capable of intervention.—Locaton, strength, composition, dispositions, estimated combat efficiency, and where and when they probably can be employed.
- f. Supply and evacuation establishments.—Location and nature.

2. ENEMY OPERATIONS DURING PERIOD.

- a. General summary—action of enemy forces as a whole.
- b. Operations of component elements.
 - (1) Enemy Naval Operations.—Movements (by fleet or groups).
 - (2) Enemy Land Operations.
 - (a) Landings. (By areas. Each entry to show, for that area, the front lines and identifications).
 - (b) Operations of Land Components.
 1. Antiaircraft artillery.
 2. Antitank units.
 3. Armored forces.
 4. Artillery.
 5. Aviation, combat.
 6. Aviation, observation.
 7. Parachute Troops.
 8. Cavalry.
 9. Chemical warfare.
 10. Engineers.
 11. Infantry.
 12. Tanks.
 13. Administrative elements.

- c. Sabotage.
- d. Miscellaneous.—Such enemy activities, movements or changes since last report as are not conveniently included in b above.

3. MISCELLANEOUS.

2504 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- a. Estimated enemy casualties, including prisoners.
 - b. Morale.
 - c. Supply and equipment.
 - d. Terrain not under our control.
 - e. Enemy's probable knowledge of our situation—observation, reconnaissance, prisoners and documents lost by us, inhabitants, etc.
 - f. Weather, visibility and surf, by areas.
 - g. Any enemy intelligence not specifically covered by headings of this report.
4. ENEMY CAPABILITIES.—A discussion of each of the lines of action open to the enemy which may affect the accomplishment of our mission, in the order of their possible imminence. For each capability, the effect of time, space, terrain, present known dispositions, and other factors in the situation should be evaluated. The earliest estimated time at which the enemy can put each into effect should be stated. When applicable, the possible result of the adoption by the enemy of any capability should be included.

HEADQUARTERS HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 10 December 1941

Subject: Coordination of Traffic Control. (Paragraph 9h (TENTATIVE) added to SOP HD.)

To: Distribution: Special, and Chief of Police, Honolulu, T. H.

1. The attention of all commanders is directed to provisions of Paragraphs 27 and 9f, SOP HD, 5 November 1941, repeated below:

"27. Traffic: The Department Provost Marshal, assisted by the Division Provost Marshals, will regulate traffic on OAHU.

"9. f. Motor vehicles operating at night, at the discretion of local commanders, will be (1) in convoy with standard blackout or blue lights with a shielded tail light on all vehicles, or (2) in the case of convoys traveling closed up, with standard blackout or blue lights on leading vehicle and a shielded tail light on the rear vehicle, and no lights on the others. *Standard blackout light or approved modifications are authorized for use at all times and all places during hours of darkness on vehicles carrying military personnel on a military mission.* On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic."

2. The following additional instructions are published for the strict compliance of all troops in this Department:

Paragraph 9h (TENTATIVE), SOP HD.

(1) The civil police (special and regular) and the Military Police will have COMPLETE and EXCLUSIVE control of traffic on the island of OAHU with the following exceptions:

a. Guards on entrances to vital installations operating under special instructions.

b. In case of accidents or other emergencies.

(2) Route markers are authorized for tactical or convoy movements.

(3) Except in case of military necessity and except as otherwise hereinafter provided, the present civil regulations relating to traffic shall remain in force.

(4) Only such military and civilian personnel as are actually needed on defense work, public utilities, and conducting emergency work or on a military mission will be authorized to operate motor vehicles on the highways between 1800 and

2508 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

0600 (6:00 P. M. and 6:00 A. M.), tactical movements excepted. In this connection, contractors' trucks working on 24 hour basis on approved defense projects will not be delayed. All cars authorized to operate between the above hours (6:00 P. M. to 6:00 A. M.) shall have standard blackout, or blue lights using Moss Blackout Blue Paint (quick-drying) or its equivalent.

(5) All modified lights must conform to a standard pattern and be visible for a distance of not to exceed 100 feet.

(6) The Military Police assisted by the civil police, will approve and check modified blackout lights and will not permit modified lights to be used that do not conform to the standard of blackout lighting equipment, as pertains to visibility from the air. Special instructions and detailed specifications will be issued later by the Provost Marshal.

(7) Persons operating vehicles at night without approved blackout lights will be arrested promptly.

(8) Parking is prohibited on the following streets in Honolulu:

School Street
Lusitania Street
Beretania Street
King Street
Waiialae Street
Dillingham Boulevard
Middle Street

Nuuanu Avenue
Alapai Street between Lusitania and Beretania
Iwilei Road between King and railroad tracks
Queen Street on mauka side between Iwilei Road and Fort Street

(9) During air raids all vehicles are prohibited from operating, except the following:

a. Military vehicles on a military mission.

b. Civilian police cars.

c. Certain civilian vehicles specifically authorized by the Provost Marshal. All other operators will halt their vehicles off the main roads or streets where they will remain until authorized to be moved by the police (civil or military) or until ALL CLEAR is given.

(10) Immediate action will be taken by all commanders to insure that their personnel are informed of the above contents.

(11) The cooperation of all personnel, civil and military, is directed.

By command of Lieutenant General SHORT:

WALTER C. PHILLIPS,
Colonel, General Staff Corps,
Chief of Staff.

OFFICIAL:

WILLIAM E. DONEGAN,
Lieutenant Colonel, G. S. C.,
Asst. Chief of Staff, G-3.

DISTRIBUTION: Special, plus 100 to Chief of Police, Honolulu, T. H., plus 500 for file w/SOP.

[CORRECTED COPY]

(Please destroy all previous copies)

HEADQUARTERS HAWAIIAN DEPARTMENT,

Forward Echelon,
0500 17 December 1941.

Subject: Coordination of Traffic Control (Corrections to Par 9 f and 9 h (tentative) SOP-HD)

To: Distribution, Special, plus one to each holder of SOP-HD and Chief of Police, Honolulu, T. H.

1. Reference letter, HHD, Corrected copy, subject "Coordination of traffic control", dated 10 December 1941, SOP-HD is further corrected as follows:

a. "9. f. Motor vehicles operating at night at the discretion of local commanders, will be:

"(1) in convoy with Standard Blackout lights or *approved modifications* with tail light shielded or painted all blue, on all vehicles, or,

"(2) in the case of convoys traveling closed up, with standard blackout lights or *approved modifications* on the leading vehicle and a tail light shielded or painted all blue on the rear vehicle, and no lights on the others.

"(3) Standard blackout lights or approved modifications are authorized for use at all times and all places during hours of darkness on vehicles carrying military personnel on a military mission.

"(4) On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic.

"(5) All motor vehicles not having standard blackout lighting equipment shall have modified lights conforming to the following specifications:

"Headlights to be painted all black with the exception of a two and one-half inch circle, slightly below the center of the headlight lens. This circle will be painted with Moss Blackout Blue paint (quick-drying) or equivalent. Tail lights will be shielded or painted all blue. Sufficient coats of the Blackout Blue paint will be used to insure that the "modified lights" conform to the standard of blackout lighting equipment, as pertains to visibility from the air."

b. Par 9 h (tentative), sup-par 4, changed to read as follows:

"(4) only such military and civilian personnel as are actually needed on defense work, public utilities, and conducting emergency work or on a military mission will be authorized to operate motor vehicles on the highways between 1800 and 0600 (6:00 PM and 6:00 AM), tactical movements except. In this connection, contractors' trucks working on 24 hour basis on approved defense projects will not be delayed. All cars authorized to operate between the above hours (6:00 PM to 6:00 AM) shall have standard blackout lights or "approved modifications" using Moss Blackout Blue paint (quick-drying) or its equivalent and with tail light shielded or painted all blue."

c. Par 9 h (tentative) sub-paragraph (5) deleted.

d. Par 9 h (tentative) sub-paragraph (6) delete the last sentence which reads as follows: "Special instruction and detailed specifications will be issued later by the Provost Marshal."

2. The above corrections will be made on all copies of the corrected SOP-HD (see corrected copy of letter, same subject, HHD, dated 10 Dec 1941).

By command of Lieutenant General EMMONS:

J. LAWTON COLLINS,
Colonel, General Staff Corps,
Chief of Staff.

OFFICIAL:

Wm. Donegan
WILLIAM E. DONEGAN,
Lieutenant Colonel, G. S. C.,
Asst. Chief of Staff, G-3.

HEADQUARTERS HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 10 December 1941.

Subject: Air Raid Alarm Instructions. (Paragraph 11b, c, d, e and f (TENTATIVE) added to SOP HD.)

To: Distribution Special, Plus 90 to Navy and 100 to Chief of Police, Honolulu, T. H.

1. Paragraph 11, SOP HD, is repeated below and changed by inserting paragraph a and adding paragraphs b, c, d, e and f.

"11. Installations and Alarm System.—a. All important installations not protected by the Territorial Home Guard will be guarded by troops. An adequate alarm system will be established in connection therewith."

b. (1) A general Air Raid Alarm will be started by sounding a long blast on the siren in the Aloha Tower. Orders for such Air Raid Alarm will be given only by the Air Corps Warning Service Information Center by direct communication with the Navy Detail at the Aloha Tower.

(2) This alarm will immediately be taken up by units, small groups, patrols and individuals who will immediately sound the alarm by a continuous blast on their alarm equipment until it is picked up and relayed by adjacent groups. Usually one (1) minute duration should be sufficient.

(3) Alarm equipment is listed below and will be used for no other purpose except in connection with Air Raid Alarm and recall therefrom or All Clear Signals.

- (a) Siren on Aloha Tower.
- (b) Stewart type Klaxon Horn.
- (c) Ambulance sirens.
- (d) Fire truck sirens.
- (e) Police sirens.
- (f) All other sirens not covered above.

2510 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

c. The "Recall from Air Raid Alarm" or "All Clear Signal" will be relayed by the alarm equipment indicated above, starting with the siren on the Aloha Tower, on instructions from the Air Corps Warning Service Information Center. The signal will be "broken short blasts" repeated until relayed by adjacent units.

d. In addition to the above signals, Air Raid Alarms and "All Clear" instructions will be announced over teletype networks, relayed over tactical communication nets, and announced over KGNB and KGU.

e. The above Air Raid Alarm signals will not be given except as indicated above unless units are actually attacked by enemy aircraft.

f. The above Air Raid Alarms and All Clear Signals will be relayed to the District Commanders of the outlying islands by the Department Signal Officer.

By command of Lieutenant General SHORT:

JOINT COASTAL FRONTIER DEFENSE PLAN, HAWAIIAN COASTAL FRONTIER,
HAWAIIAN DEPARTMENT AND FOURTEENTH NAVAL DISTRICT
SECTION I—DIRECTIVES

[Extract]

• 3. *Method of coordination.* The Commanding General of the Hawaiian Department and the Commandant of the Fourteenth Naval District have determined that in this joint plan the method of coordination will be by mutual cooperation and that this method will apply to all activities wherein the Army and the Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Action of the Army and the Navy, 1935, Chapter 2, paragraph 9b.

18. *Navy.* The Commandant, FOURTEENTH NAVAL DISTRICT, shall provide for:

i. Distant reconnaissance.

21. This agreement to take effect at once and to remain effective until notice in writing by either party of its renouncement, in part or in whole, or until disapproved in part or in whole by either the War or the Navy Department. This HCF-41 (JCD-42) supercedes HCE-39 (JCD-13) except that the Annexes Nos. I to VII of latter remain effective and constitute Annexes I to VII, inclusive, of this plan.

JOINT AIR OPERATIONS:—To be included as a part of Annex No. VII, HCF-39, (14-ND-JCD 13) RCT, Joint Security Measures for the protection of the PACIFIC FLEET and PEARL HARBOR BASE, (now in preparation).

When the Commanding General of the Hawaiian Department and the Naval Base Defense Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans:

1. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

2. Defensive air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation, it is withdrawn by the Naval Base Defense Officer and reverts to Navy control.

3. When naval forces are insufficient for long distance patrol and search operations, and Army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

4. In the special instance in which Army pursuit protection is requested for the protection of friendly surface ships, the force assigned for this mission will pass to the tactical control of the Navy until completion of the mission.

3. DELINEATION OF RESPONSIBILITY. a. (1) By direction of the President, investigation of all espionage, counterespionage, and sabotage matters are controlled and handled by the Federal Bureau of Investigation of the Department of Justice, the Military Intelligence Division of the War Department, and the Office of the Naval Intelligence of the Navy Department. In accordance with this directive, the War Department assumes responsibility for the investigation of officers, enlisted men, and civilians employed on military reservations or under military control. Similar personnel of the naval establishment is covered by Naval Intelligence. The investigation of other civilians suspected of subversive activities, except in certain overseas possessions, is the responsibility of the Federal Bureau of Investigation of the Department of Justice, hereinafter referred to as the F. B. I.

(2) Cooperation with the agencies of Naval Intelligence and the F. B. I. will be effected by appropriate echelons of our CS system, to the end that full protection may be obtained without duplication of effort.

b. Corps Area and Department Commanders are charged with the supervision of countersubversive operations, in accordance commands, including those of exempted stations and tactical units temporarily present, except the activities coordinated by the Military Intelligence Division, War Department General Staff.

Subject: Detector Operation.

To: Department Signal Officer.

1. On November 27, 1941, after conference with Assistant Chief of Staff G-3, and receiving instructions to operate all mobile detectors from two hour before dawn until one hour after dawn, I, as Acting Department Signal Officer, gave immediate instructions to Captain TETLEY, Commanding Officer of the Aircraft Warning Company, to initiate the above detector operation so long as Alert No. 1 was in force.

2. The detectors in question operated daily thereafter during the prescribed period except when having occasional operational trouble. In addition, the six detector stations operated daily except Sundays from 7:00 A. M. until 11:00 A. M. for routine training. Daily except Saturday and Sunday, the hours 12:00 noon until 4:00 P. M. were devoted to training and maintenance work.

CERTIFICATE

On the morning of 7 December, 1941, the 18th Wing had 6 B-17s in commission, with 6 B-17s out of commission for maintenance. Of the 8 B-17s destroyed during the attack, 4 were from those stationed at Hickam Field, 2 from those in commission and 2 from those out of commission. The other 4 were lost while attempting to land upon arrival from the Mainland. These B-17s arrived at Hickam Field between 8:00 A. M. and 8:20 A. M., 7 December, 1941. These planes took off from Hamilton Field, California in two squadrons, one at 9:30 P. M. December 6, Pacific time (12:30 A. M. December 7, Eastern time) and the other at 10:30 P. M. December 6, Pacific time (1:30 A. M. Eastern time).

Of the 8 B-17s which arrived safely from the mainland, none had sufficient gasoline to permit dispatching them on missions, nor were they equipped with ammunition for these defensive armament. Machine guns were still cosmolined and had not been bore sighted. Ferry crews were skeletonized, consisting of pilot, copilot, navigator, engineer and radio operator. Such crews were incapable of manning all gun positions even if the guns had been properly prepared for combat and supplied with ammunition.

The B-24 which arrived at Hickam Field on 5th December, 1941, previous to the attack, had insufficient armament for combat, only 1 .30 cal. and twin .50 cal. guns in the tail, and was without ammunition for the guns that were installed.

Territory of Hawaii, ss:

Personally appeared before me, the undersigned, authority for administering oaths of this nature, one Grover C. White, Jr. O-396182, 2nd Lieut., Signal Corps, Signal Company, Aircraft Warning, Hawaii who after being duly sworn according to law deposes and sayeth:

1. At the request of the Control Officer and Naval Liaison Officer the AWS agreed to operate its detectors beyond the daily period of two hours before until one hour after dawn. The first schedule required operation of all stations from 4 A. M. to 6 P. M. This schedule was modified to the hours of 4 A. M. to 4 P. M. A temporary schedule was next devised which required all stations to operate from 4 A. M. to 11 A. M. and to have "staggered" operation, i. e., 3 stations from 11 A. M. to 1 P. M., the remaining 3 stations from 1 P. M. to 4 P. M. On Saturday, December 6, 1941, I contacted the Control Officer to request authority to have all stations operate from 4 a. m. to 7 a. m. only on Sunday, December 7, 1941; this was agreed to by the Control Officer.

2. Staff Sergeant Stanley J. Wichas, SCAWH, acting RDF Officer, reports that he saw nothing that could be construed as suspicious in the information received by the AWS Information Center from 4 A. M. to 7 A. M. Sunday, Decem-

2518 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

ber 7, 1941. This is verified by Lt. Kermit A. Tyler, Air Corps, who was the only officer in the Information Center from 4 A. M. to 7 A. M.

3. At approximately 7:20 A. M. a report was received from a Detector station at Opana that a large number of planes was approaching Oahu on a course North 3 degrees East at a distance of approximately 132 miles. This information was immediately transmitted by the switchboard operator, Pfc. Joseph McDonald to Lt. Tyler, who talked to Opana about the flight. The statement of Pfc. Joseph McDonald, SCAWH, the switchboard operator is attached.

4. The Navy Liaison Officer's position within the Information Center was not manned when I reached the Information Center at about 8:20 A. M. This position was manned shortly thereafter by Technical Sergeant Merle E. Stouffer, SCAWH, who remained on the position until approximately 4:30 P. M. when the position was taken over by Naval Officers. Further the deponent sayeth not.

/s/ GROVER C. WHITE, JR.,
2nd Lieut., Signal Corps,
Signal Company, Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of Dec. A. D. 1941 at Fort Shafter, T. H.

FORT SHAFTER, T. H.
Territory of Hawaii, ss:

Personally appeared before me, the undersigned authority for administering oaths of this nature, one Joseph P. McDonald, 13006145, Pvt 1cl, Signal Company, Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

I was on duty as telephone operator at the AWS Information Center on Sunday morning, December 7, 1941. I received a telephone call from Opana at 7:20 A. M. stating that a large number of planes were heading towards Oahu from North 3 points east. I gave the information to Lt. Kermit A. Tyler, Air Corps, 78th Pursuit Squadron, Wheeler Field, T. H. and the Lieutenant talked with private Lockard at the Opana Station. Lt Tyler said that it wasn't anything of importance. At that time the planes were 132 miles out. I asked if we shouldn't advise Corporal Beatty and have the plotters come back. The Opana Unit stressed the fact that it was a very large number of planes and they seemed excited. Lt. Tyler said that it was not necessary to call the plotters or get in touch with anyone.

Further the deponent sayeth not.

JOSEPH P. McDONALD,
Sig. Co., Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of December A. D. 1941 at Fort Shafter, T. H.

STATEMENT OF LIEUT. KERMIT A. TYLER

20 DECEMBER 1941.

On Wednesday, 3 December 1941, I was first detailed to learn the operation of the plotting board in the Interception Control Center. I reported for duty at 1210, just as the crew on duty was leaving. I spoke with Lt. White, Signal Corps, a few minutes and he showed me the operating positions for Navy, Bombardment, Antiaircraft, Controller's position and Aircraft Warning Service. I remained on duty until 1600. Only a telephone operator was on duty with me.

On Sunday, 7 December 1941, I was on duty from 0400 to 0800 as Pursuit Officer at the Interception Control Center. From 0400 until approximately 0610 there were no plots indicated on the interception board. From that time until 0700 a number of plots appeared on the control board at various points surrounding the Island of Oahu. I particularly remember at least one plot South of Kauai and I believe there was one South of Molokai. There were two plots at some distance North of Oahu and which I remember seeing on the historical record. At the time, I questioned the plotter of the historical record who stated that he makes a record of all plots as they come in. There were a number of plots over and around the Island of Oahu. Having seen the plotters work once before with about the same general layout, this did not seem irregular to me. At 0700 all of the men except the telephone operator folded up their equipment and left. At about 0720 the operator at the Opana RDF Station called me and said that the instrument indicated a large number of planes at 132 miles to the North. Thinking it must be a returning naval patrol, a flight of Hickam Field Bombing planes, or possibly a flight of B-17 planes from the coast, I dismissed it as nothing unusual. (It is common knowledge that when Honolulu radio stations are testing by playing Hawaiian Music throughout the night that coincidentally B-17s are apt to come in using the station for radio-direction finding. The radio station was testing on the morning of 7 December, 0230-0400). At about 0750 I heard some airplanes outside and looking toward Pearl Harbor saw what I thought to be a navy practicing dive bombing runs. At a little after 0800, Sergeant Eugene Starry, A. C. Wheeler Field, called me to tell me that Wheeler Field had been attacked. I immediately had the telephone operator call all men back to duty. Most of the men had returned to duty by 0820 when Major L. N. Tindal arrived and took charge of the Control Center. I remained on duty assisting Major K. P. Bergquist and Major L. N. Tindal as Pursuit Control Officer until about 1615, 8 December 1941, with the exception of rest periods from 2000 to 2400, 7 December, and 0600 to 1000, 8 December.

HEADQUARTERS 53RD COAST ARTILLERY BRIGADE (AA),
OFFICE OF THE BRIGADE COMMANDER,
Fort Shafter, T. H., 20 December 1941.

Subject: Report on action by 53d C. A. Brigade (AA) from 0755 to 2400, 7 December 1941.

To: General Short.

1. At the beginning of the attack on Oahu 7 December 1941, the 53d Coast Artillery Brigade (AA) was operating under the conditions of Alert No. 1, S. O. P., N. C. A. C., 26 November 1941. The 97th C. A. and the AA Detachments of the East Group had anti-sabotage guards at their fixed 3-inch gun Batteries. All anti-aircraft equipment was being guarded.

2. a. Fort Weaver. Headquarters 2nd Battalion 97th C. A. (AA).

Alerted 0810
Ready to fire 0813
Engaged enemy at 0814
Amm. fired: 407—.30 Cal. ball.
117—.30 Cal. A. P.
53—.30 Cal. Tracer.
12--Pistol.

South Group Command Post detail at stations at 0810. NO repeat NO interruption in communications in South Group during this period. There was rifle and automatic rifle fire on low flying enemy planes by officers and men.

Battery G 97th, were in camp at Fort Weaver. Its battle position is at fixed battery at Fort Weaver.

Alerted at 0810
Ready to fire 0830
Engaged enemy 0830

2520 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Fired 30 rds—3" A. A. Shrapnel. Approximately 200 rds of .30 Cal. ball Amm. One .50 Cal. Machine Gun was in action at approximately 8:40 A. M. During this firing Private YORK gunner was wounded while engaging the enemy, he stayed at his post although ordered to take cover. Lieutenant KING states that the battery fire broke up and definitely turned back one formation of 15 enemy planes. Casualties—One (1) Officer dead—Killed while proceeding through Hickam Field to his battle position. Four (4) enlisted men wounded.

(Basic: Ltr., Hq. 53d C. A. Brigade (AA), dated 20 December 1941. Subject: "Report on action by 53d C. A. Brigade (AA) from 0755 to 2400, 7 Dec 1941".)

Battery F 97th, was camped at Fort Weaver. Its battle position at Fixed Battery Closson, Fort Kamehameha, T. H.

Alerted 0755, and moved to Battery position across Pearl Harbor Entrance.

Ready to fire 0855

Engaged Enemy 0900 to 0920

Amm. fired: 27—3" A. A., H. E., M. K. fuse M3.

Approximately 400 rds .30 Cal. ball.

Approximately 150 rds .30 Cal. A. P.

Battery G 64th, was in barracks at Fort Shafter, battle position at Ahua Point.

Alerted approximately 0815, and moved to battery position at Fort Kamehameha.

Ready to fire 1030

Engaged Enemy with .30 Cal. M. G. at 1030

Amm. Fired: Approximately 50 rds of .30 Cal. ball.

Battery H 64th, was in barracks at Fort Shafter. Its battle position is at Fort Weaver.

Alerted 0830

Ready to fire 1145

Engaged Enemy 2100

Amm. fired: 40 rds—.50 Cal. ball.

40 rds—.50 Cal. A. P.

30 rds—.50 Cal. Tracer

Marine detachment: The Fleet Machine Gun School at Fort Weaver. Operations were in cooperation with South Group although not tactically assigned.

Alerted 0800

Ready to fire 0810

Engaged Enemy 0810

Amm. fired: Approximately 8000 rds of .50 Cal. A. P. ball and tracer.

Approximately 450 rds of 20 mm A. A.

This Detachment shot down 4 enemy planes and saved a 4 engined bomber by causing enemy plane firing on it's tail to pull out and cease it's attack. Much shrapnel and some small arms bullets fell about Fleet M. G. School. There was excellent cooperation from Fort Weaver personnel in the liaison, phone, etc.

b. 98th Coast Artillery, Schofield Barracks.

Alerted at 0800

The communications section at the Command Post, Wahiawa, shot down one enemy plane flying at less than 100 feet, with their automatic rifles at 0855.

1st Battalion 98th C. A. (AA), was in position and ready for action at the following time:

B—98: 0955

D—98: 1000

C—98: 1030

Battery M 64th, stationed at Fort Shafter, was alerted at 0815, moved to Wheeler Field, and was ready for action at 1155.

2nd Battalion 98th C. A. (AA). This Battalion has two batteries at Kaneohe and one at Waipahu School. They were in position and ready for action at the following times:

F—98: 1315

G—98: 1315

H—98: 1330

c. Camp Malakole 251st C. A. (AA). All units were alerted at 0805 when fired upon by a single enemy plane. All units returned the fire with small arms and the plane was shot down.

1st Battalion 251st C. A. (AA), was in position and ready for action as follows:

B—251: at West Loch, 1145

C—251: Ewa Beach, 1145

D—251: South of Ewa, 1145

2nd Battalion 251st C. A. (AA), was in position as follows:

E—251: Navy Yard

F—251: Navy Recreation Area

G—251: Tank Farm

H—251: Navy Yard

At 1120 and again at 1122, E, 251st fired on enemy planes, shooting down one plane. 100 rds of .50 Cal. were fired on the first plane and 200 rds of .50 Cal. were fired on the second plane.

d. Fort Kamehameha. Battery A, 97th C. A. (AA) fired 1500 rds of .30 Cal. at one enemy plane offshore at 0835.

e. Sand Island. The AA Detachment of Battery F, 55th C. A., present at Sand Island when the attack started was ready for action at 0815. This battery fired 89 rds of 3" AA and shot down two (2) enemy planes at 0815.

f. Fort Shafter.

(1) Three (3) enemy dive bombers were fired on by the Headquarters Battery and the Intelligence Battery of this Brigade and by Battery E, 64th C. A. (AA). Ammunition Expended—3,000 .30 Cal.

(2) Enemy planes were fired on at 0900 and 1000 by Battery A, 64th C. A. (AA). Ammunition Expended—1000 .30 Cal.

(3) All 3" gun batteries and Automatic Weapons batteries of the 64th C. A. (AA) were alerted at 0815 and were in position as follows:

B—64: at Aiea, 1000

C—64: at Aliamanu, 1030

D—64: South of Aliamanu, 1100

F—64: at Pearl City, 1105

G—64: See Par. 2 a, above.

H—64: See Par. 2 a, above.

I—64: at Aliamanu

K—64: at Hickam Field

L—64: at Hickam Field.

M—64: See Par. 2 b, above.

All of these units except M, 64th fired during the second attack from 1000 to 1145. Ammunition expended as follows:

3", 23 rds.

.50 Cal., 2361 rds.

.30 Cal., 2821 rds.

g. Fort Barrette. Battery H, 97 C. A. (AA), was stationed at Fort Weaver. The battery was alerted at 0755, moved out of Fort Weaver at 0830, and arrived at Fort Barrette at 0910. Enemy planes were engaged by small arms fire at Fort Weaver, while enroute, and at Fort Barrette. The detachment on guard at Fort Barrette shot down one enemy plane at 0910 by small arms fire.

3. Three (3) Marine AA Batteries were attached to the Brigade at 2245.

4. *Ammunition.* Status at 0730, 7 December 1941. All units of the Brigade had in their possession, the initial issue of small arms ammunition. This included ammunition for rifles, pistols, automatic rifles and machine guns. In addition, the 3-inch ammunition was so positioned that it was readily accessible to all units of the Brigade except four (4) batteries for which ammunition was at Aliamanu Crater. These batteries completed drawing their initial allowance, 1200 rounds per battery, by 1015.

HEADQUARTERS HAWAIIAN DEPARTMENT,

FORT SHAFTER, T. H.,

Forward Echelon, 21 December 1941.

MEMORANDUM TO LIEUT COL. KENDALL J. FIELDER.

The following report of planes shot down, crashing or otherwise destroyed in the attack on Oahu, 7 December 1941, is submitted for your information. All of these losses have as yet not been verified, and it is very likely that some of the reports from different sources will be in reference to the same plane. Verifications are being received daily:

Time	Source	Details	Remarks	Total
0800-1000	6 officers from emergency landing field at Haleiwa.	Accounted for 10 planes	Some of these may appear in other reports.	10
	CO Mil District of Kauai.	1 plane crashed off North shore, 1 wrecked on Niihau.	Verified	2
	Civilian report	1 plane crashed in Gulch, rear Aiea Hgts.	Verified	1
	Group of officers on fishing trip.	3 planes crashing in Honolulu Harbor.	Verified	3
0940	Capt. Ebby, "B" Btry 55th C. A. C.	2 planes destroyed by machine-gun fire.	Verified	2
1922-1130	Btry "F", 55 CAC	2 planes	0922 report not verified, 1130 rpt verid.	2

HEADQUARTERS HAWAIIAN DEPARTMENT,
Office of the Department Commander,
Fort Shafter, T. H., 19 February 1941

In reply refer to
Engr. 660

General GEORGE C. MARSHALL,
Chief of Staff of the Army, War Department, Washington, D. C.

DEAR GENERAL MARSHALL: I was very glad indeed to have your letter of February 7th as it gave us some very definite information on aircraft we did not have.

Since assuming command I have had two conferences with Admiral Kimmel and two with Admiral Bloch. I have found them both most approachable and cooperative in every way. I have told them that from my point of view there will be no hair splitting, but that the one thing that would affect any decision where there is an apparent conflict between the Army and the Navy in the use of facilities would be the question of what could produce the greatest combined effort of the two forces. They have assured me that they will take exactly the same view. From my brief intercourse with them I feel that our relations should be extremely cordial.

As a result of my short study of conditions here I believe that the following are of great importance and I am taking steps to carry out the necessary changes:

- (1) Cooperation with the Navy.
- (2) Dispersion and protection of aircraft and of the repair, maintenance and servicing of aircraft.
- (3) Improvement of the Antiaircraft defense.
- (4) Improvement of the Harbor Defense Artillery.
- (5) Improvement of the situation with reference to searchlights.
- (6) Provision for more rapid movement of supplies and reserves by improvement in roads and trails.
- (7) Bombproofing of vital installations such as Command Posts and communication centers.
- (8) Increase in the number of Engineer troops.

Cooperation with the Navy. A series of joint committees consisting of Army and Navy officers has been appointed with a view to the study of cooperation of the Army and Navy especially with reference to employment of air and Aircraft. These committees have been directed to report on March 1st. Copy of the letter creating these committees is attached hereto as well as copy of [2] instructions to the echelon commanders concerning cooperation with the Navy.

Dispersion and protection of aircraft and of the repair, maintenance and servicing of aircraft. Provision has been made for a number of emergency fields upon the various islands but no provision has been made for dispersion of the planes in the vicinity of fields and other protection by either camouflage or by bunkers. The emergency fields on other islands will be valueless for pursuit aviation except possibly on the Island of Molokai. The pursuit aviation is capable of only approximately one hour's flying with the throttle wide open. This means that the dispersion of pursuit aviation must take place upon the Island of Oahu if it is to be able to meet an attack from any direction. The dispersion and bunkers for the greater part of the pursuit aviation can be made in the immediate vicinity of Wheeler Field by the use of ravines and bunkers. The maintenance and repair facilities can be placed in ravines under ground without an exorbitant cost in time or money. Tanks are now available for the distribution of gas and we are asking for money to install tanks.

The bombers can make use of the landing fields on other islands but it will be necessary to make provisions for their dispersion in the vicinity of those fields and also on the Island of Oahu. Their dispersion is more difficult than that of the pursuit. The repair and maintenance facilities require so much space that it will be necessary, at least temporarily, to place them above ground protected by hills. At present the only repair facilities for the bombers are in buildings on

Hickam Field which would undoubtedly be attacked by any surprise raid. Up to the time that we make runways for dispersion of planes on all the fields surprise enemy raids would be extremely serious.

Improvement of the Antiaircraft Defense. The major shortages in Antiaircraft artillery armament are sixteen 3-inch or 90 m.m. antiaircraft guns (six enroute) 135 37-mm antiaircraft guns, 236 .50 caliber machine guns and 30 sound locators. The locators are expected in June. The shortage of personnel, however, is much more serious than the shortage in materiel. Practically all the coast artillery units have dual roles. If they man antiaircraft artillery the Harbor Defense Artillery will not be manned, and vice versa. To man the entire antiaircraft artillery defense project avoiding dual assignments to all but four Harbor Defense batteries requires an increase in the existing antiaircraft personnel as follows:

Two regiments of Coast Artillery Antiaircraft (Mobile) T-O 4-11.

One Battalion Gun Coast Artillery Antiaircraft (Mobile (less searchlight battery)) T. O. 4-15.

[3] Approximately 90 officers and 2,000 enlisted replacements to activate three gun batteries and three 37-mm batteries of the 64th Coast Artillery Antiaircraft, now inactive. With the increasing critical international situation at this time it is urgently recommended that all reinforcements of Antiaircraft Artillery personnel, both unit and individual reinforcements mentioned above, together with the shortage in antiaircraft artillery matériel, be furnished to this department with the least practicable delay.

These reinforcements to the antiaircraft artillery garrison, as well as those for the Harbor Defense Artillery listed below, are required to complete the approved defense project. No provision of the defense of the Kaneohe Naval Air Station has been made in the defense project. This problem has been made the subject of a separate letter, copy attached as Inclosure No. 4.

Improvement of the Harbor Defense Artillery. There are no major shortages of equipment for Harbor Defense Artillery. However, about 150 officers and 2,700 enlisted men as individual reinforcements and one regiment, Coast Artillery (T. D.) T. O. 4-31W are required to fully man the Harbor Defense Artillery, not including the three obsolescent seacoast mortar batteries. It is urgently requested that these replacements and reinforcements be furnished at the earliest practicable moment.

As an accessory to the Harbor Defense Artillery, the north shore Railroad connection is extremely important to give access to railway gun positions on the north shore.

Improvement of the situation with reference to searchlights. The only serious shortage is in beach defense searchlights. A 24-inch carbon-arc light is under development; but the receipt of these lights here may be unduly delayed. This shortage can be overcome immediately by supplying power units for 42 Mack 36-inch projectors which are now on hand. The trucks and power units for these lights are unserviceable but the projectors are in fair to good shape.

There is a shortage throughout of spare parts for 60-inch searchlights, which were requisitioned some months ago. These would be required for any prolonged action. Information from the Chief of Engineers indicates that they will probably be furnished in the near future.

Provision for more rapid movements of supplies and reserves by improvement in roads and trails. With the increase in the number of motors available in the department it is most necessary that roads be provided to make the maximum possible use of the motors in the movement of reserves and supplies. The Engineers have made a very careful study of the roads and trails which are necessary for the defense of the island.

[4] There are numerous bottlenecks in the islands where it is not practicable to construct alternate roads. If these roads are damaged by shelling or bombing it is most important that they be repaired in the minimum of time. To provide for this stores of repair material should be placed in close proximity to the vital points. It is believed that the Territorial government will cooperate with the Army in this matter, thus reducing expenses to be charged to National Defense.

Bombproofing of vital installations such as Command Posts and communication centers. Command Posts, communication centers and items of critical supply should be bombproofed. This protection of Command Posts particularly should be done immediately in order that these installations can be trained to function in these locations before hostilities start.

Increase in the number of Engineer Troops. The protection of aircraft and the construction of air fields will keep one regiment of engineers employed constantly.

The work on roads and trails would be such as to employ one General Service Regiment constantly. The combat Engineer regiment of the Hawaiian Division should be left available for bombproofing of Headquarters and communication centers and other tactical work.

Previous recommendations for a regiment of Aviation Engineers, less 1 battalion, and an increase in enlisted strength of Third Engineers were based on assumption that some civilian labor would be available. The situation on civilian labor has become acute, and while it has been necessary to import skilled labor, the recent increase in defense work is going to necessitate importing unskilled labor as well. The only alternative would be to curtail activities of the plantations and much of our defense work should not be postponed until that is done.

Communications covering all the above recommendations are being or have been submitted to The Adjutant General. The following are the titles and dates of letters covering these subjects:

Cooperation with the Navy.

Joint letter, HHD 14th Naval District, 14 February 1941, subject: "Army and Navy Aircraft in Hawaiian Area," copy attached, Inclosure No. 1 AG 354.2/JAX-(pencil)

Engineer 452.

SECRET

Subject: Dispersion and Protection of Aircraft.

To: The Adjutant General, War Department, Washington, D. C.

1. With the present set-up of existing facilities in this Department the pursuit ships are forced to operate to a large extent from Wheeler Field and similarly the bombardment ships are forced to operate from Hickam Field. In times of actual operation some of the bombardment ships will be operating from bases on the outlying islands, but to a large extent the pursuit ships will continue to operate from Oahu due to the limited time and radius of operation without refueling.

2. The concentration of these airplanes at Wheeler Field and at Hickam Field presents a very serious problem in their protection against hostile aviation. Wheeler Field is too small for the operation of the number of pursuit ships to be furnished to this Department and it will be necessary to develop another base for at least one group of pursuit aviation. A site in the vicinity of Barbers Point has been tentatively selected and is now being discussed with the Navy Department in connection with that Department's activities on its new air base in the Ewa Plain Area. The new Army air base will be the subject of a subsequent letter.

3. While this new base will provide some opportunity for dispersion of the pursuit ships this dispersion cannot be counted upon to give adequate protection and it will be necessary to provide protection by means of bunkers in the vicinity of existing fields for both pursuit and bombardment aviation. I have asked the District Engineer of Honolulu to study this problem and to submit cost estimates on the most economical satisfactory means of providing this protection. The District Engineer has recommended that the protection be provided by a rolled fill embankment of dirt and has estimated the cost at \$1,200.00 each for pursuit planes, \$8,000.00 each for two engine bombardment planes and \$15,000.00 each for four engine bombardment planes. In arriving at these figures he has given consideration not only to present unit costs, but has included funds to cover increasing cost of both labor and non-labor items in this Department; the figures shown include both direct and indirect costs. This bunkering protection will cost about the same regardless of its location; the unit price includes cost of taxi strips and accessories.

4. This protection should be provided for 142 single engine pursuit ships and 121 double engine pursuit ships and for 25 two engine bombers and 70 four engine bombers. Using the unit costs quoted above the total for pursuit planes is \$315,600.00 and the total for bombing planes is \$1,250,000.00. The total for the two types is \$1,565,600.00. It is recommended that funds in this amount be allotted to this Department as soon as possible to initiate the installation of this protection.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

Office, C. of E., April 1, 1942.

To the Adjutant General.

1. Attention is invited to paragraph 3 of basis letter which gives unit prices for rolled fill bunkers for pursuit planes, two-engine and four-engine bombardment planes. It is noted that the unit prices given include funds to cover increasing cost of both labor and non-labor items and direct and indirect costs. It is also noted that the unit prices include the cost of taxi strips and accessories.

2. For the reason that the basic letter gave no basis on which this office could check the estimate of cost, a radiogram was sent to the Commanding General, Hawaiian Department, March 25, 1941, requesting detailed information sufficient for checking. A copy of this radiogram is inclosed. A reply was received thereto by radiogram from the Commanding General, Hawaiian Department, dated March 29, 1941, copy of which is inclosed.

3. It is recommended that approval in principle of the proposed protective arrangements be granted and that an initial allotment of \$1,000,000 be made at this time, authorizing the preparation of complete plans and initiation of construction with a view to providing necessary balances when costs are more fully determined.

For the Chief of Engineers:

WILLIAM F. TOMPKINS,
Lieut. Col., Corps of Engineers,
Executive Assistant.

ESA

WAR DEPARTMENT, A. G. O., May 31, 1941.

To Commanding General, Hawaiian Department.

1. Authority is granted for the construction of revetments in the Hawaiian Department for 70 four-engine bombardment, 13 light bombardment and 170 pursuit planes. This is the total number of airplanes which at present are visualized as an obtainable objective in Hawaii within a reasonable time.

2. In locating these revetments, "battle stations" of airplanes should be visualized in view of present and projected airdromes in the Hawaiian Islands. Revetments should be dispersed over the widest practicable area around and adjacent to airdromes.

3. In the designs of revetments for use in the present war in the British Isles, provision is made for a splinter-proof shelter for airplanes crews and maintenance personnel who may be caught in the revetments during an air attack. In the British design, this splinter-proof, shelter is placed in the rear wall or back of the revetment. In the construction of the revetments proposed for the Hawaiian Department, it is believed that this feature should be incorporated.

4. It is desired that you submit revised estimates covering the construction of the revetments approved in paragraph 1 above incorporating splinter-proof shelters for plane crews.

5. Funds, in the amount of \$1,358,000 for the completion of this project as finally approved after receipt of your revised estimates, are being included in estimates for funds now being prepared.

By order of the Secretary of War:

Major General, The Adjutant General.

Incls. w/d

A True Copy:

EDWARD VON GELDERN,
2nd Lieut., F. A.

Engr. 452

5th Ind

HEADQUARTERS, HAWAIIAN DEPARTMENT, *Fort Shafter, T. H., 31 July 1941.*
The Adjutant General, Washington, D. C.

1. Provisions in plans have been made for splinter-proof shelters for airplane screws and maintenance personnel.

2. Revised estimates based on obtainable objectives are as follows:

a. Personnel shelters 5' x 9' @ \$635.00 each for 85 pursuit planes, bunkers having already been built on Wheeler Field by troop labor.....	\$53, 975. 00
b. 85 Pursuit Bunkers @ \$1,200.00 and 85 personnel shelters, 5' x 9' @ \$635.00 to be constructed at locations other than Wheeler.....	\$155, 975. 00
c. 13 Lt. Bombardment bunkers @ \$8,000 and 8 personnel shelters 5' x 13' @ \$800.00.....	\$114, 400. 00
d. 70 four-engine bombardment bunkers @ \$15,000 and 70 personnel shelters 5' x 17' @ \$925.00.....	1, 050, 000. 00
Total.....	\$1, 374, 350. 00

3. The bunkers for pursuit planes will be built at the new pursuit field and at Bellows Field. These for A-20-A planes will be at Bellows Field and for the 4-engine bombardment planes will be started at Hickam Field. It is not planned at this time to construct any bunker for these 4-engine planes on the outlying airports, but it is possible that when these airports are completed, the installation of some bunkers at these airports with the majority at Hickam may be desirable. This question has been discussed with the District Engineer, Honolulu, who states that the costs at these field will be about the same as his estimate for Hickam.

4. Since the figure of \$1,374,350.00 is so close to the figure of \$1,358,000.00 mentioned in 4th Indorsement, it is recommended that the latter figure included

2530 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

in the estimates be adopted and that funds in this amount be allotted to the District Engineer, Honolulu, for this purpose.

OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., Sept. 10, 1941.

In reply refer to:

Engr. 600.96 SECRET

Subject: Underground Repair Facilities, Hawaiian Air Depot.

To: The Adjutant General, Washington, D. C.

1. The provision of bombproof facilities for the repair of aircraft by the Hawaiian Air Depot is vital to the continued functioning of the Hawaiian Air Force during an attack on Oahu.
2. At present all shop and repair facilities of the Hawaiian Air Depot are crowded into a small area at Hickham Field. This area is located close to the entrance channel of Pearl Harbor which is a perfect landmark even during blackouts. Concealment or confusion as to the purpose of this installation by camouflage is impracticable by any means known to this headquarters. In any attack or raid on this island, it is not only probable, but almost unavoidable that the Depot would be put out of action.
3. Considerable study has been made of the problem of insuring continued maintenance facilities for the Air Force and the only logical solution is to provide bombproof shelter for part of the existing maintenance facilities. Provision of bombproof protection for all of these facilities is manifestly impracticable due to the tremendous cost. It is believed that bombproofed space for one complete B-17 type airplane and for two B-17's without wing and tail assemblies, together with required space for all subassembly overhaul and repair represents the minimum space required. The District Engineer, Honolulu, has prepared a preliminary design of this structure and estimates its cost at \$3,480,650.00. Copies of the design drawings and his estimate are inclosed as Inclosures 1 and 2. Proposed location of this repair depot is shown on print, inclosure No. 3. This location has been selected because it is at a considerable distance from any other probable target, because the terrain is adapted to camouflage and because the soil will offer no construction difficulties. Location adjacent to the present facilities of the Hawaiian Air Depot at Hickham Field is impracticable; rock and ground water are reached only a few feet under ground and this location is close to other primary targets of an air attack.

4. It is recommended that one underground repair depot of the type shown on inclosed plans be approved for construction at Wheeler Field and that funds in the amount of \$3,480,650.00 be allotted to the District Engineer, Honolulu, for this construction.

ESA

WAR DEPARTMENT, A. G. O., October 27, 1941.

To Commanding General, Hawaiian Department.

1. The cost of providing bombproof underground repair facilities compared with the advantages to be gained is so great, that it is a policy that such facilities will not be provided.

2. Although the advantages of greater security which could be achieved by the provision of bombproof underground repair facilities must be recognized, the additional cost involved makes it necessary for air base installations exposed to possible bombardment attacks to assume this risk.

3. One hangar being built for our Atlantic base is to provide sidewalls of bomb-splinter proof construction. If you desire installations of this type, due consideration will be given your request, considering funds are available, and the needs of other bases similarly exposed to danger of air attack.

In reply refer to:

Engr. 400.312

Via "Clipper" Air Mail

Subject: Funds for Field Fortification and Camouflage Materials.

To: The Adjutant General, Washington, D. C.

1. Reference is made to the following project letters from this headquarters:

a. Letter to The Adjutant General, Engr. 600.94, 4 February 1941, subject: "Splinterproof Protection for Antiaircraft and Mobile Seacoast Batteries," recommending that \$306,000 be allotted to initiate protective shelters for personnel and propellants at antiaircraft and mobile seacoast batteries. In 4th Indorsement, AG 662.1 (2-4-41) M-WPD, 31 March 1941, this headquarters was advised that the recommendation was not favorably considered, and that "protective installations of this type should be improvised by ordinary field fortification methods."

b. Letter to The Adjutant General, Engr. 000.91, 7 July 1941, subject: "Request for funds for Camouflage of Wheeler Field," recommending that an allotment of \$56,210.00 be made for the purpose of camouflaging bunkers, landing field, hangers and warming apron at Wheeler Field.

c. Letter to The Adjutant General, Engr. 000.91, 27 February 1941, subject: "Camouflage of Defense Installations," recommending that \$29,000 be allotted for camouflage of batteries at Fort DeRussy, Fort Kamehameha, Fort Ruger, and

Fort Barrette. 4th Indorsement, AG 007.5 (2-27-41) MC-E, 27 June 1941, approved the project and stated that funds for this purpose would be included in the next estimates and would be made available at the earliest practicable date. Radio from the Chief of Engineer 10 October 1941 advises that \$29,000 for camouflage of coast artillery batteries had been disapproved by the Budget Advisory Committee.

[2] d. Letter of The Adjutant General, Engr. 452, 19 February 1941, subject: "Dispersion and Protection of Aircraft," recommending that an initial allotment of \$1,565,600 be made for the construction of bunkers for the dispersion and protection of aircraft. 4th Indorsement AG 600.12 (2-19-41) MC-E, 31 May 1941, granted authority for the construction of revetments for 70 four-engine bombardment, 13 light bombardment and 170 pursuit planes, and stated that funds in the amount of \$1,358,000 for the completion of the project after receipt of revised estimates would be included in estimates for funds being prepared. 5th Indorsement Engr. 452, 31 July 1941, submitted a revised figure of \$1,374,350, and recommended that it be adopted instead of the \$1,358,000. 6th Indorsement, AG 600.12 (2-19-41) MC-G, 22 September 1941, approved plans for revetments, and advised funds in amount of \$1,358,000 for completion of revetments in department were included in Project C-21, preliminary estimates 1943, funds expected to become available about January 1, 1942.

e. Letter from the Adjutant General, AG 353 (7-28-41) MC-D, 13 August 1941, subject: "Reallocation of Special Field Exercise Funds for Field Fortification and Camouflage Projects," and 1st Indorsement thereon, AG 121/1, 14 September 1941, recommending the immediate allotment of \$125,000 for necessary materials and tools for the construction of field fortifications. This indorsement was followed up by radio 25 September 1941, recommending immediate favorable action on allotment of \$125,000 for execution of field fortifications and camouflage projects. War Department radio, 29 September 1941, advised request was not favorably considered, confirmed by 1st Indorsement War Department 14 September 1941.

f. Letter to the Chief of Engineers, Engr. 121.2, 17 May 1941, subject: "Annual Estimates, Fiscal Years 1942 and 1943," and supporting data under Project 5, which requested \$50,000 each for fiscal year 1942 and 1943 for local purchase of supplies for units of the Hawaiian Garrison other than Engineer troops, these supplies to be used in the construction of fortified works other than command posts for major echelons and camouflage measures, letter, Office, Chief of Engineers, to Department Engineer, 1 July 1941, subject: "Allotment of Engineer Service, Army Funds, Fiscal Year 1942," advised that only \$5,000 was being allotted. It further stated "It is believed the amount of \$50,000 requested for this purpose is greatly excessive. Field fortifications or camouflage to this extent goes beyond the training stage and reaches the status of a construction project. It is suggested that such requirements for the defenses of Hawaii be obtained from construction funds, which should be estimated and appropriated for this purpose."

[3] 2. The field fortification and camouflage works that will be required to insure the adequate defense of this island are of such magnitude that their accomplishment after the outbreak of hostilities is entirely out of the question. All installations located on Government owned or leased land should be constructed at the present time eliminating those tasks from the work that cannot be done until after complete mobilization when it will be possible to enter on and organize private land.

3. The program for immediate construction contemplates semi-permanent emplacements for all coast artillery weapons in the present defense project. These weapons are sited in their most advantageous positions covering all approaches to the island and fixed Naval installations and their movement is not contemplated under any change of situation. Protection for infantry units is based on lightly held beach positions with a strong and highly mobile reserve in accordance with latest tactical principles. Dispersed and camouflaged Bunker protection must be provided for aircraft and airfield installations must be protected by machine gun emplacements and fencing.

4. The peculiar topographic and geologic conditions and the nature of the vegetation of the Hawaiian Islands require a greater expenditure of materials for field fortification than would normally be anticipated. In their maneuvers and field training, troops have constructed many field fortification works. Salvage and local materials have been used to the utmost and many methods have been improvised to take into consideration the coral and lava rock, sand, and peculiar volcanic soil of the islands. This effort has been largely wasted because

of the rapid deterioration of the local materials used. Sand bags and local timbers have a maximum life of about six months in this locality.

5. The War Department has repeatedly directed this Headquarters to construct certain works by Field Fortification methods but neither materials nor funds have been supplied. This letter presents a new computation of all material requirements for field fortification works and camouflage which should be constructed at once. This tabulation does not include those materials which must be used to complete the field fortification works after the outbreak of hostilities. These requirements may be divided into three groups as follows:

a. *The Air Corps requirements.* The airfields in the Hawaiian Islands are limited in number and there are very few places aside from regular airfields where enemy planes might land. Consequently, it is expected that determined efforts would be made to capture existing airfields. To prevent this, protected machine gun positions must be placed to guard the sensitive points on each airfield, and [4] mobile forces provided for counter-attacks on enemy air-borne or sea-borne troops who are attempting a landing or who have landed. Airplanes on the ground must also be hidden and dispersed, to prevent their loss in surprise air attacks, hence camouflage is needed to conceal them. For this purpose, the local vegetation must be augmented by additional planting. In case an airfield on the outlying islands must be abandoned, its runways and other essential features should be destroyed, hence demolition chambers should be installed in advance. These matters cannot be deferred because of the time required for vegetation to grow and the time required to install protection and demolition works.

b. *Coast Artillery requirements.* The Coast Artillery includes permanent fixed defenses, mobile guns in positions prepared in time of peace, and antiaircraft guns protecting fixed Naval or military installations. The Coast Artillery cannot maneuver; the mobile elements, including antiaircraft, are held in fixed positions to defend fixed installations or to cover intervals in the permanent defenses, and the best positions have been prepared. Since these positions are known to the general public, the enemy also knows them. The operating personnel must have shelters to protect them and their ammunition during air attack, and the positions must be camouflaged to prevent accurate aim by enemy bombers. Coast Artillery troops must be constantly on the alert during active operations, and can then spare no men for fortification work after hostilities have begun.

c. *Infantry requirements.* The Infantry divisions will occupy beach positions, very lightly held, and will have highly mobile motorized reserves. The beach positions have additional weapons, beyond table of organization allowances. Emplacements, trench shelters, observation and command posts for the beach positions must be ready when the enemy appears offshore, and field works should be used to develop the maximum efficiency of automatic and heavy weapons and release as many men as possible to the reserve. There will be neither time nor men available to construct beach positions after the enemy arrives; fields of fire must be cleared, barbed wire, road blocks, anti-tank mines, and other obstacles must be installed at that time because these defenses will be placed on private property or will unduly interfere with civilian enterprise if set up in advance.

6. Inclosed are tabulations showing the material requirements of the Air Force, the Coast Artillery Command and the two Infantry divisions.

[5] 7. It is recommended that an allotment of \$1,455,542 be made immediately available for the purchase of fortification and camouflage materials so that the work can be initiated and carried along concurrently with normal training activities.

8. The only alternative for having these positions prepared in advance is to have a large increase in the garrison authorized for the defense of the islands.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

In reply refer to:

Engr. 000.91

Subject: Request for Funds for Camouflage of Wheeler Field.

To: The Adjutant General, Washington, D. C.

1. There is definite need for camouflage treatment of Air Fields in the Hawaiian Department. Up to this time no camouflage treatment has been undertaken at any air field in this department.

2. Attached is a plan for camouflage of Wheeler Field prepared by the 804th Engineer Company Aviation (Separate). The plan includes photographs of the type of camouflage to be applied to the bunkers, together with itemized estimates of costs and recommendations.

3. In reporting on this proposed plan, Major J. F. Ohmer, Jr., Corps of Engineers, Camouflage Officer, has commented as follows:

The place for camouflage of Wheeler Field as prepared by the 804th Engineer Company Aviation (separate) is a good treatment for the field and the bunkers. The plan generally calls for 'blending' the buildings of Wheeler Field into the Schofield Barracks building area and endeavoring to restore the air field proper to the original condition as shown by the present earth scars, such as the old Kamehameha Road, the gully through the field and the pineapple fields, roads and irrigation ditches."

"The plan is practicable and can be readily accomplished by the 804th Engineer Company Aviation."

"The Commanding General, Wheeler Field, has approved the plan and urged that the work be expedited."

"While the air photographs of the two planes in the camouflaged bunkers show the wing tips and the harsh straight shadows of the deciding line between the upper and lower nets, this can be blended by additional garnishing and small nets tying the lower nets under the upper terrace. This work is now being completed."

"It is recommended that the camouflage plans for Wheeler Field be approved."

[2] 4. It is recommended that an allotment of funds be made to this office in the amount of \$56,210.00 for the purpose of camouflaging bunkers, landing field, hangars, and warning apron at Wheeler Field, the work to be done by the 804th Engineer Company Aviation (Separate). An itemized estimate is incorporated as a part of the plan substantiating the amount requested.

600.1 (Wheeler Fld) 71

2nd Ind.

6-C

WAR DEPARTMENT,

OFFICE, CHIEF OF ENGINEERS,

Washington, D. C., September 18, 1941.

To: The Chief, Army Air Forces, Washington, D. C.

1. The proposed plan for the camouflage of Wheeler Field, Hawaii has received careful consideration by The Engineer Board. As camouflage is essentially a local problem long range criticism may be entirely in error. Consequently, the following comments are offered only to supplement and should not invalidate decisions made on the spot by officers with intimate knowledge of local conditions.

2. Specific comments on Part I:

a. *Bunkers*.—The bunkers do not appear in the best arrangement to give maximum protection and to afford natural concealment. Their regular curving alignment throws a great burden on the artificial camouflage measures. The outer berm of the bunkers should be more irregular at the toe of the slope and should not be permitted to appear as a series of parallel lines as seen in photograph (V-112.101). Portions of the light colored pattern which show on the photograph could be continued over the revetment by sand or the native soil and over the net by weaving in appropriately colored garnishing. Extensive planting in native patterns will assist in this blending, and it is suggested that vines could be planted in the bunker tops and trained to grow into the nets to aid in defeating disclosure by means of infra-red photography. If additional dispersal pens are constructed, they should be spaced further apart, be more irregularly arranged, and the outer surface of the earth walls should be more irregular, especially at the toe of the slope.

b. *Landing Field*.—The division of the field boldly into three sections by natural boundaries as described is excellent, and, if carried out as indicated, should be very successful. The following detail criticisms may aid in the execution, but are not arbitrary. The field roads might be made a little more conspicuous by sprinkling a light colored earth, gravel or lava on the stripped surface as noted by contrast in the field roads in lower left corner of photograph (V-109-916-N-18). The same technique may be useful in the reproduction of the old Kamohameha road. If the fertilizer method does not produce dark enough contrasts it may be necessary to use black emulsified asphalts or a mixture of iron sulphate and tannin. The dark areas of the reproduced gully should not be used for taxiing and warming up any more than absolutely necessary, as this will destroy the desired effect.

[5] c. *Hangar Line*.

(1) The effort to make the buildings of Wheeler Field appear as a more homogeneous portion of Schofield Barracks might be more effective if more roads, dummy or real, were built between the two areas.

(2) The athletic track is a dangerous subterfuge, because of its characteristic outline and east-west orientation, and is not generally recommended as it becomes a reference point when detected.

(3) The painting of buildings on the aprons appears satisfactory; maintenance will be required and should not be neglected.

(4) The hangar painting presents a fine appearance. More disruption might be achieved by a larger and bolder plan of painting. The roads which terminate at hangars might be carried over the building successfully and the buildings painted

2536 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

on the roof tops might be connected with painted walks and service roads to help create the illusion of a reduced scale of construction. The general trace of the shadows of buildings should be studied and wherever possible, there should be painted, or preferably planted, trees and shrubs to break up their characteristic outline. Planting, which may appear relatively ineffective in vertical views, may help materially against the bombers' approach.

(5) Inasmuch as the concrete hangar line apron is of brighter material and more reflective than other roadways in the area, it should be generally toned down with a thin solution of tar or asphalt in kerosene, in addition to the other treatment suggested.

3. Specific comments on Part II.

a. It is suggested an asphalt emulsion for roofs would be cheaper and more suitable. In general, the type of paint should be selected with regard to the material to be coated, instead of the classification by roofs, walls, etc. Under "Concrete" it is assumed that aprons are included. The American Betumuls Company, which maintains a branch in Hawaii, should be able to furnish asphalt emulsion paints and adhesives more advantageously than Rejuvo. The matter of granules to cover surfaces should be investigated carefully to see whether local materials of indigenous colors or of a nature which will absorb bituminous colors, such as lava, are not more easily procurable.

[6] 4. It is recommended that:

a. That the plan of camouflage be approved.
b. That the camouflage office, Hawaiian Department, or the Commanding Officer of the 804th Engineer Battalion (Avn.) (Sep.) be granted permission to communicate directly with the Engineer Board on matters of materials and technical details to expedite the work.

c. That the Engineer Board be furnished a report to be made upon completion of the work, including photographs of intermediate the final stages. It is suggested that oblique photographs be furnished as well as vertical. The oblique photographs should be taken at 10,000 feet and three to four miles from Wheeler Field from four directions.

d. That the amount of \$56,210.00 be allotted to the Department Commander, Hawaiian Department, for the purpose of camouflaging bunkers, landing field, hangars and warming aprons at Wheeler Field, the work to be done by the 804th Engineer Company.

For the Acting Chief of Engineers:

[s] HOMER SAINT-GAUDENS,
Lt. Col., Corps of Engineer,
Acting Chief, Operations and Training Section.

[SECRET]

Engr. 000.91

27 FEB 1941.

Subject: Camouflage of Defense Installations.
To: The Adjutant General, Washington, D. C.

1. Investigations conducted by this headquarters have demonstrated that effective measures can and should be taken to reduce the visibility of exposed defense installations to hostile aerial observation. Admittedly these installations cannot be concealed to such an extent that they will be invisible on aerial photographs; at the same time, however, any camouflage which will render visual observation more difficult and will decrease the effectiveness of enemy bombardment is of the utmost importance.

2. Time has not permitted the submission of a comprehensive program for the camouflage of all defense installations in this department which require some degree of concealment; this matter is undergoing continuous study. Fixed sea-coast batteries have received first attention and plans of procedure and cost estimates have been prepared. The following table shows the various installations on which camouflage work should be undertaken immediately with the tentative costs:

Installation	Armament	Inclsure No.	Cost
Ft. DERUSSY:			
Battery Randolph	2-14" (Disappearing)	Incl. No. 1	\$6,000.00
Battery Dudley	2-6" (Disappearing)	Incl. No. 1	
Ft. KAMEHAMEHA:			
Battery Closson	2-12" (Barbette)	Incl. No. 2	6,000.00
Battery Selfridge	2-12" (Disappearing)	Incl. No. 3	5,000.00
Battery Jackson	2-6" (Disappearing)	Incl. No. 3	1,500.00
Ft. RUGER:			
Battery Adams	2-8" (Barbette)	Incl. No. 4	2,000.00
Ft. BARRETTE:			
Battery Hatch	2-16" (Barbette)	Incl. No. 5	8,500.00
Total cost			\$29,000.00

The measures contemplated include construction of various types of overhead cover, dummy positions, extension of roads, painting and the transplantation of trees and shrubbery.

3. Experience in the present World War has shown the very considerable success of the Germans in concealing by camouflage, their long range guns on the channel coasts. The several millions of dollars invested in the installations enumerated in paragraph 2 above and their general value in the defense of this island justify expenditure which will render them less vulnerable to enemy attack. It is therefore recommended that the sum of \$29,000.00 be allotted this department as soon as practicable to permit initiation of this camouflage work.

WALTER C. SHORT,
Lieutenant General, Commanding.

2nd Ind.

6-E

OFFICE, C. of E., May 28, 1941.

To: The Adjutant General, THROUGH THE CHIEF OF COAST ARTILLERY.

1. This paper was held in this office to permit direct inspection of the installations by a representative of this office who visited Hawaii on this and other

2538 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

fortification matters. Reference is made to Hawaii on this and other fortification matters. Reference is made to memorandum of March 22, 1941, to The Adjutant General, in this connection.

2. The importance of protective concealment for existing seacoast batteries is recognized by this office and a directive bulletin is now being prepared for issue to the field showing methods of such concealment for different type batteries.

3. The estimate submitted is considered an absolute minimum that will be required even omitting from consideration at this time Batteries Hatch and Closson which are to be casemated and more funds will probably be required at a later date. It is recommended that the project be approved and funds be made available at the earliest practicable date.

For the Chief of Engineers:

GEORGE MAYO,

WAR DEPARTMENT, OFFICE, CHIEF OF COAST ARTILLERY,
June 12, 1941.

To: The Adjutant General.

1. The need for camouflaging the seacoast Batteries listed in paragraph 2 of the basic letter is evident from inspection of the inclosures, Nos. 1 to 5, inclusive. The program as outlined in paragraph 2 of the basic letter, is concurred in, subject to the proviso that the protective concealment of Batteries Hatch and Closson will be coordinated, both in time and character, with the casemating of these batteries.

2. No Seacoast Defense funds are available, at this time, for application to camouflage projects and none are included in current estimates.

3. It is recommended that the camouflage project, described in paragraph 2 of the basic letter, be approved for inclusion in the Hawaiian Department Defense Project.

For the Chief of Coast Artillery:

JOE D. MOSS,
*Major, C. A. C.,
Acting Executive.*

[1] [SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 19 February, 1941.

Engr. 611

Subject: Military Roads and Trails Program, Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, Engr. 611, this headquarters, 8 November 1940, covering the recommendations for the revision of the military Roads and Trails Program. As indicated in paragraphs 5 and 8 of that letter, the revised program was not complete and additional roads and trails were under consideration.

2. A detailed study made by this headquarters indicates that the following additional improvements are necessary:

a. Wiliwilinui road and trail improvement, estimated cost \$33,550.00. Construction covering improvement of the existing 15,000 lineal feet of road at Wiliwilinui Ridge, eliminating sharp curves and providing adequate turnouts. It also covers construction of a 6-foot pack trail extending from the end of the existing road to the main crest of Koolaupoko Ridge area.

b. Improvement of Pupukea-Kahuku trail estimated at \$12,720.00. This project consists of the general widening of the existing trail from 3 to 6 feet along its 13,000-foot alignment. This improvement will provide desirable communication between the northeasterly section of the Island and northern end of Wahiawa-Pupukea trail.

c. Coincidental with the improvement of the Koolau Ridge trail, feeder trails to the ridge should be developed and improved. As a part of its reforestation program, the CCC has constructed several trails from forest reserve boundaries to the main ridge of the Koolaua along the lateral ridges. These trails, shown in the following list, should be partially relocated and improved as 6-foot pack trails:

(1) Poamono trail, 22,800 feet, estimated cost.....	\$35, 100. 00
(2) Kawaihoa trail, 24,000 feet.....	22, 750. 00
(3) Schofield-Waikane, 33,000 feet.....	45, 750. 00
(4) Waiawa trail, 30,000 feet.....	28, 650. 00

2540 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

d. A road to Fuu Palailai. This project ———(copy illegible)——— of a 10' class "B" supply road extending from the main government road to Fuu Falai-lai. This road is desired to improve access to a group of fire control stations manned by a detail of from 50 to 100 men. The approximate length of this road is 8,700 feet and estimated cost \$10,000.00.

e. Iunia-Palehua road. This project will connect an existing plantation road with the Palehua spur via the Mauna Kapu and the Honouliuli trails. The need for an alternate route to the Manauhua Defense Area is extremely important, particularly in view of the exposed condition of the Palehua road to hostile observation. This project calls for the construction of 24,000 lineal feet of a 10-foot class "B" road at an estimated cost of \$136,500.00.

f. Radial Ridge roads, Manauhua area. This project calls for the construction of three roads along the ridges, south and west of Fuu Nanauhua as shown on the attached map. These roads serve vital defense areas which must be made accessible to truck transportation. The total length of these ten-foot roads is approximately 20,000 feet and the estimated cost of construction is \$84,900.00.

3. These additional roads and trails have been combined with the 19 items listed in paragraph 7 of letter, this headquarters, file Engr. 611, 8 November 1940, and are shown in the table below in order of their relative priority. The location of each item is shown on the map, scale 1/125,000, Inclosure No. 1 hereto.

1. Fort Weaver 155-mm position Road, 10' Class B	\$8,900
2. Fort Roger Roads, 10' Class B	4,000
3. Barbors Point East 3L Pos. Trail, 3L Trail	1,000
4. Mail Marker 3L Position Trail, 3L Trail	8,000
5. Maililili 3L Position Trail, 3L Trail	1,400
6. Eaena Point 3L Position Trail, 3L Trail	1,000
7. Walloa Point 3L Position Trail, 3L Trail	1,000
8. Completion of Barbors Point Road Net, Class A	133,000
9. North Shore RR Connection, R. R	250,000
10. Improvement Wakiua Pupukea Road, 10' Class A & B	216,000
11. Waimoa-Pupukea Road, 10' Class B	35,000
12. Alternate R.R. Schofield-Wahiuan Bypass, R. R.	70,000
13. Connection-Lellohua Spur to Oahu Sugar Co. tracks (rail only) R. R	48,600
14. Ordnance Magazine Area, Schofield 25' Class A	33,000
15. Feeder Roads Wahiua Pupukea Road, Improvement	111,800
16. Eahuku 155-mm Position Road, 10' Class B	9,500
17. Rahuku CP Trail, CP Trail	2,100
18. Kepuhi CP Trail, CP Trail	8,000
19. Koolau Ridge Trail, 6' Pack Trail	20,000
20. Willwillimoa Road, Improvement	17,900
21. Willwillimi Trail, 6' Pack Trail	15,650
22. Poamoho Trail, 6' Pack Trail	35,100
23. Pupukoa-Mahuhu Trail, 6' Pack Trail	12,720
24. Hawaiian Trail, 6' Pack Trail	22,750
25. Schofield-Wahiwan Trail, 6' Pack Trail	45,750
26. Waiwan Trail, 6' Pack Trail	28,650
27. Pau Palailai CP Road, 10' Class B	10,000
28. Eunia-Palehua Road, 10' Class B	135,500
29. Ridge Roads, Mamamam Area, 10' Class B	34,900
	1,370,020

4. It is recommended that the roads and trails program shown in the table above be approved in lieu of the present program approved in 4th Indorsement (AG 611 Hawaii) (3-31-38) (Misc.) (X) dated 23 May 1939, on War Department letter (AG 611 Hawaii (3-28-38)) (Misc. WPD) dated 31 March 1938, subject: "Military Priority Highways in the Hawaiian Department". It is further recommended that the sum of \$1,370,020.00 be allotted to this department as soon as possible to permit early completion of this program.

WALTER C. SHORT,

To: The Chief of Coast Artillery.

1. Items 1 to 19, inclusive, in this program were approved for inclusion in the Hawaiian Defense Project in 3rd Indorsement dated February 18, 1941, AG 611 Hawaiian Department (11-8-40)M-WPD; OCGA 611/45 A 7; C. of E. 611 (Hawaii) 10. It was further directed that the Commanding General confer with Mr. Moskowitz, the representative of the Commissioner of Public Roads in Hawaii, with a view to securing the maximum aid permissible from the Public Roads Administration for the accomplishment of the construction authorized Federal Highway Act of 1940. It was also directed that a revised estimate be submitted covering Items 9, 12 and 13. The above action was not available to the Commanding General at the time of preparation of basic paper.

2. Items 20 to 29, inclusive, are new items of work. The estimated cost appears reasonable, and their inclusion in the program is recommended.

3. Attention is invited to letter from the Commanding General Hawaiian Department dated February 19, 1941, subject: "Construction of North Shore Railroad Connection" file Engr. 611; AG 112.05 (2-19-41)M; C. of E. 611 (Hawaii) 11 in which it was recommended that funds in the amount of \$230,000 be allotted as soon as possible to initiate construction. The item referred to is included in this paper as item 9.

b. AG 660 (4-19-41) M; Expenditure Program, Seacoast Defense Fund, Fiscal Year 1942.

c. Eng. 121.2 (Forts); Maintenance and Repair of Fortifications, Estimate of Funds for Fiscal Year 1943, (cited in Paragraph 3, 3rd Indorsement above).

2. a. Road, trail and railroad program submitted in reference a was approved by War Department 3rd Indorsement, February 18, 1941, subject to the following:

(1) That Mr. Moskowitz be contacted to secure a maximum of the unobligated portion of \$446,000.00, previously allotted the PRA for Hawaii, for the construction of the road and trail items in the approved program.

(2) That revised estimates be submitted for the railroad items in the approved program.

b. 4th Indorsement, this headquarters, April 4, 1941, submitted the following:

(1) Recommendation that \$446,000.00 available to the PRA be not diverted from the purpose for which originally allotted, namely, construction of the Wahiamoa cut-off and the Kolokolo-Waiamoa Road.

(2) Revised estimates for the railroad items and reduced estimates for the road and trails portions of the program by the \$70,400.00 made available on December 7, 1940.

(3) Cross-referenced the originally approved program, items 1-19 inclusive, with the additional items, 20-29 inclusive, approved herein and submitted revised estimates in the amount of \$951,020.00 for the road and trail items and \$298,000.00 for the railroad items. The total cost, \$1,249,620.00 supersedes estimate of \$1,370,020.00 reported in basic letter herewith.

[8] 3. Reference b informed this headquarters that regular estimates for Seacoast Defense funds, FY 1942 include \$300,000.00 for the construction of the railroad items and \$50,000.00 for road and trail items. Release of these funds will cover the construction of the railroads (\$298,600.00) and will reduce the required funds for the completion of the roads and trails to \$901,020.00.

4. a. Reference c submitted estimates in the amount of \$286,000.00 for the upkeep of military roads and trails during FY 1943. These estimates were based upon the maintenance of these roads and trails already constructed in this department, since at the time of submission, the augmentation program did not have War Department approval. The great increase in FY 1943 estimates over those of previous years has been due primarily first, to the necessity of procuring new plant and equipment as replacements for outworn units and second, to the necessity supplanting WPA employees with hired labor as a result of the increasing non-availability of the former.

b. The breakdown of the \$286,000.00 estimate showed the proportional amounts of the total which would be expended on existing roads and trails. In view of the approval by 4th Indorsement of the revised road, railroad, and trail program, which contains funds for the improvement of certain existing roads, the original breakdown of FY 1943 maintenance estimates is no longer applicable. Specifically, maintenance funds for the Wahiana-Purukea Road and Barbers Point Road net can be reduced considerably; at the same time, however, the construction of new roads and trails during FY 1943 and ensuing years. Attached as inclosure No. 1 is a revised tabulation of maintenance funds required during FY 1943 for all existing roads and trails and those to be constructed under the approved program. This breakdown shows specifically the purposes for which these funds will be expended. Revised estimates decrease the funds originally requested by \$34,000.00.

c. 1st Indorsement, January 16, 1941, which forwarded the estimates cited in paragraph 5a, recommended immediate release of \$100,000.00 of the \$286,000.00. This \$100,000.00 is necessary for the purchase of materials and additional plant and the hiring of labor for the maintenance of long neglected existing roads and trails, funds for the improvement of which have not been included in the approved augmentation program.

[9] 5. As explained in the foregoing paragraphs, there is no duplication in the funds still required for the construction of the approved augmentation program, \$1,249,620.00 or \$901,020.00 if the \$350,000.00 in FY 1942 estimates is made available and the funds, totaling \$252,000.00, required for maintenance: the \$1,249,620.00 construction estimate includes no funds for maintenance and the \$252,000.00 maintenance estimate includes no funds for new construction.

6. It is recommended:

a. That in accordance with the revised estimates cited in paragraphs 3b (3) and 4, above, funds in the amount of \$901,020.00 for the completion of the approved road, trail and railroad program be included in FY 1942 estimates to supplement the \$350,000 expected to be released.

2544 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(b) That the revised estimates in the amount of \$252,000.00 be substituted for the \$236,000.00 now included in FY 1943 estimates for the maintenance and repair of military roads and trails and that \$100,000.00 of this amount be released to this department during FY 1942.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

7th Ind.

3.

WAR DEPARTMENT,
Office, Chief of Coast Artillery,
June 12, 1941.

To: Chief of Engineers.

1. The records of this office indicate that the necessary action has been taken with a view to accomplishing the recommendations appearing in paragraph 6 a of 5th Indorsement, assuming that that portion of the recommendation reading "FY 1942" was intended to read "Fy 1943"

2. With respect to the recommendation appearing in paragraph 6 b of 5th indorsement, preliminary estimates for FY 1943 do not now include a specific item for maintenance and repair of military roads and trails. The total sum now appearing in the preliminary estimates FY 1943 under Project 11—Alteration, maintenance and repair of fortifications—is \$225,000. Fy 1942 estimates for Project 11 total \$173,710. The portion of these funds to be applied to maintenance of roads and to strictly fortification works appears to be discretionary with the Commanding General, Hawaiian Department. However, the basis for estimating these funds for FY 1941 included specifically \$59,000 as applicable to road maintenance.

For the Chief of Coast Artillery:

LEONARD L. DAVIS,
Lt. Col., C. A. C.,
Assistant.

WAR DEPARTMENT, A. G. O., July 18, 1941.
To: Commanding General, Hawaiian Department.

1. Funds in the amount of \$300,000 for railroads and \$50,000 for roads and trails are now available from FY 1942 appropriations for construction contained in the approved Road, Trail, and Railroad Program. These funds will soon be released to the District Engineer. Additional funds in the amount of \$900,000 have been included in tentative estimates, FY 1943 for the completion of the approved Road and Trail Program. This latter amount will be requested at an earlier time in the event that further supplemental FY 1942 estimates are prepared.

2. General maintenance funds to the amount of \$173,710 are now available from FY 1942 appropriations and a substantial amount thereof has been released to the District Engineer, Honolulu. The portion of these funds to be applied to the maintenance of roads is discretionary with you. Additional general maintenance funds to the amount of \$223,000 have been included in preliminary estimates, FY 1943.

3. An additional amount of \$140,000 will be included at the first opportunity in estimates to be submitted to provide further funds for maintenance of roads and trails in your department.

[EXTRACT]

Subject: Construction at Bellows Field, T. H.
To: The Adjutant General, Washington, D. C.

1. Reference is made to 1st Indoresment, The Adjutant General's office, file AC 370.5 (2-15-41) M-D, dated 5 March 1941 which authorized the permanent assignment of the 86th Observation Squadron and the 58th Bombardment Squadron at Bellows Field.

* * * * *

5. The improvement of the runways consist in lengthening the present runway from about 2800' to 3400' and widening from 150' to 300'. The new runway is 5000' long and 300' wide. Cross-connection the existing and the new runway is a paved taxi strip and parking strip 300' wide and 2200' long with a servicing mat 300' x 600' adjacent to the taxi strip. All runways, servicing mats and taxi strips will be asphaltic concrete. Other installations required are an airdrome control tower and an aqua-gasoling system of 600,000 gallon capacity. The necessary tanks for this gasoline system are on hand. A complete system of airport lighting and sewer, water, and power utilities will be necessary. Miscellaneous installa-

2546 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

tions include man-proof fences around vital installations, improvement of the drainage of the camp area, pistol and 1000' machine gun ranges, and roads and sidewalks.

* * * * *

7. The improvements recommended are all necessary. Funds for improving the runways in particular should be expedited. The District Engineer has informed me that it is possible at this time to secure on the mainland the necessary plant and equipment for this paving but that unless contracted for in the very near future, it will not be much longer available.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 2 May 1941.

Engr. 600.12

Subject: Construction at Barking Sands Field, Kauai, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's Office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Barking Sands Field on Kauai be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 6 officers and 107 men, and 1 National Guard company to provide local security of 4 officers and 116 men, total 10 officers and 223 men. In addition to this permanent garrison, two heavy bombardment squadrons of 37 officers and 206 men each from Hickam Field will be sent to Barking Sands for training. While these bombardment squadrons will change, two will be temporarily stationed at all times at this field. The total garrison at Barking Sands including temporary and permanent troops will be 84 officers and 635 men.

3. Some buildings have been and are being erected at this field by the WPA. Additional buildings will be necessary and the WPA Administrator has informed me that neither his material funds nor his available labor will be sufficient to complete the required program. There is inclosed as Inclosure No. 1 a tabulation showing the buildings, built and building by the WPA and the additional buildings required which include administration buildings, shops, warehouses, recreation buildings, mess halls, officers' quarters and other structures. Complete utility system should be provided for this camp. All buildings to be mobilization type.

4. Other construction recommended consists in improvement of flying conditions by the grading of two runways 5000' by 500' and the paving of a 200' strip on each runway for a length of 5000', the construction of a servicing mat and the installation of a complete airport lighting system. Storage for 450,000 gallons of gasoline will soon be installed by the District Engineer with funds now available to him; in this storage nine of the eighty [2] 50,000-gallon tanks now on hand will be utilized. These tanks are now designed for the aqua system; at this time, however, the tanks are being installed for storage only and if at a later date the necessity develops, this storage system can be readily converted into the aqua system. Also included in the cost estimates are miscellaneous items such as an airdrome control tower, pistol and 1000'' ranges and man-proof fencing around vital installations. Roads within the camp area have also been included in the cost estimates; an improvement to the access road to this military reservation from the nearest point on the Kauai belt road has been the subject of discussion with the local public roads administration under the provision of Section 18 of the Federal Highway Act of 1940. Surveys of this road are now being made by the Territorial Highway Department; these surveys have not been completed. The local Public Roads Administration officials, based on a reconnaissance, estimate that this access road will cost about \$150,000. As it is doubtful whether either territorial or Federal Highway funds will be available for construction on this amount has also been included in the estimates. Telephone costs have been estimated at 2½% of building costs as directed in Chief Signal officer's radio of 11 March 1941. In determining the building costs a constructive evaluation of the work already done by the WPA based upon costs of the new buildings recommended in this letter was used to arrive at the total costs.

5. There are inclosed as Inclosures Nos. 2 and 3, a layout drawing of this field and a tabulation of cost estimates of the buildings and other improvements required. These cost estimates were prepared by the District Engineer, Honolulu, and include not only direct but also the indirect costs of the job. The total required to complete the installation is \$1,772,220.

6. It is recommended that the improvement of Barking Sands be authorized and that funds in amount of \$1,772,220.00 be released to the District Engineer, Honolulu, to initiate this construction.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

Engr. 600.12

Subject: Construction at Hilo Airport.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Hilo airport be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 4 officers and 50 men, and 2 National Guard companies to provide local security of 4 officers and 116 men each, total 12 officers and 382 men. In addition to this permanent garrison, one heavy bombardment squadron of 37 officers and 206 men from Hickam Field will be sent to this field for training. While this squadron will change, at least one will be temporarily stationed at this field a large part of the time. The total garrison at Hilo therefore will be 49 officers and 588 men.

3. Some buildings are now being erected at this field by the WPA. Additional buildings are needed and the WPA Administrator has informed me that neither his material funds nor his available labor will be sufficient to complete the required program. The buildings now being built and the additional ones required are tabulated in the cost estimates. A complete utility system is recommended. Buildings will be mobilization type.

4. The runways at the Hilo airport will be improved through a CAA contract under supervision of the District Engineer, Honolulu. Additional improvements needed are the installation of storage for 450,000 gallons of gasoline; for this 9 of the 80 50,000-gallon tanks now on hand will be utilized. These tanks were designed for the aqua system, but simple storage only is recommended at this time. If the need later develops, this storage can readily be converted to the aqua system as all fittings will be available on the tanks.

[2] 5. There are inclosed as Inclosure No. 1 a tabulation of cost estimates and as Inclosure No. 2 a layout map of the field. In addition to the items already mentioned, these estimates include miscellaneous items such as roads, airdrome control tower, pistol and 1000 inch ranges and telephone installations. These telephone costs have been estimated at 2½ per cent of the building costs as directed in Chief Signal Officer's radio of 11 March 1941. In determining the total building costs a constructive evaluation of the work now being done by the WPA was combined with the estimated costs of construction recommended in this letter. The estimates in the tabulation were prepared by the District Engineer, Honolulu, and include indirect as well as direct costs of the job.

6. It is recommended that this construction on the present military reservation at the Hilo airport be authorized and that funds in the amount of \$670,140 be allotted to the District Engineer, Honolulu, to complete the installation.

Engr. 600.12

Via "Clipper" Air Mail

Subject: Construction at Morse Field, Hawaii

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating condition. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Morse Field on Hawaii be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 6 officers and 107 men, and 1 National Guard company to provide local security of 4 officers and 116 men, total 10 officers and 223 men. In addition to this permanent garrison, two heavy bombardment squadrons of 37 officers and 206 men each from Hickam Field will be sent to Morse Field for training. While these bombardment squadrons will change, two will be temporarily stationed a large part of the time at this field. The total garrison at Morse Field including temporary and permanent troops will be 84 officers and 635 men.

3. Some buildings have been built at this station by troop labor. Other buildings have been and are being built by the WPA. Additional buildings and improvements are necessary; I believe that the requirements of training preclude any extensive use of troop labor and the WPA Administrator has informed me that neither his material money nor his available labor will be sufficient to complete the required program. These additional buildings will all be of mobilization type construction for use as operations buildings, shops, administrative and supply buildings, barracks, mess halls, magazines, etc. A complete system of utilities should be provided.

4. Other construction recommended consists in improvement of flying facilities by the paving of a main runway 3400 feet long and 300 feet wide, and its extension by grading, leveling and light paving to a length of 4150 feet and width of 400 feet. Because of prevailing wind conditions, only one paved runway is considered necessary by the Commanding General, [2] Hawaiian Air Force. Necessary taxi mats, service mats and warming up aprons will be graded and paved. A complete airport lighting system will be installed. Gasoline storage for 450,000 gallons utilizing nine of the eighty 50,000-gallon tanks now on hand will be installed; because of the shortage of water at this field, this will be plain storage and not the aqua system. There is inclosed as Inclosure No. 1, a layout map of this field. It will be noted that considerable areas in the vicinity of the runway are shown for light paving. This is necessary; the soil at this field is very fine and with the prevailing high velocity wind there is a serious dust problem as this dust affects the engines of the planes. The shortage of water makes stabilization by sodding or vegetation impracticable, and the most practical way that this problem can be solved is to stabilize by light paving.

5. There is inclosed as Inclosure No. 2 a tabulation of cost estimates of the buildings and other improvements required. In addition to the items already mentioned, miscellaneous items such as roads, pistol and 1,000 inch ranges, an Airdrome Control tower, and telephone installations have been included. These telephone costs have been estimated at 2½ percent of building costs as directed in Chief Signal Officer's radio of 11 March 1941. In determining the building costs a constructive evaluation of the work already done by troop labor and the WPA based upon costs of the new buildings recommended in this letter was used to arrive at the total costs. The estimates in the tabulation were prepared by the District Engineer, Honolulu, and include the indirect as well as the direct costs of the job.

6. It is recommended that the improvement of Morse Field be authorized and that funds in the amount of \$1,687,530 be allotted to the District Engineer, Honolulu, to complete the installation.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

[CONFIDENTIAL]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Ft. Shafter, T. H.

Engr. 600.12

Subject: Improvement of Airfield at Haleiwa, Oahu, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. At present the Hawaiian Air Force has under lease an unimproved landing field located at Haleiwa, on the north shore of Oahu, about ten miles airline distance from Wheeler Field. There are no paved runways, and no installations other than boundary marking lights. No permanent detachment is quartered there. The field is used for practice landings, etc. by the pursuit aviation at Wheeler Field.

3. It is proposed that this field be improved by the grading and paving of one runway 4000' by 300' and by the installation of other facilities for flying operations. These will include an operations building and airdrome control tower and storage for 100,000 gallons of gasoline using two of the eighty 50,000 gallon tanks now on hand. This storage will utilize the aqua system. A small galvanized warehouse for oil storage will be provided.

4. The only garrison at this field will consist of a small permanent detachment to refuel and handle planes on the ground and to operate radio and control installations. For this detachment a combined barracks and mess hall will be provided.

5. It is recommended that the improvement of Haleiwa Airport be authorized as outlined above and that funds in the amount of \$450,000 be allotted to the District Engineer, Honolulu for this construction.

1 Incl: Cost Estimate

WALTER C. SHORT,

OFFICE, C. OF E., June 10, 1941.

To the Adjutant General.

1. Approval recommended.

2. It is assumed that the District Engineer at Honolulu collaborated with the Hawaiian Department Commander in preparation of the estimate inclosed with the basic communication. Further delay in verification of this estimate is not considered advisable inasmuch as the funds required can be rectified if necessary in the future.

3. Funds for this construction at Haleiwa, Oahu, T. H. are available in this office under the Miscellaneous Construction Reserve provided this construction is of a high priority, the urgency for which is not known in this office.

4. If authorized it is requested that the amount of \$450,000 be approved for allotment from funds reserved under the Miscellaneous Construction Reserve for construction of the buildings, gasoline storage and runways as specified in the inclosed estimate.

For the Chief of Engineers:

JOHN R. HARDIN,
Major, Corps of Engineers,
Chief, Construction Section.

In reply refer to:

Via "Clipper" Air Mail

Engr. 600.12

Subject: Construction at Burns Field, Kauai, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Burns Field be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 4 officers and 50 men, 1 National Guard company to provide local security of 4 officers and 116 men, total 8 officers and 166 enlisted men. In addition to this garrison, one heavy reconnaissance squadron of 43 officers and 233 men will be sent to this field for training. Either this squadron or a heavy bombardment squadron will be stationed at this field a large part of the time. The total garrison at the field will therefore consist of 51 officers and 399 men.

3. Some buildings have been erected at this field by soldier labor. Other buildings are necessary and soldier labor is not available for their construction. These buildings have been tabulated in the cost estimates, Inclosure No. 1. All buildings will be of mobilization type construction. The installation of a complete system of utilities is recommended.

4. The runways at Burns Field are authorized for improvement by a CAA project. Additional improvements needed are the installation of storage for 200,000 gallons of gasoline; for this four of the eighty 50,000-gallon tanks now on hand will be utilized. These tanks were designed for the aqua system, but simple storage only is recommended at this time. If the need later develops, this storage can be readily converted to the aqua system as all fittings will be available on the tanks.

[2] 5. There is inclosed as Inclosure No. 1 a tabulation of cost estimates. In addition to the items already mentioned, these estimates include miscellaneous items such as roads, airdrome control tower, pistol and 1000-inch range and telephone installations. These telephone costs have been estimated at 2 1/4% of the building costs as directed by the Chief Signal Officer's radio of 11 March 1941. The estimates include direct as well as indirect costs of the job.

6. It is recommended that this construction be authorized on the present military reservation at Burns Field and that funds in the amount of \$636,163.00 be allotted to the District Engineer, Honolulu, to complete the installation.

WALTER C. SHORT,

Lieutenant General, U. S. Army, Commanding.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,

Fort Shafter, T. H.

Via "Clipper" Air Mail

Engr. 600.12

Subject: Proposed Airfield on the Island of Lanai.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, the Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective."

2554 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. Included in the plan for dispersion of facilities is a proposed airport on the Island of Lanai. A location has been selected and preliminary negotiations for leasing have been made. The land is owned by the Hawaiian Pineapple Company which is willing to lease it to the government on a twenty-five (25) year lease in return for one dollar a year rental and the use of the flying field. The location of the field, barracks area, and a proposed bombing range are shown on map, scale 1/62,500 inclosed as Inclosure No. 1. Project letter for the bombing range has already been submitted by letter to The Adjutant General, subject: "Construction of Night Bombing Range, Island of Lanai" file Engr. 686 dated 16 May 1941.

3. It is proposed to improve this field by the grading and paving of two 5,000' runways 300' wide and by the installation of facilities for flying operations. These will include the necessary operations buildings and shops, airdrome control tower and storage for 200,000 gallons of gasoline using four of the eighty 50,000 gallon tanks now on hand. Although these tanks were designed for the aqua system, only simple storage is proposed, although all the necessary fittings for later conversion to the aqua system will be installed.

4. The rotating garrison at this field will consist of an air base detachment of 4 officers and 50 men and a National Guard company for local security of 4 officers and 116 men, total 8 officers and 166 men. In addition to this garrison, a pursuit squadron of 33 officers and 157 men will be temporarily stationed at this field for training. While this squadron will change at least one will be temporarily stationed at this field a large part of the time. The total garrison, therefore, will be 41 officers and 323 men.

5. There is attached as Inclosure No. 2 a tabulation showing in detail the buildings and other construction proposed with estimated costs. These costs include not only direct but also indirect costs of the job. The total cost shown on this tabulation is \$1,990,000.00.

6. The following is recommended:

a. That this headquarters be authorized to proceed with negotiations for the lease of this site.

b. That construction and improvements outlined in Inclosure No. 2 be authorized.

c. That funds in the amount of \$1,990,000.00 be allotted to the District Engineer, Honolulu, to complete this installation.

2556 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[1]

[CONFIDENTIAL]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 2 May 1941.

Via "Clipper" Air Mail
Engr. 600.12

Subject: Construction at Proposed Airport, Parker Ranch Area, Hawaii, T. H.
To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. There has been for some time a realization that an additional field was necessary on the Island of Hawaii, and extensive studies have been made on its location. The best location found was about four miles from the town of Waimea on land owned by the Territory of Hawaii, and at present under lease to private cattle interests. The site consists of about 1,360 acres, and it is believed that the land can be transferred to the Federal government under Section 91 of the Organic Act. Preliminary negotiations to this end have been opened with the Territory. The location of the field is shown on map, scale 1/62,500, inclosed as Inclosure No. 1.

3. It is proposed that this field be improved by the grading and paving of three 5000-foot runways and by the installation of facilities for flying operations. These will include the necessary operations buildings, and shops, airdrome control tower, and storage for 300,000 gallons of gasoline, using 6 of the eighty 50,000-gallon tanks now on hand. Although these tanks were designed for the aqua system, only simple storage is proposed, as the shortage of water will preclude use of the aqua system. There is inclosed as Inclosure No. 2 a print of Department Engineer Map No. 11-1-25D41 which shows the boundary of the land and the location of the three 5000-foot runways.

4. The rotating garrison at this field will consist of an air base detachment of 4 officers and 50 men and a National Guard company for local security of 4 officers and 116 men, total 8 officers and 166 men. In addition to this permanent garrison, a heavy bombardment squadron of 37 officers and [2] 206 men will be temporarily stationed at this field for training. While these squadrons will change at least one will be temporarily stationed at this field a large part of the time. The total garrison therefore will be 45 officers and 372 men.

5. There is attached as Inclosure No. 3 a tabulation showing in detail the buildings and other construction proposed with estimated costs. These costs include not only direct but also indirect costs of the job. The total cost shown on this tabulation is \$1,992,600.00.

6. The following is recommended:

a. That this headquarters be authorized to proceed with negotiations for the acquisition of this site.

b. That construction and improvements outlined in Inclosure No. 3 be authorized.

c. That funds in amount of \$1,992,600.00 be allotted to the District Engineer, Honolulu, to complete this installation.

OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., April 14, 1941.

In reply refer to:

Via "Clipper" Air Mail

Engr. 600.12

Subject: Additional Airdrome, Hawaiian Department

To: The Adjutant General, Washington, D. C.

1. The recent and anticipated increases in the Pursuit Wing of the Hawaiian Air Force have emphasized the need of an airdrome to supplement the existing facilities at Wheeler Field. The latter field is now badly overcrowded with the planes stationed there.
2. A very thorough study has been made of the location of this additional air field by the Commanding General, Hawaiian Air Force, Department Engineer and the District Engineer. At least five separate locations were given serious consideration; one of these in the Barbers Point area was discarded first because of its proximity to the beach and second, because of objections by the Navy to interference with the new carrier aviation base in the Ewa plane area. Another location at Kahuku was discarded because of its proximity to the beach. A third on the flat ground about three miles north of Wahiawa was discarded by the Hawaiian Air Force because of bad flying conditions from turbulent air conditions. A fourth location in the general area to the east of the crossing over Kipapa Gulch by the Kamehameha Highway was discarded for similar flying reasons. The area finally selected between the Kipapa and Waikakalua Gulches and west of the Kamehameha Highway is believed to be the best possible location of this airdrome on the island of Oahu. There is inclosed a map on the scale of 1/20,000 showing the location of this field.
3. The garrison to be stationed at this field will consist of the 15th Pursuit Group of 84 officers and 729 enlisted men, an air base group (single) 28 officers and 490 men, and miscellaneous detachments of 5 officers and 75 men. Total strength 117 officers and 1,294 men. Complete construction with mobilization type facilities must be provided for the housing of this garrison. The present construction authorized for Hickam, Wheeler and Bellows Fields is insufficient for the needs of those three stations and it will be impossible to transfer any of the existing authorization to this new field.
4. It is estimated that at least 75% or 88 of the officers will be married and of this number 10% or 9 will be senior officers. Since there are no locations in this vicinity where these officers can be placed upon commutation and live in private quarters and also because of the tremendous housing shortage on Oahu, it is believed that Government quarters should be provided for these married officers. Recognizing that this [2] field must be constructed under emergency appropriations, it is proposed that these quarters not be as elaborate as usually constructed on Army Posts. With the unit costs estimated, houses similar in construction to the average in Honolulu can be provided. In addition it is also estimated that there will be 135 married noncommissioned officers in this garrison. Adequate quarters will also be provided for these married enlisted men and it is recommended that the War Department secure from the Federal Building Administration authorization for the construction of 135 low cost housing units at this field.
5. The improvement for flying operations consists of the installation of three runways each 5,000 feet long with a graded width of 400 feet and a paved width of 200 feet; the paving of taxi strip 200' x 5,000' and a servicing apron 300' x 600'. A complete installation of airport lighting is proposed. Bunkers for the protection of airplanes against hostile bombardment will be installed as part of the airport and the cost of these bunkers and necessary approaches are included in the cost estimates. It is also proposed to install storage for 900,000 gallons of gasoline with the aqua system. In this storage 18 of the 80 50,000 gallon tanks now on hand will be utilized.
6. The housing proposed will be mobilization type construction. It will include barracks, mess halls, and recreation facilities for the men, buildings for flying operations such as an airdrome control tower, Air Corps technical schools, supply rooms, and housing for maintenance facilities. In addition mobilization type construction is proposed for the necessary post overhead, buildings such as a fire station, a guard house and an infirmary and warehouses for commissaries, etc. A complete system of utilities is covered in the estimates. In designing the water supply and sewage disposal systems provision has been made for the

2558 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

eventual expansion of the garrison to 4,000 men. This increase in capacity is proposed to take care of the possibility of assigning an anti aircraft regiment as part of this garrison. Shown on the map accompanying this letter are two areas shaded in blue. The area near the runway will be used for the construction of the service buildings incidental to flying operations. The 40 acre tract shown to the north of the runways will be utilized for construction of housing facilities for both officers, married noncoms, and enlisted men. The land where the runways and the adjacent blue area are located is now cultivated cane land. The area of the 40 acre tract is cultivated pineapple land; the cane land involved is about 250 acres minimum. If these sites are secured by lease it is estimated that the cane land will cost \$30.00 per acre per year and the pineapple land \$25.00 per acre per year, or a total annual rental of \$8,500. If this land is purchased the cane land will cost about \$1,000 and the pineapple land about \$500.00 per acre; a total cost of about \$270,000.

7. There is inclosed a tabulation showing the buildings which should be constructed with cost figures and cost estimates on runways and other flying facilities and on utility systems. These estimates show a total estimated cost of \$4,668,950 not including cost of land. As stated shows if the land is leased there will be a yearly rental of \$8,500. If the land is purchased the total cost is estimated at \$4,938,950.

[3] 8. It is recommended that the proposed location of this new field be approved and that funds in the amount of \$4,668,950 be allotted for construction if the War Department decides that securing the land on a lease basis is satisfactory. It is further recommended that if the War Department decides that this land should be purchased, additional funds in the amount of \$270,000 be made available.

[SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., April 14, 1941.

In reply refer to: Engr. 600.96

Subject: Protection of Seacoast Defense Batteries.

To: The Adjutant General, Washington, D. C.

1. Reference is made to your secret radiogram No. 708, 4 April 1941, which was on the subject of protection for the seacoast defense batteries in this department and which suggested a conference with Mr. J. C. Letts of the Office of the Chief of Engineers during his recent visit in this department.

2. This radiogram stated that a letter covering this construction was being forwarded by mail. This letter has not as yet been received in this department. In order to save time, however, we're submitting recommendations without waiting for the arrival of this letter as its subject matter was explained in general by Mr. Letts.

3. There are three batteries involved in this protection; these are the two 16-inch gun batteries, Battery Hatch at Fort Barrette and Battery Williston at Fort Weaver and a 12-inch barbette gun battery, Battery Closson at Fort Kamehameha. A study of this problem has been made jointly by the Commanding General, Hawaiian Separate Coast Artillery Brigade, the District Engineer and Mr. Letts. They recommend the casemating of Battery Hatch and Battery Closson and provision of a tunnel type shield for Battery Williston. There is inclosed a chart showing the fields of fire of these batteries after the protection is installed. From this chart it will be seen that Battery Hatch has a field of fire from azimuth 295 to azimuth 80; and Battery Williston, a 360° field of fire. The red shading on this chart indicates the area in which the fire of four 16-inch guns can be placed. The yellow shading shows the additional area which can be covered by the fire of two 16-inch guns at Fort Weaver. The existing range circle of Battery Hatch is shown by the red line and Battery Williston by the black line. The chart indicates that there is an area about 5,000 yards in range west of Oahu which is now covered by the fire of Battery Hatch and which is not covered by the fire of Battery Williston. On the east side of the island the area now covered by fire from Battery Hatch, which is sacrificed by the casemating is well in the field covered by Battery Williston. The only loss in coverage is in the 5,000 yards to the west of the island and in the fact that the general area is now covered by the fire of only two 16-inch guns while under present arrangement this area is in part covered by the fire of four 16-inch guns.

[2] 4. I do not believe that this loss in coverage is at all important when compared to the necessity of providing protection for Battery Hatch in particular, and therefore concur in the recommendations of the Commanding General, Hawaiian Separate Coast Artillery Brigade.

5. Your radio also referred to our letter, subject: "Bombproof Construction for Magazines at Fort Barrette and Fort Weaver," dated 4 February 1941. The recommendations contained in this letter are reiterated. Since the recommendation is made that Battery Williston should have tunnel type shield protection which does not provide any protection for ammunition, a bombproof magazine for at least one-half of the propelling charges should be provided at that battery. Also due to the exposed position of Battery Hatch and the impossibility of camouflaging the existing magazines, it is believed that a bombproof magazine for one-half of the propelling charges should be provided at that battery in addition to the bombproof storage for 50 complete rounds in each casemate.

6. Reference is now made to letter, this headquarters, subject: "Defense of Naval Air Station, Kaneche Bay, Oahu, T. H." dated 18 February 1941, file 381, in which the War Department was advised that this department was assuming responsibility for the defense of the Kaneche Bay Area. It is believed that the growing military and naval importance of Kaneche Bay area makes it essential that a major calibre seacoast battery be installed for its protection. The need for this battery is urgent and its installation should not wait upon the manufacture of the armament. It is understood that there are some 12-inch long range gun batteries similar to Battery Closson on the mainland where the need for them no longer exists and it is recommended that the armament of one of these batteries be shipped to this department and funds provided for its emplacement in the Kaneche Bay area.

7. The following is therefore recommended:

a. That protection be provided for Battery Hatch by the construction of casemates and overhead cover, at Battery Closson by the construction of overhead cover, and at Battery Williston by the installation of tunnel type shields.

b. That a bombproof magazine for one-half of the propelling charges be authorized for Battery Williston and a similar magazine be authorized for Battery Hatch in addition to the storage of 50 rounds in each of the casemates.

c. That the armament of a 12-inch gun battery similar to Battery [3] Closson to be obtained from a location on the mainland where it is no longer needed and shipped to this department and installed to cover the Kaneche Bay area.

AG 381/20

Kaneohe Bay Project.

Secret

Subject: Coast Artillery Armament for Naval Air Station, Kaneohe Bay.

To: The Adjutant General, Washington, D. C.

1. References:—

A Secret letter HHD to TAG, 14 April 1941, subject: "Protection of Seacoast Defense Batteries" file AG 662.1 (4-14-41) MC-E, HD Engr 600.96, with 4 indorsements.

B Secret letter TAG to HHD, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." file AG 381 (3-13-41) M-WPD, with 1st indorsement HHD to TAG dated 16 June 1941.

2. The attached study was prepared by the Commanding General, Hawaiian Separate Coast Artillery Brigade in accordance with the directive contained in the 4th indorsement to reference A. In considering this study, reference should be made to a similar study which was submitted as an enclosure to 1st indorsement, reference B.

3. The recommendations contained in paragraph 6 of the attached study of the seacoast and antiaircraft defenses required for the protection of the Kaneohe Bay Naval Base (Incl. #1) are approved with the following exceptions:

a. It is believed a large proportion of the 15 AA searchlights recommended in paragraph 6a. should be equipped with SCR 268 sets instead of the M2 sound locators. The severe limitations imposed by the terrain and normal atmospheric conditions present in this area make mandatory the early detection of hostile aerial targets.

b. In order that personnel may be available to establish a headquarters for the Harbor Defenses of Kaneohe Bay, it is believed that instead of augmenting the seacoast personnel, as recommended in paragraph 6d. (2) by one battalion (TD) and three separate batteries (HD), that the increase should consist of one Coast Artillery regiment (HD), type B, (T/O 4-71, Nov 1/40), less band and one battalion. This organization will provide the necessary command and staff and attached medical personnel to permit the proper tactical organization of the defenses. The 155mm battalion can take the place of the second battalion of the Harbor Defense Regiment.

[2] 4. It is recommended:

a. That the eventual project for defense of the Kaneohe Bay Naval Air Station and Bellows Field, based on the installation of fixed armament, be as follows:

(1) Armament:

(a) Seacoast:

2 155 mm Gun Batteries (latest type).

2 6" Fixed Gun Batteries (2 guns each).

1 16" Long Range Casemated Gun Battery of 2 guns on Barbette Carriages.

(b) Antiaircraft:

3 90 mm AA Gun Batteries.

3 37 mm AA Gun Batteries to consist of 10 guns each.

48 Caliber .50 AA Machine Guns.

15 AA searchlights together with a minimum of 6 SCR 268 sets and 9 M2 sound locators.

(2) Personnel:

(a) Seacoast Artillery:

1 Battalion Coast Artillery (TD), 155 mm guns, (T/O 4-35, Nov 1/40).

1 Regiment Coast Artillery (HD), type B, less band and one battalion, (T/O 4-71, Nov 1/40).

(b) Antiaircraft Artillery:

1 Regiment Coast Artillery (AA), semi-mobile, less one gun battalion, (T/O 4-111, Nov 1/40).

b. That initially based on armament now available in the Hawaiian Department, the defense be constituted as shown below. The seacoast armament and personnel to be used in this defense must be moved from previously assigned positions in other parts of the island, thereby weakening the defense in other areas.

(1) Considering only personnel now present and available:

- 1 155 mm Gun Battery.
- 1 155 mm Gun Battery with additional assignment of five antiaircraft searchlights.
- 1 8" Railway Gun Battery.
- 2 3" Antiaircraft Gun Batteries.
- 1 Seacoast Searchlight Battery.

(2) Assuming that personnel under paragraph 4 a (2) (a) above will be made available at an early date and using armament now available in War Reserve, the defense can be organized as shown below. Under this plan no movement of armament from present assigned positions is required:

- 2 155 mm Gun Batteries
- 1 155 mm Gun Battery with additional assignment of five antiaircraft searchlights.
- 1 8" Railway Gun Battery.
- 2 3" Antiaircraft Gun Batteries.
- 1 Seacoast Searchlight Battery.

[3] c. That the increase in personnel and in major items of armament recommended in paragraphs 6 a and b, reference B, insofar as they relate to the Coast Artillery be amended to conform to paragraph 4 a. above.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

1-Incl: Revised Study on Seacoast and Antiaircraft Artillery Defense of the Kaneohe Naval Air Station (Secret) in trip.

[SECRET]

[1] Subject: Coast Artillery Armament for Naval Air Station, Kaneohe Bay, Hawaiian Department.

AG 381 (7-31-41) MC-E

3rd Ind.

WAR DEPARTMENT, A. G. O., October 30, 1941.

To: Commanding General, Hawaiian Department.

1. Reference is made to:

a. Letter, this office, April 8, 1941, AG 381 (3-13-41) N-WPD, subject: Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H.

b. Radio No. 320, your headquarters, September 13, 1941.

c. Letter, your headquarters, September 18, 1941, Engr. 662/4 x 662/7, subject: Provision of three (3) Panama Mount 155-mm Battery Positions and one (1) 8-inch Railway Gun Battery Position for the defense of Kaneohe Bay, Oahu, T. H.

2. The following temporary measures for the defense of the Kaneohe Bay area are approved:

a. Movement of one battery of 8" railway guns now in storage at Fort Kamehameha to Mokapu Peninsula and temporary installation at site designated by you in reference c subject to local coordination of site with the Navy.

b. Installation of two batteries 155-mm guns on Panama mounts at sites to be selected by you.

3. Immediate personnel and armament requirements will be set:

a. By the transfer to the Hawaiian Department of the following units at their allotted strengths:

(1) One battalion, 57th Coast Artillery, TD, with battalion section, supply platoon T/O 4-32, and battalion section, medical detachment (T/O 4-31), attached, less guns and fire control equipment.

(2) 95th Coast Artillery (AA), Semimobile (less one gun battalion), with armament and equipment on hand. Authority is granted for the reorganization of the 37-mm gun battalion of this regiment into three [2] 37 mm gun batteries (8 guns each) and one (1) Caliber .50 MO battery (AA) (12 guns).

b. By the local activation of one 8" railway battery (R/O 4-47) from personnel available in the Hawaiian Department.

2562 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4. Guns and fire control equipment for the battalion of 155 mm guns and the 8'' railway battery will be furnished from defense reserves on hand in the Hawaiian Department. Shortages will be filled in accordance with approved War Department priorities.

5. Personnel and equipment mentioned in Paragraph 3 a. above will be dispatched to the Hawaiian Department by first available shipping. It is estimated that troops will begin to arrive in your department about December 1, 1941. The shipment of the major items of organizational equipment and armament for reinforcing units is dependent upon the availability of bottoms of which no accurate forecast can be made at this time.

6. Theater of operations type housing is authorized for the personnel listed in paragraph 3 above. It is desired that estimates covering housing for this increased garrison be made the subject of separate correspondence.

7. Ultimate approval of one 8'' seacoast battery (fixed) in lieu of the 16'' battery recommended by you, and of two 6'' seacoast batteries (fixed) to replace the two batteries of 155 mm guns authorized for temporary defense is probable. The 8'' seacoast guns will not be available before July, 1942, and the 6'' seacoast guns not before December, 1942.

8. In view of the expected approval of fixed armament for the Kaneohe Bay Area the plan submitted by reference c for the installation of the 8'' railway battery on Mokapu Peninsula and for the construction of 155 mm gun positions is considered too elaborate. Plans should be revised to provide for temporary installation of the 8'' railway battery, and for construction of Panama mounts for two 155 mm gun batteries. Provision should be made for splinterproofing magazines and plotting room only and should be confined to that which can be constructed by field fortification methods and materials.

9. A revised project, to include detailed estimates of cost, is desired for the defense of Kaneohe Bay based on two batteries of two 6'' BC guns, and one battery of two 8'' BC guns, all shielded type.

[3] 10. No change in the eventual project for the antiaircraft defense of Kaneohe Bay over that prescribed for the temporary defense Paragraph 3 a (2) above, is contemplated.

11. Reinforcement of either the peace or war garrisons of the Hawaiian Department by additional troops for the beach and land defense of Kaneohe Bay is not contemplated at this time.

By order of the Secretary of War:

[s] F. S. ADAMS,
Major General,
The Adjutant General.

Engr. 662/4 x 662/7

Via "Clipper" Air Mail

Subject: Provision of three (3) Panama Mount 155-mm Battery Positions and one (1) 8-inch Railway Gun Battery Position for the Defense of Kaneohe Bay, Oahu, T. H.

To: The Adjutant General, Washington, D. C.

1. References:

a. Secret letter TAG to HHD, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." file AG 381 (3-13-41) M-WPD, with 1st Indorsement HHD to TAG dated 18 June 1941.

b. Secret letter HHD to TAG, 5 June 1941, Subject: "War Garrison for Initial War Operation", file AG 320.3/37b, with 1st Indorsement TAG to HHD, dated 22 July 1941.

c. Secret letter HHD to TAG 31 July 1941, Subject: "Coast Artillery Armament for Naval Air Station, Kaneohe Bay", file AG 381/20.

2. Reference a. directs that the Army assumes the responsibility for the defense of the Kaneohe Bay area. A study by this headquarters of the armament requirements for the defense of Kaneohe Bay and submitted by my 1st Indorsement to reference a. requested the inclusion of the following items of Seacoast Defense Armament in the Hawaiian Defense Project for this purpose:

3 Batteries of 155-mm guns.

1 Battery of two 12-inch barbette guns with related equipment

3. A restudy of the project for the defense of the Kaneohe Bay area submitted by reference b. recommended that the following armament be provided:

Two 155-mm gun batteries

Two 6-inch fixed gun batteries of two guns each

One 16-inch long range casemated gun battery of two guns on barbette carriages.

[2] 4. A realization of the fact that it will be at least two years before these items of fixed armament, namely, the two 6-inch batteries and the one 16-inch battery, can be installed, makes it necessary that some provision be made immediately for the employment of mobile artillery to defend this area. The 1st Indorsement from The Adjutant General's Office to reference b. authorized the following additional units for the defense of Kaneohe Bay:

One battalion of Coast Artillery, 155-mm guns with one additional gun battery.

One Harbor Defense Battery.

Pending the installation of the fixed batteries, it is recommended that the Seacoast Defenses of the Kaneohe area consist of the following items of mobile artillery:

Three 155-mm gun batteries.

One 8-inch railway gun battery.

The proposed locations and fields of fire of these batteries are shown on map, Inclosure No. 1.

2564 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

5. Since there is no railroad running from Honolulu to Kaneohe Bay, it will be necessary to move this railway battery to Kaneohe Bay by truck trailer, and it is proposed to install this battery on fixed mounts similar to those of Battery Granger Adams on Black Point.

6. Each of the 155-mm battery positions should include the following:

- (1) 4 Panama mounts.
- (2) 4 splinterproof ammunition shelters for 25 rounds at each gun position.
- (3) 4 gun bunkers.
- (4) 4 splinterproof personnel shelters.
- (5) 2 splinterproof propellant shelters for 150 charges each.
- (6) 2 splinterproof projectile shelters for 150 projectiles each.
- (7) 1 splinterproof plotting room.
- (8) The roads and ramps necessary for the occupation of the position.
- (9) Camouflage treatment of all the above listed installations.

Considering the urgent need for combat training and the large amount of labor required to complete field works now being constructed by the troops of this command, it is believed advisable to construct these positions by contract.

[3] 7. The cost of installation of the three batteries of 155-mm guns including the acquisition of land has been estimated at \$93,630.00. The cost of the transportation and installation of the 8-inch railway battery in an emplacement similar to that of Battery Granger Adams has been estimated at \$121,635. These estimated costs include both direct costs and indirect costs. Inclosure No. 2 is a tabular breakdown of these cost figures.

8. It is recommended that the installation of these three batteries of 155-mm guns with the necessary field fortifications and the construction of one 8-inch gun battery position be approved, and that funds in the amount of \$215,265.00 be allotted to the U. S. District Engineer, Honolulu, for construction.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

WAR DEPARTMENT,
OFFICE, CHIEF OF THE AIR CORPS,
Washington, D. C., August 25, 1941.

To The Adjutant General *THRU* Chief of Engineers.

1. Attached hereto is a copy of the radiogram transmitted to the Commanding General, Hawaiian Department, Fort Shafter, T. H. on July 15, 1941.

2. In explanation thereof, you are advised that this office concurs with the opinion that the uneven areas in the runways, referred to in the basic communication, should be eliminated in the interests of safe operation.

3. This office considers runways of 4,500 feet in length to be an absolute minimum for military airports at sea level, with an additional 500 feet of length for each 1,000 feet of elevation or fraction thereof. This minimum likewise meets the requirements for the future installation of an instrument landing facility, if there is provided that the same time forty to one clear angles of approach at both ends of the runway in question.

4. If such clearances are not available at the north end of the present N-8 runway, or of the proposed new N-8 runway, because of quarters built at that end of the field, then the runway lengths should be extended on the southerly ends sufficiently to insure that a 4,500 foot length of runway will exist south of a point where a forty to one clearance angle may be realized.

5. There is no objection to the runway crossing the railroad spur, if necessary, providing the runway pavement is kept flush with the top of the rails and there is; no break in the runway grade, and providing, of course, rail traffic is controlled. If a difference in grade exists, the rail grade should be brought to that of the runway, or the spur relocated.

6. It is requested that the District Engineer be advised of these considerations, and that his new estimates be made accordingly.

7. No funds are available at this time for the construction and improvements recommended in the basic communications. The recommendation, however, will be placed in our "Suspense File" for further consideration upon receipt of a revised estimate, and when funds therefore become available.

For the Chief of the Air Corps:

WALTER J. REED,
Colonel, Air Corps,

29 SEPTEMBER 1941.

SIG 676.3

Subject: Aircraft Warning Service Installation Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, file AG 660.2 A. A. (7-5-41) MC-E, 8 July 1941, subject: "Aircraft Warning Service Philippine and Hawaiian Departments." A report of a Board of Officers convened at this headquarters to restudy the AWs project is being transmitted to the War Department by Clipper mail under separate cover. This board has considered the employment of the six fixed and six mobile stations allocated to this Department by the War Department. The increased number of stations now available has necessitated some adjustments in both type and location of the stations in the previously approved project of three fixed and five mobile units, as well as new locations. The results of this restudy are covered fully in the report being submitted, and are summarized in the following paragraphs.

Locations a. Kauai. There have been no changes in the fixed station now approved at Kokee. In the former project the mobile station on Kauai was planned for operation on the Waimea Kokee road. This mobile station is now recommended for operation on the coast north of Kilauea Village at latitude 22°13'50", longitude 159°23'54". There is no change in the base camp at Kauai which is now under construction at Kokee for the personnel of both the fixed and mobile stations.

b. Maui. No change has been made in the previously approved fixed station which is now under construction at Red Hill on Haleakala. Formerly approved project contained a mobile station to operate along the road up Haleakala. The project now being submitted makes no change in this mobile unit.

2568 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

c. Hawaii. The former project contained a mobile station for the Island of Hawaii, which was to be operated from the upper terminus of the Mauna Loa truck trail, with a base camp for personnel at the Kilauea Military Camp. This station has been eliminated in the restudy and has been replaced by a fixed station in the vicinity of Pahoa at latitude 19°26'50" and longitude 154°57'5", and by a mobile station to operate from an initial position near Kahuku Ranch at latitude 19°30'30", longitude 155°41'40". A base camp similar to that on Kauai will be constructed near the fixed station for the personnel of both that station and the mobile unit.

d. Oahu (1) There is no change in the previously approved fixed station for Mt. Kaala.

(2) The formerly approved mobile station at Manawahua is to be replaced by a fixed station.

(3) Opana. Under the former project, there were not sufficient [2] stations to emplace one on the north shore of Oahu. With the increase in the number of stations allowed, this is now possible and it is recommended that a fixed station be installed at the Opana Triangulation station at coordinates (98.655-19.182).

(4) The increase in the number of stations has also made advisable the consideration of other locations for mobile units on Oahu. This reconsideration indicated that a location at Makapuu Point had many advantages over the former approved Pali location, and it is accordingly recommended that the Makapuu Point Station be considered as an initial operating position in lieu of the former Pali location.

(5) The increase in the number of stations allowed has also made possible the provision of units in reserve against the possibility of failure of one of the primary stations. Since Oahu is the central point in the islands for which protection must be secured, it has been decided to concentrate the reserve units on this island. For this purpose two mobile units are recommended as a mobile reserve and for general operations on Oahu and on other islands if necessary. These stations will be utilized as needed to either replace the other Oahu stations or reinforce the coverage in certain sectors. Locations on Oahu which have been considered for their employment are the Pali location discussed above, on the high ground along Tantalus Road, at Fort Shafter, and at various points along the coast.

(6) Information center. There has been no change in the previous location for the Information Center which is now under construction at Fort Shafter. In compliance with other directives, this installation has been combined with various command posts into an air defense command post.

(7) No base camps are being provided for the stations on Oahu as the personnel will be housed in construction already approved for the Signal Area, Fort Shafter. The same construction, however, will be built at the Manawahua and Opana fixed stations as is now approved for Kaala.

2. Reference is made to 2d Ind, Hq Haw Dept, OSigO, 31 May 1941, to the letter Sig. 676.3 (AWS) dated 17 October 40 in which Signal funds totalling \$75,281.84 were requested for the installation of radio and wire facilities for the original three fixed and five mobile stations. Due to the abandonment of the mobile station at the Nuuanu Pali on Oahu and the Moana Loa Station on Hawaii, this sum can be reduced by \$2,296.00 to \$72,985.84. The allocation of additional stations has necessitated increased demands for Signal communications. These additional communication facilities are summarized as follows:

a. Radio facilities for the control from the Information Center of pursuit task forces. This includes a station at the control airdrome with four satellite stations at the principal pursuit fields on Oahu.

Total cost..... \$55,000

b. Emergency power for pursuit radio control transmitters. This power is to allow the operation of pursuit control during commercial power failure.

Total cost..... \$12,000

c. Commercial power extensions to include provision of adequate commercial power for the base camps and the principal alert stations at locations where this is economically feasible.

Total cost..... \$39,000

[3] d. AWS radio communication facilities to include additional transmitters and receivers at the new fixed stations, receivers at the Information Center and allied antenna and control equipment as established by standard practice.

Total cost..... \$18,000

e. AWS wire and cable facilities to include additional cable extensions for the added stations on Oahu, together with additional telephone and teletype equipment. This item also includes a cable installation from the Hawaii base camp to the detector unit at Pahoa.

Total cost..... \$10, 900

f. Commercial wire facilities to include leased lines from all base camps to the nearest commercial exchange, leased lines from the principal alert stations to the nearest exchanges, together with the yearly rental charge.

Total cost..... \$10, 463. 67
Total Sig funds..... 145, 400. 00

3. Estimates for the internal wire facilities of the Information Center and the allied Air Defense wire facilities are being held in abeyance pending more reliable information upon which to estimate the necessary funds. It is believed, however, that estimates for the Information Center should be included in the next available appropriation bill. Information Center layouts and schematic diagrams of the Information Center Wire Net have been forwarded to the Chief Signal Officer for review. This data is being transmitted as an inclosure to the aforementioned board proceedings.

4. Funds in the amount of \$890,804 have been made available to the Dist. Engr., Honolulu, to complete the previously approved project of three fixed and five mobile stations. Some of these funds were for stations which are being superseded by other stations in the revised program. The tabulation below shows cost estimates on the new stations, less the amounts available from the superseded stations, and the total of engineer funds supplementing those now on hand required to complete the revised projects.

Item No.	Description	Oahu Manawahua	Opana	Makapuu	Kauai Kilauea	Hawaii Pahoa	Kahuku

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT ENGINEER,
Fort Shafter, T. H., July 3, 1941.

Via Clipper Airmail
Engr. 523.07

Subject: Priorities and Preference Ratings.

To: The Adjutant General, Washington, D. C.

1. On 4 June 1941 I wrote a letter, file Engr. 523.07, subject: "Priority in Shipping Space for the Hawaiian Electric Company", in which the question of securing shipping space priorities for this company was discussed. A copy of this letter is inclosed for ready reference. At that time the main problem was the securing of shipping space; since then it has developed that difficulties are also arising concerning the procurement of materials. I have directed that an investigation be made of this priority question, and the results of this investigation indicate that some clarification and coordination is highly desirable.

2. At the present time priorities and preference ratings for Army activities are assigned by the various procurement agencies and contracting officers. There is now no coordination in the Department between these various agencies, each of which is dealing direct on priorities questions with its Chief in the War Department. This is satisfactory as long as only one procurement agency or contracting officer is involved. There are cases, however, in which more than one agency is involved, and the number of these will undoubtedly increase in the future; I believe it is advisable to have a coordinating agency in the Department to not only coordinate these cases locally, but also to bring to the attention of the War Department the advisability of similar coordination between the Chiefs of the respective agencies. Also there are many procurement problems on which the establishment of priorities and preference ratings is necessary which no agency is now handling. The 14th Naval District has already established a central priority office in the local bureau of supplies and accounts where priorities information is kept available, and where preference ratings on all Navy orders are issued.

3. The following outlines in greater detail some of the problems on which difficulty has already been encountered:

a. We have some projects in which more than one supply or construction branch is interested. While there is no complaint with the present system by which each agency handles priority matters with its Chief in the War Department there is a probability that desirable action by one agency may be overlooked with the result that the second agency might be held up in its work even thou it had taken all action necessary.

[2] b. Hawaii presents a special problem in procurement as do the other overseas departments, due to the shipping situation. The present priorities instructions are concerned with procurement; in this Department, however, priorities on shipping space are important. There are large quantities of essential materials transported on commercial shipping. These shipments involve not only government shipments but also shipments by private concerns of materials which are to be incorporated in defense installations.

c. Practically all construction materials must be imported into the island. The various constructing agencies are, of course, anticipating their needs and are having materials procured on the mainland and shipped to the department. It is impossible to anticipate every item needed, and in the past the various supply houses in the department, such as the Honolulu Iron Works, the Hawaiian Electric Company, and others, have maintained local stocks from which small items could be procured as they were needed. These local stocks are now becoming a matter of concern. For example, the mainland agents of the Hawaiian

Electric Company have advised the company that it can not expect to obtain replacements for its ordinary warehouse and operations stocks unless a preference rating is placed on this procurement. Practically all of our defense contracts demand electric power and unless the company's local stocks are maintained it will be impossible to install power connections without waiting for the arrival of necessary materials for each connection from the mainland. A specific example of this occurred recently where a sub-contractor on the Hickam Field low-cost housing had to import by Clipper air express at an expense of \$1,000.00, some plumbing items which under normal conditions could have been obtained from local stocks.

d. As stated above shipping priorities are also important. To our knowledge there is now no coordinated shipping priorities, although the Matson Navigation Company, which handles the bulk of the shipments, is granting unofficial priority to items on which a procurement priority has been obtained. As far as government bought and shipped materials are concerned there has been no great difficulty although considerable detail work has been involved in radioing about specific shipments. There are large quantities of materials, however, which are being ordered by private firms either for direct supply to government agencies or for incorporation in defense works directly or indirectly, and these private concerns are encountering great difficulties in securing shipping space for this material.

4. To meet this increasing problem I propose to set up an office in this department to be responsible for coordinating all priorities matters, and I have selected the Department Engineer's office as the section in which this control can best be established. Additional officers, not necessarily engineers, will be placed on duty in that office to furnish needed assistance. [3] The following is a preliminary outline of the duties of this section:

a. To establish an information bureau where request for information on priorities can be promptly filled.

b. To keep me informed of the priorities and preference ratings assigned by regular supply branches to their own procurement in order to insure that these are coordinated. In this work with the regular supply branches and construction agencies it is not intended that the coordinating office will assume any control over these agencies; it is intended, however, that the coordinating office keep informed of what action these agencies are taking in priority matters.

c. We assign preference ratings covering procurements which are essential to defense work and which are not now covered by existing instructions.

5. In the directive of the Priorities Committee of the Army and Navy Munitions Board, 27 November 1940, it is noted that all Panama Canal defense projects are placed in priority classification A-1-b. There is no similar blanket coverage for devents projects in this department; and the rating which can be assigned to any project in this department depends upon its classification as a general project under the other entries in this directive. The aircraft Warning Service project is the most important single project in the department, and under the general classification in this directive the highest priority which could be assigned to it would be A 1-f. It is believed that the conditions facing this department are similar to those in Panama and that a similar blanket priority classification for our defense projects should be authorized, and that this rating should be high. If this is done it would not be necessary to assign this high a rating to all projects and this department could reserve the high rating for the exceptional projects which were considered absolutely essential.

6. As stated above, the maintenance of adequate local stocks by local supply firms is essential. Existing instructions on the issuance of preference ratings are predicated on the fact that the firm to whom the rating is issued is a government contractor. The local supply firms who must obtain preference ratings to maintain stocks are not actually government contractors at the time they place their mainland orders. These firms become contractors, however, when a government agency orders materials from their stocks. The question involved here is one of time; and obviously we should not wait until the specific need for a stock item arises to issue a preference rating then delay the job while the item is being procured and shipped. It is believed that some authority should exist for us to give preference ratings for the procurement of any items which we, through experience and knowledge of future projects, select as essential.

[4] 7. The following is therefore recommended:

a. The establishment of a blanket priority for Hawaiian defense projects as has been done for Panama Canal defense projects, and authorization to this headquarters to apply this high rating to cases of exceptional importance.

2572 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

b. Waiving of the requirement that preference ratings can be issued only to government contractors and authorization to this Headquarters to issue these ratings for the procurement of those items which we anticipate will be essential to the defense program.

c. Consideration of the establishment of a liaison with shipping agencies on the West Coast to insure that defense materials ordered by private firms receive proper priorities in shipping space.

It is further recommended that prompt consideration be given to subparagraphs a and b above and this headquarters advised by radio of the War Department's attitude.

PRIORITIES COMMITTEE,
ARMY & NAVY MUNITIONS BOARD,
WAR DEPARTMENT BUILDING,
Washington, D. C., August 18, 1941.

To Commanding General, Headquarters Hawaiian Department, Office of the Department Engineer, Fort Shafter, T. H. (THRU: The Adjutant General, Washington, D. C.)

1. The following information is submitted in answer to the recommendations on page 4 of letter from Lieutenant General Walter C. Short:

2. The establishment of a blanket priority specifically to Hawaiian Defense Projects is not considered necessary inasmuch as the Directive, Priorities Committee, Army and Navy Munitions Board, established the preference rating A-1-c for "Construction, equipment, defense and development of outlying bases, not included in the Continental United States". This Directive is the cumulative result of an exhaustive study of the military importance of the various items required by the military and naval forces of the United States, and has received the approval of the Secretary of War and Secretary of the Navy.

3. Attention is invited to a copy of communication of July 31, 1941, from the Army and Navy Munitions Board to "Supply Arms and Services of the Army and Bureaus and Offices of the Navy", which explains the procedure covering the issuance of project rating orders to Army and Navy construction projects outside of the Continental United States. It will be noted that the project rating orders issued in accordance with these instructions will not be confined to items on the Critical List, but will include all items necessary to complete the construction of a particular project. These ratings may be extended in the usual way, and it is believed should cover the recommendation as made in paragraph 7 b.

4. Attention is invited to the "Defense Supply Rating Plan" recently inaugurated by the Office of Production Management. This is a plan developed whereby the manufacturers who supply so-called "Off the shelf" items to defense industries are permitted to get material with which to manufacture additional stock so as to make a supply available to defense customers. This plan may be of value to some of the concerns in the Hawaiian District and is mentioned for your consideration.

5. The establishment of a liaison with shipping agencies of the West Coast has been referred to the Division of Emergency Shipping, Maritime Commission. That Commission has a record of the situation as it exists and as it has been for some time. They are further checking into the situation, but definite decision to establish a liaison agency has not been made.

In reply refer to:

Engr. 523.07

Subject: Office of Production Management Field Service.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter dated 13 August 1941 from the Army and Navy Munitions Board, a copy of which is inclosed. Reference is also made to letter from this headquarters, file Engr. 523.07, subject "Priorities and Preference Ratings," and 1st Indorsement from Priorities Committee, Army and Navy Munitions Board, 18 August 1941, file 114.14-18-C-32-RGC-amw (8-18-41).

2. The conditions as to securing priorities for materials needed in the Hawaiian Islands are growing worse steadily, and a large part of the difficulties encountered can be traced to lack of information and to failure of field offices, whose region includes this Territory, to make themselves known to local Federal officials and business men. The long distances involved in travel, the difference in time, and the high cost of telephonic communication, all make contact with any regional office difficult.

3. Governor Poindexter has already submitted a request to Washington for the establishment of a local office of the Priorities Division, OPM, and at his request I concurred in his suggested action. A copy of my letter of September 13, 1941 to the Governor is inclosed for your information.

4. It is therefore requested that the War Department propose the establishment in Honolulu of a field office of the Office of Production Management, to

2574 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

include the Priorities Division, initially, with provision for adding representatives of other divisions later, if required.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., July 28, 1941.

VIA "CLIPPER" AIR MAIL

Engr. 600.12 (Gen.)

Subject: Revolving Fund for Purchase of Materials.

To: The Adjutant General, Washington, D. C.

1. The delay in securing necessary materials for our construction program has become a matter of serious concern. Experience indicates that from three to four months are necessary to procure construction materials from the United States after funds for projects are allotted, and increasing transportation difficulties may lengthen this time.

2. The following is the situation of the two constructing agencies:

a. The District Engineer has no revolving fund for advance procurement of materials. Among the first Engineer projects approved, however, were two large projects; one the additional ammunition storage facilities, and the other the Air Corps mobilization housing. As soon as these allotments were received, the District Engineer immediately ordered all or a large part of the necessary materials to complete the entire project. With his construction crews now well organized, the rate of using these materials has greatly accelerated and the stock is being depleted because the rate of use is greater than the rate of arrival from the mainland.

b. The Constructing Quartermaster is in somewhat the same situation. While the Quartermaster General has authorized the establishment of a stock pile of lumber, no funds have been advanced for the procurement of other materials. These other materials are not available for local purchase in any appreciable quantities, and as a result, there will undoubtedly be delays.

3. I understand that the Division Engineer, San Francisco, has recommended to the Chief of Engineers that a revolving working fund of \$1,000,000.00 be allotted to the District Engineer, Honolulu, to permit that officer to procure materials in advance. This fund would be a revolving fund. All expenditures from it for materials would be reimbursed from other projects funds as these projects were approved and utilize the materials.

4. I think that this materials situation may become critical. As stated in previous communications, a large part of our construction forces have been imported from the mainland on contracts which require either their continued employment or return to the mainland at Government expense. It is obvious that if there is any lack of materials not only will the jobs be delayed, but also the cost to the Government will be increased. I therefore strongly recommend that the suggestion of the Division Engineer, San Francisco, be adopted, that the District Engineer, Honolulu, be allotted a revolving fund of \$1,000,000.00, and that similar arrangements be made for the Constructing Quartermaster to permit him to stock materials in addition to lumber.

OFFICE, C. OF E.,
August 7, 1941.

To The Adjutant General (Through The Quartermaster General.)

It is recommended that a revolving fund of \$1,000,000.00 be authorized for the purposes indicated in the basic letter. If the necessary funds are not available to the War Department from any other source, it is believed that this amount could be advanced from the Fifth Supplemental, 1941, Deferred Storage Program, (Air Corps), Items a & b, Parking Storage Areas, Reserve Airplanes. As a final resort, the sum of \$1,000,000.00 now reserved for construction at the Mobile Air Depot, (Brookley Field) could be advanced for this purpose. In either case, reimbursement should be effected upon the appropriation of funds for construction in Hawaii under the 1943 Construction Program.

In reply refer to: Engr. 600.12 (Gen.)

Major General R. C. MOORE

Deputy Chief of Staff, War Department,
Washington, D. C.

DEAR DICK:

The situation surrounding the obtaining of materials for defense contracts is becoming more and more critical. On many items a delay of between three and four months occurs between the time an allotment of funds for a project is received and the materials necessary are obtained from the mainland. We have recently received word on some electrical equipment which indicates that delivery cannot be made for six months.

In a conference with Colonel Hannum, Division Engineer in San Francisco, when he was here sometime ago, he mentioned that he had recommended to The Chief of Engineers that a revolving fund of \$1,000,000.00 be set up to permit the District Engineer to make advance purchases of materials and plant. I followed up Hannum's recommendation to the Chief of Engineers with a strong letter to the War Department urging that this revolving fund be set up for the District Engineer and that similar arrangements be made for the Constructing Quartermaster. The District Engineer informed me today that he had received an allotment of \$1,100,000.00 from the Chief of Engineers which could be utilized for the advance purchase of materials. The Constructing Quartermaster, however, has not yet received similar information, and while he is authorized to stock lumber locally, he has no revolving fund for which to make advance purchases of materials other than lumber.

I am following up my previous recommendation by radio to The Adjutant General today. I think that the matter is sufficiently important to bring it to your attention, and I will appreciate it if you would have someone look into this matter. A copy of my letter of July 28th and of the radio follow up of September 13 are inclosed for ready reference.

Very sincerely.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

2578 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, September 29, 1941.

Lieutenant General WALTER C. SHORT,
Headquarters, Hawaiian Department, Honolulu, T. H.

DEAR WALTER:

I have your letter of the thirteenth relative to the establishment of revolving funds in connection with construction in Hawaii.

Owing to legal restrictions we cannot approve your request for revolving funds. However, it appears that the wording of the appropriation from which the Quartermaster General maintains the lumber pile you mention is such that those funds may be used to make advance purchases of other materials required for construction.

The Quartermaster General will take immediate measures to establish a stock pile of construction materials other than lumber, sufficient to meet requirements for both Engineer and Quartermaster construction. The conditions under which these stock piles will be reimbursed will be covered in the reply of the War Department to your official request of July 28, 1941.

The Chief of Engineers advises that the allotment of \$1,100,000 made to your District Engineer, to which you refer, is from funds now available for approved projects. This allotment should not be construed as making these funds available to you as a revolving fund, nor for advance purchase of materials, except for the projects to which the funds apply.

I believe that when these stock piles have become established the situation you outline will be greatly relieved.

Sincerely yours.

[S] R. C. Moore,
R. C. MOORE,
Major General, Deputy Chief of Staff.

Subject: Increase in the Strength of the Third Engineers.
AG 320.2 (11-1-40) M-C 3rd Ind.

ESA

WAR DEPARTMENT, A. G. O., February 10, 1941.

To Commanding General, Hawaiian Department

1. Action is being taken to increase the allotment of Regular Army enlisted men for the Corps of Engineers, Hawaiian Department by 107. This allotment will permit the organization of the 3rd Engineers in accordance with Table of Organization 5-11, November 1, 1940. Regular Army personnel are not available to increase further the strength of this regiment.

2. Since War Department policy forbids sending trainees to the Overseas Departments it will not be practicable to aid you in creating an Engineer Battalion (Separate) as recommended in your radio of January 23, 1941.

3. As previously advised, plans provide for the activation of a separate Engineer Company (Avn) for your Department.

By order of the Secretary of War:

[sgd] E. S. ADAMS.

A True Copy:

L. W. TRUMAN,
Capt. Inf.
12-22-41

[SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., February 19, 1941.

In reply refer to:

Engr. 322.03

Subject: Additional Engineer Troops.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, this headquarters, Engr. 322.03, 23 August 1940, which recommended the assignment to the Department of an Engineer regiment (Aviation) less one battalion, and to letter, Engr. 210 x220.03, 1 November 1940, which recommended an increase in the strength of the Third Engineers, and to letter, Engr. 322.03, 5 February 1941, recommending a redesignation in the Third Engineers from a combat regiment, Division, to a combat regiment, Corps.

2. These previous recommendations for an increase in the Engineer component in the Department were based upon the assumption that some civilian labor would be available. It has been necessary with the various agencies involved in defense construction to import skilled labor from the mainland. A recent increase in the defense contracts of the Navy will now necessitate the importation of unskilled labor as well. This development now makes it impossible to assume that any appreciable local labor will be available and requires that previous estimates of the minimum force of Engineers necessary be revised upwards.

3. I consider it essential that a regiment of Engineers (Aviation) be furnished this Department as an integral part of the Hawaiian Air Force and that a regiment of Engineers, General Service, be furnished this department as Department Engineer troops. There is sufficient work immediately on hand in connection with Air Corps activities on the outlying islands and on Oahu to keep a regiment of Engineers continuously occupied. There is also sufficient work in connection with military roads and trails in department units to keep a regiment of General Service Engineers continuously occupied. There is also sufficient work in connection with the Hawaiian Division such as bombproofing of Division command posts and communication centers, road blocks and other tactical employment to keep the Third Engineers continuously occupied.

4. It is therefore recommended that one regiment of Engineers (Aviation) (T. O. 5-411) and one regiment of Engineers, General Service, (T. O. 5-21) be authorized for this Department and that these units complete with personnel and equipment be furnished as soon as possible..

WALTER C. SHORT,
Lieutenant General,
Commanding.

AG 320.2 (2-19-41) MC-C-M 1st Ind.

ESA

WAR DEPARTMENT, A. G. O.,
May 15, 1941.

To the Commanding General, Hawaiian Department.

1. a. The 34th Engineers (Combat), will be activated in your department with an allotted strength of 1127 enlisted men under T/O 5-171, November 1, 1940, less band and basic privates, on June 1, 1941 (AG 320.2 (4-8-41) M-C, radio April 9, 1941).

b. The regiment will be organized with cadres to be furnished by units now in your department, as directed by you, and with selectees to be dispatched from the Continental United States.

c. Every effort will be made to send individuals who have completed their basic training; however, in order to make maximum use of the available shipping, some curtailment in their basic training may be required. If this is done, you will be informed so that they can complete their training in Hawaii. Under the present tentative schedule, it is proposed to dispatch the full quota except thirty-six attached medical, in June. The Medical Department personnel will be dispatched in November.

d. The actual date of activation of the regiment will conform to the arrival of personnel in your department.

2. While your recent request for additional medical enlisted men was disapproved because of non-availability of personnel, the 34th Engineers (and the 97th and 98th Coast Artillery Regiments whose activation is covered in separate correspondence) is allotted a full quota of attached medical personnel, less basics. You are authorized to make a redistribution of this attached medical personnel, reporting such readjustment to this office.

3. It is desired that you submit a report on the following:

a. The actual date of activation of the 34th Engineers.

b. Changes in the distribution of three-year men in engineer units in connection with the organization of the 34th Engineers.

4. Attention is invited to letter, this office, April 21, 1941, AG 381.4 (1-27-41) M-D-M, subject: Reports of change in status reports—Defense Reserves, Overseas Departments.

5. Your request for aviation engineers is being considered separately.

6. The allotment of commissioned personnel and the grades and ratings of enlisted personnel will be made separately.

By order of the Secretary of War:

[S] E. S. ADAMS,
Major General,
The Adjutant General.

Subject: Additional Selective Service Trainees for the Hawaiian Department.

AG 320.2 (4-21-41) MC-C

1st Ind.

ESA

WAR DEPARTMENT, A. G. O.,
May 21, 1941.

To: Commanding General, Hawaiian Department.

1. Radio No. 721, this office, April 9, 1941, requested your views on the practicability of securing additional selectees locally, and it was not intended that an appeal be made to the Governor of the Territory of Hawaii to secure 1,127 additional selectees in excess of the existing quota.

2. In connection with your remarks on labor shortage in Hawaii, a resolution recently passed by the Board of Supervisors of the City and County of Honolulu, copies of which were sent to the Secretary of War and other governmental heads, protested the organization of a port company in Hawaii on the grounds that the supply of labor was ample and that needs of National Defense projects could be met without importation of additional personnel from the United States. This matter is brought to your attention for information only. No further action appears necessary or desirable at this time.

3. Personnel for the 34th Engineers will be provided from the Continental United States in two increments. Details have been communicated to you in separate correspondence.

By order of the Secretary of War:

[sgd] E. S. ADAMS,
Major General,
The Adjutant General.

12-22-41

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 21 April 1941.

In reply refer to:

AG 381

Subject: Additional Selective Service Trainees for the Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. War Department radio No. 721, of 9 April 1941, proposes activation in this Department of the 34th Engineer Regiment (C) in June with a strength of 1127, including 36 attached medical personnel. It further proposes that the 3d Engineers (C) will furnish the cadre; the balance to be local selectees.

2. As the existing Territorial quota of 1400 Selectees has already been exceeded by approximately 500, and those now inducted assigned to organizations, an appeal was made to the Governor of the Territory of Hawaii to secure the additional personnel required to activate this new unit. The Governor's reply, attached, states that he is without authority to call additional quotas of trainees, and even if such authority existed, he is opposed to providing additional manpower at the expense of National Defense projects and local industry which have already absorbed all available labor.

3. The labor shortage in Hawaii is acute. Skilled labor for work on National Defense projects is now being imported and it is quite likely that the importation of unskilled labor will become necessary to maintain defense work schedules.

4. In view of these circumstances it is urged that the War Department provide personnel from the Mainland U. S. for the activation of new or expansion of existing units in the Hawaiian Department.

[sgd] Walter C. Short,
WALTER C. SHORT,
Lieutenant General, U. S. Army,

[SECRET]

18 FEBRUARY 1941.

AG 320.2/55

Subject: Reinforcements for Coast Artillery Garrison, Hawaiian Department.
To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Letter the Secretary of the Navy to the Secretary of War, dated 24 January 1941, with reference to the defense of the Pearl Harbor Naval Base against a surprise attack, copy forwarded to this headquarters as inclosure to letter TAG to HHD, 7 February 1941, subject: "Air Defense of Pearl Harbor, Hawaii," file AG 381 (1-24-41) M.

B. Letter HHD to TAG, 5 September 1940, subject: "Additional Antiaircraft Troops for the Hawaiian Department", file 320.2/49.

C. Letter TAG to HHD, 27 September 1940, subject: War Reinforcements, Hawaiian Department", file 320.2 (9/27/40) M-WPD, with 1st and 2nd Indorsements thereon.

2. The increasingly critical international situation, together with the vital need, as expressed in Reference A, for adequate provision for the best defense which can be provided for the security of the Pearl Harbor Naval Base and the Fleet against surprise attacks makes it essential that the antiaircraft artillery garrison of Oahu be placed upon a war footing without delay. While not specifically mentioned in Reference A, there is a similar requirement for a sound defense of the Fleet and its base against raids by surface ships. This would have special importance if the fleet should be withdrawn from Pearl Harbor. An adequate defense, ready for prompt action, can not be provided with the present garrison because of the necessity for dual assignments of Coast Artillery batteries to anti-aircraft and harbor defense missions. The reinforcements required for the anti-aircraft artillery and harbor defense garrisons to provide the degree of defense considered essential are discussed below.

3. Antiaircraft Artillery.

a. The approved defense project provides for twenty-five (25) gun batteries, five (5) searchlight batteries, and sixteen (16) automatic weapons batteries manning a total of seventy-two (72) mobile and twenty-six (26) fixed AA guns, seventy-five (75) searchlights, one hundred and twenty (120) 37 mm AA guns, and two hundred (200) cal. .50 AA machine guns. (NOTE: Three hundred and

[2] forty five (345) cal. .50 AA machine guns are provided in the defense project, of which two hundred (200) are manned by antiaircraft artillery and the remainder by other troops.) With the present garrison, including the assignment of all but two (2) harbor defense artillery batteries to antiaircraft assignments, only nineteen (19) gun batteries, three (3) searchlight batteries,

2584 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

no 37 mm batteries and six (6) machine gun batteries can be manned because of the shortage of both personnel and equipment. The major shortages in anti-aircraft artillery armament are sixteen (16) three inch AA guns and associated equipment (of which six (6) guns are understood to be enroute to this Department), all one hundred and thirty-five (135) 37 mm AA guns, two hundred and thirty-six (236) cal. .50 machine guns, and thirty (30) sound locators.

b. To man the entire anti-aircraft artillery defense project, avoiding dual assignments to all but four harbor defense batteries, requires an increase in the existing garrison of the following anti-aircraft artillery personnel:

2 Regiments Coast Artillery AA (Mobile) T/O 4-11.

1 Battalion Gun Coast Artillery AA (Mobile) (less searchlight battery) T/O 4-15.

Approximately ninety (90) officers and two thousand (2000) enlisted men as individual filler replacements to activate three (3) gun batteries and three (3) 37 mm batteries of the 64th CA (AA), now in active, and to bring to war strength the active elements of this regiment.

c. In paragraph 10 a of 2nd Indorsement of Reference C, the War Department provided for only one half of the reinforcements of the peacetime garrison of anti-aircraft artillery which, at that time, were considered essential to provide a reasonably effective anti-aircraft defense prior to the date unit reinforcements from the mainland could effect the situation. With the increasingly critical international situation at this time, it is urgently recommended that all war reinforcements of anti-aircraft artillery personnel, both unit and filler reinforcements described above, together with the existing shortages in anti-aircraft artillery material be sent from the mainland with the least practicable delay.

4. Harbor Defense Artillery.

The status of the defense which can be established with existing personnel of the peace garrison of harbor defense artillery is described in detail in par 6f, of the basic document, Hawaiian Defense Project, Revision of 1940. Briefly, only one 16-inch battery and the seacoast searchlights of the Ulupau Group can be manned by batteries with harbor defense as their only mission. By employing the undesirable expedient of dual assignments to harbor defense and anti-aircraft missions, and of harbor defense and Field Artillery missions, both 16-inch gun batteries, the one 14-inch battery, one of the two 12-inch gun batteries, none of the three mortar batteries, three of the five 8-inch batteries (fixed and railway), six of the twelve 155mm batteries (two manned by Field Artillery personnel) and none of the two 6-inch and two 3-inch [3] batteries can be manned upon initial deployment. As shown in Table I, par. 7 to HDP-40, an increase of approximately 165 officers and 3400 enlisted men as individual filler reinforcements and One Regiment Coast Artillery (TD, T/O 4-31W) is required to fully man the harbor defense artillery. By not manning the three fixed seacoast mortar batteries, which are not essential to a defense against raids, the total number of individual filler reinforcements may be reduced to approximately 150 officers and 2700 enlisted men. This increase in the garrison will be sufficient to provide only one relief as manning details for harbor defense guns, but will be adequate so that key observation stations, air guards and similar details can be maintained continuously.

5. Summarizing, it is urgently recommended that:

(a) The Coast Artillery garrison of this Department be brought to substantially war strength by the dispatch from the mainland of the following reinforcements:

(1) Two Regiments CA (AA) Mobile, T/O 4-11.

(2) One Battalion CA (AA) gun, Mobile (less searchlight battery), T/O 4-15.

(3) One Regiment CA (TD), 155mm gun, T/O 4-31W.

(4) Individual anti-aircraft artillery filler reinforcements to include 91 officers and 2064 enlisted men.

(5) Individual harbor defense artillery reinforcements to include approximately 150 officers and 2700 enlisted men.

b. Existing major shortages in the armament of the approved anti-aircraft artillery projects, as set forth in par. 3 above, be filled as soon as practicable.

WALTER C SHORT,
Lieutenant General,
Commanding.

[1]

[SECRET]

Subject: Reinforcements for Coast Artillery Garrison, Hawaiian Department.
AG 320.2 (2-18-41) MC-C-M 1st Ind. ESA

WAR DEPARTMENT, A. G. O., May 10, 1941.

To the Commanding General, Hawaiian Department.

1. The Coast Artillery garrison, Hawaiian Department, will be augmented by approximately 276 officers and 5,734 enlisted men between June, 1941, and March, 1942, in three increments paralleling the estimated delivery of material, as follows:

a. June, 1941:

(1) AA filler replacements, 60 officers and 1,337 enlisted men.

(2) 62 officers and 1,329 enlisted men required to activate the following units in the Department:

98th Coast Artillery (AA) (Semi-mobile), less band, 3d Battalion (37-mm Gun), Battery E (Searchlight), basic privates and attached medical, under T/O 4-111, November 1, 1940, and component tables.

(3) 17 officers and 359 enlisted men to activate the 2d Battalion, 97th Coast Artillery (AA) (Semi-mobile), less Battery H (Gun), Battery E (Searchlight) and basic privates, under T/O 4-115, November 1, 1940 and component tables.

b. November, 1941:

(1) 48 officers and 885 enlisted men to activate the 97th Coast Artillery (AA) (Semi-mobile), less band, 2d Battalion (Gun), 3d Battalion (37-mm gun), and basic privates, under T/O 4-111, November 1, 1940, and component tables.

(2) 4 officers and 134 enlisted men to activate Battery H (Gun), 97th Coast Artillery, less basic privates, under T/O 4-17, November 1, 1940.

(3) Attached Medical personnel, 98th Coast Artillery, 7 officers and 49 enlisted men.

[2] c. March, 1942:

(1) AA filler replacements, 24 officers and 661 enlisted men.

(2) 54 officers and 980 enlisted men to activate the 3d Battalion (37-mm Gun), 97th Coast Artillery and 3d Battalion (37-mm gun), 98th Coast Artillery, each less Battery M (Gun) and basic privates, under T/O 4-125, November 1, 1940 and component tables.

2. Cadres for the new units will be furnished from existing units in the Hawaiian Department; their source, strength and composition will be determined by you.

3. Every effort will be made to send individuals who have completed their basic training; however, in order to make maximum use of available shipping, some curtailment in their basic training may be required. If this is done, you will be informed so the individuals can complete their basic training in Hawaii.

4. The actual activation of the various units will conform to the arrival of personnel in the Department.

5. While your recent request for additional medical enlisted men was disapproved because of non-availability of personnel, the 97th and 98th Coast Artillery Regiments (and the 34th Engineers whose activation is covered in separate correspondence) are allotted full quotas of attached medical personnel, less basics. You are authorized to make a redistribution of this personnel, reporting such readjustment to this office.

6. It is desired that you submit a report on the following:

a. The actual dates on which various units are activated.

b. Changes in the distribution of three-year men in Coast Artillery units in connection with activation of new units.

c. List of all Coast Artillery units and installations in the Department including allotted strengths and tables of organization under which organized; this report to be submitted upon completion of the activation of all new units and distribution of the last increment of AA filler replacements.

[3] 7. Attention is invited to letter, this office, April 21, 1941, AG 381.4 (1-27-41) M-D-M, subject: Reports of Change in Status Reports—Defense Reserves, Overseas Departments.

8. The allotments of commissioned personnel and the grades and ratings for enlisted personnel will be made separately.

9. Recommendation for augmentation of harbor defense artillery is not favorably considered at this time because the additional personnel is not available.

2586 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The antiaircraft reinforcements will strengthen the seacoast defenses by the relief of all but four harbor defense batteries from dual antiaircraft missions.

By order of the Secretary of War:

(sgd) E. S. ADAMS,
*Major General,
The Adjutant General.*

AG 320.2/57

25 FEBRUARY 1941.

Subject: Increase of enlisted strength, 251st Coast Artillery (AA), National Guard (California).

To: The Adjutant General.

1. On January 9, 1941, the then Department Commander, Lieutenant General Herron, radioed for authority to increase the enlisted strength of the 251st Coast Artillery (AA), National Guard, from present allotted strength to a peace strength of 1450 by assignment of selectees from Ninth Corps Area. On January 17, 1941, the War Department replied by radiogram to the effect that the recommendation made in January 9, 1941 radiogram was not favorably considered and that the policy of the War Department is that selective service personnel in overseas garrisons will be limited to those procured within the overseas department itself and that no additional selective service personnel will in time of peace be sent from the continental United States to overseas departments.

2. I am again submitting this request as I am of the firm opinion that the situation here is different than in the United States, and that this is a special case which deserves further consideration. The facts are:

The 251st National Guard is the only National Guard organization on duty outside of the continental limits of the United States;

This regiment is composed of white officers and enlisted men;

The selective service trainees now in being in this Department are composed of 469 Japanese out of the quota 700. The next draft quota of 700 which is to be inducted in March will undoubtedly be composed of approximately the same ratio of Japanese; namely, about 67%;

The selective service trainees are of varied mixture, such as Japanese, Hawaiian, Part Hawaiian, Filipinos, Chinese, Korean, and other mixtures;

Any assignment of the selective service trainees to the 251st Coast Artillery (AA) would result in a mixture of races, largely Japanese, being assigned to a white organization, which is contrary to War Department policy, as stated in War Department Letter AG 291.21 (10/9/40) M-A-M, October 16, 1940, Subject: "War Department Policy in regard to Negroes", paragraph g;

The Colonel, Commanding the 251st Coast Artillery (AA), states that because of the feeling in California against orientals, any assignment of selective service trainees from this Department to his command would cause dissension, and lessen the efficiency of his command fully 50 percent.

[2] All replacements now coming from the mainland are required for the Regular Army troops here.

All the selective service trainees in this Department will be needed to fill the Hawaii National Guard units which are composed of races of the same type as in the selective service draft.

3. In view of the above, the only justifiable solution of this problem is to assign selective service trainees from the mainland, and preferably from the 9th Corps Area, to the 251st Coast Artillery (AA), National Guard. It is my opinion that it will be contrary to the best interests of all concerned to assign selective service trainees in this Department to the 251st Coast Artillery (AA) to increase its strength.

4. Since this is a special situation incident to this Department. I do not believe the present War Department policy, as stated in WD Radiogram, January 17, 1941; i. e., of not sending any additional selective service personnel from the continental United States to overseas departments, should apply to this Department.

5. I therefore again request that the 251st Coast Artillery (AA), National Guard, be increased from present allotted strength to a peace strength of 1450 by assignment of selective service trainees from the 9th Corps Area.

(sgd) Walter C. Short,
WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

AG 320.2 (2-25-41) M-C

1st Ind.

ESA

WAR DEPARTMENT, A. G. O.,
March 8, 1941.

To the Commanding General, Hawaiian Department.

1. Your recommendation that the 251st Coast Artillery (AA) be increased from its present allotted strength of 1181 to a strength of 1450 by assignment of selectees from the Ninth Corps Area is not favorably considered.

2. As stated in radiogram from this office, January 17, 1941, all selective service personnel to be procured in the current fiscal year have already been allotted to units and activities. Additional personnel could be allotted to the 251st Coast Artillery (AA) only at the expense of other units or activities.

3. If trainees were sent to the 251st Coast Artillery (AA) at the present time, it is not considered that they could be of great value to the regiment or to the defense of the Hawaiian Islands due to the short period of time they would be available after completing their basic training. Selectees inducted now would probably reach the Hawaiian Department some time in April 1941. Their basic training would require approximately three months making them fully available about July 1941. As the 251st Coast Artillery (AA) is scheduled to be returned to the United States for return to an inactive status of September 16, 1941, it appears that any selective service personnel sent at this late date would be available to the regiment for a maximum of two months.

By order of the Secretary of War:

(sgd) E. S. ADAMS,
Major General,
The Adjutant General.

AG 320.2/58

25 FEBRUARY 1941.

Subject: Reinforcements for Hawaiian Department.
To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Letter, TAG to HHD, 4 February 1941, subject: "Tables of Organization, Overseas Departments", file AG 320.2 (1-17-41)P(C):

B. Letter, TAG to HHD, 27 December 1940, Subject: "Equipment for Field Artillery Units", file AG 320.2 (12/20/40) P.

C. Letter, HHD to TAG, 18 February 1941, subject: "Reinforcements for Coast Artillery Garrison Hawaiian Department", file AG 320.2/55.

D. Letter, HHD to TAG, 19 February 1941, subject: "Additional Engineer Troops", file Engr. 322.03.

2. The requests for troop reinforcements as stated in Reference C and D, hold priority over the requests given herein. The following reinforcements are requested for this Department at the earliest possible date and in the priority in which they are listed.

a. In accordance with Reference A, authority is requested to organize the 11th Field Artillery under WD T/O 6-41, dated November 1, 1940. The 11th Field Artillery (less 3d Battalion) is now organized under Standard War Department, Tables of Organization with units organized and maintained at war strength, as follows:

(1) 11th Field Artillery (less 3d Bn), T/O 6-41, January 3, 1939.

(2) Hq & Hq Btry, 11th Field Artillery, T/O 6-42, January 3, 1939.

(3) 1st and 2d Bn, 11th Field Artillery, T/O 6-45, December 7, 1938.

(4) Hq & Hq Btry, 1st and 2d Bn, 11th Field Artillery, T/O 6-46, January 7, 1938.

(5) Four (4) batteries, 11th Field Artillery, T/O 6-47, December 7, 1938.

b. That one Infantry Battalion, Light Tanks, be authorized for and the necessary personnel and material to organize same, be furnished this Department. The number of possible localities for hostile beach landings make the availability of a mobile reserve having the characteristic of light tanks of [2] great tactical importance for counterattacks. The 11th Tank Company (Light Tanks) organized under Standard WD, T/O 7-8, dated March 17, 1938, is the only tank unit in this Department and could be the nucleus for the Infantry Battalion of Light Tanks, requested herein.

c. That the organization of two (2) Military Police Companies, under WD, T/O 7-55, dated November 1, 1940, (Military Police Battalion) be authorized and that the necessary personnel be furnished from the Mainland for organization of the two (2) companies in this Department. The technical duties required of Air Corps enlisted personnel are retarded due to the required training for and actual performance of interior guard duty at both Hickam and Wheeler Fields. It is believed that an organized Military Police Company stationed at each of these fields would release Air Corps personnel for necessary air activities and also render more efficient interior guard and military police duty. The Military Police personnel could be efficiently trained in anti-sabotage work and also in close-in defense without disrupting scheduled training. It is the intention to use the Military Police personnel to perform similar work at outlying air fields under the control of the Commanding Officers of Hickam and Wheeler Fields and also to accompany Air Corps Units to those outlying fields when either Wing is operating under its Dispersion Plan.

d. That the necessary reinforcements be furnished so that the Infantry Regiments of the Hawaiian Division, be organized under WD, T/O No. 7, dated November 1, 1940: Infantry Division (Square). These regiments are now organized under Standard WD, T/O 7-11, dated December 6, 1938, as modified to fall within the "Allotment of Grades and Ratings for Enlisted Men, and authorized Recruiting Strength" as published in mimeograph letter, TAG, August 7, 1940, file AG 221 (8-7-40) E. Approval of this request would permit compliance with Reference A, above, and also make available the necessary personnel and material authorized by current standard, War Department Tables of Organization.

e. That the 11th Field Artillery Brigade (less 11th Field Artillery) be organized under WD, T/Os dated November 1, 1940 and that the necessary reinforcements be furnished this Department. That War Department, Tables of Basic Allowances for Field Artillery, No. 6-1, dated November 1, 1940, be made applicable to the 11th Field Artillery Brigade (less 11th Field Artillery).

3. A Study is now being made of all Special Tables of Organization at present in use by units in this Department, with a view of submitting recommendations for changes that will permit organization and functioning under current Standard WD, Tables of Organization.

SUBJECT: Reinforcements for Hawaiian Department.

G 320.2 (2-25-41) 1-C 1st Ind. WVC
WAR DEPARTMENT, A. G. O.,
April 11, 1941.

To: Commanding General, Hawaiian Department.

1. The augmentation of Coast Artillery and Engineer components of the Hawaiian Department is being considered separately, and you will be advised in the near future of the action taken thereon.

2. The augmentation of the Field Artillery and Infantry components of the Hawaiian Division, and the addition of a Tank Battalion and two Military Police Companies to the peace garrison are not considered urgent, nor is it practicable to provide the personnel at this time. It is believed the necessary guard duties can and should be performed by troops in the Department without organizing Military Police Companies for this purpose.

3. The reorganization of Infantry and Field Artillery elements of the Hawaiian Division under latest War Department tables of organization is approved. This can be accomplished without additional personnel. The majority of the units in other foreign garrisons and in the Continental United States are below table of organization strengths yet conform to standard tables. As stated in letter, February 4, 1941, AG 320.2 (1-17-41) P (C), subject: "Tables of Organization, Overseas Departments", this can be accomplished by reducing the size of component elements of a unit or by carrying certain elements inactive.

By order of the Secretary of War:

(sgd) W. V. Carter,
W. V. CARTER,
Brigadier General,
Acting The Adjutant General.

Fort Shafter, T. H., 24 April 1941.

In reply refer to: 320.2

Subject: Air Base Group.

To: The Adjutant General, Washington, D. C., (thru: Commanding General, Hawaiian Department, Fort Shafter, T. H.).

1. The Commanding General, Hawaiian Air Force, recently requested the War Department to designate Bellows Field, T. H., a permanent Air Corps station under the jurisdiction of Headquarters Hawaiian Department.

2. A further request is being prepared by the Commanding General, Hawaiian Department, to have the War Department authorized the creation of a separate Air Corps station for the 15th Pursuit Group on Oahu, T. H.

3. Subject to the approval of the above mentioned recommendations, a redistribution of Air Base Group units will be necessary and the following is recommended:

a. The 18th Air base Group (R) (tentative T/O 1-411) Wheeler Field, T. H., be redesignated an "Air Base Group, Air Base" (Single).

b. An "Air Base Group, Air Base" (Single) (tentative T/O 1-411) be authorized for Bellows Field, T. H.

c. An "Air Base Group, Air Base" (Single) (tentative T/O 1-411) be authorized for the new station of the 15th Pursuit Group.

[SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 25 April 1941.

In reply refer to:
AG 230.3/37

Subject: Reorganization of the Forces of the Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Secret letter, HHD to TAG, 25 February 1941, subject: "Reinforcements for Hawaiian Department", file AG 320.2/58.

B. Secret radio, TAG to HHD, 19 April 1941, 744-18th and reply thereto, HHD to TAG, 22 April 1941. AG 325/18-18a.

C. Secret letter, HHD to TAG, number 2645-18, dated 18 April 1941, in connection with Medical Department Enlisted Reinforcements. On file in Department Surgeon Office.

2. It is recommended that authority be given this headquarters to organize the present Hawaiian (Square) Division into two (2) separate and independent Triangular Divisions. Under War Department, tables of Organization, No. 70, dated November 1, 1940, current shortages exist in both personnel and material but it is believed that a desirable reorganization can be accomplished without increases in present strength other than the expansion of certain units as requested in my References A, C, and D, and requested reinforcements to organize a Reconnaissance Troop in each of the proposed Triangular Divisions. In paragraph d, Reference A, I requested the necessary reinforcements to organize the Infantry Regiments of the Hawaiian (Square) Division under current War Department, Tables of Organizations, No. 7, dates November 1940, and assuming favorable action on the recommendation, the reinforcements requested herein for the expansion of existing units are in accordance with Reference A. A summary of the proposed reorganization with tables showing personnel shortages hereto as Inclosure No. 1.

3. Primary reasons for this request are as follows:

a. For tactical purposes the Defense of Oahu is conducted in two sectors, they are, the North Sector and the South Sector. Two (2) Triangular Divisions are considered more flexible to accomplish defensive operations in the two separate sectors.

2598 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

b. The proposed reorganizations presents no serious problems as to organization, command, staff and tactical unity.

c. The Hawaiian (Square) Division, as now organized and employed, constitutes a separate channel of command. Due to present organization it is less flexible than the proposed two (2) Triangular Divisions and also retards the prompt execution of missions requiring the employment of one or more units of the Division in coordination with units of the other echelons under the control of the Department Commander.

d. As now constituted the land defense is assigned to the Division Commander as the Beach and Land Defense Officer, with the result that it permits the Department Commander to play no part in the defensive action, if and when, the air and coast defenses are knocked out.

4. National Guard and Selectee Units.

a. It is proposed to assign one of the two National Guard Infantry regiments now in Federal Service to each of the Triangular Divisions.

b. If the two National Guard Infantry regiments now in Federal Service are demobilized upon completion of one year's training and the Department's full yearly quota of three thousand (3,000) selectees are authorized, then it is planned to form two Infantry regiments from the selectees and assign one selectee Infantry regiment to each of the Triangular Divisions. See Reference B.

c. Should the two (2) National Guard regiments now in Federal Service and two (2) tentatively planned selectee regiments be in Federal Service at the same time then, it is planned to assign one selectee Infantry regiment to each of the Triangular Divisions and one or both of the National Guard regiments to defense missions on the Outlying Islands or retain one National Guard regiment as a Department reserve unit on Oahu.

d. By employing one National Guard regiment with each of the Triangular Divisions it will forestall an expected request for a Brigade organization of the two Hawaiian National Guard Regiments.

5. Station Compliments

a. Schofield Barracks.

(1) It is recommended that a Brigadier General be assigned to Schofield Barracks for duty as an administrative Post Commander and that he be provided with a staff and commissioned assistants, warrant officer, nurses, enlisted men and civilian employees as shown in Inclosure No. 2, attached hereto, which lists the net minimum requirements desired in addition to permanent personnel now on duty at Schofield Barracks and not assigned to units of the present Hawaiian (Square) Division.

b. Fort Shafter.

(1) It is recommended that a Lieutenant Colonel be assigned to Fort Shafter as the Administrative Post Commander and that he be provided with the officer and enlisted Station Complement personnel as shown in Inclosure No. 3, attached hereto. The necessity for a station complement for the post of Fort Shafter is predicted upon operational missions of its garrison, the 64th Coast Artillery (Antiaircraft) regiment. When thus employed the regiment is absent from its station and because of post and administrative requirements is deprived of its maximum fighting strength. It is believed this serious handicap could be eliminated by employment of a Station Complement at Fort Shafter.

c. Station Complements are not requested for stations under control of the Hawaiian Air Force and the Hawaiian Separate Coast Artillery Brigade for the following reasons:

(1) Hawaiian Air Force: The duties of units of the 18th Bombardment Wing (Hickam Field) and the 14th Pursuit Wing (Wheeler Field) necessitate maximum operation, maintenance and control from Air Fields under the control of the Wing Commanders and from which the Post Administrative Staff and enlisted assistants will not be moved. With full consideration of the anticipated complement of three hundred (300) airplanes, no need for Station Complements exists.

(2) Hawaiian Separate Coast Artillery Brigade: Practically all of the field operational functions will be performed in the vicinity of the permanent station and no necessity for Station complements is considered except for Fort Shafter, as noted above.

6. After preparation of this letter, your 1st. Indorsement to our reference A was received. This request is being forwarded with a view of having it available for reference in the War Department, under the following conditions:

a. That this communication with its request for reinforcements as listed in Inclosure #1, be given reconsideration at the earliest date it is practicable to provide the reinforcements requested.

b. That authority be granted me to reorganize the present Hawaiian (Square) Division into two (2) Triangular Divisions by using the present available personnel and material. This can be accomplished in accordance with the last of your paragraph 3, 1st Indorsement, dated April 11, 1941, to my Reference A.

7. Organization of Air Defense Command.

a. In order that maximum coordination in all activities pertaining to the Air Defense of Oahu may be accomplished, I propose to create an Air Defense Command to be commanded by the Commanding General, Hawaiian Air Force, who will continue control of the 18th Bombardment Wing. I propose to constitute the Air Defense Command as follows:

- (1) Commanding General, Hawaiian Air Force.
 - (a) Headquarters and Staff, Hawaiian Air Force.
 - (b) 18th Bombardment Wing.
 - (c) Air Defense Command.
 1. Aircraft Warning Service.
 2. 14th Pursuit Wing.
 3. Antiaircraft Artillery Brigade.

b. In the organization of an Air Defense Command no interference with normal antiaircraft training is contemplated. Only while actually performing operational missions is it planned to place the antiaircraft Artillery under the control of the Air Defense Commander. Furthermore, no increase in the numbers of the Staff of the Hawaiian Air Force is believed necessary in order to create an air defense Command for this Department. It is planned to have the Commanding General, Hawaiian Air Force, and his staff also perform the duties of the Commander and the Staff of the Air Defense Command. In order to avoid divided responsibilities due to the dual missions now required of some beach defense batteries, no action will be taken to form an Air Defense Command until the first increment of the antiaircraft artillery reinforcements, described in secret radiograms War Department, 25 and 26 April, 1941, have been received.

c. An Air Defense Command for the Hawaiian Department is believed peculiarly adaptable to this theater and will best meet the needs for defense against attacks from the air.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

AG 320.37/37B

5 June 1941.

Subject: War Garrison for Initial War Operations.
To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Secret Radio, TAG to HHD, 29 May 1941, 837-29th.

B. Secret letter HHD to TAG, 25 April, 1941, subject: "Reorganization of the Forces of the Hawaiian Department", file AG 320.37/37.

2. In compliance with instructions contained in Reference A, the composition of the war garrison for initial war operations has been studied. Table I herewith, shows the forces recommended, totaling 59,425 officers, warrant officers, nurses, and enlisted men, but not including the civilian employees now shown in Table I, par. 7, HDP-40.

3. The proposed war garrison consists of the following major units:

a. Two Triangular Divisions, less reconnaissance troops, with the Infantry and Signal Corps personnel at reduced strength.

b. Corps troops consisting of a light tank battalion, the existing 11th Ordnance Company, Division Pack Train, and Co. A, 1st Separate Chemical Battalion, and the recently authorized 34th Engineers, Combat, and the 804th Engineer Battalion (Avn.).

c. The Hawaiian Air Force with service elements at present strengths.

d. Harbor Defense Coast Artillery as now provided in the approved defense project reduced by the personnel required to man three fixed seacoast mortar batteries and three 155-mm GPF batteries.

e. Antiaircraft Artillery with no reduction from the approved defense project.

f. Service, elements, with reductions in the mobilization strengths as shown in par. 7 HDP-40, and with many units entirely eliminated.

4. (a) The necessity for the defense of existing military air fields on the outlying islands of the Hawaiian group, together with the recently assumed responsibility for the defense of the Naval Air Station at Kaneohe, Oahu, directed by secret letter WD to HHd, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H.", file AG 381 (3-13-41) M-NPD, and provision of a suitable mobile reserve for the beach and land defense of Oahu are three vital missions which can not be performed with any degree of success with an initial war garrison of approximately 59,000 troops.

b. The 299th Infantry recently has been transferred from Oahu to the islands of Hawaii, Kauai, Molokai, and Maui for the defense of air fields, thus leaving the proposed North Sector division short one Infantry Regiment.

c. Plans for the defense of the Naval Air Station at Kaneohe, now in preparation in this headquarters, indicate the minimum increase in the war garrison for this mission will include the following:

1 Regiment Infantry.

1 Regiment Field Artillery, 155mm How., truck drawn.

1 Battalion C. A., 155mm guns plus one additional battery.

1 Regiment C. A., (AA), (semi-mobile) (less one gun battalion).

1 Battery C. A., 12-inch barbette guns.

d. Assuming that two Infantry regiments will be furnished, one to replace the 299th Infantry and one for the defense of Kaneohe Bay, it is believed that the

mobile reserve for the beach and land defense should be comprised of the light tank battalion now included in Table I herewith, and Infantry units detached from one or both of the triangular divisions recommended in Table I herewith.

e. It is therefore urgently recommended that the strength of the war garrison for this department be increased from approximately 58,000 to approximately 70,600 men so as to provide the following unit reinforcements from the mainland, not now shown in Table I herewith:

2 Infantry Regiments, T/O 7-11 Nov. 1, 1940-----	8, 898
1 Regiment F. A. 155mm How T/O 6-41 Nov. 1, 1940-----	1, 733
1 Regiment C. A. (AA) Semi-mobile (less 1 gun bn) T/O 4-111 Nov. 1, 1940-----	1, 797
1 Bn C. A. 155mm guns, w/1 additional gun btry, T/O 4-35 Nov. 1, 1940-----	694
1 Btry C. A. 12-inch barbette guns, T/O 4-67 Nov. 1, 1940-----	157
Total-----	11, 279

5. Reference is invited to par. 5 and inclosures 1 and 2 of reference B in which it was recommended that station complements be provided for Schofield Barracks and Fort Shafter. Table I herewith includes provisions for the Quartermaster Corps, Finance Dept., Medical Corps, Signal Corps, and Ordnance personnel required for these station complements. It is highly desirable that the war garrison be increased sufficiently to provide the complete station complements for these two stations, an increase of 731 officers and men for Schofield Barracks and 131 officers and men for Fort Shafter.

6. Summarizing, in Table I herewith the war garrison for this Department has been reduced to a strength of 59,425. To provide a mobile reserve for the beach and land defense of Oahu, and to defend the Naval Air Station at Kaneohe and military air fields on outlying islands, an increase to approximately 70,600 officers and men is essential. A further increase of about 860 officers and men is highly desirable to furnish station complements for Schofield Barracks and Fort Shafter. I therefore recommend that the war strength of this command for initial war operations be fixed at approximately 71,500 officers and men.

7. Recent operations in Europe, particularly the failure of the British to hold the island of Crete, indicate the vital importance to the defense of Oahu of the nearby air fields on the other islands of the Hawaiian group. Hostile use of any of these air fields, considering modern methods of air warfare, would be extremely hazardous to the defense of Oahu. While not yet included in the war garrison recommended for this Department, it is probable that in the near future, plans will be submitted for the garrisoning of each of the outlying islands by a force consisting of approximately one regiment of Infantry and a composite battalion of Field Artillery.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

ESA

WAR DEPARTMENT, A. G. O., July 22, 1941.

To: Commanding General, Hawaiian Department.

1. The war garrison recommended in paragraph 2 of the basic communication, totalling 59,425 officers, warrant officers, nurses and enlisted men, reduced to 57,249 as shown in inclosure 2, and augmented by the following units for the defense of Kaneohe Bay:

1 Regt CA (AA), semi-mobile (less one gun Bn, band and basies)-----	T/O 4-111	11-1-40----	1, 590
1 Bn CA 155 MM Guns with 1 addit. gun btry-----	T/O 4-35	11-1-40----	694
1 Btry CA-----	T/O 4-67	11-1-40----	157
Total-----			2, 441

is approved. Paragraph 7, HDP-40 will be amended accordingly.

2602 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

2. The recommendation contained in paragraph 6 of the basic communication to establish a war garrison of 71,500 officers and men for initial war operations in your department is not favorable considered. Troops in excess of the 59,690 authorized in paragraph 1, above, will be sent to Hawaii only in case the situation develops a need therefor and provided such additional troops can be made available in connection with other requirements.

By order of the Secretary of War:

(Signed) E. S. ADAMS,
Major General,
The Adjutant General.

[Exhibit 1M]

2 MAY 1941

AG 320.3/38

Subject: Organization of Antiaircraft Artillery Brigade.

To: The Adjutant General, Washington D. C.

1. References:

A. War Dept. Secret Radio No. 739, 24 April 1941.

B. War Dept. Secret Radio No. 760, 26 April 1941.

C. Letter CO, RECAB to CG, Reun. Dept, dated 16 April 1941, subject: "Constitution and Activation of Antiaircraft Intelligence Battery," forwarded to the War Department by 1st. Indorsement dated 21 April 1941, file RECAB 320.3, IHD 320.3/36.

D. Letter FED to TMG, subject "Reorganization of the Forces of the Hawaiian Department", dated 25 April 1941, file 320.3/37.

E. Letter VD to FED dated 2 April 1941, subject: "Coast Artillery units for Hawaiian Department", file AG 3GC.2 3G26-41_M (Ret) M-C. —D 320.2 straight Misc.

2. Upon the arrival of the first increment (Ref. A) of the war reinforcements of the Antiaircraft Artillery Garrison of this Department in June 1941, the organization of the Antiaircraft Artillery Brigade will be required. This brigade will be composed of all Antiaircraft Artillery Units in the Department except the one or two batteries of harbor defense artillery regiments which still have dual assignments to harbor defense and Antiaircraft Artillery missions. The organization of this brigade is mandatory not only because of the strength of the units involved but also because of the organization of the Air Defense Command (Reference D) this brigade will be required to function independently of the Hawaiian Separate Coast Artillery Brigade for tactical operations and in training therefore.

3. It is proposed that the Antiaircraft Artillery Brigade, Hawaiian Department, will be organized as follows:

53rd C. A. Brigade (AA) (RRF.N.).

Hq. and Hq. Btry, 53rd CA Brigade (Ref.H.).

Intel. Btry, 53d CA Brigade (T/O 4-08 (a) HAD) (Ref. C & R).

64th C. A. (AA)

251st. C. A. (AA)

"Tch" CA (AA) semi-mobile (less 3d Ea) (Ref. A)

"Eth" Rs, AA gun, semi mobile (less searchlight battery and one gun Battery) (Ref.A); to be expanded into the "8th" Regt. upon arrival of the remainder of the reinforcements (Ref. B)

4. Accordingly it is recommended that:

a. Authority be granted to activate the Hq. and Hq. Btry, 53d CA Brigade (T/O 4-10-1, 1. Nov. 40) and the Intel. Btry. 53d. CA Brigade (T/O 4-06 (c) New), on or about 1 June 1941.

b. A brigadier General be assigned to this Department to command the 53d CA Brigade.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

WAR DEPARTMENT, A. O., June 12, 1941.

To: Commanding General, Hawaiian Department.

1. You are authorized to activate the Headquarters and Headquarters Battery and Intelligence Battery, 53rd. Coast Artillery Brigade, within the recently authorized organization of Coast Artillery garrison, Hawaiian Department, by 1998 filler replacements. No additional personnel can be made available at this time.

2. It is desired that the date of activation of these units and report showing the allotment to units of grades and ratings of your present allotment, Coast Artillery Corps, to include these units be furnished this office.

3. Separate action will be taken on the allotment of additional grades and ratings and on the recommendation to assign a brigadier general to the Department.

4. Table of Organization 4-06 (S) (HAD) is approved as submitted, and is being reproduced and distributed.

TALK GIVEN BY GENERAL SHORT TO CHAMBER OF COMMERCE ON ARMY DAY

GENTLEMEN:

I am especially pleased to be able to come before this representative gathering of Honolulu business men on the occasion of the celebration of Army Day. Today our military establishment is being brought closer to the view of the general public throughout the entire United States by exhibits and various demonstrations, in order that the people may become better acquainted with some of our equipment, methods and procedures, and now I am afforded the opportunity of discussing some of our plans which will demand close and active cooperation on the part of the civil community and by various departments of your civil government.

You are all aware of the tremendous effort being expended by industry, labor and all departments of the government toward the accomplishment of a gigantic program of national defense. While there are many evidences of this activity here in Hawaii, through defense projects being carried on both by the Army and by the Navy, the tempo of action has not reached as deeply into the private life of the average citizen as has been the case in many cities on the Mainland. Conditions are changing overnight and procedures and practices of today may be changed by the plans and activities of tomorrow. None of these matters are being handled, or even considered, in the light of actual warlike moves nor with any feeling of hysteria, but simply as carefully considered plans which are to be effected for the future security of each and every individual, including the youngest child and the oldest adult, of our nation.

I have been asked many times what the community can do to assist National Defense. The following items are of prime importance:

- (a) Production and storage of food.
- (b) Organization of doctors and nurses for care of injured and wounded.
- (c) Organization of an auxiliary to the police force to guard utilities and prevent sabotage.

(d) Preparation of plans and making of provisions for evacuation of women and children and preparation of shelters for workers in vicinity of essential industries.

These islands are in no way self sustaining in the matter of food. This is due not to lack of fertility of your soil but to your specialized agriculture.

All of you are vitally interested in the food supply of these islands. In any emergency, which might include the possibility of a disruption of communications with the Mainland, a most important safety measure would be to begin at once the planting of basic food crops which are known by actual practice to be the most easily grown in this soil and climate. Such produce might include sweet potatoes, string beans, lima beans, Chinese cabbage, peanuts and some other local varieties of vegetables. The plantations have done important development work and are prepared to produce these articles in quantity should the necessity arise. An immediate increase in the stocks of such items as rice, flour, canned milk, fats and oils would be a great safety factor and with rising prices is sound economy. Shortage of storage for the food shipped in is now a problem. This condition can be materially alleviated if housewives will well stock their cupboards with non-perishable items. This action would operate to clear needed space on retail and wholesale merchant's shelves for further storage of additional foods. This plan is good present day economy because of steadily rising food prices. There is at present a plan on foot for the construction of large warehouse storage by government subsidy and I believe that this plan should have the support of us all as a defense measure. In the pursuit of this project speed is all important.

Along this same thought I read with much interest in the local press of March 19, 1941, an item which referred to the possible repeal of the personal property tax which so greatly affects the merchant or importer who desires to cooperate in holding large stocks of food available in his warehouse or store. I would like to voice my approval to such an Act, or other similar legislation which would freeze the tax for any corporation or individual at an amount not to exceed that paid in the past year. This would make it possible for more adequate and plentiful stores of food stuff to be maintained without imposing a hardship on any individual or organization.

It is further important that the local fishing fleet be kept in operation, as it supplies a very large proportion of our daily subsistence. Increased cold storage for meats should be provided. Existing dairy herds on Oahu should be conserved and feed stored.

In the general defense measures for these islands there is no civilian effort of higher importance than preparedness now for an adequate food supply for all the people in time of emergency.

The preparation of your emergency medical service in the case of an extreme emergency such as an air attack or actual assault upon the city is of vital importance. The functions of the military forces under such conditions or control, would be to take measures to insure that civilian agencies, expanded as required, continued to function and not to displace them by a military operating agency. It is therefore definitely necessary that prompt action be taken to organize your medical service into the maximum possible number of teams with mobile equipment capable of being rapidly moved from place to place and set up in existing buildings. Staffs of doctors, nurses, technicians, and others required for the stations should be selected and trained and be ready at any time for immediate duty.

Adequate initial medical supplies for these stations should be obtained, classified, packed, and stored in a manner making them readily available. Necessary vehicles must be on hand by loan or otherwise. Suitable trucks, of the delivery type, for rapid conversion to use as ambulances should be listed and obtainable at once. Necessary personnel for the immediate expansion of hospitals properly located to the extent at least of the porches, dayrooms, etc., should be listed by each. All of these preparations should be accompanied by the preparation of shelters, from air attack, of the best types available. Suitable buildings should be selected to replace hospitals in the zones of probable bombardment. Preparations of this nature should be made in cooperation with the Red Cross.

The organization of a force of ex-service men to supplement the police force in guarding utilities and preventing sabotage I understand is under way. This move

will release troops for defense purposes. Consideration should be given to the employment of the R. O. T. C. of the University of Hawaii for the same purpose.

Here in Hawaii we all live in a citadel or gigantically fortified Island. Many residents have their homes well within the limits of actual military fortifications, docks, arsenals or many other types of legitimate military targets. Should we ever be faced with a military operation by any enemy against this island (which we fervently hope may never come true), the residents in these areas must be cared for and protected. Plans for such care and protection quite properly come under the jurisdiction of your civil governmental agencies, and I believe these should now receive careful, detailed and mature consideration. I repeat that these matters are not to be viewed with alarm or hysteria, but simply as defense projects and exactly in the same classification as any of the present housing activities which you see around you every day. If you, as civilian organizations, are making plans for adequate warehouse and pier space for the handling of defense materials should you not give some degree of the same effort toward the security and protection of your families from any possible contingency? I believe that you already have a Defense Committee, under the leadership of the Governor of the Territory and the Mayor of Honolulu which has given, or is about to give, some consideration to these matters, and I advance, for the consideration of this committee, some of my ideas on this subject.

There has been considerable information in the New York newspapers as to the plans which are being formulated and discussed by the Mayor of that city for the protection of its inhabitants from any possible air raids. Elaborate measures have been suggested for shelters, fire protection, and other phases of which you are well aware. It is my suggestion that some such plans be initiated for the city of Honolulu. My belief is that any such proposals should be considered not only from a possible wartime condition but also with a view of fitting into the plans for the expansion, betterment and improvement in the civil facilities. In other words, why should we not make plans which will not only form the nucleus for protective measures and which will, at the same time, furnish additional recreation centers for our civil and military population. My plans envision a recreational center for each precinct, or perhaps smaller section of the city, which would be located somewhere in the highlands away from military targets. There might properly be selected by the Forestry Service, the City Planning Commission or other appropriate body. These camps would be located where a source of fresh water is available, some degree of natural shelter and with a view of accessibility. Here would be installed, in the following order of importance, water, sanitary facilities, outdoor grills and other cooking installations, and mess halls. The Forestry Service, National Parks Administration, and the CCC have already had considerable experience in the construction and laying out of such installations as many such recreational camps already exist on the Mainland. You yourselves have seen some of the results of these activities in your National Park on Hawaii.

Thousands of you people spend your hours of leisure and recreation at the beaches. Why would it not be feasible as well as healthful to divert a portion of such time to comfortable and attractive camps in the hills? Forming the habit of such excursions to adequate and well planned camps would accomplish a dual purpose in establishing not only additional recreation features but at once establishing the basis for evacuation camps should they ever be required in the future.

In case of actual hostilities, which involved this community, all able-bodied males would be utilized by industry or by the military services in one manner or another. Normal business routine would be continued to the greatest extent possible. Any evacuation camps would thus be dedicated to the use of women, children, and male citizens who would not be qualified for other duties. The Army has definite plans to go ahead immediately on the construction of similar camps for the use of the families of Army personnel should such an occasion ever demand that drastic action. In the meantime the camps will be utilized as recreation centers by all of our personnel.

I take this opportunity of laying before you the foregoing plan as deserving your consideration. I believe the evacuation of the women and children from the area of probable bombardment the most essential and difficult problem confronting the community. Without advance planning the greatest confusion and loss of life might result.

I again repeat that the foregoing suggested plans are to be considered as important defense measures with the same priority as given other defense plans. They are not to be thought of as indications of any immediate pending threat, but rather as carefully considered measures to safeguard our homes and families

2610 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

in case of any future dangers. The bill now before the Legislature creating a major Disaster Relief Department, if enacted, will put you in a position to complete these plans and preparations. The Army is ready to do all within its power to help you and you must feel free to call upon us for advice at any time.

My thoughts have been expressed to you quite frankly, as I believe we must understand each other on all questions and work out our common plans together. Army Day was inaugurated with such an ideal as its basis and I am pleased to have had this opportunity of bringing before you some ideas and suggestions which may have material work to you now and in the uncertain days of the future.

I thank you.

[1]

[Exhibit 1P]

CHRONOLOGICAL NARRATIVE OF ACTIONS TAKEN BY LIEUTENANT GENERAL WALTER C. SHORT IN CONNECTION WITH PREPAREDNESS OF THE CIVIL POPULATION TO MEET A FOOD EMERGENCY IN HAWAII.

- Item No. 1 Letter from General Short to Governor Poindexter, re storage facilities for Food Supply. General Short states that after a conference with a civilian committee on food supply and facilities for storage, he is in hearty accord with action taken to date. He feels strongly that the problem is of vital interest to both the civil population and the military. The civil authorities should take the initiative for their own supplies, and their actions will receive his utmost support. (See Inclosure No. 1).
- 21 Mar 41
- Item No. 2 Letter from General Short to War Dept. asking authority to issue invitations for purchase of Irish potatoes grown in Hawaii, stating serious problem of food supply under emergency conditions, and stating his objective is to stimulate continuous Irish potato production in Hawaii. (See Inclosure No. 2).
- 4 Apr 41
- Item No. 3 Radio from Gen. Short to War Dept. referring to his letter of 4 April 41, and asking priority radio advice as soon as decision has been reached. (See Inclosure No. 3).
- 12 May 41
- Item No. 4 1st Indorsement to Gen. Short's letter of 4 April 41, from War Dept., granting authority to contract for Hawaiian-grown potatoes, providing price does not exceed 2¼¢ per pound. (See Inclosure No. 4).
- 2 May 41

[2]

- Item No. 6. Memo to Board of Directors, Honolulu Chamber of Commerce from the Executive Secretary, John A. Hamilton:
- 5 May 41
- 1. Prior to April 7, 1941, there was very little buying of food supplies for emergency use. However, on April 7, Lt. General Walter C. Short, Commanding Officer of the Hawaiian Department, United States Army, suggested the desirability of purchasing additional food supplies for use during a possible emergency.
- 2. Beginning with April 7, the consumer began to purchase additional food supplies in quantities ranging from an extra can of milk to as much as \$800.00 per family as reported by one retailer. Retail merchants report that 20 to 30 per cent of their customers have purchased additional food supplies in the last 30 days. This means that the retailers' stocks on hand would be depleted rapidly.
- 3. It would be expected that the retailer, when food stocks are moved rapidly from the shelves as a result of heavy consumer purchases, would reorder quickly from the wholesaler or the manufacturer. This has been done. In fact it would appear that retailers have increased their purchases by 20 to 25 per cent above normal.
- 4. Wholesalers generally support the report of the retailers with regard to the increase of consumer buying as reflected in the increase in the buying done by the retailer from the wholesalers.
- 5. Of the three wholesale firms visited, two reported large stocks of foodstuffs on hand as a result of additional warehousing space secured to care for the additional demand and the prospective needs in the event of an emergency. Also these firms report a satisfactory replenishment of stocks although additional time is required to get merchandise from the manufacturers to the docks in Honolulu.

Note. The direct result of Gen. Short's public address of 7 April 1941 was to increase the supply of food in storage in Hawaii from 20 to 35%.

[3]

Item No. 7 In a published statement prior to a general meeting of agriculturists thru-out the islands at the University of Hawaii, Gen. Short said, "All efforts to increase local food production are steps toward increased security for Hawaii".

16 June 41

Item No. 8 At an address to the University Assembly on Aug. 13th Gen. Short stated:

13 Aug 41

"Among defense projects which I have publicly emphasized has been that of the home production of food to sustain the civilian population during an emergency. I regard this project of local food production as of primary importance to the defense of Hawaii."

"So far as food supply is concerned, the military organization here is self-sufficient as to its reserves of essential items. It will look after itself in time of war, and it is now projecting food production on military reservations to supply its needs—so far as is practicable.

"I have also supported shipping priorities for all foods—cattle, dairy and poultry feeds, as well as food for human consumption. This support includes farm machinery which is important for large-scale crop production."—(From the Honolulu Advertiser, 14 Aug 41)

Item No. 9 Copy of radiogram from Delegate King to Gov. Poindexter stating the War, Navy and State Departments and the Budget Bureau were lukewarm in their interest in procuring food reserve stocks for Hawaii. (See Inclosure No. 5 attached).

16 Sept 41

For reply to Delegate King, stating Gen. Short's continued support, see Inclosure No. 6.

[4]

Item No. 10 The Food Production Plan for Hawaii was formally presented in complete form to the Directors of the Hawaiian Sugar Planter's Association and accepted by them as the basic operating plan for local production of food crops, cattle and dairy products. This plan covers production not only of Oahu but of all the out-islands as well, setting up acreage and crops allocations to plantations, both sugar and pineapple, which were accepted by them as defense requirements. Small farmers were included in the plan as well. Seed requirements were set up; as well as insecticide, fertilizer and machinery requirements for producing crops sufficient to sustain the entire population for six months.

23 Oct 41

This plan was based on the Army plan and was supported and urged thru-out by Gen. Short. It is now in operation in its initial phases as planned. Gen. Short arranged for the procurement of all seed, insecticides, fertilizer and machinery for harvesting this crop, as well as arrangements for procuring the necessary priority allocations of shipping space required. (See Incl. No. 7.)

Item No. 11 Letter from Gen. Short to War Dept., stating that the project of the Emergency Food Reserve for Hawaii which failed of approval by the Bureau of the Budget should be brought up for reconsideration, and asking the support of the War Dept. when it comes up. (See Inclosure No. 8.)

3 Dec 41

Item No. 12 Letter from Gen. Short to Gov. Poindexter, stating that he has always regarded a reserve food supply as of primary importance in defense plans, giving supporting data, and asking the Governor to obtain an inventory of food on hand in the Territory, in order to support his request for an emergency reserve food supply. (See Inclosure No. 9.)

3 Dec 41

Item No. 13 Radiogram from General Short to War Dept. stating in detail the immediate requirements of food, seed, livestock feed, farm machinery, insecticides and fertilizers, including shipping space required, for current civilian needs. (See Inclosure No. 10.)

14 Dec 41

[5]
Item No. 14 WD Radio #685, 17 Dec. 41 "Shipment of Food for Civilian Population".

17 Dec 41

2612 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

In reply to Haw'n Dept. radio #1182, the War Dept. states food will be procured and delivered to civil authorities in Hawaii, first shipment to leave within one week, second shipment following week; every effort to be made to provide critical items indicated by the radios of Gen. Short and of the Governor. (See Inclosure No. 11.)

As a direct result of Gen. Short's letter to the War Department of December 3, 1941, the attached radiogram (Inclosure No. 11) from the War Department, dated December 17, 1941, was received, indicating the immediate shipment of the Food Reserve Supply to Hawaii.

While Gen. Short was not asked for letters of support for certificates of necessity for the construction of storage for the Emergency Food Supply because this was not needed, he has consistently supported such construction, both by the Hawaiian Pineapple Co. for the dry storage, and by the Oahu Ice and Cold Storage Co. for the refrigerated storage.

When the Emergency Food Reserve was turned down by the Bureau of the Budget Gen. Short stated publicly that storage completed, or under construction for the Emergency Food Supply would be specifically reserved for the purpose for which the certificate of necessity was granted by the War Dept.

At present the warehouse space of the Hawaiian Pineapple Co. is ready, and that of the Oahu Ice and Cold Storage Co. will be ready in the very near future.

The Civilian Food Administration, as planned by Gen. Short, is now in full operation under Governor Poindexter's Council of Civilian Defense, which in turn is affiliated with the National Office of Civilian Defense.

Civilian authorities of the Food Administration freely acknowledge the impetus of Gen. Short's consistent urging of plans to implement the Food Administration for an emergency, so that it has been able to get into operation without delay on the basis of plans set up by the Army.

Enclosure No. 1.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., March 21, 1941.

Honorable JOSEPH B. POINDEXTER,
Governor, Territory of Hawaii, Honolulu, T. H.

MY DEAR GOVERNOR POINDEXTER: Mr. H. H. Warner and Mr. Richard Kimball, acting as your committee on emergency food storage, conferred with me March 19th relative to storage facilities and food supply, and the adequacy in general of the supply of food stuffs during any emergency in which incoming shipments might be curtailed. The conference included the action taken to date to obtain storage facilities, including their meeting with local importers and bankers, the action taken by Delegate King, and your radiogram of March 18th to Delegate King. I assure you that I am in hearty accord with the action taken to date and am in full concurrence therewith.

I strongly feel that the problem of assuring the civil population an adequate supply of food stuff during any emergency in which incoming shipments might be curtailed or cut off is of vital interest both to the civilian community and the military. I believe that the civilian community should take the initiative as this problem is primarily and initially the concern of the civil authorities. However, the military cannot be divorced of its concern in this problem as it is relatively of equal vital interest to the military. Any action which you may take to insure such an adequate supply of food for the civil population will be concurred in by me and have my utmost support.

With kindest personal regards,
Sincerely,

WALTER C. SHORT,
*Lieutenant General, U. S. Army,
Commanding.*

Enclosure No. 2

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 4 April 1941.

[1]

Subject: Authority to Issue Invitations for Purchase of Irish Potatoes Grown in Hawaii.

To: The Adjutant General, U. S. Army, Washington, D. C.

1. In view of the present military situation it is of high importance to increase the local production of food within these islands so that they may become self-supporting.

Hawaii at present imports 85% of its food supplies from the mainland. In the event of an interruption of communications the sustenance of the civil population would become a serious problem. Under certain conditions the solution of this problem becomes a mission of this Department.

In view of these conditions it is believed that the subsidizing of local food production by governmental agencies is entirely justified as an emergency defense measure provided that the increase in cost to the government is not unreasonable.

In this connection attention is invited to Radiograms (381) this Headquarters, to the Quartermaster General, 22 and 23 August 1940, and to his reply thereto of 26 August 1940, authorizing this Department to contract for Irish potatoes under conditions as set forth in 1st Indorsement, W.D. -OQMG, July 5, 1938; and to related correspondence over the past four years.

2. Under the authority above quoted 1,929,000 pounds of Hawaiian-grown Irish potatoes have been contracted for delivery during February, March and April of this year at an average cost of \$.025 per pound. Mainland-grown potatoes were delivered to the Navy during this period at an average of \$.018 per pound. Therefore, the project of Irish-potato growing in Hawaii for the purpose of increasing local food production as an emergency defense measure was carried out in this case at an increased cost to the Army of \$.007 per pound, or approximately \$13,500 for the total project in terms of money. It is believed that this differential would hold good as an average throughout any year until growers have established a year-around crop when the spread would become less. Actually, the wastage on Island-grown potatoes is nil for shrinkage, loss of weight or spoilage such as occurs with mainland potatoes in their shipment to Hawaii. This fact materially reduces the differential cost to the government as above indicated. The increase in cost is considered justified as a safety defense measure to assure the future expansion of the local crop. This can be accomplished only by this assurance to the grower of the return of his cost of production. Sugar planters—who provide the bulk of the production, are entirely willing to go along on this project and break even.

3. The efforts of this Department during the past year have directly resulted in the increase in production of 1,242,086 lbs of locally grown Irish potatoes over 1940.

4. It is believed that for a part of the first year Island production will not be able to meet the requirements of the Army for Irish potatoes, but the project is still considered well worth the added cost to the government during the period that the requirements can be met. Local producers feel that they can quickly build up the industry to a point where Hawaii can meet the demand throughout the entire year.

5. It is now proposed to stimulate continuous Irish potato production in Hawaii. For this purpose authority is requested to contract for Hawaii-grown Irish potatoes for the fiscal year 1942, for monthly or quarterly periods, or for periods of six-months, or for one year as seem most likely to accomplish the purpose at the time of the offering.

Subject: Emergency Reserve Food Supply for the Civilian Population of Hawaii.
To: The Adjutant General, War Department, Washington, D.C.

1. The present military situation in this area has engendered a strong feeling among the civil authorities that the project of the Emergency Food Reserve for Hawaii which has lately failed of approval by the Bureau of the Budget, should

be brought up again at this time for reconsideration based on new data to be presented.

2. It is my feeling that this project should be progressed as a sure way to meet any food shortage with which the Territory may be confronted in emergency, and for this reason I have written a letter to the Governor of Hawaii in support of this project. A copy of this communication is enclosed.

3. In view of the necessity of a reserve food supply as indicated above, and in the enclosure herewith, I request the support of the War Department for this project when it comes up for reconsideration by the Bureau of the Budget.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

1 Incl —
Let. Gov. of Hawaii re
food storage dated
12-3-41.

Enclosure No. 9

DECEMBER 3, 1941.

AG-430

Honorable JOSEPH B. POINDEXTER,
Governor of Hawaii, Honolulu, T. H.

MY DEAR GOVERNOR: The present military situation in the Pacific indicates the necessity of advancing certain plans for the care and protection of the civil population of Hawaii in the event of an interruption of normal shipping between the Islands and the mainland.

I have always regarded the accumulation of a reserve food supply for Hawaii as of primary importance in our defense plans, and I have publicly announced this view on appropriate occasions.

I feel strongly that the project for the reserve food storage which has lately been refused approval by the Bureau of the Budget, might well be again advanced at this time.

In support of this view I should like to quote from the annual report of the Diversified Crops Committee of the Hawaiian Sugar Planters' Association transmitting the final Food Production Plan for Hawaii to the Trustees of that organization:

"We think that our year of work on these plans has given us a sufficiently clear understanding of the various phases of the problems of emergency food supply to enable us to express an opinion. And that opinion is, that no stone should be left unturned in the effort to have adequate supplies of essential basic foods stored here against an emergency."

Additionally I should like to quote in part from a radiogram from Delegate King of October 24, 1941, addressed to yourself and to Mr. H. H. Warner of your Emergency Food Commission, on the subject of the refusal of the Bureau of the Budget to approve the Food Storage Plan. This communication was submitted at the time as information to the members of the commission, including the Army representative present.

"Perhaps appeal by Governor addressed to President through Interior Department supported by inventory of specified food commodities and length of time such supplies could meet local needs would help bring about further consideration this program.

"Direct appeal from local administration based on factual data would bring quicker action."

It is apparent from the above that the surety of a food supply during the initial phases of a war situation and prior to any supplementary local food production, can be safely predicated only upon the presence of a reserve of food stored here, and that the chance of getting the approval of the Bureau of the Budget for this project rests largely upon the ability of local authority to submit factual data as to amounts of food currently in Hawaii.

This requirement cannot be met with any degree of accuracy except by data obtained through a physical inventory of food on hand.

It is my feeling that as a matter of safeguarding the public welfare against the coming emergency, the project of a defense reserve of food for Hawaii should be again advanced at this time, and that it should be supported in this case by a factual statement of the amount of food currently on hand in the Islands.

For this purpose it is believed that the local importers and others concerned would voluntarily take an inventory to supply the required data in response to a

2616 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

request from you. It would seem that an appropriate date for this inventory might well be the end of this calendar year to tie in with other legal inventory requirements of the territory, or even sooner in view of the time element involved in assembling the figures.

May I take this opportunity to assure you of my continued wish to be of any assistance in the present emergency.

Very sincerely yours,

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., July 11, 1941.

In reply refer to:
Via "Clipper" Air Mail
Engr. 383

Subject: Protection of the Civilian Population against Air and Other Attack.
To: The Adjutant General, Washington, D. C.

1. Reference is made to radiogram from Delegate Sam King to me, a copy of which is inclosed for ready reference. This radiogram raised questions concerning funds to be allotted to Hawaii under the Lanham Act for the protection of the civilian population against air and other forms of attack. These questions are answered in this letter which is submitted to the War Department in accordance with request in the radiogram. A copy of this letter and all inclosures is being forwarded direct to Dr. C. E. Fronk, in care of Division of Territories and Island Possessions, Department of the Interior. Dr. Fronk is now in Washington as the Governor's representative in this matter.

2. Evacuation camps will be built in units designed to care for 240 people. This size is determined by the capacity of the standard mess hall (Fig. 74, FM 5-35) which will serve 120 people at one sitting. The ideal unit would be built in a quadrangle 100 yards wide by 120 yards long. This arrangement will facilitate guarding against prowlers, contribute to privacy, and shorten average distances between shelters and latrines, mess hall, baths, and wash rooms. See typical layout plan inclosed herewith (Incl. No. 1).

a. This typical layout will be modified as necessary to adapt it to ground forms, streets, etc.; but the general principle of using shelters to form a partially inclosed communal area will be observed.

b. The design has been made extremely simple to permit erection by unskilled labor, and the use of any type of building material. Materials available in local stocks will be used to the utmost to conserve shipping space. Windows and doors are omitted. Occupants will devise curtains to secure such privacy as they wish. It is proposed to construct all units except bath houses and water served latrines without floors initially. If lumber is available, wooden floors will eventually be laid on wooden sleepers. If lumber is not available, floors will be finished with volcanic cinders, crushed rock, or sand stabilized with portland cement if available. If floors cannot be provided, occupants will have to provide themselves with something to stand on.

[2] c. Canec, a locally available product, will be used to the fullest extent practicable. Studding, rafters, flooring, and probably sleepers supporting flooring will have to be imported if not in stock. Roofs will be made from galvanized iron, if obtainable.

d. All structures have been designed to utilize standard sheets of canec, plywood, and standard lengths of lumber.

e. The mess hall is an adaptation of the standard mess hall shown in Fig. 74, FM 5-35. Construction is greatly simplified by omitting doors and windows which permits spacing all studs uniformly 24" on centers (See Incl. No. 6).

f. All other buildings are simple shed construction. See inclosed sketches of shelters, latrines, bath houses, and wash houses. (Incls. 2 to 5).

(1) 960 lineal feet of living room shelters will be provided for each camp. They will be built in lengths which are multiples of 8'. Standard double bunks (Fig. 71, FM-5-35) will be placed 8' apart. (Incl. No. 2). Partitions will be of canec so nailed that they may be easily removed. Occupants will remove and shift canec partitions to give any length room desired.

(2) The same type construction will be used for latrines, bath houses, and wash rooms as in living quarters. Details of interior arrangements are indicated on inclosed sketches. Latrines will be equipped with water closets when a sewer system is available and the necessary plumbing supplies can be secured. Otherwise pit latrines will be used. Running water will be available at all camps. Plumbing will be installed in mess halls, bath houses, and wash houses in the order named as far as available materials will permit.

g. Protection against bombardment will be provided by slit trenches as indicated in the typical layout sheet (Incl. No. 1) when camps are on flat ground. Camps in gulches will be provided with conveniently located alcoves dug into deep slopes.

2618 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

h. Dispensary buildings and administration buildings will not normally be built. In the general instance sufficient space in permanent residences or other buildings will be available for those purposes.

i. Protection of funds and valuables may be made a function of a central administration service. No provision will be made for that in construction plans.

[3] 1. Evacuees will be encouraged to bring small articles of furniture such as mirrors, chairs, hammocks, mattresses, curtains, etc. They will also be encouraged to bring simple hand tools. It is presumed that subsequent to evacuation a systematic collection will be made of abandoned articles required for camp comfort.

3. a. Camp locations have been selected with a view to the following. For locations see Incl. 7.

(1) Utilizing existing roads, utilities installations, and community service units such as stores, post offices, churches, etc.

(2) Avoiding ground at present under cultivation.

(3) Placing a large percentage of evacuees near areas suitable for growing vegetables.

(4) Securing dispersion.

b. The equivalent of 42 units (240 persons each) with a capacity for 10,080 people will be constructed as extensions of existing permanent plantation villages. In addition to this extension many villages will be increased by one mess hall, latrine, bath house, and wash house to permit increasing the number of occupants in the permanent buildings which will be utilized solely as dormitories. Plantation villages in the higher altitudes are usually built on the edges of gulches. The camp extensions will, in the general instance, be sited in these gulches and will vary greatly in size and layout, depending on terrain conditions. These camps will be spread throughout the central valley in areas least subject to probable enemy activity. Distances from Honolulu will vary from 8 to 26 miles. The estimated average distance is about 20 miles. Locations are shown on Incl. 7. These camps will have running water, but will not have sewer connections. The following advantages are characteristic of these units:

(1) Provide a high degree of dispersion.

(2) Sited in excellent locations for protection.

(3) Well located for utilization of occupants in food production.

(4) Adaptable to race segregation which will be desirable to present communal discord.

(5) Can readily be amalgamated with existing village administrations which will facilitate government.

(6) Utilize existing installations.

[4] c. 42 units (240 persons each) with a capacity for 10,080 people will be located at Wahiawa, north of the Schofield Barracks East Range boundary and south of the North Fork of Wahiawa Reservoir. The distance from Honolulu is about 21 miles by Kamehameha Highway. This location offers the following advantages:

(1) Will be an extension of an existing city in areas fairly well supplied with roads.

(2) Can readily be supplied with sewer facilities if materials are available.

(3) Will be included in anti-aircraft defense of Schofield Barracks and Wheeler Field.

(4) Is in an area of rich soil adaptable to utilization of evacuees in food production.

d. 21 units (240 persons each) with capacity for 5,040 people will be located in four valleys leading into the Koolau Range from the evacuated areas. For location see Incl. 7. They will be between 2 and 3 miles of the evacuated area.

e. 21 units (240 persons each) with a capacity for 5,040 people will be located in gulches west of Aiea. For location see Incl. 7. They will be an average of about 13 miles from Honolulu.

4. The projected air-raid shelters are intended to protect 6,000 persons other than military personnel whose continued presence in the danger area is essential to the defense of Oahu. The number is based upon reports submitted by essential governmental agencies, public utilities, and commercial firms.

b. The proposed locations of shelters is shown on the inclosed map of Honolulu (Incl. No. 8). These locations have been determined from reports of probable distribution of personnel submitted by the organization affected.

c. It is proposed to construct the shelters of reinforced concrete and to limit the normal capacity of each shelter to from 10 to 15 persons which can shelter from 16 to 25 people for short periods. However, other materials will be sub-

stituted for reinforced concrete if cement and steel are not available in sufficient quantities. When practicable existing structures will be utilized by increasing protective characteristics. Tunneling will be practicable in some locations. Enclosures 9 to 12 show details of the various types to be used, depending on conditions.

[5] d. The cost of reinforced concrete shelters has been estimated at \$100.00 per person to be sheltered. That is each shelter will cost from \$1,000 to \$1,500. To estimate of unit cost can be made for shelters built of substitute materials. Should shortage of materials limit the number of concrete shelters built, the available funds will be applied to building as many shelters of substitute materials as possible.

e. It is presumed that the shelters provided for personnel essential to defense will be supplemented by private individual shelters and by shelters erected by commercial interests not essential to defense. The costs of these shelters should be borne by the individual.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

HONOLULU T. H., December 22, 1941.

The PRESIDENT,

The White House, Washington, D. C.

SIR: We, the undersigned, representing substantial business and social organizations in Hawaii, and having had for many years in many ways a vital interest in the armed forces stationed in Hawaii, do hereby wish to express our sincere appreciation of the services rendered to this Territory and to our Nation by Lieutenant General Walter C. Short.

We have found him at all times to be most cooperative and furthermore he has exercised a vigorous leadership in causing this community to prepare for an emergency such as exists at present. Almost a year ago he laid out a plan for this purpose and has taken all steps practicable toward carrying out such plan.

General Short's thorough foresight and his forceful presentation of his ideas to our Territorial Legislature, to our local officials, and to our community in general have been very largely responsible for (a) the enactment of a sound "M-Day" Bill; (b) for the provision of a Territorial Guard; (c) for the decision to increase stored food and to produce food; and (d) for the prevention of sabotage. He has shown a correct and a sympathetic attitude toward the problems of the civil community in assuring cooperation of civilians.

He has maintained a high morale in his Command and has conducted "alerts" from time to time. He has proceeded with preparing the troops and with plans, now looking for financing from federal funds, for adequate and safe storage of sufficient supplies and equipment of all sorts for their use in a probable emergency.

We are encouraged by the fact that a committee has been appointed to go into various phases of the entire case, believing that the excellent men you have selected will render a just report, fair to all concerned.

Meanwhile, we wish to express to yourself and to all concerned our high esteem and our full confidence in the character and ability of General Walter C. Short as a citizen and as an officer, whatever his assignment may be. This letter is prepared without the knowledge or consent of General Short or any other officials, merely in our hope that no unwarranted discredit may accrue to the record of such a conscientious and able officer, through adverse publicity or other wise. This concern is in no way lessened by our vital interest in the adequate defense of Hawaii and our Nation.

With very best respects and wishes, we are

Yours very truly,

Lester Petrie, City of Honolulu, Mayor; C. R. Hemenway, President, Hawaiian Trust Co., Ltd.; A. L. Dean, Vice-President, Alexander & Baldwin, Ltd.; Walter F. Honolulu, Hawaii, December 20, 1941.

Lt. General WALTER C. SHORT,
Fort Shafter

DEAR GENERAL SHORT,

Please allow me express my sincere regret that our contact through Civilian Defense Plans has terminated.

It was greatly due to your help and backing that our Civilian Organizations were so far advanced that they were able to function so splendidly during the attack.

You will always be able to recollect that your determination to have our Civilian Groups Prepared saved many lives of our Sailors and soldiers through the organized effort of our Civilian Defense Medical Committee and the many trucks that we had ready to be turned into ambulances at a minutes notice.

Please be assured that you will carry the sincere thanks and Aloha of your many friends here who realizes the distress you saved by urging and helping us to be Prepared.

Yours very sincerely,

[1] [SEAL OF THE TERRITORY OF HAWAII]

TERRITORY OF HAWAII,
Executive Chambers,
Honolulu, 23 December 1941.

Lieutenant General WALTER C. SHORT,
Fort Shafter, T. H.

MY DEAR GENERAL SHORT: Having noted in the public press that an investigation is being made as to the military preparedness of the Army and Navy in Hawaii on December 7, 1941, I believe it appropriate that I make to you a statement as to the state of preparedness of the civil communities of these Islands for war when they were so insidiously and treacherously attacked on December 7, 1941.

The citizens of the Hawaiian Islands have always appreciated that these Islands were important to National Defense from a military standpoint, but it has been only since your arrival in these Islands on February 5, 1941 that it has been brought home to the civil population the importance of the part it would play in the event of a war in the Pacific. On December 7th, the citizens of these Islands met the hour of their test in such a manner as to make me proud to be the Chief Executive of these Islands. Your foresight in urging the population to prepare to meet the possible vicissitudes of war and the joint efforts of the Army and civil population in planning and preparing for this emergency was magnificently rewarded.

It may be of interest to point out in detail some of the plans and preparations which bore fruit on December 7, 1941:

(1) *The enactment of the Hawaiian Defense Act* by a special session of Legislation called for that purpose. This legislation permits a mobilization of the entire

civil economy of the Islands in the interest of National Defense or in the event of disaster. By virtue of this act, civilian defense was planned and many of its phases were brought to such a point of preparation that they were able to go into action immediately and to function effectively on December 7, 1941.

(2) *The production and conservation of food:* Householders were persistently urged to stock their shelves in canned food. It is estimated that this resulted in increasing the available food supply of the Hawaiian Islands by more than twenty percent. Federal appropriation was requested for procurement and storage for food reserve. This appropriation has, since [2] December 7, 1941, been authorized. By agreement with plantation owners, plans were made for the procurement and storage of seed and the planting of certain large areas with quick growing food crops. Agreements were also made for the growing, in normal times, of those crops not usually grown in marketable quantities. In furtherance of this plan, the War Department was induced to permit the purchase of Island grown potatoes for the use of the Army although the price was above that of mainland potatoes. In anticipation of the receipt of reserve supplies of food asked for in the emergency, the Army supported a certificate of necessity for building an adequate warehouse to meet these needs. This warehouse is now available for the storage of food supply when it arrives.

(3) *The medical facilities* for the care of the injured and wounded during any disaster was one of the first things accomplished by the civilians of these Islands for an emergency. This resulted in mobilizing the entire medical profession of the Islands with all its medical facilities. Approximately three thousand persons were given training and instruction in First-Aid as required by the Red Cross. The persons thus trained assisted in carrying out the arduous tasks of evacuation. Twenty First-Aid units were organized, each unit consisting of personnel of about one hundred and twenty. An ambulance corps of one hundred and forty improvised ambulances were organized. The performance of their tasks by these groups was one of the highlights of the civil defense efforts on December 7, 1941.

(4) *Plans for the evacuation of women and children and the preparation of shelters* for workers in essential industries had reached a high state of perfection on December 7, 1941, and the evacuation of women and children from areas attacked was accomplished in a most admirable manner.

(5) *An auxiliary police force* to guard utilities and to prevent sabotage was organized at an early date in our preparation and it was able to function instantly when called upon to do so on the morning of December 7th. Their work of this force was exceptional and excellent.

(6) *Legislation authorizing a home guard* was enacted at the special session of the Territorial Legislature. It was well planned and so organized that 1400 of such home guardsmen could and were placed on duty thereby relieving members of the Army for other military duty.

(7) *There were many other matters* too numerous to detail here which were planned and accomplished at your instigation. Important among these was the bringing home to the public the urgent necessity for cooperation and public service in times of emergency.

All of the foregoing required tremendous effort on the part of the local authorities, the citizenry and military authorities. All such efforts have been rewarded since December 7, 1941, in that Territorial and City Governments and all phases of the public welfare have overcome all obstacles and have operated smoothly as a direct result of prior planning and training.

It is my belief that the public has confidence in the military and civil authorities. The fact that the Japanese Government has seen fit to inflict a treacherous attack has not in any way diminished the faith of this community in your demonstrated abilities. I wish to state that the magnificent way in which the Territory of Hawaii met its problem in its crucial hour was in a large measure due to your foresight. I am deeply grateful for your efforts on behalf of the Territory.

You are at liberty to use this letter in any way which you see fit.

Very sincerely yours,

(S) J. W. POINDEXTER,
Governor of Hawaii.

HEADQUARTERS HAWAIIAN DEPARTMENT
OFFICE OF A. C. OF S., G-4
FORT SHAFTER, T. H.

ARMY PEARL HARBOR BOARD EXHIBIT No. 2

4A-e

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, August 28, 1941.

EMUEL B. SCHOFIELD, *Special Assistant,*
Bureau of Immigration and Naturalization,
Office of the Attorney General,
Department of Justice, Washington, D. C.

DEAR MR. SCHOFIELD:

The Hawaiian Constructors, a joint venture consisting of the W. E. Callahan Construction Company, Los Angeles, California; Rohl-Connolly Company, San Francisco and Los Angeles, California; Gunther and Shirley Company, Los Angeles, California, and Ralph E. Woolley, contractor of Honolulu, T. H., are working on very important defense construction at Honolulu, T. H. pursuant to Engineer Corps Contract No. W-414-eng-602.

Mr. H. W. Rohl, 8519 Hollywood Boulevard, Los Angeles, California, one of the principal stockholders of the Rohl-Connolly Company, applied to the U. S. District Court at Los Angeles, California on January 15, 1941 for his final citizenship papers which have not, as yet, been issued. Mr. Rohl is possessed of outstanding ability, excellent judgment and resourcefulness for the management of difficult construction work. Some of the outstanding work performed by Mr. Rohl was the construction of the Los Angeles-Long Beach Detached Breakwater, the construction of the Headgate Dam at Parker, Arizona for the Indian Service and miscellaneous dams, tunnels and other heavy construction in the State of California. To date, Mr. Rohl's valuable services have not been available for government defense projects because of his alien status.

The services of Mr. Rohl are of vital importance to the expeditious completion of the aforementioned defense construction project because of his peculiar qualifications and scarcity of qualified supervisory personnel. It is the understanding of this office that Mr. Rohl's loyalty to the United States is beyond question. It is therefore requested that the granting of Mr. Rohl's final citizenship papers be expedited.

Your consideration and cooperation will be very much appreciated.

Very respectfully,

JOHN J. KINGMAN,
Brigadier General,
Acting Chief of Engineers.

HEADQUARTERS HAWAIIAN DEPARTMENT,
Office of the Signal Officer,
Fort Shafter, T. H., 31 December, 1941.

Subject: Aircraft Warning Service.

To: Chief Signal Officer, Washington, D. C.

1. Inasmuch as five out of six radio sets SCR 270 were operating from 4:00 to 6:00 A. M. on 7 December, 1941, and one station, namely the Opana station, remained in operation thereafter until 7:39 A. M., it is believed that the following two inclosures may be of some interest:

2. Inclosure No. 1 is a composite based on the written records of ranges and azimuths kept at the following stations: KOKO HEAD, KAAAWA, OPANA, LA WAILOA, and FORT SHAFTER. Attention is invited to the close agreement of data secured on aircraft north of OAHU between 6:48 and 6:54 A. M.

2624 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. Inclosure No. 2 is the graphical record made on the OPANA station plotting board. This record includes the period covered in Inclosure No. 1 and subsequent hours of 7 December, 1941. Attention is invited to the plot beginning at 7:02 A. M. near the top of the chart and ending at 7:39 A. M. as it developed that this was the hostile flight which attacked PEARL HARBOR at 8:10 A. M.

C. A. Powell
C. A. POWELL,

SUMMARY

WAR DEPARTMENT

UNITED STATES ENGINEER OFFICE

Honolulu, T. H.

Contract No. W-414-eng-602

Mt. Kaala (Oahu, T. H.).

Job Order #2.1 March 5, 1941.

Construct 9,000 feet of access road from Kole Kole Pass Road to proposed site of Cableway at Mt. Kaala.

Est. Cost \$78,825.00.

Commencement date: March 6, 1941.

Est. date for completion: May 6, 1941.

Supervision by J. J. Kestly, Area Engr., 3rd Field Area.

Job Order #2.0 Feb. 6, 1941.

Construct Cableway Mt. Kaala.

Est. Cost \$71,451.00.

Commencement date: Feb. 6, 1941.

Est. date for completion: June 1, 1941.

Supervision John J. Kestly, Area Engr., 3rd Field Area.

Addendum #1 Feb. 19, 1942 Cable Warehouse.

Addendum #2 Feb. 26, 1942 Splinter Proof Tunnel.

Job Order #2.2 Oct. 17, 1941.

Construct A. W. S. Camp and install utilities—Mess Hall, Barracks, Power House, Radio Communication Bldg., etc. Also erect 100 ft. Radio Tower and install equipment.

Est. Cost \$31,120.93.

Commencement date: Dec. 1, 1941.

Est. date for completion: Mar. 1, 1942.

Supervision Area Engr. J. J. Kestly 3rd Field Area.

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Honolulu, T. H., March 5, 1941.

JOB ORDER No. 2.1

Contract No. W-414-eng-602.

To: Hawaiian Constructors, Honolulu, T. H.

You are hereby directed to proceed with the following work:

1. **PROJECT TITLE:** Access Road from Kole Kole Pass Road to base of proposed Cableway at Mt. Kaala.
2. **LOCATION:** Island of Oahu, T. H.
3. **OFFICE FILE REFERENCE:** C. of E. 665 (Oahu) 505. July 31, 1940.
4. **WORK TO BE DONE:** Construct approximately 9,000 feet of access road from Kole Kole Pass Road to the proposed site of the Cableway at Mt. Kaala, together with all necessary culverts and drainage facilities.
5. **WORK REQUESTED BY:** Commanding General—Hawaiian Department.
6. **DRAWINGS AND REFERENCES:** See Para. 1-03 Specifications.
7. **APPROPRIATION CHARGEABLE:** 21010605 Signal Service of the Army 1940-41.
8. **ESTIMATED COST:** \$57,225.00.
9. **COMMENCEMENT DATE:** March 6, 1941.
10. **ESTIMATED DATE FOR COMPLETION:** May 6, 1941.
11. **ESTIMATED LABOR AT SITE:** 14,200 man hours.
12. **PLANT REQUIRED:** See detailed estimate attached.
13. **MATERIALS:** See detailed estimate attached.
14. **SUPERVISION BY:** J. J. Kestly, Area Engineer, Third Field Area.

THEODORE WYMAN, JR.,

Lt. Col., Corps of Engineers, District Engineer.

Approved: March 20, 1941.

For and in the absence of the Division Engineer:

J. R. D. MATHESON,

*Colonel, Corps of Engineers, Executive Assistant.***ESTIMATE OF COST**

To Accompany Job Order No. 2.1

Contract No. W-414-eng-602

ESTIMATE OF COST: Access Road From Kole Kole Pass Road to Base of Proposed Cableway at Mt. Kaala, Island of Oahu, T. H.**DISTRICT:** Honolulu District, Honolulu, T. H.

The work to be done is on the Island of Oahu, T. H., and includes the furnishing of all necessary labor and equipment, and the performing of all work necessary to construct a 10' roadway approximately 9,000 feet long, together with all necessary culverts and drainage facilities. Unit prices are stated in the following schedules:

1. Materials to be furnished:

Item	Designation	Quantity	Unit	Unit Price	Amount
1	Dynamite	15,000	lbs.	\$0.125	\$1,875.00
2	Blasting Caps, Electric (Lump Sum)				400.00
3	Cement	460	bbl.	3.04	1,398.40
4	Fine Aggregate	170	cu. yd.	2.70	459.00
5	Coarse Aggregate	260	cu. yd.	3.00	780.00
6	1" ϕ Reinf. Steel	7,210	lbs.	0.045	324.45
7	3/4" Reinf. Steel	8,420	lbs.	0.045	378.90
8	5/8" Reinf. Steel	27,580	lbs.	0.045	1,240.20
9	1" x 6" Shiplap—Lumber	9,500	bf.	55.00M	522.50
10	2" x 4" Studding—Lumber	3,000	bf.	55.00M	165.00
11	4" x 4" Whaling—Lumber	3,500	bf.	53.00M	185.50
12	2" Black Steel Pipe and Fittings	9,000	lin. ft.	0.30	2,700.00
13	Wire #14	100	lbs.	0.10	10.00
14	48" R. C. Pipe	608	lin. ft.	6.30	3,830.40
15	Tar Paper	1	roll	3.00	3.00
16	Nails	300	lbs.	0.08	24.00
17	18" Reinf. Concrete Pipe	240	lin. ft.	3.15	756.00
Total Cost of Material					15,052.35

UNSKILLED LABOR

Class 1—\$0.50 per hour:

Shovelers
Concrete placers
Slopers—roadway
Material handlers
Water boy

Class 2—\$0.65 per hour:

Carpenter's helper
Rigger's helpers
Powderman's helpers
Pipefitter's helper
Tractor operator's helpers
Crane operator's helpers
Electrician's helpers

SEMI-SKILLED LABOR

Class 3—\$0.75 per hour:

Truck Drivers
Steel Tiers
Jackhammer man

SKILLED LABOR

Class 4—\$1.00 per hour:

Carpenters
Tractor operators
Crane operators
Cement finishers
Electricians
Pipefitters

Class 5—\$1.50 per hour:

General Foreman.

2670 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SCHEDULE "A"

Work Order No. 5.0

Contract No. W-414-eng-602

1. The site of the work is at Wheeler Field on the Island of Oahu, T. H.
2. The work authorized to be done under Work Order No. 5.0 includes furnishing, by the contractor, of all labor and performing all work for the construction of ammunition storage magazines and appurtenant work in conformity with plans and specifications and within the limits of available funds.
3. The materials essential to the construction provided for herein, will be furnished by the Government, at a convenient location on the Island of Oahu, from which location the materials will be transported, by the contractor to the site of the work.
4. The work to be done at this time under Work Order No. 5.0 is as follows:
 - (a) Clearing and grubbing the site of the work.
 - (b) Transport material to the site of the work.
 - (c) Perform all excavation for structures.
 - (d) Perform all excation for service roads.
 - (e) Install all culverts.
 - (f) Construct and complete three (3) bomb proof ammunition storage magazines (of 30,000 cubic feet capacity each).

MAY 22, 1941.

ESTIMATE OF COST

To Accompany Job Order No. 5.0

Contract No. W-414-eng-602

ADDENDUM NO. 1

ESTIMATE OF COST: Three (3) Each 30,000 Cubic Feet Capacity Bomb Proof Ammunition Storage Structures At Wheeler Field, T. H.
DISTRICT: Honolulu District, Honolulu, T. H.

The work to be done, as provided for herein, is located at Wheeler Field, on the Island of Oahu, T. H., and is limited to the following specific items:

- (1) Furnish all necessary labor and equipment, and perform all work necessary to construct three (3) 30,000 cubic feet reinforced concrete bomb-proof magazine structures, complete with all necessary utilities and fixtures.
- (2) Furnish all necessary labor and equipment, and perform all work necessary to construct graded dirt connecting and access roads, complete with culverts, headwalls, and riprapped ditches.

All of the work done shall be in accordance with Specifications, "Bombproof Ammunition Storage and Appurtenant Work to Accompany Job Order No. 5.0," and the details shown on drawings listed in paragraph 1-03 of the Specifications. This addendum No. 1 to Job Order No. 5.0 supplements paragraph 4 (f) of Schedule A to Work Order 5.0 and is not authority for additional construction. The estimated cost of the work to be done is as follows:

*Cost to the Contractor*1. *Materials to be Furnished:*

ADDENDUM NO. 2

To Accompany Job Order No. 5.0

Contract No. W-414-eng-602

WORK TO BE DONE: Construct and Complete (5) each 30,000 Cubic Feet Capacity Bombproof Ammunition Storage Structures at Wheeler Field, T. H.

DISTRICT: Honolulu District, Honolulu, T. H.

The work to be done, as provided for herein, is located at Wheeler Field, on the Island of Oahu, T. H., and is limited to the following specific items:

(1) Furnish all necessary labor and equipment, and perform all work necessary to construct five (5) each 30,000 cubic feet reinforced concrete bombproof magazine structures, complete with all necessary utilities and fixtures.

(2) Furnish all necessary labor and equipment, and perform all work necessary to construct graded dirt connecting and access roads, complete with culverts, headwalls, and rip-rapped ditches.

All of the work done shall be in accordance with Specifications, "Bombproof Ammunition Storage and Appurtenant Work to Accompany Job Order No. 5.0," and the details shown on the drawings listed in paragraph 1-03 of the Specifications.

Addendum No. 2 to Job Order No. 5.0, supplants and makes void Addendum No. 1 to Job Order No. 5.0.

Total cost of the work to be one shall not exceed \$585,993.89.

ADDENDUM NO. 3

To Accompany Job Order No. 5.0 Contract No. W-414-eng-601

WORK TO BE DONE: Complete necessary excavation for all Ammunition Storage Structures authorized by Job Order No. 5.0, together with Construction of graded dirt Connecting and access roads, complete with necessary culverts, headwalls, and riprapped ditches.

DISTRICT: Honolulu District, Honolulu, T. H.

The work to be done, as provided for herein, is located at Wheeler Field, on the Island of Oahu, T. H., and is limited to the following specific items:

(1) Furnish all necessary labor and equipment, and perform all work necessary to complete necessary excavation for all Ammunition Storage Structures, authorized by Job Order No. 5.0.

(2) Furnish all necessary labor and equipment and perform all work necessary to complete Construction of graded dirt Connecting and access roads, Complete with, culverts, headwalls and riprapped ditches.

All of the work done shall be in accordance with Specifications, "Bombproof Ammunition Storage and Appurtenant Work to Accompany Job Order No. 5.0".

Addendum No. 3 is additional Work and does not alter Addendum No. 2 to Job Order No. 5.0.

The Cost of the Work to be done Shall not exceed \$115,034.10.

THEODORE WYMAN, Jr.,
Lt. Col., Corps of Engineers,
District Engineer.

ARMY PEARL HARBOR BOARD EXHIBIT No. 6

HOUSE OF REPRESENTATIVES

COMMITTEE ON MILITARY AFFAIRS

WASHINGTON, D. C.

In re : Hans Wilhelm Rohl.

STATE OF CALIFORNIA,

County of Los Angeles, ss:

ALICE ANSTAY, who resides at 938 East Edgemore Road, Los Angeles, California, first being duly sworn, deposes and says:

I have been employed as a hotel maid by the Biltmore Hotel for fifteen years, and am now employed there in that capacity. During the last four years, I have been working on the ninth floor, and there are apartments on that floor as well as suites.

I first saw HANS WILHELM ROHL about four years ago, when he used to occupy Apartment Z. He usually would have dinner at about 8:30 P. M. About four years ago last February, I know Rohl gave a big dinner party in Apartment Z, and I know the man whose picture you now show me was present. (John H. Weiner shows picture of THEODORE WYMAN, JR. to affiant with Wyman's name covered). I don't recall any other men at that party except Rohl and Wyman, who became extremely drunk. The liquor was brought up there by the case. During the course of the evening there were about twenty young girls who kept coming in and out of the Apartment all evening, and the party was still in progress when I left to go off duty at about 10:30 P. M. The girls appeared to be cheap, commercial party girls of the type that frequent the Main Street bars and night places.

After this first party, I saw Rohl and Wyman on a great many occasions when they had wild drinking parties of the same general type. The same cheap looking type of young girls paraded in and out all evening.

In cleaning up the various suites on the ninth floor, used for the parties, Suites Q, Z and W, there were twin beds, and I always found them pushed together.

[SECRET]

I would find lip-stick on the pillow cases and bedclothes, towels strewn over the floor and hair pins and bobby pins all over the room. At these subsequent parties, there would usually be four or five girls during the evening. While the parties were underway, I could never get into the bedrooms because they were always locked. Mr. Rohl always called Wyman "Ted" or "Teddy". On each and every occasion when these parties occurred, I have seen girls sitting on Rohl's lap and Wyman's lap, and all the indications that would naturally lead me to believe that these girls were simply being hired to cater to the sexual whims of the two men, because different girls were used from time to time, and as I was the maid on that floor, I went in to take fresh supplies of towels and had ample opportunity to observe what went on.

Rohl had a party in Apartment Q on the Ninth Floor about six weeks ago. He had no baggage and registered alone. Rohl had a tall, blond girl with him and said she was his nurse. They had dinner together and he said he had just come from the hospital where he'd had his gall-bladder removed. On this occasion a lot of liquor went up to this Suite, both Rohl and the nurse were drinking and Rohl got drunk.

About two months ago, in Apartment Q, on the Ninth floor, Rohl gave a party and there was a dark little girl who looked like a Mexican. That was after Rohl just left the hospital following the gall-bladder operation. On this occasion he also came in with the same blonde nurse, and the brunette, the blonde nurse and Rohl were all drinking and a great deal of liquor was brought in. On this occasion the twin beds were shoved together and the mattresses were placed crossways on the beds, and on the bed-clothes and pillow-slips were evidences of lip-stick, and there were rouge-stained cigarettes, used towels, hair pins and bobby-pins strewn about the bedroom. At about 10 P. M. the blonde shoved the brunette out of the apartment and into the hall and shut the door. This blonde,

2724 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

whom Rohl stated was his nurse, was almost always with him on these many parties.

I saw Wyman alone in the hotel about a year ago and haven't seen him since.

Alice Anstey
ALICE ANSTEY.

Subscribed and Sworn to before me this 18 day of December, 1943.

FRIEDA SEGEL.

County of Los Angeles, ss:

JUANITA BLACKWELL, first being duly sworn, deposes and says:

I went to work for Hans W. Rohl approximately sixteen years ago, on Rodeo Drive in Beverley Hills, then to Shaddow Place, then to the Talmadge Apts., then to their present residence. I was cook and cared for the house. At 8159 Hollywood Boulevard, Theodore Wyman, Jr. was a guest. Mr. Rohl often spoke of Wyman when we were living in the Talmadge Apartments in about 1936. It was shortly after we had moved from the Apartments that Mr. Rohl took Dr. Lewis and his wife on a cruise aboard the yacht "Vega," to the Hawaiian Islands.

Major Wyman never remained overnight—he usually discussed business with Mr. Rohl during these visits, and used to stay for dinner. Every other day or so Major Wyman would telephone Mr. Rohl, and I would answer the phone, and he would, of course, tell me who he was. Major Wyman frequently was driven to the Rohl residence by a soldier in an army car.

Werner Plack used to telephone infrequently, would ask for Mr. Rohl, and would, of course, tell me his name when I answered the telephone.

Many times after Wyman went to Honolulu, he and Mr. Rohl would talk for quite a long time on the long-distance telephone, and I have heard Rohl swear at him during these conversations. Rohl certainly wasn't afraid of Mr. Wyman at all. During these long-distance conversations Wyman and Rohl would discuss business, and I heard Rohl speak of hangars, runways, and landing fields. Mr. Paul Grafe also used to phone Mr. Rohl from Honolulu about business, too.

JUANITA BLACKWELL.

Subscribed and sworn to before me this 14th day of December, 1943.

R. E. COMBS,

Counsel for State Fact Finding Committee on Un-American Activities; #ACR59.

JOHN H. WEINER,
W. BRUCE PINE

Mr. T. E. Connolly was interviewed by Mr. John H. Weiner, Investigator for the Committee of Military Affairs, House of Representatives on December 11, 1943 at his office, 461 Market Street, San Francisco.

Question. Your name is T. E. Connolly?

Answer. Yes.

Question. Where do you reside?

Answer. I reside at 2400 Fulton Street, San Francisco.

Question. Are you acquainted with Hans Wilhelm Rohl?

Answer. I am.

Question. When and under what circumstances did you first meet him?

Answer. I met H. W. Rohl sometime prior to 1925, probably at some contractor's gathering because I knew him as such. The exact date and exact circumstances I don't remember.

Question. Are you acquainted with Colonel Theodore Wyman, Jr.?

Answer. I am.

Question. When and under what circumstances did you first meet him?

Answer. The year and date I do not have. I first met him when he came to Los Angeles as a captain in the United States Army Engineers and was in charge of construction activities in that area.

Question. Do you remember who introduced you to him?

Answer. It was very possible that I introduced myself. If a formal introduction was arranged, I don't think that was so. I would rather say that I went over there to get some plans or offer a bid. I certainly met him in his office in an official capacity.

Question. In other words, it is possible that you went over to discuss with him contracts, etc.?

Answer. Certainly. I have done that many times.

Question. It is a fact is it not that you are a stockholder in the Rohl-Connolly Co., a Nevada corporation doing business in California?

Answer. Yes, sir.

Question. Where is the principal place of business?

Answer. Los Angeles, California.

Question. Wasn't it formed in 1932 by Frank S. Cliff, F. E. Leader and a man named Peterson? Who are these gentlemen?

Answer. I don't know. Of course, it was formed in Nevada—they may be the attorneys, those must be the qualifying directors—absolutely unknown to me.

Question. Isn't the corporation's principal place of business 511 N. Carson Street, Carson City, Nevada?

Answer. It might be so recorded but our principal place of operations has been Los Angeles.

Question. Didn't the California Commissioner of Corporations in May of 1932 issue a permit for the sale of 40,000 shares of the capital stock of the concern to H. W. Rohl, Irma Dickey and yourself?

Answer. If so, I don't think that was acted upon. My recollection is there is only 20,000 shares out.

Question. What consideration, if any, did you give the corporation for your shares?

Answer. Cash.

Question. How much, what amount, do you remember?

Answer. I think \$200,000.

Question. How many shares were originally issued to you?

Answer. I think 10,000 shares.

Question. What office did you hold in December of 1940?

Answer. The latter half of December, 1940, I was president.

Question. Did Rohl ever state to you that he knew Wyma prior to meeting you?

Answer. No, sir.

Question. Was it your general custom to confer with Rohl from time to time on important projects in which your firm was engaged?

Answer. Yes, sir.

Question. Are you acquainted with General Virgil Lee Peterson of Washington, D. C.?

Answer. I met General Peterson, who was then Colonel Peterson, when he was in charge of the Los Angeles District when we bid our first section of the Los Angeles-Long Beach breakwater.

Question. Were you in Washington on December 18, 1940?

Answer. Yes, sir.

Question. Were you in Washington on January 17, 1941?

Answer. I was there on the evening of that day. I was in a plane from Los Angeles to Washington during the day on January 17th.

Question. Were you in Washington, January 21, 1941?

Answer. Yes, sir.

Question. While you were in Washington on these dates, Mr. Connolly, isn't it a fact that you were there discussing the contracts that you had in the Hawaiian Islands?

Answer. No, sir. When I was there in December we were discussing the Hawaiian contracts. When I was there on January 17th to appear before the naval board on January 18th regarding the building of naval bases and Bermuda installation was mentioned, but we had gone there to try and obtain construction of a dry dock at San Diego. We prepared questionnaires and on January 22nd we appeared before the naval board and made our submission regarding the construction of the dry dock at San Diego and refused our consideration of any work in Bermuda or Newfoundland.

Question. While you were in Washington, did you receive any long distance calls from Mr. Rohl?

Answer. Whether I received them or not—I talked to him. If I didn't receive them, I made them.

Question. During your visits to Washington to either negotiate or conclude government contracts for your firm for installation of fortifications in the Hawaiian Islands, Mr. Rohl called you in Washington?

Answer. I had telephonic communication with Mr. Rohl when I was in Washington concerning these contracts. Whether he called or I called, I cannot state, but we did have telephone conversations.

Question. Regarding the contracts?

Answer. Yes. The first knowledge I had of a potential contract in the Hawaiian Islands was on Monday, December 16, 1940, when I was called in Denver, Colorado by Mr. Rohl from San Francisco who stated that Colonel Wyman was here from the Hawaiian Islands seeking contractors to perform certain work over there and that he, Rohl, wished me to meet a certain plane at Cheyenne and go on east with Colonel Wyman and endeavor to get the contracts. I asked what type of contracts they were and Rohl answered that the Colonel would explain that to me. I was unable to get on a plane at Cheyenne so I flew to Chicago and got on a plane with Colonel Wyman and flew from Chicago down to Washington. We went to the Carlton Hotel where we could get no rooms and we were expecting Mr. Paul Grafe. He had not yet arrived so we occupied his room. I met John Martin, Mr. Rohl's attorney, who told me he was in Washington in the interests of acquiring citizenship or furthering citizenship applications for Mr. H. W. Rohl. When I thought that there was a likelihood that we would acquire the contract I further thought that I should have Mr. Rohl resign as an officer of the Rohl-Connolly Co. and substitute myself and I so 'phoned him and it was so done, and he was neither officer nor a director of the Rohl-Connolly Co. until after he obtained his naturalization papers.

Question. In other words Mr. Connolly, at your insistence he resigned as an officer or a director of the company?

Answer: That's right.

Question. But still retained his stock?

Answer. That is right.

Question. Subsequent to receiving the contract for the Hawaiian Islands, did Mr. Rohl discuss with you the nature of the contract, etc.?

Answer. No. There was no detailed discussion of this contract at all. Personally I never saw a written description of it or a blueprint on any part of it. Rohl and I discussed the necessary financial arrangements, advancement of monies because after all we were financing this. We were building certain airfields. We knew what that meant, just simply movement of materials and stabilization of a base without a blueprint at all. When you are told to run a 7500 runway we knew what it takes.

Question. But it would be most usual for him to discuss with you the nature and type of contract that you received for the Hawaiian Islands?

Answer. Yes. I don't doubt but what we mentioned building an airport there. I don't think that we ever got into some of these installations out there, I don't think Rohl and I ever discussed anything of that nature. We talked of those warning stations because I was curious as to what they were. That's all that I know that we ever got into any detail about.

Question. I believe that's all, Mr. Connolly.

J. E. CONNOLLY.

Witness

JOHN H. WEINER,
Dec. 11-43.

PASADENA, CALIFORNIA, December 14, 1943.

At the request of Mr. John H. Weiner, investigator for the Committee of Military Affairs, House of Representatives, Mr. E. T. Foley made the following statement:

To the best of my recollection, my first meeting with Colonel Theodore Wyman, Jr. occurred during the construction of the Fort Peck Dam, ten years or more ago. Our Company was one of a group of contractors that unsuccessfully bid for the spillway of this dam, and Colonel Wyman at that time was one of the engineer officers on this work. I believe he was a captain at that time. This meeting was short and purely in the line of the business at hand.

My next meeting with Colonel Wyman, as I recall it, occurred in about 1937 on completion of the San Gabriel Dam. At that time, Colonel Wyman, then a major, was in charge of the engineering work on the Los Angeles River, and the West Slope Construction Co. rented to the Government a portion of the plant that had been used on the San Gabriel Dam.

I have never had any social relations with Colonel Wyman.

The circumstances surrounding the connection of Foley Brothers, Inc. with the Rohl Connolly Co. in the construction of the Haines Cutoff to the Alcan Highway are briefly as follows:

Foley Brothers, Inc. representatives went to Edmonton early in February at the request of Colonel Theodore Wyman, Jr., the Division Engineer of the Northwest Division of the U. S. Engineers Corps.

Colonel Wyman stated that it was necessary that the Haines Military Cutoff Road be completed in the fall of 1943 and that he desired that Foley Brothers, Inc. undertake the work jointly with Rohl Connolly Co. as that firm owned a considerable amount of floating equipment suitable for ocean transport of personnel, construction machinery and material to Haines, Alaska. Prior to this time there had been no transactions between these firms although Foley Brothers, Inc. knew that Rohl Connolly Co. was a well established and successful firm. It was known that both Mr. Rohl and Mr. Connolly had been actively engaged in construction in the Pacific Coast district for many years and there was no knowledge or suspicion on the part of anyone connected with Foley Brothers, Inc. that Mr. Rohl was anything but an American citizen. It was known that prior to this time he had been engaged on Army work in the Pacific area. The press accounts of the investigation of the California Committee on Unamerican Activities came as a complete surprise. This Haines Cutoff work is the only work on which Foley Brothers, Inc. have ever been associated with Rohl Connolly Co. or with Mr. H. W. Rohl.

After this unfavorable publicity in connection with Mr. H. W. Rohl occurred, representatives of Foley Brothers, Inc. again went to Edmonton and told General L. D. Worsham, Colonel Wyman's successor as Division Engineer, that Foley Brothers, Inc. entered into this association at the Army's insistence, that through no fault of its own, Foley Brothers, Inc. found itself in a very awkward position, and that Foley Brothers, Inc. would withdraw and consent to the cancellation of the letter of intent, if the Army so desired. General Worsham pointed out that the work was urgent, that this procedure would result in unnecessary delay and agreed to the suggestion of both firms that Mr. Rohl be entirely disassociated from the work. Negotiations were completed with General Worsham and contract entered into.

By arrangement with Mr. T. E. Connolly, now president of Rohl Connolly Co. Co. the construction was entirely handled by Foley Brothers, Inc. and Mr. Rohl was never on the work.

The road was completed on schedule and below the estimated cost, a result which is very creditable to everyone connected with the project.

E. T. FOLEY.

Witness

JOHN H. WEINER

Dec. 14-43

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., March 18, 1944.

INTERVIEW

Present: Colonel Earl E. Gessler and H. Ralph Burton.

Mr. BURTON. Please state your name and position that you hold.

Colonel GESSLER. Colonel Earl E. Gessler, Corps of Engineers, at present Division Engineer of the Middle Atlantic Division, Baltimore, Maryland.

Q. How long have you been with the Engineer Corps?

A. Since 1915.

Q. Did you at any time have occasion to participate in negotiations which led up to the awarding and signing of contracts for defense projects in the Hawaiian Islands to the Hawaiian Constructors, Inc?

A. No, sir.

Q. Did you have occasion at any time to participate in negotiations in which Colonel Theodore Wyman, Jr. took part?

A. No, never in any negotiations.

Q. Do you know anything about any contract awarded to the Hawaiian Constructors?

A. I know there were such contracts, I possibly have seen them when I was in the Chief of Engineers Office.

Q. There was a contract for certain installations in Hawaii which was negotiated and finally signed on December 20, 1940, and some of the persons connected with those negotiations were Hans Wilhelm Rohl, Paul Grafe and T. E. Connolly. Do you recall any of these?

A. I recall the names. Yes, sir.

Q. Did you ever come in contact with any of them?
 A. I never met any of them, no, sir.
 Q. At what place were you stationed in 1940?
 A. I was Chief of the Finance Section at that time, which included the Contracts and Claims Branch.
 Q. Do you recall having any dealings with Hans Wilhelm Rohl, T. E. Conolly, or Paul Grafe?
 A. No, sir.
 Q. Did you ever have occasion to participate in any negotiations leading up to the awarding and signing of a contract for the Canol Project in Alaska.
 A. As a general rule I did not participate in any of the negotiations. I do not remember having seen it before it was executed or after it was executed. I do know there was such a contract.
 Q. You had no personal contact with either the negotiations or the awarding of the contracts for the installation of defense projects in Hawaii, the Pacific Islands, or the Canol Project in Alaska?
 A. That is true. It may be that my assistants may have had something to do with it. I can give you their names and perhaps that would be helpful.
 Q. I would be very glad if you would.
 A. At that time there was connected with the contract work, David Ogden, Now Brigadier General, in the South Pacific, I think; possibly Watler Pincus, a Major, also in the South Pacific; also Brig. Gen. D. L. Newman, but if it were Newman it could not have been Ogden. I forget just what the date of relief was there. They are the only officers who might have had contact in the contract section.

[1] STATEMENT OF MR. CYRIL J. HARRINGTON, 2142 EWING STREET, LOS ANGELES, CALIFORNIA. NORMANDY 16774.

Interviewed by: Mr. John H. Weiner, Investigator, Committee on Military Affairs, House of Representatives.

Question. What is your name?
 Answer. Cyril J. Harrington.
 Question. Where do you live, Mr. Harrington?
 Answer. 2142 Ewing Street, Los Angeles, California.
 Question. Were you ever employed by the Biltmore Hotel, in Los Angeles?
 Answer. Yes.
 Question. How long were you so employed?
 Answer. From September 20, 1936 to November 5, 1940.
 Question. What were your duties?
 Answer. House officer.
 Question. Do you know Hans Wilhelm Rohl?
 Answer. Yes.
 Question. Do you know Colonel Theodore Wyman, Jr.?
 Answer. Yes.
 Question. While you were employed at the Biltmore Hotel, did you have occasion to meet either of these men there?
 Answer. Yes.
 Question. Do you know of your own knowledge if Mr. Rohl had, from time to time, been a guest at the hotel?
 Answer. Yes.
 Question. Would Mr. Rohl retain a room or a suite?
 Answer. It would be a suite or apartment—an apartment, if available.
 Question. Did you develop quite an acquaintance with Mr. Rohl?
 Answer. Yes.
 Question. For that reason, you had many opportunities to visit his suite?
 [2] Answer. Yes.
 Question. Did you ever see Colonel Wyman there?
 Answer. Yes.
 Question. What would usually be the condition of Mr. Rohl and Colonel Wyman on your visits?
 Answer. I would say that Rohl, most of the time, was apparently drinking. Of course there was always liquor there and usually Rohl and Wyman would be in conversation.
 Question. Have you ever seen girls in Mr. Rohl's suite or apartment?
 Answer. Numerous times—many times.

Question. Would these parties last late?

Answer. Yes, because I didn't go on duty until 11:30 P. M.

Question. Do you know Mr. Svendrup?

Answer. Yes.

Question. Will you please state the time or times that you saw Mr. Svendrup, while he was registered at the hotel, in the company of Mr. Rohl or Colonel Wyman?

Answer. Mr. Svendrup was in Mr. Rohl's apartment and he called requesting that his suite be cleaned during his absence. Ray Moore, handyman around the hotel, was sent to Svendrup's room to clean it and he found a purse. Ray Moore called me and I found approximately \$3.00 in the purse and I knew that Mr. Svendrup and the girls were visiting in Mr. Rohl's apartment. I took the purse to Rohl's apartment and turned it over to them and Svendrup was very much perturbed, saying that I should have left the purse in his room and that I should not touch anything in the room. At this point, Mr. Rohl ordered Mr. Svendrup to leave his apartment and go back to his own room and take his girl friend. Mr. Rohl resented the fact that Mr. Svendrup talked to me the way he did.

Question. Did Mr. Svendrup leave and take his girl friend?

Answer. I don't know that he left at that moment, but he did leave shortly thereafter.

[3] Question. What was the apartment or suite number of Svendrup on that occasion?

Answer. I believe it was 7315 and 7316.

Question. Had you seen these girls around the hotel previously?

Answer. Yes, three or four times.

Question. What would you say the occupation of these girls might be?

Answer. My opinion is that they were good time girls. I had seen them in the rooms of Rohl and Svendrup at different times.

Question. Did you ever see Colonel Wyman in Svendrup's apartment?

Answer. To the best of my knowledge, I only saw him there once.

Question. Do you recall about what time it was?

Answer. About 7 A. M.

Question. Had he been there all night?

Answer. Apparently.

Question. What was his condition?

Answer. He had been drinking. Of course, I wasn't employed at the hotel at this time, but I had been at the hotel the night before and had met Svendrup who had told me to be at his apartment at 7 the next morning, stating that he wanted to talk to Mr. Rohl about a position I was to get in Honolulu and the reason I had to be there so early was because Svendrup told me he was leaving the city early.

Question. I believe that is all, Mr. Harrington. Thank you.

Cyril J. Harrington

Mr. CYRIL J. HARRINGTON.

Subscribed and sworn to before me this 22nd day of December, 1943.

FRANCES H. PURTELL,

Notary Public in and for the County of Los Angeles, State of California.

My Commission Expires Oct. 6, 1947.

SECRET

AFFIDAVIT

[1]

STATE OF CALIFORNIA

County of Los Angeles, ss:

WALTER HORNE, being first duly sworn, deposes and says:

That he is a native born American citizen, now of the age of 53 years, and that he has resided on the West Coast of the United States of America for the past fifty years.

That during said period of time, he owned the German-built yacht, "Contender," formerly known as the "Arm Gaard," which vessel was built and owned by a German Prince, Lippe.

That said vessel during affiant's ownership was known as the Contender with its home port at Long Beach, California and that said Contender was moored along side of a vessel known as the "Pandora" and that the records will disclose that said Pandora was registered in the name of the said Rohl because said vessel was less than 75 feet in length, and therefore could be registered in the name of an Alien German.

That while affiant was the owner of said vessel, Contender, he met the said Hans Wilhelm Rohl and had many conversations with him, including conversations regarding the construction of said Contender, but during said conversations, said Rohl was very arrogant, boastful of all things German, and claimed that his Uncle occupied a high position as Managing Director in the Hamburg-American line and the North German Lloyd Steamship Co.

That in 1928, affiant entertained several persons upon his yacht the Contender, among which was Felix Von Luckner, commonly known during World War No. 1, as the German Raider, that affiant did not invite the said Rohl to said entertainment, and that thereafter, the said Rohl no longer renewed his friendship and acquaintance with the affiant, and that said Rohl represented that he visited with the said Von Luckner, and claimed close acquaintance with all visiting Germans of high rank in business and in Diplomatic Service of the German Republic.

That during the acquaintanceship between the said Rohl and affiant, a large sea going vessel with its home port in New York which affiant was informed was purchased by the said Rohl for \$47,000, was believed to be registered in the name of Floyee Rohl, who was a native born American, and that by said registration any perfunctory examination of the record would disclose that said vessel, the Vega being in excess of 75 feet in length was owned by an American citizen in truth and in fact that said vessel "Vega" was purchased and controlled by the said Hans Wilhelm Rohl, a German alien in violation of U. S. Maritime laws.

That affiant was informed and believes that said Hans Wilhelm Rohl is the same person who secured upon the recommendation of an American Army officer known as Major Wyman, construction contracts from the United States Engineering Department in excess of \$100,000,000.

That affiant is informed and believes that the said vessel, Vega, was chartered by the Engineering Department of the United States Army through said Major Wyman for \$75,001, and that said charter provided that said vessel, Vega, was to be used in the war effort, but instead the said vessel under said charter was used to haul a load of liquor to Honolulu at the instigation of the said Major Wyman, and that said \$75,001 was authorized by the said Major Wyman, and was actually paid by the United States Government to the then wife of Hans Wilhelm Rohl, a German alien.

[2] That affiant is informed and believes that said vessel sailing with the said cargo of intoxicating liquor from the harbor of San Pedro was never used for any purpose of National Defense or as set forth in the charter thereof.

That affiant believes that the method of registration of said vessel Vega and the chartering thereof, and the wrongful use of said charter, was and is a fraud upon the United States Government.

That affiant is informed and believes that the said Rohl was at Pearl Harbor, Honolulu, prior to December 7, 1941, and had complete detailed information of all of the offensive and defensive installations of the War Department, and that he knew on said date of the location of American Naval vessels, American planes, fortifications and other vital installations, and that the aforesaid knowledge of the said Rohl at that particular place at that particular time, was too serious to be a mere coincidence, which in affiant's opinion should be thoroughly investigated by officials of the Government high enough not to be biased, prejudiced, or influenced in any manner whatsoever.

Affiant further states that in his opinion, the Government investigators should go deeper than the records disclose upon the surface, so that there may be apprehended all *Alien Spies* working under cover against the best American interests, and in league with agents of Germany or Japan, and that all persons so apprehended should lose their citizenship, and all of their worldly goods and ill-gotten gains available should be confiscated, and that they should be deported to the countries from which they originally came.

And that it should not be forgotten that the fathers and mothers who mourn their dead soldiers and sailors who lost their lives in this war, and who have received Awards of Merit and Distinguished Service Medals, would want to return these Awards to the United States Government so long as the said Major Wyman is allowed to retain any merits or the Distinguished Service Medal granted him, and that he should be subjected to an impartial Court Martial, and

treated as found guilty, according to his just deserts and the best American tradition.

WALTER HORNE.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS
Washington, D. C.

In Re: Hans Wilhelm Rohl
STATE OF CALIFORNIA
County of Los Angeles, ss:

H. J. KING, who resides at 904 South Oakland Street, Pasadena, first being duly sworn, deposes and says: I was on active service in the Army Engineers from December, 1917 to September, 1919, with the rank of Major when I resigned in 1929. I studied engineering at Northwestern University, where my son is now a professor.

About January 15, 1942 I had completed a project at San Luis Obispo, and learned that a tunnel man was needed in the Hawaiian Islands, and was eventually employed by Paul Grafe for Hawaiian Constructors, and arrived in Honolulu on February 16, 1942, and lived in the Pleasanton Hotel until January 25, 1943.

I met Hans W. Rohl a day or two after I arrived. He was drunk when we met, and although I saw him many times thereafter, I never did see him when he was fully sober; and he was never in the full possession of his faculties during the time I saw him.

The work being done during the period when Col. Theodore Wyman, Jr. was in charge, was quite muddled. This was due to a variety of causes, some being the fact that there was a natural state of confusion following the attack on Pearl Harbor, and a constantly-changing tactical situation throughout the Pacific theatre. Among the business people who come in contact with Col. Wyman there was a general impression that he was extremely arbitrary.

After Col. Wyman left, the situation began to improve; more equipment began to arrive and our program was much more definite.

I was there when Rohl's yacht the Vega arrived in February of 1942, and I used to see it tied to the dock from time to time. The U. S. Engineers Department took over the Vega upon her arrival, but so far as I know they never used the boat, because she just remained tied up, and was never sailed at all.

When I arrived I laid around for about thirty days before Rohl got sufficiently sober to put me to work. On about March 15, 1942 I commenced work as Area Superintendent for Area 14, which included the Ewa area. After a little over two weeks had elapsed I was appointed General Superintendent for Hawaiian Constructors—April 3, 1943, and thenceforth until I left I had complete supervision over all field work.

Generally speaking, the work that had been accomplished under the supervision of Col. Wyman prior to December 7, 1941, was pretty lousy; and when the people in the Hawaiian Islands who were familiar with this work—officers and civilians alike—learned that Colonel Wyman had been awarded the Distinguished Service Medal "for exceptionally meritorious and distinguished service in the performance of duty of great responsibility as District Engineer, Honolulu (T. H.) Engineer District, from October 14, 1941, to March 15, 1942," it was a source of considerable amusement.

SECRET

IN RE HANS WILHELM ROHL

STATE OF CALIFORNIA,

County of Los Angeles, ss:

Statement of Mrs. Gertrude Marcus

I reside at 2007 W. Third Street, Los Angeles; have been employed for the last seventeen years by the Biltmore Hotel, Los Angeles; for the last four years have been desk clerk assigned to the ninth floor.

I have known Hans Wilhelm Rohl for several years as a patron; he most usually requested quarters on my floor, since one of the suites has a refrigerator. He most always was drunk, and it was a common practice for him to have cheap looking girls visiting him; they would stop at my desk for directions, but after a while they got wise and came up the back elevator.

His male companion on these parties was the man whose picture Mr. Weiner showed me. Mr. Rohl would sometimes call him Ted and sometimes Mr. Smith. I now know his name is Colonel Wyman, but I have not seen him recently. When Wyman and Rohl would leave together, they would be pretty plastered. When Mr. Rohl was here about a month ago the bellboy, Charles Hays, said: "You ought to see how Rohl is bleeding; you know he was operated on for gall bladder".

AFFIDAVIT

STATE OF CALIFORNIA,

County of Los Angeles, ss:

FERMAN K. PICKERING, being first duly sworn, deposes and says:

I was employed by Bechtel-Price-Callahan in San Francisco as Cost Clerk. I left Oakland, California June 6, 1942, arriving in Edmonton, Canada June 10, 1942. I then proceeded to Waterways, Canada, arriving there June 12, 1942. During my two weeks' stay, I lived at the New Franklin Hotel at Fort McMurray, which is approximately one and one-half miles from Waterways. I arrived in Waterways with my immediate superior, Mr. E. W. Bailey and Mr. J. H. Cooper, Assistant Administrative Manager for Bechtel-Price-Callahan. We were met at the depot by Mr. Robert Hoffman, who introduced himself as the Construction Superintendent for Bechtel-Price-Callahan. After the departure of Mr. Bailey and Mr. Cooper, which took place a few days after their arrival, and when we, according to instructions of both Cooper and Bailey, ordered some office supplies, we learned that Bechtel-Price-Callahan apparently was unknown locally, but that the firm which had established credit was known as Hoffman and Boyce. I learned that the employees were paid in cash and had never heard of Bechtel-Price-Callahan but thought they were working for Hoffman and Boyce. The cash for the payroll was handled by Mr. E. E. Beckett, who also believed he was working for Hoffman and Boyce rather than Bechtel-Price-Callahan. His remark was "Who is Bechtel-Price-Callahan?" I never met Mr. Boyce and in spite of numerous inquiries, never was able to find anyone who knew him.

The two front rooms of the New Franklin Hotel, where I lived, at Fort McMurray, were occupied by Mr. Robert Hoffman and Colonel Theodore Wyman, Jr. of the United States Engineers, who was in charge of the Northwest Division. For a period of two weeks I saw Colonel [2] Wyman nearly every day with the exception of two occasions when he didn't leave his room. Mr. Robert Hoffman seemed to be a very close friend as well as business associate of Colonel

Wyman. Mr. Hoffman told me that he had been with the Hawaiian Constructors and had worked with Colonel Wyman in the Hawaiian Islands. It was general gossip among the men that Colonel Wyman was a heavy drinker and no apparent effort was made to conceal this fact. On several occasions I saw Colonel Wyman when he was, in my opinion, drunk. On several other occasions I saw him when, in my opinion, he had been apparently drinking heavily. Upon another occasion, Mr. Robert Hoffman told me that he was very much worried as Colonel Wyman was out of liquor and had asked him to get some, which was difficult, as Edmonton, the nearest legal source for liquor, was over three hundred miles away.

One night, at Waterways, at the Northern Alberta Railway depot, Colonel Wyman asked the Railway Agent to spot some cars that had arrived that day loaded with prefabricated barges. He was told that it would be a matter of a couple of hours before an engine was available. The Colonel, who obviously had been drinking, told the agent that he and the other Canadians were incompetent and that "If you can't run the God damned railroad, I'll take it over and run it myself."

One evening, while having dinner, seated close to Colonel Wyman's table, the Colonel, who apparently hadn't seen us up to that time, asked Mr. Robert Hoffman who we were. Mr. Hoffman replied that we were administrative employees sent from Edmonton several days prior to that time. The Colonel asked Mr. Hoffman if he had hired us. Mr. Hoffman replied that he hadn't and the Colonel said, blustering, "Send them back to Edmonton. We don't want them here." On another occasion, at the New Franklin Hotel, Mr Hoffman was talking to a man who had approached him in reference to buying a saw mill for \$25,000. Mr. Hoffman replied that he had no authority to spend \$25,000. At that point, Colonel Wyman approached and asked Mr. Hoffman, "Who the hell [3] is going to spent \$25,000.?" Mr. Hoffman replied that no one was; that the man had a saw mill that he wanted to sell for that amount. Colonel Wyman asked Hoffman what use they had for the lumber and was told that it could be used in building barges. Colonel Wyman said, "Go ahead and buy the God damned thing." Earl Harcourt, who was a Bechtel-Price-Callahan Transportation Advisor and who had worked in the surrounding country for a number of years, told me that the saw mill in question wasn't worth over \$5,000, as it had stood idle for some time. Whether or not this deal was consummated, I do not know.

I talked to Mr. Everett Seaberry, whose title was Project Manager on the Canal Project. By way of introduction, I asked Mr. Seaberry if he was not Bechtel-Price-Callahan's Project Manager to which he replied: "I'm supposed to be, but don't have a damned thing to say about anything that is being done."

After being in Waterways for two weeks, I returned to Edmonton on June 27, 1942, where I remained until July 27, 1942. I found the town full of idle men who were drawing salary and subsistence, which in the case of, for instance, a tractor operator, amounted to about \$20.00 per day, with subsistence allowance. From my arrival back in Edmonton until July 27, 1942, I was on a travel status, drawing salary and subsistence allowance with no work assigned.

Robert Finney who wrote "Canada Moves North" was on the Bechtel-Price-Callahan payroll with the title of Chief Expediter at, I was told, a salary of \$1,000 per month. It was my understanding that all administrative salaries of \$200 or more per month had to be approved by the United States Engineers.

Before I left Waterways, I met a Mrs. Cooper and another girl, whose name I cannot recall, who told me they had also worked with Colonel Wyman in the Hawaiian Islands prior to coming to Canada.

Gertrude Campbell, who called herself the Colonel's personal representative, told me that she had been with the Engineers in Los Angeles; from Los Angeles she had gone to Hawaii, where she worked directly under Colonel Wyman and had gone to Canada from [4] Hawaii. I flew from Edmonton to White Horse in the same plane with Miss Campbell. After staying in White Horse for two days, we proceeded to Skagway, Alaska, by train, also accompanied by Miss Campbell, who was the Colonel's personal representative on the Canal Project #2 at Skagway, Alaska. Miss Campbell told me, in the presence of my wife and others, that on the morning of December 7, 1941, in the Hawaiian Islands, Colonel Wyman, who was then District Engineer, came to the office after the Japanese attack, in a drunken condition and in civilian clothes, and changed to his uniform in full view of the girls in the office. Colonel Wyman meantime

2734 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

shouted directions to those in the office and passed out guns to anyone who seemed to be able to operate firearms.

Lieutenant L. M. STAUB, 11166 Sunset Boulevard, Los Angeles, California, U. S. Navy, Reserve, first being duly sworn, deposes and says:

I first met Colonel Theodore Wyman, Jr. about 1938; I have seen him on H. W. Rohl's yacht, the Vega, four or five times, and on each and every occasion Wyman was so drunk that he was utterly obnoxious and incapable of transacting any business; when I was first introduced to him, Colonel Wyman criticized my appearance and was very insulting to me; he would pour whisky on the floor and drop his burning cigarettes on the carpet.

Mrs. Floy Rohl once stated to me that she didn't like Wyman, but that H. W. Rohl, her husband, had to tolerate him for business reasons.

I was acquainted with Werner Plack, having met him in about 1935 or 1936, and know that he spent most of his time at Gert Von Gundhardt's home in Beverly Hills. Plack also told me that he visited at Frank Morgan's home in Beverly Hills.

In re: Hans Wilhelm Rohl.

STATE OF CALIFORNIA,

County of Los Angeles, ss:

REA B. WICKISER, whose residence is 1522 Rodney Drive, Los Angeles, California, first being duly sworn, deposes and says:

I was born in Lima, Ohio, in 1908, educated in that state, and went into tunnel construction work in Michigan, worked on the Boulder Dam project, on the Southern California Aqueduct and Parker Dam, and went to Honolulu on the Alinanau Crater project under the supervision of Major Bruce Hill, then worked running quarries and making estimates for the U. S. Engineers on the California Central Valleys Project, then worked for Mr. H. J. King on the Pennsylvania Turnpike, then on a shaft and tunnel for the Navy in Bremerton, Washington, then to Parker Dam driving penstock tunnels, then to San Luis Obispo.

In about May, 1941, I heard that Territory Airport Constructors had gotten a contract for building five airports in the Hawaiian Islands, and contacted Phil Shirley, of Gunther-Shirley Company, and was hired to take charge of rock excavation in the Islands for Territory Airport Constructors, having signed the contract on July 18, 1941.

I went to the Island of Maui in July, 1941, and started supervising rock excavation work there. Colonel Theodore Wyman, Jr., was supervising all this work for the Army Engineers. I then worked on an airport on the Island of Hilo as

superintendent for Territory Airport Constructors. No particular difficulties were encountered until the United States went to war, and the engineers bought all our equipment for the Army, and we assigned our contracts over to the Army Engineers, and our personnel went to work for Hawaiian Constructors. My first job was to mine Hilo Airport which consisted of placing boxes of explosives in a definite pattern below the grade of the runways—this being immediately after Pearl Harbor. This was under Col. Theodore Wyman, Jr. The grades on the runways were changed nine times by the Army Engineers, necessitating changing positions of the demolition boxes. Since an invasion was feared, I was put to work with a crew of my men to stand by on a 24-hour emergency. Two Army demolition experts were stationed at Hilo as advisors, but in fact I had to instruct them. I was really in charge of the "scorched earth" program. I requested soldiers be assigned to my detail, and this was done.

I was next sent to Pahoa as superintendent to take charge of very secret work. I was instructed by the Engineering Corps, headed then by Wyman, not to leave the dirt in the tunnel and not to dump it outside. My one small blueprint indicated the tunnel's course as making a 62° turn to the right off an exit. I finished the job 2 days ahead of schedule, and was asked drive another one at Pahoa, but the Engineers failed to locate it for me; so I had to locate and drive it, which I did in 15 days; the plan showed a 62° turn to the left, but after we had completed it, the Engineers brought out another set of plans showing the 62° turn to the right instead of the left. This was all under Wyman's supervision.

I then went to Kahuku to drive another tunnel of the same type through rock, necessitating mechanical equipment. Believing the work was needed in a hurry, I asked for equipment, but Wyman's engineers in Honolulu wouldn't give us any equipment, so we did the job by hand.

My wife was then evacuated from Honolulu to the mainland, and I decided that things were in such a mess I would leave, and got a medical release from my contract by the engineers, but I stayed on under Mr. King until we left together on January 25, 1943. Was general superintendent of all underground construction from June, 1942 until our contract was fulfilled.

From the experience I had with Wyman's Engineers, when I found he received the Distinguished Service Medal, I thought somebody had slipped up somewhere along the line, and that Washington just didn't know what had been going on.

Referring to the testimony given by Ray Anderson, where he insinuated that Pleasonton was a place of debauch, but this is not true. The female help in this hotel was never allowed above the first floor.

The food about which Anderson complained was furnished by the Army Engineers, and was a livable ration.

He mentions a vehicular tunnel as being dug by soldiers, whereas I dug it myself in 1935.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 24 September 1942.

In reply refer to: AG-201.22
Re Contract No. W-414-eng-602

HAWAIIAN CONSTRUCTORS,
Punahou Campus, Honolulu, T. H.

DEAR SIRS: The Hawaiian Department commends your organization on its achievements as noted below.

The completion of Runway A at Wheeler Field in 30 days is particularly noteworthy. This project was started on the morning of July 24, 1942 and the completed and paved runway, 300' wide by 6,200' long, was turned over to and used by

the Air Force on the morning of August 25, 1942, a record for runway construction which it is believed has never been equaled in this area.

Special credit is due to Herbert J. King, General Superintendent, who, by reason of his training, experience and unselfish devotion to the job, brought about the coordination of forces necessary for these achievements.

Specifically to be commended are your Tunnel Department, headed by R. B. Wickiser, General Tunnel Superintendent, his able assistants, and the organization under his jurisdiction. Within 90 days, not only was this organization perfected, but notable advances were made in tunnel construction which are the more remarkable in view of the difficulties, obstacles and unforeseeable contingencies to be overcome.

The outstanding work of the grading organization headed by John Crockett, Excavation Superintendent, also merits recognition. The grading of Walele Gulch Airfield, involving in excess of 600,000 yards of excavation, was completed in 34 days. At Wheeler Field, the grading and placing of foundation rock base course on Runway A was completed in 20 days.

Special appreciation is also merited by the asphalt paving crew under Donald D. Cook, Asphalt Superintendent. This crew, I am informed, started asphaltting the base course on Runway A at Wheeler Field before more than half of the course had been laid and so coordinated its work with other operations that the entire project could be completed in record time.

Very truly yours,

Delos C. Emmons,
DELOS C. EMMONS,
Lieutenant General, U. S. Army,
Commanding.

Headquarters,
SAN BERNARDINO AIR SERVICE COMMAND,
SAN BERNARDINO ARMY AIR FIELD, CALIFORNIA.

STATEMENT OF MR. EMIL ZUCCA,

RESIDENCE: 1141 MAGNOLIA STREET, SAN BERNARDINO, CALIFORNIA.

Interviewed by John H. Weiner, Investigator, Committee of Military Affairs, House of Representatives, Washington, D. C.

Statement taken at San Bernardino Air Service Command, San Bernardino Army Air Field, California, December 23, 1943.

Q. Please state your name.

A. Emil Zucca.

Q. Where do you reside, Mr. Zucca?

A. 1141 Magnolia Street, San Bernardino, California.

Q. Where are you employed?

A. San Bernardino Air Service Command.

Q. What is your occupation?

A. Senior Aircraft Mechanic.

Q. Were you ever employed by the U. S. Engineer Department, South Pacific Division, Los Angeles District?

A. Yes.

Q. What were your duties?

A. Chauffeur.

Q. To whom were you assigned?

A. District Engineer.

Q. And who was that?

A. Major Theodore Wyman, Jr.

[2] Q. How long were you employed in that capacity?

A. I started in February, 1936, and I worked there until March of 1942.

Q. How long did you actually drive for Major Wyman?

A. About 3 years and 7 months.

Q. Was that a government car?

A. Yes.

Q. Were you acquainted with the first Mrs. Wyman—Ella Wyman?

A. Yes.

Q. Also the second Mrs. Wyman—Ruth Wyman?

A. Yes.

Q. Do you know Hans Wilhelm Rohl?

A. Yes.

Q. Had you had occasions to drive Major Wyman in the evenings and early mornings?

A. Yes.

Q. Did you ever have occasion to drive Major Wyman to the Biltmore Hotel?

A. Yes.

Q. Do you know, from your own knowledge, who he was going there to visit?

A. No, sir.

Q. Have you ever had occasion to go up to Mr. Rohl's apartment in the Biltmore Hotel?

A. Yes, sir.

Q. What would be these occasions?

A. On different occasions, I have gone to Mr. Rohl's apartment to take Major Wyman cigarettes, and his brief case—on occasions.

Q. Who would be in the apartment on these occasions?

A. Mr. Rohl, Major Wyman, sometimes would be alone; and on other occasions, there would be Mr. Svendrup, and Paul Graffe.

[3] Q. As a rule, would you have to wait for Major Wyman?

A. Yes.

Q. How late, if you remember, would you have to wait for him on some occasions?

A. Oh, anywhere from 9:00 until 2:00.

Q. Where would you then take him?

A. Home.

Q. Do you remember the address?

A. 221 Woodruff, West Los Angeles.

Q. It was also customary, was it not, for you also to drive Major Wyman and his friends around to the various night clubs?

A. I have, on occasion. Yes.

Q. Please name some of the night clubs that you have taken Major Wyman and his guests.

A. Earl Carroll's, Cafe La Maze, Little Jane Jones' club, the Trocadero, and the Ambassador Hotel.

Q. Who would usually be along on these parties?

A. Mr. Rohl, Major Wyman, Mr. Svendrup, Captain George Withers, Captain Clatterbos, Paul Graffe. There was also one man whose name I don't remember . . . medium build.

Q. On these trips, Mr. Zucca, you always used the government car, did you not?

A. Yes, sir.

Q. Would you then have to wait until the party was over and take them home?

A. Most of the time.

Q. How late would you have to wait to take the parties home?

A. Around midnight or one o'clock.

Q. But there have been occasions that you just took out Mr. Rohl and Major Wyman to the same type of places?

A. Yes, sir.

[4] Q. Would you be paid extra for this work?

A. Occasionally I received a tip.

Q. Please state the various night clubs or country clubs where you took Mr. and Mrs. Rohl and Major and Mrs. Wyman.

A. The Bel-Air Country Club. Different hotels. It is impossible for me to remember all the names.

Q. Please state if there have also been occasions when it was necessary for you to take Mrs. Wyman shopping.

A. Yes, I have taken both of them shopping.

Q. And that, also, was in the government car?

A. Yes.

Q. To the best of your recollection, Mr. Zucca, please state the various banks that you took either Major Wyman or Mrs. Wyman.

A. The Bank of America at Seventh and Figueroa, and the Bank of America at Westwood Village.

Q. On your visits to Mr. Rohl's apartment in the hotel, while Major Wyman and these men were there, did you see evidences of liquor?

A. I have, on occasions.

Q. Have you ever driven Major Wyman down to the Los Angeles Yacht Club?

A. Yes.

Q. Do you know who he was to meet there?

A. I presume Mr. Rohl.

Q. Have you ever been on the Vega?

A. No. But I have seen it.

Q. Have you ever taken Major Wyman from the hotel to homes other than his own?

A. Yes.

[5] Q. Do you know whose homes you took him to?

A. I drove him to Mr. Rohl's home, and Captain Clatterbos' home, and Captain Withers'. Those are the only ones that I recall.

Q. Would you leave him there, or would you wait for him?

A. Sometimes I would leave him there, and sometimes I would wait.

That is all Mr. Zucca. Thank you very much.

EMIL ZUCCA.

Subscribed and sworn to before me this 23rd day of December, 1943.

EDWARD C. STRUM.

My Commission Expires April 28, 1944.

[1]

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C., February 3, 1944.

INTERVIEW

Present: Herman J. Galloway, John M. Martin, H. Ralph Burton, Joseph G. Colgan.

Mr. MARTIN. All of the Rohl-Connolly Company work performed prior to the negotiated contract for construction work in the Hawaiian Islands was performed pursuant to an invitation for bids and an award for them at public letting. The first negotiated contract that Rohl-Connolly became interested in was known as the Hawaiian Constructors contract about December 18, 1940. Present were Mr. Paul Grafe, then Vice President of the Callahan Construction Company, Mr. T. E. Connolly, the President of the Rohl-Connolly Company. Mr. Grafe also is either Vice President or Attorney in Fact for the Gunther-Shirley Company.

Mr. BURTON. Could you state just what interest Rohl had in any of the companies making up the Hawaiian Constructors?

Mr. MARTIN. The same interest as the three had in the Caddoa Constructors, that being 40 percent participating interest; 40 percent participating interest was held by W. E. Callahan and 20 percent by Gunther-Shirley Corporation. The Rohl-Connolly [2] stock was then owned 50 percent by T. E. Connolly through his ownership in the T. E. Connolly Co., Inc., 25 percent was owned by Floy E. Rohl, Rohl's wife, and 25 percent was held by H. W. Rohl, so that Rohl had 10 percent interest in those contracts. That was later reduced by selling a participating interest to Ralph Wooley and the Hawaiian Contracting Company.

Mr. BURTON. I understand that Rohl was the directing head of the Hawaiian Constructors on the Hawaiian contracts.

Mr. MARTIN. That is true only from on or about the 26th or 27th of September 1941 on which date he first arrived. Prior to that date he had nothing to do whatsoever with the Hawaiian Islands contract or with work being performed there. He probably was consulted as to the necessary finances the Rohl-Connolly Co. would have to advance toward an operating fund.

Mr. BURTON. Isn't it true that Colonel Wyman was in Washington in December of 1940 when this contract was negotiated?

Mr. MARTIN. I personally met and talked with Colonel Wyman in Washington, D. C. on December 18, 1940.

Mr. BURTON. You state there were a number of supplements dated December 20, 1940?

Mr. MARTIN. Yes, I served as Attorney for Hawaiian Constructors from the very inception of the contract until the completion of the work about a year ago. By that I mean I personally dictated from Washington to my Los Angeles Office the joint venture agreement.

Mr. BURTON. I would like to ask you to repeat what you said about the Far Eastern Air route.

[3] MARTIN. You asked me about Mr. Rohl's being in charge of the Islands. It is my understanding that on or about the 25th of September, 1941 Mr. Rohl took a clipper to the Islands and immediately took direct charge of a major portion of the project. I understand from him that he was there on December 7, 1941 and that on or about December 10, 1941 he received from the Commanding General

an order to construct for the Government the five ferry command bases from the United States to Australia. Within 35 days after the receipt of such order he had completed those 5 ferry command bases.

BURTON. Do you know anything of the relationship of Leif J. Sverdrup of the firm of Sverdrup and Parcel and later the firm of Sverdrup and Parcel and J. Gordon Turnbull, to the Hawaiian Constructors?

MARTIN. I have spent, as attorney for the Bechtel-Price-Callahan Company, a considerable amount of time on their problems. On one occasion I flew to Edmonton and spent a portion of a month there as attorney for Bechtel-Price-Callahan who had the contract for what is known as the Canol Project. While there were only three names on the contract, there were probably 10 or 12 who had been contributing their efforts to that project. I do not believe a supplemental contract was made so as to bring all those people in as contractors to that project. I did come into contact with that firm in connection with the Canol project. I have never contacted them in connection with the Rohl-Connolly Company. It is my recollection that Sverdrup has served as the consultant in my work with other clients.

[4] BURTON. Do you know whether or not Sverdrup is an associate or close personal friend of Rohl?

MARTIN. I am sure he is not. I never met Sverdrup. I have represented Mr. Rohl as his attorney and I would say also as his attorney in fact for a period of more than 15 years and I don't know the man Sverdrup.

BURTON. Do you know about how many supplements there were to the original contract which was W-414 eng 602 signed December 1940?

MARTIN. Approximately 40.

BURTON. Do you know anything of negotiations which are pending now relating to the termination settlement of the contract with the Hawaiian Constructors? Have you had anything to do with them?

MARTIN. It is my understanding that conferences concerning that matter have been had with my office, probably with my brother, Frank L. Martin, Jr. I have had some discussion with those interested in the Hawaiian Constructors, but I have no detailed information of that now. I can say to you I believe the present status would show that on approximately \$100,000,000 worth of work completed by Hawaiian Constructors, there is a major portion of it on which no settlement has been made either as to determination of fees or the issuance of final estimates of the making of final payments themselves.

BURTON. Are those negotiations taking place in California or in Hawaii?

MARTIN. I am personally not handling them and I can't give you any help on that subject. It is my recollection that a decision was [5] reached by Mr. Connolly, Mr. Grafe, and Mr. Shirley that that matter was to be handled by their partner Mr. Wooley who resides in the Islands and that Mr. Wooley has the assistance of Mr. Middleton who has been in continuous active charge of the office for Hawaiian Constructors in the Islands throughout the entire period of the contract.

BURTON. Will you continue your statement regarding Colonel Wyman?

MARTIN. When I said a few moments ago I personally saw Colonel Wyman in Washington, D. C. about the 18th of December, 1940, I had in mind a joint conference with Mr. Connolly, Mr. Grafe and Mr. Wyman which was prior to the date when the contract was signed for the work. I only spoke to Colonel Wyman in greeting because I had known him in Los Angeles. I don't recall there was any business discussion at all in that conference. I had shortly adjourned to a conference with Mr. Connolly and Mr. Grafe at which time I learned of their wishes for a joint venture. The negotiations for that contract were handled by Mr. Connolly personally with Mr. Grafe, General Schley and General Robbins in Washington and a Major Neuman. Mr. Rohl was not present in Washington and to the best of my knowledge, knew none of the terms or provisions of that contract or had anything to do with it until on or about September 25, 1941. I make that statement because sometime in 1929 Mr. Rohl had come to my office and handed me his original declaration of citizenship and inquired of me whether there wasn't some means by which he could [6] now proceed to obtain his final papers, I told Mr. Rohl he had waited too long, that the 7 years period had already expired. He said he was quite anxious to expedite the obtaining of his papers and wondered if I didn't know of somebody who knew a way that the procedure could be shortened, calling to my attention the fact that his wife was an American. I told him I would write to Washington, D. C. and try to think of something that would enable him to obtain citizenship without starting all over again. In the early spring of 1941 Mr. Rohl came to my office

and handed me an order of Colonel Wyman, District Engineer, directing that he report as a consultant in the Islands in connection with the work of the Hawaiian Constructors. I at that time discussed with Mr. Rohl the possibility of the Department issuing him a permit authorizing him to go to the Islands. It is my recollection that I thought probably the order by the District Engineer would be sufficient for him to go, but that I felt for him to go in the capacity where the order itself disclosed that the contract was secret, this order showed it was a secret contract, would not be wise. I advised Mr. Rohl he shouldn't attempt to assume responsibility for a secret project at a time when he wasn't a citizen of the United States. Mr. Rohl asked me if I would explain to General Robbins why Mr. Rohl was not obeying that request of Colonel Wyman. I told him [7] I would and I think there was a lapse of probably several months. Other subsequent requests had been made by Colonel Wyman who apparently was rowing with Paul Grafe, in which Rohl was again requested to come to the Islands and it drifted along until about August 1941 when I had come to Washington and handed to General Robbins a photostatic order directing that Rohl go to the Islands and I believe that Colonel Lorange and a civilian attorney for the Chief of Engineers named Stephen were there. It is my recollection that General Kingman, who was then Acting Chief of Engineers, was brought into the discussion and that Kingman thereupon wrote a letter to Mr. Schofield. Was it Schofield? The letter was dated about August 28, 1941, and Mr. Schofield is head of the Department of Immigration in which General Kingman stated that there could be no question of Mr. Rohl's loyalty to the United States; that his services were badly needed in the islands, and that he understood he had a petition pending with the court in Los Angeles for his naturalization and would they do what they could to expedite the hearing on its merits by the Federal court. It is my recollection that Mr. Stephen delivered that letter by hand to Mr. Schofield and that Mr. Schofield then wired his office at Los Angeles asking that they expedite a hearing of the Rohl petition, and while in Washington I was advised that it had been set for September 15. At that hearing my brother appeared as attorney for Mr. Rohl.

BURTON. Did Mr. Rohl have any one else employed as attorney?

MARTIN. Only as my associate. At that time my brother was ill and [8] I had Mr. Cannon aid me. He was on a number of cases with me and probably had an active part in this hearing on September 15, although I was not personally present. That is just my recollection.

COLGAN. Did I understand he had taken out his first papers?

MARTIN. He took out his first papers at Sacramento in about 1913 to 1915.

BURTON. Do you want to tell of Rohl-Connolly's Company participation in contracts having to do with the Government or is there something you want to say before then?

MARTIN. I previously stated that the first contract for Government work awarded the Rohl-Connolly Company on a competitive bidding basis was for the Hawaiian Constructors. The second contract, and I believe the only other Government contract ever awarded the Rohl-Connolly Company, or in which it participated other than on a competitive bidding basis is what is known as the Haines Cut-off contract, which is a secret contract of the War Department. The contract, I believe, was signed by a General Worsham, Division Engineer of the Northwestern Engineering District. I believe a letter of intent was signed by Colonel Wyman about February 9, 1942. The Rohl-Connolly Company had no active participation in the prosecution of the Haines Cut-off work. That was a highway which was being built to avoid a bottleneck in the Alaskan Highway, about 160 miles long. It started at a place called Haines. The Rohl-Connolly Company had a considerable amount of marine equipment that was then being used under a rental agreement by Navy contractors doing breakwater work and Army contractors doing breakwater work in Los Angeles Harbor. Foley Bros. and Rohl-Connolly Company were asked [9] to join in a 50-50 proposition in the execution of this secret contract. The primary reason for doing this was to gain the permission of the Rohl-Connolly Company to terminate the rental agreements for this marine equipment for the Army and Navy work so that the marine equipment would be available for the Haines Cut-off job, which contract was signed and a very considerable portion of the Rohl-Connolly Company equipment was made available.

BURTON. You mean that the Rohl-Connolly Company retained their financial interest in the contract but did not have any active participation in it?

MARTIN. That is correct.

COLGAN. You spoke of ten or more subcontractors on the Canol project?—or was it supplemental contracts?

MARTIN. What I said was the original contract with the Bechtel-Price-Callahan Corporation—that is, special features of the work were performed by other companies; they were selected to perform those special tasks and it is my recollection that those companies were not made parties to the original contract, with the full knowledge and approval of the contracting officer. Mr. Rohl had no interest either directly or indirectly in the Canol project.

BURTON. Do you know whether Mr. Rohl was over in Alaska during the period of construction work?

MARTIN. I do not believe that he has ever been in Alaska at any time. Not to my knowledge.

BURTON. Is the Bechtel-Price-Callahan one corporation?

MARTIN. The Bechtel Corporation is just one corporation, the W. W. [10] Callahan Corporation is another. The Bechtel-Price-Callahan is the same Callahan Corporation that was interested in the Hawaiian Constructors.

BURTON. What was the name of the Callahan Company which was in the Hawaiian Constructors?

MARTIN. W. E. Callahan Construction Company.

COLGAN. Can you give us some of Mr. Rohl's background prior to 1926?

MARTIN. I can cover that whole field but it would take a little time. Mr. Rohl was educated as a mechanical engineer at one of the universities in Germany. As a young man he went to South America. He had been in South America in charge of a special force there on mining properties. What I think should really happen here, as I can hit just the high points, I will have my brother prepare a statement, or have Rohl come here so that we have accurately all information you want. I have heard so much broadcast against Mr. Rohl that I am beginning to wonder as I do not know any of the things that I have heard broadcast. I have heard Fulton Lewis, Jr. broadcast about the \$75,000 yacht. The yacht belonged to Mrs. Rohl, she received \$1 for the leasing of it and that is all she received. (He here made mention of the Senator Tenney investigation, and stated that he obtained copies of the transcript and personally delivered a copy of it to Major General Roberts and to Attorney General Biddle on March 9, 1943).

BURTON. Do you know how much the Government spent in reconditioning the Vega?

MARTIN. No. It was the best maintained and kept boat on the Pacific [11] coast when the Government took it. I do know this. I know that the object of Colonel Wyman in taking it was to use it in certain South American countries as a survey project, but through the lack of cooperation the original use, to make a survey of the shortest route from these countries to the island, was never realized. It was to be used as a survey boat, a secret survey.

BURTON. Certain South American countries would not cooperate?

MARTIN. That is my information. It is secondhand, I learned during the time that the facts transpired. Colonel Wyman could give you better information than I can. There are certain islands that could have been used, which would have shortened our route, certain South American countries made this impossible. It was to have been used as a survey boat. The boat was subsequently purchased by the Government contract.

BURTON. I think by the Navy.

MARTIN. I am using broad terms.

BURTON. Is Mr. Grafe an American citizen?

MARTIN. I have no information at all. I always assumed he was.

GALLOWAY. I know this. He was going to Rose Polytec in Terre Haute, Indiana, where I lived. I was practising law there before the World War and he was there and was a friend of friends of mine.

MARTIN. So far as knowing it, I do not know. I do know this, I know him well enough to know that he is a very loyal, aggressive man, whose ability is well recognized in the industry. He pushed through and built Madden Dam, and has done a great deal of construction [12] work, tunnels, dams, etc. for the Government, and that he is the manager of the Policy Committee for the Canol Project and has given largely of his personal time. While Lewis was broadcasting about him he was north of the Arctic Circle doing his work, no radio broadcasts could get through there and he did not know what was being said about him. Mr. Rohl and Mr. Grafe are both aggressive men and you cannot be aggressive without stepping on someone's toes. I do know they are loyal to this country and their loyalty cannot be questioned. I do know that one of the

natural effects of the Fulton Lewis broadcasts and activities is to hamper our war effort and our preparedness program. I do know that when you do anything of this nature that you effect the mental punch of a man by destroying his peace of mind and destroying his ability to accomplish construction projects, or anything else. I feel that men who are engaged in putting forth their efforts in that direction under war conditions, should have support and not be interfered with. I will say for Mr. Rohl, Mr. Grafe, and Mr. Connolly, they are willing to come here. All I have to do is pick up the telephone and they will come here voluntarily, without service of subpoena.

BURTON. It is gratifying to know that.

MARTIN. I know something of the difficulties that are being encountered on the Canal project. But it is my understanding that they have discovered one of the largest potential oil fields that have ever been discovered on the North American continent; rich in 100 octane gas, oil, etc. If that is true, it should be worth leveling, and [13] as to the cost of development, maybe their commercial development would be very high in dollars, but if it is to be measured in the human lives saved then the cost is immaterial.

I served as a pilot in the Army 27 years ago, my brother was a pilot, my son is an Army pilot, and I have a daughter who is married to a Naval officer. I am somewhat prejudiced when I see anyone blackmailing, getting publicity for mud-slinging, or for other reasons injuring the fellow who is doing this work. I have to sympathy for him.

I was personally informed by the Speaker of the California State Legislature that the Jack Tenney Committee received appropriations for the calling in of those witnesses and taking of testimony on the representation that it was taking that testimony at the special instance and request of Attorney General Biddle. I received a copy of the transcript, and I personally delivered it to Attorney General Biddle. I advised him of the information I had received from the Speaker of the Assembly. I advised him in the presence of witnesses that Tenney had stated he had taken that testimony at the special instance of Mr. Biddle. Mr. Biddle at once informed me that that statement was not true. That none of the proceedings were being done at the instance or request of the Attorney General or his department.

I know that the petition which the department prepared for Rohl for his citizenship in the Spring of 1941 could not be acted upon, could not get any recommendations or any action of any [14] kind on it. I finally found out that a person in Los Angeles had taken the position, with relation to the Rohl-Connolly Company, who owned the scows, tugs, etc., that these had been licensed by the Bureau of Navigation when Hans Wilhelm Rohl owned 25% of the stock of the Rohl-Connolly Company, whereas the participation of an alien is limited to 15%. I personally came to Washington and submitted all of the facts and all of the data to the Solicitor General for the Department of Commerce, who personally went through all the files and all of the data and reported back that he could find no moral turpitude; that it was not a case for seizure of the vessels. The vessels had been documented by a broker who did not know that Mr. Rohl was not a citizen and signed by a secretary, Irma Dickey, neither of whom knew of the limiting of stock to 85% American and 15% alien. The Rohl-Connolly Company was fined \$25,000. That was promptly paid by the Rohl-Connolly Company. The Department of Commerce in turn communicated direct with Mr. Schofield, head of Immigration and advised Mr. Schofield that so far as the Department of Commerce was concerned, they could find nothing as to why Mr. Rohl's petition should not be promptly acted upon, and with that determination by the Department of Commerce, and letter from General Kingman, Mr. Schofield did expedite the placing of the petition on the calendar. I was told, and I hesitated a moment ago to say, I learned not so long ago that the informer had been paid by the United States Government, a statutory portion of that \$25,000 penalty.

Of course, I assume that you are not interested in any [15] threats that may have been made to any of my clients as to what would happen in the event they did not pay off. I assume that it is your duty to determine any action you may take on the facts.

BURTON. I think it is important that you include in your statement anything that you may know of any threats which have been made to your client.

MARTIN. I do not want to bother you with something you are not concerned with.

BURTON. If there is anything within your knowledge that reflects in any way upon the credibility of a witness who has, or does appear before the Committee, I think it your duty to submit it.

MARTIN. Only recently, prior to coming to Washington, in a telephone conversation with Mr. Hans Wilhelm Rohl, I was informed by him that such threats had been made. He did not give me the details, but I understand that they had been made by person or persons scheduled to appear before your Committee. I asked Mr. Rohl whether he had personally seen such documents. He said that he had. I asked him how many. I think he said two. I asked him if he could furnish me with photostatic copies. He said he could. I told him that if Mr. Burton was interested in them, I would let him know. That is all the information I have on this subject.

BURTON. I think it proper at this point to say to you emphatically, and without qualification or the slightest question, that this Committee as such, or any of the members of the Committee, are absolutely above participating in anything in the nature of persecution of anyone, and if any threats directly or indirectly [16] are involved they should be submitted at once.

MARTIN. That is the reason I just made the statement, summary of my knowledge, my information from Mr. Rohl on that subject. I do not have in my possession or have I seen such threats relating to the telephone conversation I had with Mr. Rohl. I have but one interest here which is paramount, that is our preparedness program.

BURTON. A hearing, or an investigation, so far as this Committee is concerned, is never conducted for the purpose of publicity or smearing any one, and I can say without qualification that I have never encountered any such thing.

MARTIN. If you had an opportunity to talk with Mr. Rohl and Mr. Grafe, they could substantiate what I have said. If you could satisfy yourself from the key leads I am giving you here, I think you would be in a position to move with considerable dispatch. I am ready to bring these men here at any time you want them.

HANS WILHELM ROHL

Born in Lubeck, Germany, September 29, 1886.

His last foreign residence was Raneagna, Chile. He emigrated to the United States from Valpariso, Chile, on October 23, 1913, arriving in New York City on the S.S. "Santa Marta" and paid his head tax.

He came to the United States to work for Nevada Consolidated Mining Company. Went to Nevada and worked there for about a year.

In 1914 he went to Sacramento, California, where he was employed by George Pollock, contractor.

He had a common law marriage in Sacramento in 1914. Four children were born of this marriage.

On July 23, 1915, he filed Declaration of Intention in Superior Court at Sacramento. He registered for the draft in 1917. He did not surrender Declaration of Intention or claim exemption because of citizenship. He was given some sort of supervisory position on a project engaged in raising food stuff for the Army during World War I, on which project some 600 were employed.

Later took up residence in San Francisco and in 1925 had a common law divorce, by agreement providing for care of children and common law wife until she remarried. Wife has since remarried and her name is now Mrs. Clark. Mrs. Clark's last residence of which I have knowledge was Sacramento, California.

Married Floy Edith Hubert (nee Adams) in San Francisco on August 26, 1925. Floy Edith Adams was born in Iola, Kansas, on October 27, 1890. She was formerly married but divorced in San Francisco.

On November 27, 1924, sailed from New York on S. S. Deutschland to England. Spent week or less in Germany. Returned New York January 10, 1925 on S. S. France. Had visa from German Consul in San Francisco.

In 1931 made several trips to Mexico in connection with highway construction for Mexican Government.

In 1932 wife purchased Yacht Ramona in New York, and he sailed on boat through Panama Canal arriving at San Diego.

In 1937 Ramona sold, and wife purchased Yacht Vega in New York. He went aboard at Jacksonville, Fla., went through Canal, then to Honolulu, arriving there in January, 1938, and then to Los Angeles, arriving in February, 1938.

Registered under Allen Reg. Act in Dec. 1940.

February 3, 1941, filed preliminary application papers for citizenship with Butterfield.

March 10, 1941, took examination before Butterfield with two witnesses, T. E. Connolly and Dr. Karl Lewis. Filed petition for naturalization and appeared

2744 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

before Julge Terrell, who excused the witnesses, but requested certified copies of his divorce proceedings, and of present wife's divorce proceedings.

On September 15, 1941, his petition was heard by the U. S. District Court at Los Angeles, and decree granting citizenship was entered.

On September 25, 1941, left by Clipper for Honolulu in accordance with written order of Colonel Wyman, dated January 22, 1941.

Mr. Rohl's reasons for refusing sooner compliance with Colonel Wyman's order of January 22, 1941, were fully explained to Major General Robins, U. S. Engineer Corps, about August 28, 1941, at which time General John J. Kingman directed a letter to Lemuel R. Schofield, head of the Department of Immigration and Naturalization in Washington. This letter in substance stated that Rohl's services were badly needed in the Islands and that he had declined to make his services available to Colonel Wyman until such time as the U. S. District Court in Los Angeles had heard and determined upon its merits his then pending petition for citizenship.

Mr. Schofield, on receipt of General Kingman's letter, wired his Los Angeles office requesting that Mr. Rohl's petition be placed upon the September 15 calendar for hearing in the Federal Court of Los Angeles. The petition was heard on September 15, decree of citizenship entered and on September 25, Mr. Rohl left by Clipper for Honolulu and for the next 14 months took active charge of work of the Hawaiian Constructors in the Islands.

At no time prior to the entry of his final decree of citizenship did Hans Wilhelm Rohl take any part in prosecution of the work or the performance of the Hawaiian Constructors' obligations, as during the period prior to Mr. Rohl's declaration of citizenship Mr. Paul Grafe was in the Islands in active charge of the work of Hawaiian Constructors. Mr. Rohl had no part in the negotiations or the Hawaiian Constructors contract as such contract was personally negotiated in Washington, D. C., by Mr. T. E. Connolly, president of Rohl-Connolly Company, Mr. Paul Grafe, vice-president of W. E. Callahan Construction Company, with General Schley, General Robins, and Major Newman.

During the period of these negotiations, Colonel Wyman was then serving as District Engineer in the Islands and was present in Washington for the purpose of making known to the Department his requirements, but the actual negotiations were primarily with the three other officers above-mentioned.

WAR DEPARTMENT,
Washington, May 23, 1944.

H. RALPH BURTON,
General Counsel, House Military Affairs Committee,
519 Old House Office Building, Washington, D. C.

DEAR MR. BURTON: With reference to your oral request that you be furnished certain information with respect to the equipment which was purchased from Rohl-Connolly Company for use in connection with contract No. W-414-eng-602, there is enclosed a memorandum from the Office of the Chief of Engineers dated May 23, 1944 which, it is believed, contains the information desired by you.

Yours sincerely,

/s/ James P. Murtagh,
JAMES P. MURTAGH,
Major, Inf.

(For Julius H. Amberg, Special Assistant to the Secretary of War.)

WAR DEPARTMENT,
OFFICE OF THE CHIEF ENGINEERS,
Washington, 23 May 1944.

Address reply to Chief of Engineers, U. S. Army,
Washington, D. C.
Refer to File No SPEGS 3335 (Hawaiian Dept).
Memorandum for Mr. Julius H. Amberg,

Special Assistant to the Secretary of War.

Atten: Major James P. Murtagh, Inf. Room 3D739, The Pentagon.

Subject: House Military Affairs Committee Investigation Rohl-Connolly Company.

1. Reference is to your memorandum for the Chief of Engineers dated 14 April 1944, subject as stated above.

2. Information responsive to the inquiries made by the Chief Counsel of the House Military Affairs Committee, relative to the equipment which was purchased from Rohl-Connolly Company for use in connection with Contract No. W-414-eng-602, has been secured from the Acting District Engineer at Honolulu, T. H., and is furnished below.

a. *A list of the equipment involved.* The following items of equipment were purchased from Rohl-Connolly Company for use in connection with Contract No. W-414-eng-602:

No. of units	Description	Unit price	Total cost
1	80-D Northwest Shovel, Serial No. 5437	\$30,000.00	\$30,000.00
1	80-D Northwest Shovel, Serial No. 5184	25,000.00	25,000.00
1	80-D Northwest Shovel, Serial 3872	20,000.00	20,000.00
2	Sullivan Class Wn. Air Compressors, Serial Nos. 19023 & 19024	4,500.00	9,000.00
1	Palmer International Generator, Serial No. 508186	2,500.00	2,500.00
7	Sterling Trucks, Model HCS, Engine Nos. 13622, 13604, 13701, 13659, 19789, 10398, 13605	9,000.00	63,000.00
1	Rex Double Pumcrete (Model 200)	9,000.00	9,000.00
1	Lot Pumcrete Accessories and Parts	6,982.14	6,982.14
1	Hell Hoist (Model OT-73-S0)	941.03	941.03
	Total		166,423.17

b. *The date on which the equipment was, according to the terms of the agreement, to be delivered.* No written agreement was entered into prior to actual acquisition of the equipment by the Government. Arrangements were made in November, 1941, between Colonel Theodore Wyman, Jr., then District Engineer, Honolulu, and Mr. H. D. Rohl, of the Rohl-Connolly Company, for the plant in question to be made available for use under Contract No. W-414-eng-602. The transaction was consummated by issuance of Government purchase order to Rohl-Connolly Company 18 March 1942, after the equipment had been in the possession of the United States for approximately four months, i. e., considering both time in transit and time in use.

c. *When the equipment was actually delivered in Hawaii.*—The equipment was received in the Hawaiian Islands early in February 1942.

d. *What caused the delay in transporting the equipment to Hawaii.*—The equipment was originally scheduled for use on construction work being performed at Canton Island under Contract No. W-414-eng-602. The equipment was shipped from Los Angeles, California, on the Army Transport Ludington and was enroute to Canton Island at the time of the enemy attack of 7 December 1941, whereupon the vessel was ordered back to the United States and accordingly returned to Los Angeles. The equipment was then shipped to the Hawaiian Islands under war restrictions, where it was retained for utilization on defense projects.

e. *How much was paid to Rohl-Connolly Company for the equipment and how much additional expense, if any, was incurred in transporting it.*—Total payment in the amount of \$166,423.17 was made to Rohl-Connolly Company on 19 March 1942 for the equipment listed in subparagraph a above as representing its value at time of original possession by the Army. The equipment was purchased f. o. b. Los Angeles, California. Inasmuch as the equipment was shipped from that point via Army Transport, the actual additional cost incurred by the Army in transporting the equipment to Hawaii is not available.

For the Chief of Engineers:

/s/ Douglas I. McKay,
DOUGLAS I. MCKAY,
Special Assistant to the Chief of Engineers.

WAR DEPARTMENT

Washington, May 22, 1944

H. RALPH BURTON,
General Counsel, House Military Affairs Committee,
519 Old House Office Building, Washington, D. C.

DEAR MR. BURTON: This will acknowledge receipt of two unsigned memoranda, addressed by you to Lt. Colonel Miles H. Knowles under date of March 22, 1944.

in which you requested certain information in connection with the investigation being conducted by your Committee of the award of construction contracts in Hawaii.

The Office of the Chief of Engineers has furnished the seven enclosures listed below which, it is believed, contain the information desired by you. In addition, that office has supplied the following comments with respect to the enclosures:

1. *Information pertaining to basic contract and supplements thereto numbers 1, 2, 3, 4, and 5:*

a. *Dates of the orders to proceed for all the schedules listed in summary.* Copies of all job orders, with addenda thereto, applicable to the basic contract and first five supplemental agreement are enclosed, together with an index identifying the relationship of the various job orders to the schedules of work in the contract and supplemental agreements (Encl. #1). These job orders constitute the notice to the contractor to proceed with the work, and list in each case the proposed commencement date and estimated date for completion of the work. It will be noted from the last column of the index (Encl. #1) that, in many cases, the contractor was directed to proceed with the various items of work under any one particular schedule on different dates.

b. *Progress charts for the same schedules.* Progress charts, as such, were not maintained for the various schedules. In lieu thereof, data covering actual progress of the work were kept on a job order basis, and with respect to the job orders applicable to the basic contract and supplements Nos. 1 to 5 thereto, are reflected in the information furnished in subparagraph 1c below.

[2] c. *Monthly reports showing percentage of completion of the work as determined from estimates made and approved by the Contracting Officer.* Extracts of partial payment estimates pertaining to work under the basic contract and first five supplemental agreements are enclosed (Encl. #2.) These payment schedules show the progressive percentages of completion of the applicable job orders as determined from estimates jointly made and agreed to by representatives of the contractor and the Government and approved by the Contracting Officer.

d. *Record of weekly reimbursements to contractor for payroll and material invoices for the year 1941.* No reimbursements were made to the contractor for payroll and material invoices for the year 1941, since all reimbursable salaries and wages were paid to the contractor's employees directly by the Government and all materials utilized on the projects were either furnished by the Government or payment therefor made directly to vendors in accordance with the direct payment option reserved in the contract.

e. *By whom the air raiding devices were supplied and when they were received by the District Engineer for the District of Hawaii.* The only work performed by the contractor at Aircraft Warning Service locations was the construction of camps, buildings, utilities, roads, tunnels, fencing, and such appurtenant work. The actual furnishing and installation of technical equipment was a responsibility and function of the Army Signal Corps. In connection with Job Order No. 2.0 (Original Contract, Schedule "B"), the cableway erected at Mt. Kaala was purchased from the Interstate Equipment Corporation, 18 West Jersey Street, Elizabeth, New Jersey, under Government Supply Contract No. W-414-eng-784, dated 30 April 1941.

f. *By whom the storage tanks for gasoline were supplied.* The gasoline storage tanks covered by Supplemental Agreement No. 2, Schedule "J", were furnished the District Engineer in plate form by the Army Air Corps. The tanks were then either prefabricated by the contractor at a central point and hauled to the site or the plates were transported to, and welded at, the installation site. Revised work under Supplemental Agreement No. 4, Schedule "G", provided for the substitution of nine (9) 40,000-barrel all welded steel underground gasoline storage tanks for the four (4) 50,000-barrel tanks originally specified. These nine (9) tanks were furnished and installed by the Hammond Iron Works, Warren, Pennsylvania, under Government Lump-Sum Construction Contract No. W-1101-eng-5309, dated 23 October 1941.

g. *Record of any complaints made by the Government concerning delays of the contractor during 1941.*—There is no record in this office (U. S. E. O., Honolulu, T. H.) of any formal complaints registered by the Government concerning delays of the contractor during 1941.

2. *Information applicable to basic contract and all supplements thereto:*

a. *Chart showing the organization of the Hawaiian Constructors as required by Article 16 of the contract.* Three separate charts, reflecting the contractor's organizational set-up as of 31 March 1941, 26 May 1941 and 10 October 1942, are enclosed (Encl. #3.)

b. *Copy of Hawaiian District Order No. 1, dated 1 January 1943, terminating the contract and supplements to that date.* The order mentioned has apparently been cited in error, since District Order No. 1 dated 1 January 1943 has no bearing on the termination of Contract No. W-414-eng-602. It is believed that reference is intended to District Circular No. 4, dated 12 January 1943, copy of which is enclosed (Encl. #4.) There is also enclosed copy of termination notice given the contractor on 11 January 1943 (Encl. #5.) Prior to issuance of the notice (Encl. #5) terminating all work under the contract, as amended, the work provided for under Supplemental Agreement No. 43 (Parts 1 and 2) and Supplemental Agreement No. 23 (Parts 1 and 2) was terminated for the convenience of the Government by Change Order No. 12, dated 5 May 1942, and Change Order No. 13 (Part 1), dated 13 May 1942, respectively. Copies of both of these change orders are enclosed (Encl. #6 and #7.)

Yours sincerely,

/s/ James P. Murtagh
JAMES P. MURTAGH
Major, Inf.

Subject: Information concerning contracts with Hawaiian Constructors, Sverdrup & Parcel and Territory Airport Constructors

To: The Chief of Staff, U. S. Army, Washington, D. C.

1. Information requested in War Department secret radiogram No. 84 dated 6 February 1944, for the House Military Affairs Committee, concerning all contracts awarded under the jurisdiction of this Headquarters to Hawaiian Constructors, Honolulu, T. H.; Sverdrup & Parcel, St. Louis, Missouri; and Territory Airport Constructors, Honolulu, T. H., is given below.

2. *Information relative to Contract No. W-414-eng-602:*

a. Total payments made to date other than reimbursements for supplies, materials and services:

- (1) To Hawaiian Constructors:
\$541,031.35—Fixed Fee
\$124,105.05—Rental and recapture of new equipment
- (2) To Hawaiian Contracting Company, Ltd.:
\$317,128.58—Purchase of used equipment
- (3) To Rohl-Connolly Company:
\$166,423.17—Purchase of used equipment
- (4) To W. E. Callahan Construction Co.:
\$84,000.00—Purchase of used equipment
- (5) To T. R. Connolly, Inc.:
\$57,500.00—Purchase of used equipment

The bulk of the supplies and materials utilized on the contract work were purchased by the Government from independent vendors and paid for directly by the Government to the several vendors. With few exceptions, [2] all personnel employed by the contractor on the work was paid directly by the Government. Of the sums reimbursed or paid by the Government under Contract

2748 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

No. W-414-eng-602, Hawaiian Constructors have been requested by the present Contracting Officer to refund to the Government the following:

Date of request for refund	Item	Amount
9 Apr. 43	Legal services	\$110.00
22 Apr. 43		9,833.32
21 Sep. 43	De-luxe subsistence items ordered in connection with operation of Yacht VEGA	146.47
20 Oct. 43	1% per month interest prior to recapture of equipment used on the work	124,105.05
20 Oct. 43	License fees & taxes on equipment used on work	20,929.18
25 Jan. 44	Expenditures in connection with operation of Yacht VEGA	29,518.70
4 Feb. 44	Additional expenditures in connection with operation of Yacht VEGA	10,233.76
	Total	194,876.48

None of these sums has been refunded to date, although a total of \$29,604.83 has been set off against reimbursement payments which would otherwise have been due the contractor under the terms of the contract.

b. *Relative degree of participation by the Joint Venturers.*—The following data from the files of the U. S. Engineer Office, Honolulu, T. H., are believed to be substantially correct but have not been definitely confirmed.

Period	Joint venturer	Extent of interest
12/20/40 to 5/27/41.....	W. E. Callahan Construction Co.....	40%
	Rohl-Connolly Co.....	40%
	Gunther & Shirley Co.....	20%
[5] 5/27/41 to 12/31/41.....	W. E. Callahan Construction Co.....	32%
	Rohl-Connolly Co.....	32%
	Gunther & Shirley Co.....	16%
	Ralph E. Woolley.....	20%
1/1/42 to 1/31/43.....	W. E. Callahan Construction Co.....	24%
	Rohl-Connolly Co.....	24%
	Gunther & Shirley Co.....	12%
	Ralph E. Woolley.....	20%
	Hawaiian Contracting Co., Ltd.....	20%

c. *Personalities involved in the work on behalf of each one of the Joint Venturers.*

Name of joint venturer	Name and title of official involved	Nature and extent of participation
W. E. Callahan Construction Co.	Paul Grafe, Vice President.....	Negotiation of contract and supplemental agreements and active supervision of contract work from 20 December 1940 to approx. 31 December 1941
Gunther & Shirley Co.....	J. P. Shirley, President.....	Negotiation of contract only
Rohl-Connolly Company.....	T. E. Connolly, President.....	Negotiation of contract only
" " ".....	H. W. Rohl, President.....	Negotiation of supplemental agreements to contract and active supervision of contract work from about 1 January 1942 to about 24 June 1942
Ralph E. Woolley.....	Ralph E. Woolley, trading as an individual	Participated in supervision of contract work from 22 May 1941 to 31 January 1943
[4] Hawaiian Contracting Co., Ltd.	H. P. Benson, President.....	Participated in direction of contract work from 3 January 1942 to 31 January 1943

d. *War Department representative engaged in settlement negotiations.* Colonel B. R. Wimer, C. E., Deputy District Engineer and Contracting Officer, U. S. Engineer Office, Honolulu, T. H.

3. *Information relative to Contracts Nos. W-414-eng-634, W-414-eng-808, DA-W-414-eng-511, DA-W-414-eng-585 and DA-W-414-eng-842:*

a. Were contracts terminated at same time as Contract No. W-414-eng-602?
No.

b. If not, were they completed or terminated on some other date?

Contract No.	Completed or terminated	Date of completion or termination
W-414-eng-634.....	Completed.....	27 February 1941.
W-414-eng-808.....	Completed.....	24 April 1942.
DA-W-414-eng-511.....	Terminated.....	24 December 1942.
DA-W-414-eng-585.....	Completed.....	1 April 1943.
DA-W-414-eng-842.....	Completed.....	1 January 1943.

c. Amount paid under each contract and to whom paid:

Contract No.	Amount paid ¹	To whom paid
W-414-eng-634.....	Fee—\$1,300.00.....	Sverdrup & Parcel.
W-414-eng-808.....	Fee—\$13,600.00.....	do.
DA-W-414-eng-511.....	Fee—\$101,188.43.....	do.
DA-W-414-eng-585.....	Fee—\$20,469.00.....	do.
DA-W-414-eng-842.....	Fee—\$40,139.00.....	do.

¹ Other than reimbursements for supplies, materials and services.

d. If any of the contracts were terminated has a settlement been reached and full details of the settlement indicating what part of the work under the contract was performed:

(1) Contract No. DA-W-414-eng-511 is the only one of the contracts listed in this paragraph which was terminated prior to completion of all work thereunder. Final settlement has been reached in connection with the termination of this contract.

(2) Details of the settlement and percentages of work completed at each site under Contract No. DA-W-414-eng-511 are as follows:

[5] Site	Fee for design plans, etc.	% compl.	Fee earned	Fee for supervision of constr. & constr.-management services	% compl.	Fee earned
Nandi, Fiji Islands.....	\$21,921	98	\$21,482.58	\$54,914	80	\$43,931.20
Narewa, Fiji Islands.....	5,270	98	5,164.60	13,214	45	5,946.30
Tontouta, New Caledonia.....	1,120	75	840.00	746	75	559.50
Plaines des Gaïacs, New Caledonia.....	15,998	75	11,998.50	10,665	75	7,998.75
Townsville, Australia.....	2,332	100	2,332.00	1,555	160	935.00
	\$46,641		\$41,817.68	\$81,094		\$59,370.75
Total fixed fee earned and paid.....						41,817.68
						\$101,188.43

¹ Approximately 60%.

e. If termination settlement negotiations are current, state present status of such negotiations and whether it is possible to estimate the amount ultimately to be paid. Payments listed under subparagraph 3c above represent final settlement in connection with the termination or completion of all of the above listed contracts.

2750 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

f. Information as to the personalities involved in performance of each contract.

Contract No.	Name and title of person involved	Nature of participation
W-414-eng-634.....	L. J. Sverdrup, Partner.....	Negotiated contract and performed contract work.
W-414-eng-808.....	L. J. Sverdrup, Partner.....	Negotiated contract only.
	D. C. Wolfe, Engineer-in-Chief.....	Performed contract work.
6] DA-W-414-eng-511....	L. J. Sverdrup, Partner.....	Negotiated contract and actively supervised contract work from inception of contract to about 25 April 1942.
	D. C. Wolfe, Engineer-in-Chief.....	Supervised contract work from 25 April 1942 to termination of contract.
DA-W-414-eng-585.....	L. J. Sverdrup, Partner.....	Negotiated contract only.
	D. C. Wolfe, Engineer-in-Chief.....	Actively supervised the contract work.
DA-W-414-eng-842.....	L. J. Sverdrup, Partner.....	Negotiated contract only.
	D. C. Wolfe, Engineer-in-Chief.....	Actively supervised the contract work.

g. Name of War Department representative in the negotiation of termination settlement. Colonel B. R. Wimer, C. E., Deputy District Engineer and Contracting Officer, U. S. Engineer Office, Honolulu, T. H., negotiated the settlement in connection with Contract No. DA-W-414-eng-511, the only one of the above numbered contracts terminated prior to completion.

4. Information as to what part of performance of contracts was supervised by Hans Wilhelm Rohl, Paul Grafe, and Leif J. Sverdrup, and the installations and locations involved. (The following information supplements that contained in paragraph 3.)

Contract No.	Supervised by	Title and company	Approx. period	Nature and location of work
W-414-eng-602.....	Paul Grafe.....	Vice President, W. E. Callahan Construction Co.	20 Dec. '40 to 31 Dec. '41...	(Omission)
	H. W. Rohl.....	President, Rohl-Connolly Co.	1 Jan. '42 to 24 June '42...	
[7] W-414-eng-634.	L. J. Sverdrup.	Partner, Sverdrup & Parcel.	21 Jan. '41 to 16 Feb. '41...	(Omission)
DA-W-414-eng-511.	L. J. Sverdrup.	Partner, Sverdrup & Parcel.	6 Nov. '41 to 25 Apr. '42...	(Omission)

5. Advise whether Hawaiian Constructors still have all of the construction work in the Hawaiian Department; if not, who does have it? Since the termination of Contract No. W-414-eng-602 effective 31 January 1943, Hawaiian Constructors have not performed any construction work in the Hawaiian Department (now Central Pacific Area). From 1 February 1943, all construction work has been and is now being performed by hired labor forces of the United States Engineer Office, Honolulu, T. H., with the exception of a few lump sum contracts which have been awarded by the United States Engineer Office to local contractors having available organizations and equipment for construction of temporary buildings and facilities in the Hawaiian Islands.

[8] 6. Advise specifically whether there was any other reason for the termination of construction contracts relating to work in New Caledonia other than the reasons which led to the general termination of Contract No. W-414-eng-602. The arrival of the task force and their taking over the construction prompted the termination of all work in New Caledonia under Contracts Nos. W-414-eng-602 and DA-W-414-eng-511.

7. Information as to all prime contracts and subcontracts awarded in areas of Territory of Hawaii or Southwest Pacific (including Canton Island, Christmas Island, the Fiji Islands, New Hebrides, New Caledonia, the Solomon Islands, Aitutaki, Tongatabu, Norfolk and Townsville, Australia) to the Territory Airport Constructors, or to any other company, corporation, partnership or syndicate in which Hans Wilhelm Rohl, Paul Grafe, or T. E. Connolly were in any way associated.

a. Contractor. Hawaiian Constructors, Honolulu, T. H., a joint venture composed of W. E. Callahan Construction Company, a Nebraska corporation; Gunther & Shirley Company, a Nebraska corporation; Rohl-Connolly Company, a Nevada

corporation; Ralph E. Woolley, operating as an individual of Honolulu, T. H.; and Hawaiian Contracting Company, Ltd., an Hawaiian corporation.

(1) *Contract No.* W-414 eng-602.

(2) *Amount of contract.* Total estimated cost of all work ordered by the Government prior to termination of the contract (including that not completed at the effective termination date) \$135,891,523.00, and estimated total fixed fee allowance with respect thereto \$1,035,892.00. These figures are approximate only, and are based upon the amounts set forth in the contract, as amended to date, plus the estimated cost of work ordered prior to termination but not yet incorporated into the contract by supplemental agreement and the estimated fixed fee allowance with respect thereto. Amounts included with respect to work not yet covered by contract have been proposed by the Government, but have not been fully or finally accepted by the contractor.

(3) *Date of award of contract.* 20 December 1940.

(4) *Estimated completion date.* Six months for original contract; indefinite thereafter.

(5) *Date of termination prior to completion of work.* 31 January 1943.

[9] (6) *Percentage of work completed at time of cancellation.* Approximately 65%.

(7) *By whom work was completed.* Essentially all projects not completed prior to termination of Contract No. W-414-eng-602 have been or are now being prosecuted by hired labor forces of the United States Engineer Office, Honolulu, T. H.

(8) *Date of completion.* The majority of the individual projects formerly covered by Contract No. W-414-eng-602 have been completed at various intervals since the termination of that contract effective 31 January 1943. A few of the projects are not one hundred per cent (100%) complete by reason of temporary suspension of the work at intervals due to low priority, nonreceipt to date of certain materials required in the work, etc.

(9) *Full details of any termination settlement concluded.* Negotiations are still in progress. No mutually satisfactory settlement is in sight.

(10) *Status of pending termination settlements, and amounts to be paid if that can be estimated.* Contract No. W-414-eng-602, as amended to date, does not cover all of the work ordered by the Government and performed by the contractor prior to termination, nor does it reflect all revisions within the contract which were directed by the Government prior to termination. Reference is made to tabulation entitled "Cost Estimates—Contract No. W-414-eng-602," forwarded to the Chief of Staff, U. S. Army by secret letter of this Headquarters dated 21 January 1944, subject "House Military Affairs Committee Investigation—Hans Wilhelm Rohl." Exhibits "A" and "B" of that tabulation cover all work included in the contract, as well as changes in these contract items which have not yet been covered by formal change order. The figures set forth in Exhibits "A" and "B" of the tabulation represent the final agreed estimated construction costs of the work covered by the contract, adjusted to reflect all revisions in these projects which were directed by the Government prior to final termination. All revised estimates listed in Exhibits "A" and "B" of the tabulation have been agreed to by the contractor and by the Government, with the exception noted by the contractor to deduction of \$700,000 from the estimated cost of work performed under Supplemental Agreement No. 4, Schedule G. The figures listed in [10] Exhibit "C" of the tabulation cover direct costs only on the balance of the work ordered by the Government and completed by the contractor as of the effective contract termination date, but not yet covered by supplemental agreement to the contract. The Contracting Officer and the contractor have agreed to these direct cost estimates and to the proportion of the work actually completed at the contract termination date. The Contracting Officer has proposed an allowance of seven per cent (7%) of direct costs to cover the estimated indirect cost to the contractor of performing all work listed in Exhibit "C." This allowance has been appealed by the contractor, but no final decision reached. The Contracting Officer has further proposed to the contractor an allowance of 25% of the maximum allowable fees approved by the Under Secretary of War for work under cost-plus-a-fixed-fee construction contracts with respect to the work included in Exhibit "C" of the aforementioned tabulation and not yet covered by the contract. The contractor has protested this proposed basis of computing the additional fixed fee allowance. However, based upon the estimates of cost, percentages of completed work and fixed fee allowance on which agreement has been reached, and using the additional amounts which have been proposed by the Government but not

2752 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

accepted by the contractor, the total estimated cost of the work completed under Contract No. W-414-eng-602 at the effective contract termination date will approximate \$88,525,609.00 and the fixed fee allowance is presently estimated at \$800,000.

(11) *Personalities involved in work on behalf of each company.* See subparagraph 2c above.

(12) *War Department representative engaged in settlement negotiations.* See subparagraph 2d above.

b. *Contractor.* Territory Airport Constructors, a joint venture composed of W. E. Callahan Construction Company, a Nebraska corporation; Gunther & Shirley Company, a Nebraska corporation; and Paul Grafe, an individual of Los Angeles, California.

(1) *Contract No.* CCA-4140 (W-414-eng-854).

(2) *Amount of contract.* Approximately \$3,594,203.42.

(3) *Date of award of contract.* 19 May 1941.

(4) *Estimated completion date.* 10 September 1942.

(5) *Date of termination prior to completion of work.* 20 December 1941.

(6) *Percentage of work completed at time of cancellation.* (Omission.)

(7) *By whom work was completed.* The Upolu airport project was totally abandoned. The terminated work at the Hilo, Maui and Molokai Airports was completed by Hawaiian Constructors under Contract No. W-414-eng-602.

(8) *Date of completion.* (Omission.)

(9) *Full details of any termination settlement concluded.* Payment was made at the contract unit prices for all work in place as of the effective contract termination date in the total sum of \$679,813.43.

(10) *Status of pending termination settlement, and amount to be paid if that can be estimated.* The amount of the payment stipulated under subparagraph 7b (9) above represents final settlement.

(11) *Personalities involved in work on behalf of each company.*

Name of joint venturer	Name and title of official involved	Nature and extent of participation
W. E. Callahan Construction Co. and Paul Grafe.	Paul Grafe, Vice President of W. E. Callahan Construction Co. and trading as an individual.	Negotiated contract and actively supervised contract work.
Gunther & Shirley Company---	None-----	

[12] (12) *War Department representative engaged in settlement negotiations.* Colonel Theodore Wyman, Jr., C. E., then District Engineer, U. S. Engineer Office, Honolulu, T. H.

8. The original of the report of the Inspector General concerning Colonel Theodore Wyman, Jr., and Rohl-Connolly Company has been forwarded under separate cover via air mail.

ROBERT C. RICHARDSON, Jr.,
Lieutenant General, U. S. Army,
Commanding.

CONFIDENTIAL

WAR DEPARTMENT,
Washington, D. C., 14 January 1944.

Re: House Military Affairs Committee Investigation of Colonel Theodore Wyman, Hans Wilhelm Rohl, and Colonel Lief J. Sverdrup.

H. RALPH BURTON,
Chief Counsel, Truman Committee,
Old House Office Building, Washington, D. C.

DEAR MR. BURTON: In response to your oral request for a compilation of the contracts held by Colonel Lief J. Sverdrup and associates with the War Department, you will find annexed a compilation of the contracts giving the contract number, date, amount of contract and description and location of the work. These contracts are between the War Department and the following:

L. J. Sverdrup
Sverdrup & Parcel
Sverdrup & Parcel and J. Gordon Turnbull

You will note that several of the contracts listed herein have been awarded on a cost-plus-fixed-fee basis. The letters "FF" indicate the fee to the Architect-Engineer and the figure shown as "estimated cost of construction" indicates the amount to be paid the constructor under a separate contract.

Your attention is called to the fact that the contracts are all dated with the exception of one before 7 December 1941. Since that date, if any further contracts have been let to Colonel Sverdrup and his associates, they are under the jurisdiction of the Commanding General of the Hawaiian Department to whom inquiry is being addressed by this office for further information. You will note that this material is classified as confidential by the War Department, and it is respectfully requested that the Committee respect the War Department classification.

Yours sincerely,

/s/ Miles H. Knowles
MILES H. KNOWLES
Lt. Colonel, JAGD

SECRET

WAR DEPARTMENT,
OFFICE OF THE UNDER SECRETARY,
Washington, D. C., 8 January 1944.

Mr. H. RALPH BURTON,
Chief Counsel, House Military Affairs Committee,
519 Old House Office Building, Washington, D. C.

DEAR MR. BURTON: I refer below to memorandum dated 8 December 1943, from the Assistant Chief of Staff, G-4, regarding the contract with Hawaiian Constructors, in which Rohl-Connally was a joint venturer. This memorandum was transmitted to this Office through another War Department branch and was mistakenly filed in that branch until yesterday, when it was traced and then delivered to this Office. This accounts for the delay.

The above mentioned memorandum gives the following information:

By radio CM-IN-4957 (8 Dec 43) the commanding General, Central Pacific Area has advised that only one contract involving Hans Wilhelm Rohl has been awarded in that area. The number of this contract is W 414 Eng 602. It was awarded by the Honolulu District Engineer to Hawaiian Constructors, in which Rohl-Connally Company was a joint venturer. The contract was dated 20 December 1940 and was approved by the Under Secretary of War on 3 January 1941. It was terminated for the convenience of the Government, effective 31 January 1943, prior to completion of all work thereunder.

The total estimated cost involved in this contract was \$84,436,961 and the contract called for a fixed fee of \$1,014,690. As result of current negotiations in connection with the termination of this contract, these figures are subject to substantial revision.

The contract referred to above covered various construction projects located throughout the Hawaiian Islands, including air fields, fortifications and other defense projects. Airport facilities were also included for Canton Island, Christmas Island, Plaines Des Gaiacs on New Caledonia, and Nandi in the Fiji Islands. All of the above are in the Pacific Ocean.

The Central Pacific Area has entered into no contracts in which Rohl is involved as a subcontractor.

The above mentioned information was received by this Office classified as "Secret" and I request that you respect this classification unless the material is released from the classification by the War Department.

Sincerely yours,

HERBERT A. FRIEDLICH,
Lt. Colonel, JAGD,
Assistant.

CONFIDENTIAL

WAR DEPARTMENT,
Washington, D. C., 4 January 1944.

H. RALPH BURTON,
Chief Counsel, House Military Affairs Committee,
Old House Office Building, Washington, D. C.

DEAR MR. BURTON: In Colonel Knowles' absence, I enclose herewith copy of 1st indorsement from the Chief of Engineers, dated 1 January, 1944, and addressed

2754 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

to Mr. Julius H. Amberg, setting out contract information requested by you in your letter of 20 December, addressed to Mr. Julius H. Amberg.

I note that there is indicated in some of the material under the heading "Approved" that certain contracts were not approved. I presume that under War Department regulations, the contracts indicated as not approved, would not require any approval in addition to the signature of the officer who signed the particular contract in question.

As I know, you are in a great hurry to get this material, I am sending it out to you without checking it.

Yours sincerely,

/s/ Herbert A. Friedlich
HERBERT A. FRIEDLICH,
Lt. Colonel, JAGD,
Assistant.

P. S.—I note that there is included in the enclosures, contract No. W-869-eng-7600 with Miller Construction Company, Inc. I doubt very much if this contract should properly be included among those in connection with the Canol project.
H. A. F.

Address Reply to Chief of Engineers,
U. S. Army, Washington, D. C.

Refer To File No. SPEGD

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, 16 December, 1943.

Memorandum to: Mr. Julius H. Amberg, Office of the Secretary of War, Room 3-E-739 Pentagon.

1. Pursuant to telephonic request 1600, 11 December 1943, of Mr. Burton, counsel of the House Military Affairs Committee, the following information is furnished relative to the duties of Colonel Theodore Wyman, Jr., in Hawaii and Canada.

2. In September 1939, Colonel Wyman was relieved from duty in Los Angeles and assigned to duty with the 3rd Engineers, Schofield Barracks, T. H. By War Department orders dated 5 June 1940 he was relieved from duty with the 3rd Engineers and assigned as assistant to the District Engineer, Honolulu Engineer District, effective on or about 1 July 1940, with additional duties as assistant to the Works Projects Administrator for the Territory of Hawaii. Special orders of the Chief of Engineers appointed Colonel Wyman, District Engineer, on 15 July 1940.

3. As District Engineer, Colonel Wyman was charged with the administration of the district which covered the entire Territory of Hawaii, with the execution of any construction projects assigned the district and with the execution of fortification and other military construction under the direction of the local military commander as prescribed in Army Regulations and other War Department instructions. Colonel Wyman as District Engineer was specifically authorized to—

(a) Issue certain permits in the name of the Secretary of War for works in the navigable waters of the United States.

(b) Provide, within prescribed limits of cost, for hire or rental, construction, repairs, and alterations to plants and structures, and procurements.

(c) Approve specifications, awards, contracts, and change orders within prescribed limits of cost.

4. In October 1941, pursuant to a secret War Department directive, which placed the District Engineer at the disposal of the Commanding General, Hawaiian Department, Colonel Wyman was placed in charge of construction of facilities necessary to provide an air route from Hawaii to the Philippines via Australia. This directive was later changed to limit the activities of the Commanding General, Hawaiian Department, to that portion of the route from Hawaii to Australia.

5. Colonel Wyman was relieved from duty as District Engineer, Honolulu Engineer District, by War Department orders dated 10 March 1942 and assigned as assistant to the Division Engineer, South Pacific Division. At the same time all functions of the District passed to the control of the Commanding General, Hawaiian Department, in accordance with War Department directives concerning construction activities outside of the continental limits of the United States.

6. From the time of Colonel Wyman's arrival in the United States until May 5, 1942 he was engaged in officer procurement activities in connection with the activation of an Engineer General Service Regiment. On May 5, 1942, Colonel Wyman was designated as Officer in Charge of the Canal Project and was directed to proceed with the necessary surveys and construction incident thereto, reporting directly to the Chief of Engineers. He was vested with all the authority of a District Engineer which carried an automatic designation as contracting officer with full authority to make procurements and to execute contracts necessary for the accomplishment of his mission. District Engineers are empowered to award contracts not exceeding \$3,000,000.

7. As Officer in Charge of the Canal Project, Colonel Wyman was sent on temporary duty to Edmonton, Alberta, Canada and such other points in Canada and the United States as were necessary for the accomplishment of his mission. The period of this temporary duty started on or about 23 May 1942. The temporary nature of the assignment was changed by War Department orders of 21 November 1942 which relieved Colonel Wyman from the temporary duty status and from assignment as assistant to the Division Engineer, South Pacific Division, and assigned him as Division Engineer, Northwest Division, with station at Edmonton, Alberta, Canada.

2756 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

8. Colonel Wyman was relieved from duty as division engineer by orders issued 25 March 1943. Records of this office show Colonel Wyman now assigned overseas at APO 29, in care of the Postmaster, New York, N. Y.

Re: Hans Wilhelm Rohl
H. RALPH BURTON,
Chief Counsel, House Military Affairs Committee,
519 Old House Office Building, Washington, D. C.

DEAR MR. BURTON: Annexed is memorandum covering the contracts of the War Department with construction concerns with which Hans Wilhelm Rohl is associated. This material is furnished in conformity with your oral request of 3 December 1943.

In respect to the information on page 2 regarding construction in Hawaii, further information is being secured from the Service Command, and the total amount may be increased somewhat. The material will be forwarded to your office immediately upon its receipt.

Yours sincerely,

/s/ Miles H. Knowles

Address reply to
Chief of Engineers, U. S. Army,
Washington, D. C.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, 6 December 1943.

Refer to File No. SPEAC

Memorandum for the Office of the Director of Materiel. (Attention: Major Frank W. Xiques, Room 5D-666, The Pentagon).

Subject: House Military Affairs Committee Investigation—Hans Wilhelm Rohl.

In conformity with your verbal request of 3 December 1943, the following information is furnished concerning the request of the House Military Affairs Committee for information relating to contracts with the War Department in which Hans Wilhelm Rohl was (or is) interested, either as contractor or subcontractor, including the amounts involved and the locations where the work was performed (or is being performed):

CONTRACTS ENTERED INTO WITH ROHL-CONNOLLY COMPANY, 4351 ALHAMBRA AVE., LOS ANGELES, CALIF.

Contract No.	Date	Amount	Location and type of work
W 509 eng-68.....	10- 4-33	\$1,520,000.00	Construction of breakwater Los Angeles, Long Beach Outer Harbors, San Pedro Bay, Calif.
W 509 eng-85.....	7-26-34	557,790.00	Construction on new enrockments, reconstruction existing enrockment, Newport Bay, Calif.
W 509 eng-4 (ER).....	8-10-35	827,750.00	Construction breakwater, Los Angeles & Long Beach Harbors, Calif.
W 509 eng-103.....	8- 6-36	2,145,000.00	do.
W 509 eng-267.....	12- 3-37	2,600.00	Repair of revetment, Los Angeles, (Harbor) California.
W 509 eng-980.....	1-24-40	23,875.00	Rental of floating derrick, towboat and barge.
W 509 eng-994.....	2-21-40	865,678.25	Improvement of Los Angeles River, Section VII, Downey Rd. to Atlantic Avenue, City of Vernon & Los Angeles Co., Calif.
W 509 eng-4622.....	3- 6-43	50,000.00	Repair of floating plant, any available shipyard.
W 509 eng-979.....	-----	11,250.00	Jetty stone, Newport Bay Harbor, Calif.
W 509 eng-1000 (ER).....	-----	15,770.00	Derrick stone, F. O. B., Railroad cars at Ormand (Riverside), Calif.
W 509 eng-61 Subcontractor. (Contractor is Puget Sound Bridge & Dredging Co.)	-----	466,410.00	39,307 Tons Class B Stone, and 87,081 Tons Class A Stone.

CONTRACT ENTERED INTO WITH CADDOA CONSTRUCTORS (JOINT VENTURE WITH W. E. CALLAHAN CONSTRUCTION CO., AND GUNTHER & SHIRLEY COMPANY, AND ROHL-CONNOLLY)

Contract No.	Date	Amount	Location and type of work
W 911 eng-487.....	7-19-40	\$7,478,790.41	Construction John Martin Dam and appurtenant works on Arkansas River in Bent County, Colorado.

CONTRACT ENTERED INTO WITH HAWAIIAN CONSTRUCTORS (JOINT VENTURE WITH W. E. CALLAHAN CONSTRUCTION CO., GUNTHER & SHIRLEY COMPANY, ROHL-CONNOLLY COMPANY AND RALPH E. WOOLEY.)

CONTRACT ENTERED INTO WITH FOLEY BROTHERS, INC., & ROHL-CONNOLLY CO.

W 3416 eng-51.....	2-9-43	\$11,000,000.00	Haines Cutoff, Alaska.
--------------------	--------	-----------------	------------------------

For the Chief of Engineers:

/s/ John H. Hendren, Jr.,
JOHN H. HENDREN, JR.,
Major, J. A. G. D.,
Acting Chief, Contracts and Claims Branch.

[11] Prior to making this inspection trip, these officers studied directives, communications and other data from the Headquarters, Service of Supply to the Office of the Chief of Engineers, and from the latter to the Division Engineer, Northwest Service Command, and also made a two months intensive study of the Field Progress Reports.

They state that immediate remedial action by higher authority is needed; leadership of Commanding General and the Division Engineers are of a low order; subordinate officers lack respect for their ability and capacity; complete lack of organization, except on paper; lack of respect and cooperation between the various offices, with a low state of morale throughout; lack of, or belated, planning for many important phases of this entire project.

Quotations from report:

"B Northwest Division Engineer Office

"The undersigned, during the course of the past twenty months, has had occasion to study and analyze the construction activity on some 1500 projects and has personally visited and inspected the work on approximately 500 jobs. I say unhesitatingly that the Office of the Division Engineer, Northwest Service Command and, as a consequence, all echelons of command under it and all private constructors and others having contractual relations with it, represent the most confused, frustrated, disjointed, heterogeneous, disorganized, demoralized group of organizations with which we have ever come in contact."

"Sound processes of ratiocination are conspicuous because of their absence; understanding of military concepts and knowledge and information on the basis of which plans must be made and work executed are nebulous, fragmentary and disarranged; designs, plans, and specifications are grandiose, expensive to execute and anachronistic in their preparation; job planning and job scheduling are superficial, fantastic and in many cases child-like; execution of physical work-in-place is pitifully slow, wasteful, lacks balance between labor, material and supervision, and is performed in a sequence lacking common-sense, let alone that complementarity of effort which is ordinarily necessary for efficient, economic and speedy work execution.

"The entire atmosphere at the Office of the Division Engineer (and several of the Districts) reflects mental desuetude, capriciousness, mysticism and insouciance.

"It is my conviction that the construction work, if ever accomplished, will be prolonged for many months, in some cases as much as a year or more; will involve

*Colonel Theodore Wyman, Jr.

the unnecessary expenditure of many millions of dollars; and will cause the wasteful and misdirected employment of millions of man-hours and the uneconomic use of hundreds upon hundreds of pieces of all types of heavy equipment and vehicles—automotive, truck, etc.

"A few specific illustrations of the many observations upon which the above opinions are predicated are given herewith.

"On the 11th and 12th of February, 1943, conferences were held at the Office of the U. S. Division Engineer between Colonel William C. Henry, assistant to the Chief Signal Officer, U. S. Army, and Colonel Theodore Wyman, Division Engineer, relative to coordinating and accelerating the work on the construction of the communications system throughout the Northwest Service Command. In attendance were representatives of the Alaska Communications Service, members of the Division Engineer's Office, special assistants to Commanding General, NWSC, and members of the firm and key employees of the Architect-Engineer, Turnbull, Sverdrup & Parcel, and the Prime Contractor, Bechtel-Price-Callahan."

General James A. O'Connor, Colonel James K. Tully, General Staff, Washington, D. C. and Major Lee E. Scheid and Captain William T. Carpenter, Jr., of the Services of Supply, Washington, D. C., attended one of these meetings, at which the undersigned were present.

Quotations from report:

"To anyone who has been over the territory covered by the Northwest Service Command for as little as one week it is obvious that the communications system is to all practical purposes the sine qua non of efficient construction effort. And yet, when Colonel James K. Tully, [13] because of the nature of the conversations, had occasion to express the fact that the General Staff had established the work on the communications system and on the Port of Prince Rupert as the Number One and Two Priorities for accomplishment in the Northwest Service Command, Colonel Wyman registered surprise and stated that it was the first time that such information had been brought to his attention, officially or otherwise.

"It was apparent to everyone in the room that the work on the communications system had been woefully neglected, and what little had been done was not in accordance with Signal Corps standards, design or specifications. . . .

"The inability to get the job done retards the War effort."

"In my opinion, Colonel Wyman does not understand the use of or does not choose to employ the members of an organization in a generally accepted sense.

"I can conceive of a man being a genius, being possessed of a superlative degree of clairvoyance, omniscience, omnipresence, perspicacity, and perspicuity, and having an indomitable will (incidentally, Colonel Wyman does not, in my opinion, possess any of these qualities to a reasonably desirable degree). . . .

"The slow preparation of plans and specifications; the lack of faulty planning and scheduling of many features of work the impractical manner and sequence in which work is executed and the fact that work which should be started and vigorously prosecuted according to common-sense and its important significance to other work is not started; the confusion surrounding the procurement and supply of materials and equipment; the complete lack of transportation means months after all facilities should have been in a state of immediate readiness; the lack of organization on the part of the Architect-Engineer, the Contractors and the echelons of the Division Engineer Office, and the low state of morale and feeling of frustration and despair which pervades almost everyone bespeak but one thing. It is vitally necessary that a leadership of vision, imagination, cooperation-inspiring, and which will produce results in a quick, efficient and economic manner be found at once, in the person of a Division Engineer.

"Planning

"The planning of all construction work in the Northwest Service Command seems to be exceptionally poor in many respects.

[14] "1. The preparation of designs, plans and specifications is far too slow, assuming all other phases of activity were reasonably satisfactory, to consummate all the work at the required completion dates as established by higher authority.

"2. . . . As a consequence, there is over-design, as in the case of proposed rail heads at Dawson Creek, Whitehorse and Fairbanks, and Skagway."

"3. The sequence in which work is planned to be done lacks a sense of understanding of complementarity and integration of all the features of work. . . . The sense of correct relativity, proper timing, and general perspective of all the

elements of the construction program are distorted. This in my opinion is the reason for the over-emphasis on the immediate construction of the elaborately conceived railheads for which an allotment of eighty-one million dollars was requested on Canal Projects #1 and #3, and the under-emphasis on the Ports of Skagway, Haines, and Prince Rupert, on Canal Projects #4 and #5, on the facilities along the Alcan Highway, and on the Haines-Champagne Cut-Off. . . .

"Scheduling

"The scheduling of work to be accomplished as reflected in the Off-Continent Field Progress Reports submitted by the Northwest Division is meaningless and is being prepared unthinkingly and mechanically. The estimated work schedules shown on the bar graphs cannot possibly be met for any of the projects. Notwithstanding the fact that the data is officially submitted by the Division Engineer, it is understood and recognized as being impossible of accomplishment by officers, contractors, and employees in the field.

"If these prognoses are fanciful, so must be the data and calculations on which they are predicated. . . . The same lack of thinking and planning generates a mobilization of field employees without material to work on so as to accomplish physical work-in-place, and leads to the procurement and delivery of materials in the wrong order, and in the wrong place and without men to work on them.

"7. An organization of the Division Engineer and the six District Engineer offices exists but only on paper. The Division Engineer delegates responsibilities to his District Engineers through the issuance of generalized orders based on directives. But nothing has been done as yet to simultaneously establish authority and create the wherewithal in the District Offices on the basis of which the duties can be performed and the responsibilities fulfilled.

"It is imperative that a sensible and workable channel of command and authority for direction, supervision, and control of the work to be established at once. . . .

[15] "If this is not effectuated, all the District Engineer Offices are truly superfluous and should be abolished. * * *

"8. More skillful and learned policy and procedure in the methods and processes of awarding contracts to private firms is essential. * * *

"9-b. Troops are over-taxed because of the assignment of too many missions.

Troops are not as well fed as employees of the private firms with whom they are in close proximity.

Quotations from report:

"10. The field agencies of the Public Roads Administration are possessed, in a measure, of the many deficiencies expressed relative to the organization of the Architect-Engineers, Contractors, and the United States Engineer Offices. The liaison and channelizing through echelons is particularly bad, and direction and supervision are carried on, too preponderantly, at headquarters away from the areas of activity. Because of these conditions, the proper equipment is not at the disposal of Contractors at places and time when it should be, and it takes months to affect the sending and receipt of spare parts by requisition.

"Because there are so many groups in being for the accomplishment of the construction work * * * it will require the highest degree of intelligence and leadership, of which one can conceive to unravel periodic snags, let alone getting the job done. This entire set-up requires immediate remedial action, so that the correct chain of authority is clearly defined, the greatest cooperation is established, and the direction and supervision processes are simplified throughout.

"Personnel, Labor and Morale

"Much of the supervisory, administrative, technical and other key personnel employed * * * is not qualified not competent, to assist in carrying out the missions which have been mandated; a lack of specialized training on the part of employees is aggravated by the poor organizational fabric of which they are made a part; the efficiency of labor is very low on practically all of the construction work. The unusual depth to which it has fallen is mainly attributable to the poor leadership, lack of organization, et cetera.

"3. The morale of a majority of all civilians and officers engaged in the construction task in the Northwest Service Command is as low as has ever come to our personal attention. This is due to all that has been stated heretofore in this report. * * *

[16] "Work requirements and work accomplishment."

2760 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"To date, for the time already consumed, the physical work-in-place accomplishment is meagre and subnormal."

Military Liaison and Cooperation

It would appear that the liaison and cooperation between the different branches of the Services were very poor, especially between the Corps of Engineers and the Signal Corps, and the Corps of Engineers and Army Air Forces, and that the liaison between the Northwest Service Command and the Division Engineer's office were based upon personal acquaintance between General O'Connor and Colonel Wyman, to the exclusion of most of their respective staffs.

This report gives considerable information in regard to railway facilities, and calls attention to their lack of equipment; that they are constructed with light rail, and that the majority of the roadbed is built upon "muskeg", with metal ballast being practically non-existent; that it does not appear that the Division Engineer has made any plans to take care of this situation, although all these railway facilities are badly needed to carry supplies.

There seems to be a lack of planning for housing and storage facilities, water, and sanitation at the various rail heads.

Alcan Highway

Again, this report reveals what appears to be lack of foresight planning. This is readily illustrated by the fact that many of the trestles and bridges are of temporary timber construction and will be washed out by the Spring thaws, with no supply of material [17] being placed adjacent thereto for their repair or rebuilding, which will naturally mean considerable delay caused thereby.

Alcan Telephone Line

Here again is pointed out the value of communication facilities in connection with such a large construction project and the lack of proper planning to have this installed and available for construction purposes.

Skagway

The following relative to this port is interesting:

"Everything done thus far has been 'hit or miss'; it is thought that a comprehensive plan for the use of the port and the available land area should be prepared * * *"

"Canol Project"

"For the period of time during which work has been going on in connection with this entire project, only a moderate amount of physical work-in-place has been accomplished. The required completion dates cannot possibly be met.

"The only jobs on which any substantial amount of work has been done are Canol No. 1A, Canol No. 6, and Canol No. 2. The remainder of the work on jobs Canol No. 1, Canol No. 3, Canol No. 4 and Canol No. 5 is either in the category of 'barely started' or 'not started.'"

Division and District Offices

That part of the report dealing with the Division and District Engineer Offices is severely critical, stating, among other things, that the Division Office at Edmonton is a conglomeration of individuals under headless guidance and direction, with living and working conditions exceedingly poor and conducive of the lowest morale, that the various District Offices, of which there are six, appear to be ineffectual because of lack of proper knowledge of [18] construction facts, authority, control, and specifically defined objectives, which should be given them by the Division Engineer's Office.

This report ends with the following general conclusions and recommendations:

"General Conclusions"

"1. The breaking through of the pioneer road (Alcan Highway) was an outstanding and praiseworthy performance.

"2. The planning, scheduling, methods of arranging for the execution of work, and the conduct of work performance throughout, subsequent to the breaking through of the pioneer road, have been as disgraceful as the work on Alcan was commendable.

"3. The leadership in the Northwest Service Command and in the Northwest Division Engineer Office, particularly the latter, is of a very low order. This leadership and the complete lack of organization which exists have not permitted and will not permit of the rapid, efficient, and economic consummation of the construction task.

"4. The requirements for construction work as embodied in the various directives issued and the capacity for the performance of this work with the instrumentalities and agencies, as they exist, are so out of consonance that they cannot be reconciled.

"5. Any curtailment or deferment of the work authorized, because of changes in strategic and tactical concepts, caused by changes in war conditions, will not solve the problems in the Northwest Service Command. It is vitally necessary to change the leadership and to reorganize, revitalize and catalyze the agencies enjoined or engaged for the work performance. We are fully convinced that the present construction program, regardless of its adequacy or necessity, can be performed more rapidly, efficiently and economically by good organization and under proper leadership than a deleted program can be executed by the present forces and agencies.

"6. The liaison and cooperation between the many commands, divisions and branches of the Army have not as yet reached the stage where they might be termed as completely satisfactory.

[19]

Recommendations

"1. That the Commanding General, Northwest Service Command, be relieved, or alternatively, that the Commanding General be assigned a staff of officers, qualified and trained for this particular type of supply and transportation task, who in turn are further implemented in the form of expert technical assistance.

"2. That the Northwest Division Engineer be relieved. There is no alternative procedure to this recommendation. The retainment of the Division Engineer in his present capacity will and must eventuate in disgraceful performance or failure."

(Report of Horowitz and Helgerson, War Department, dated March 15, 1943.)

It is of pertinent interest that conditions in Alaska, as have been described in the paragraphs just preceding, compare noticeably with those in the islands of the Pacific where defense installations were under the direction of Colonel Wyman, pursuant to contracts with Hawaiian Constructors, Rohl's Company, and Sverdrup and Parcel, architect-engineers, selected by them.

During this period when those defense projects vitally affecting the defense of the United States were being installed in that strategic and vulnerable Alaskan area, Attu and the Aleutians were occupied by the Japanese, causing a continuing threat.

CONFIDENTIAL

WAR DEPARTMENT,
Washington, 7 December 1943.

Mr. H. RALPH BURTON,
Chief Counsel, House Military Affairs Committee,
519 Old House Office Building, Washington, D. C.

DEAR MR. BURTON: In pursuant of your telephone request, I enclose confidential document of date 15 March 1943, being report of Colonel L. George Horowitz to Colonel F. S. Strong, Jr. of the Corps of Engineers and covering various matters in the Northwest Service Command, with particular reference to the Division Engineer in connection with construction operations.

This document is given to you for the confidential use of the Committee and not for publication.

It represents the views of Colonel Horowitz, but has not been approved as to its findings or accuracy by higher authority in the Department.

Yours sincerely,

/s/ Julius H. Amberg,
JULIUS H. AMBERG,
Special Assistant to the Secretary of War.

Encl.

[1]

CONFIDENTIAL

MARCH 15, 1943.

REPORT COVERING AN INSPECTION OF ALL CONSTRUCTION WORK AND RELATED FUNCTIONS UNDER THE JURISDICTION OF THE U. S. DIVISION ENGINEER IN THE NORTHWEST SERVICE COMMAND

Col. L. George Horowitz Col. F. S. Strong, Jr.

This report, on the above-named subject, has been prepared on the basis of the following studies and observations:

a. A study of many if not all directives and communications from the Headquarters Services of Supply to the Office, Chief of Engineers, and from the latter to the Division Engineer, Northwest Service Command. Many other documents of a miscellaneous but important and pertinent character have also been carefully scrutinized.

b. An intensive and extensive analysis over a period of two months (December 1942 and January 1943) of all the Field Progress Reports submitted by the Division Engineer, Northwest Service Command, to the Office, Chief of Engineers.

c. Observations made by the undersigned and Major H. C. Helgerson, Corps of Engineers, during the course of an inspection trip throughout the Northwest Service Command, from February 7, 1943 to March 6, 1943. An outline of our itinerary is attached to this report.

Our observations and investigations have developed personal reactions on our part from which have sprung the many opinions and beliefs expressed herein. Because it is our conviction that many matters require immediate remedial action by the authorities charged with the responsibility for executing the construction tasks and corrective action by higher authority in those matters beyond the control of the former, we have decided to treat the subject by an elaboration under the headings which follow. We feel that the presentation in this form will give the most comprehensive portrayal in the simplest, most direct and most graphic manner.

I. Leadership

A. Northwest Service Command

B. Northwest Division Engineer Office

II. Planning

III. Scheduling

IV. Organization

V. Personnel, Labor and Morale

VI. Work Requirements and Work Accomplishment

VII. Military Liaison and Cooperation

VIII. Thumbnail Sketches

[2] IX. General Conclusions

X. Recommendations

I. LEADERSHIP

The leadership on the part of the Commanding General, Northwest Service Command, and the U. S. Division Engineer is, in our opinion, of a low order. This has manifested itself in many ways, such as:

1. Lack of respect and open expression of such lack of respect by many officers in the rank from Captain to Colonel, for the ability and capacity of the two above-mentioned officers to successfully effectuate the construction and supply tasks which have been mandated to them by directives from higher authority.

2. The complete lack of organization, except on paper, after several months, as one understands the meaning and connotation of that word in both a military and construction sense.

3. The vacillation, superficiality, and belated actions involving: thinking in terms of concepts; planning of tasks and procedures; scheduling of work in sound sequence and in an integrated program and accomplishment sense; mobilization of military forces at various locations and the assignment of missions to them; method of awarding contracts to private construction firms; direction and supervision of the efforts of these firms in preparing designs, plans, specifications, procurement of material mobilization of personnel and labor forces, and in the execution of the work.

4. Lack of proper and sufficient liaison and practical cooperation between the Headquarters of the Northwest Service Command and the Office of the Division Engineer; the Office of the Division Engineer and the Offices of the District Engineers; the Northwest Service Command and the Alaska Defense Command; the Corps of Engineers, the Army Air Forces and the Signal Corps; the Engineer for the Commanding General, Alaska Defense Command and the Northwest Division Engineer; and the Office of the Northwest Division Engineer and the Field Representatives of the Public Roads Administration.

5. The low state of morale and spirit of frustration which obtain at Edmonton, Dawson Creek, Fort Nelson, Whitehorse, and Skagway and the sense of helplessness which pervades the hearts and minds of officers and employees at Fairbanks and Prince Rupert.

[3] A. *Northwest Service Command*

Our observations, attendance at conferences, and conversations with many officers and civilians have given us the distinct reaction that General Order No. 44, War Department, Washington, D. C., September 4, 1942, will not prove workable because of the personalities involved and the conditions and circumstances which exist.

The Commanding General, NWSC, has established a hybrid organization which consists of an antiquated Corps Area set-up, infiltrated with task command officers, recently appointed officers from civil life and civilians, all of whom are supposedly to function as specialists. In addition to a Chief of Staff, a Deputy Chief of Staff, the four Staff O's, there is an Alcan Highway Commanding Officer, a Northern and Southern Sector Commander, a Railroad Commander at Dawson Creek, an officer in charge of equipment and parts, an officer in charge of automotive transportation on the Alcan Highway, and, we presume, others.

Whether the organization is orthodox or heterodox is of little moment in the final analysis if there is a high type of leadership, a systematic arrangement of all procedure, and an efficient execution of all work. But unfortunately, the diametrically opposite conditions obtain. The Commanding General seems to vacillate, apparently because of his susceptibility to advice from many and the latest quarters; seems to issue orders which are not properly channelized and about which there is timely lack of knowledge on the part of officers who should know about them; and he is inclined to command spasmodically, so to speak, not on a basis of perspicacity and advance planning but as crucial moments occur or a stalemate or impasse arises. As a result, the entire atmosphere at Whitehorse is one of confusion, frustration, lack of interest, indifference, and low morale. Dynamic, respected and accomplishment-inspiring leadership are imperative.

One of many illustrations of the lack of or belated planning on the part of the Northwest Service Command is the fact that as late as February 13, 1943, a conference was held at the office of the Division Engineer at Edmonton, one of the purposes of which was to arrange for the transportation of construction materials up the Alcan Highway. It was evident, or should have been evident, as early as December 1, 1942, that one of the vitally important tasks was to provide for the movement of construction material up the highway before the April thaw set in, so that physical work-in-place could be performed during the months of April, May, and June, when the road was impassable.

At the conference of February 13, 1943, it was apparent that no workable plans had been formulated until then. The lack of knowledge on the conditions or location of trucks was pathetic. The discussion on lack of gasoline, fuel, kerosene, alcohol, Prestone, spare parts, drivers, facilities [4] for making and shelter under which to make repairs bespoke a completely chaotic state of affairs. It became doubly evident that the data on planning, scheduling, work performance, etc., as contained in and submitted in Field Progress Reports was highly unrealistic and in most cases fantastic. One had no further to look to understand the reason for the jam-up of some thousand freight cars in the Edmonton railroad yards or the large percentage of vehicles and equipment of every description which were on the dead-line or otherwise inaccessible and unavailable.

As a result of this conference, Colonel Glandon, who has superseded Col. Wheeler as the Commanding Officer of the Alcan Highway, was directed to corral, sequester, and what-not all the trucks in the Service Command for the purpose of allocating them for specific uses. One of these truck employments was designated as the movement of construction material up the Alcan Highway. At the time I was leaving Edmonton to return to the United States on March 4, 1943, I was informed by Colonel Henry Woodbury, Asst. Division Engineer, that practically nothing in that direction had been accomplished since the meeting of February 13, 1943.

Coincident with the failure to make plans and preparations for the overhauling, repair and disposition of such trucks, so that tonnage of approximately 68,000 tons could be moved over the highway on or before April 15, 1943, evidence appeared of available trucks not being expeditiously used and trucks being assigned to tasks which very ostensibly were of a priority of performance much below the many purposes to which they could and should have been assigned. As an example of the former, we refer to approximately 150 new White 10-ton Diesel Drive trucks which were at Dawson Creek and not being used (no one seemed to know to whom the trucks belonged and everyone volunteered that they were not running because of lack of winterization, lack of Prestone, etc.). As an example of the latter, we refer to the approximately 25 White Trucks, later increased to 50, which the Metcalf, Hamilton and the Kansas City Bridge co-ventures were apparently able to persuade the Commanding General to allocate to them for the purpose of building their railheads of fantastic preliminary conception and much more fantastic estimated cost.

The reasons for the other statements relative to the manifestations of the low order of leadership expressed in resume form under I. *Leadership*, supra, will become obvious as delineations of facts and conditions are made under headings which follow.

B. *Northwest Division Engineer Office*

The undersigned, during the course of the past twenty months, has had occasion to study and analyze the construction activity on some 1500 projects and has personally visited and inspected the work on approximately 500 jobs. I say unhesitatingly that the Office of the Division Engineer, Northwest Service [5] Command and, as a consequence, all echelons of command under it and all private constructors and others having contractual relations with it, represent the most confused, frustrated, disjointed, heterogeneous, disorganized, demoralized group of organizations with which we have ever come in contact.

Sound processes of ratiocination are conspicuous because of their absence; understanding of military concepts and knowledge and information on the basis of which plans must be made and work executed are nebulous, fragmentary and disarranged; designs, plans and specifications are grandiose, expensive to execute and anachronistic in their preparation; job planning and job scheduling are superficial, fantastic and in many cases child-like; execution of physical work-in-place is pitifully slow, wasteful, lacks balance between labor, material and supervision, and is performed in a sequence lacking common-sense, let alone that complementarity of effort which is ordinarily necessary for efficient, economic and speedy work execution.

The entire atmosphere at the Office of the Division Engineer (and several of the Districts) reflects mental desuetude, physical paralysis, resort to processes of temporization, empiricism, mysticism and insouciance.

It is my conviction that the construction work, if ever accomplished, will be prolonged for many months, in some cases as much as a year or more; will involve the unnecessary expenditure of many millions of dollars; and will cause the wasteful and misdirected employment of millions of man-hours and the uneconomic use of hundreds upon hundreds of pieces of all types of heavy equipment and vehicles—automotive, truck, etc.

A few specific illustrations of the many observations upon which the above opinions are predicated are given herewith.

On the 11th and 12th of February, 1943, conferences were held at the Office of the U. S. Division Engineer between Colonel William C. Henry, assistant to the Chief Signal Officer, U. S. Army, and Colonel Theodore Wyman, Division Engineer, relative to coordinating and accelerating the work on the construction of the communications system throughout the Northwest Service Command. In attendance were representatives of the Alaska Communications Service, members of the Division Engineer's Office, special assistants to Commanding General, NWSC, and members of the firm and key employees of the Architect-Engineer, Turnbull, Sverdrup & Parcel, and the Prime Contractor, Bechtel-Price-Callahan. General James A. O'Connor, Colonel James K. Tully, General Staff, Washington, D. C., and Major Lee E. Scheld and Captain William T. Carpenter, Jr., of the Services of Supply, Washington, D. C., attended one of these meetings, at which the undersigned was present.

To anyone who has been over the territory covered by the Northwest Service Command for as little as one week it is obvious that the communications system is to all practical purposes the sine qua non of efficient construction effort. And yet, when Colonel James K. Tully, because of the nature of the conversations, had occasion to express the fact that the General Staff had established the work

on the communications system and on the Port of Prince Rupert as the Number One and Two Priorities for accomplishment in the Northwest Service Command, Colonel Wyman registered surprise and stated that it was the first [6] time that such information had been brought to his attention, officially or otherwise.

It was apparent to everyone in the room that the work on the communications system had been woefully neglected, and what little that had been done was not in accordance with Signal Corps standards, design or specifications. Lengthy conversations, much of a superfluous character, ensued between Colonels Henry and Wyman. It is my opinion, the hypotheses, the processes of reasoning, and the constructive intentions and purposes of Colonel Henry were sound, logical, practical and commendable. Colonel Wyman comported himself as one engaged in the art of fencing. The weapons of which he made repetitious and irrelevant use were "the matter of unfortunate personalities and proper or improper jurisdiction". I could not draw any inference other than that, if phobias existed, they were inherent in Colonel Wyman, and it seemed to me that a peculiar psychosis permeated all of Colonel Wyman's reasoning and viewpoints.

The conclusion is inescapable that at least three months of valuable time have been lost during which much of the work on the communications system could or should have been accomplished. The lack of progress on this feature of work will decelerate the efforts of all persons engaged in the construction task, Northwest Service Command, in an inordinately large measure.

The discussions, higgling and haggling, which accompanied the attempts to obtain the signature of the Commanding General, NWSC, and the Signal Corps representatives to a Memorandum of Understanding, have convinced me beyond any shadow of doubt that any accomplishment in the overall construction task that might and should reflect kudos to the Services of Supply, the Corps of Engineers, and others engaged in this effort, will be exceedingly difficult if not impossible.

At the time of my visit to Edmonton, the Office of the Division Engineer had approximately 180 civilian employees and 30 officers, and the Division Engineer was in the process of building up a home organization of approximately 450 persons. If an organization that possessed cohesion and coordination and functioned smoothly and efficiently were to result, little fault, if any, might be found with the set-up, regardless of whether or not it contained a small percentage of supernumeraries. But when disconnected, non-used and misdirected compartmentalization obtains, and it is my opinion that it does and will, deadening effects transcend the considerations of useless expenditure of funds, wasted man-hours, low morale, etc. *The inability to get the job done retards the War Effort.*

In my opinion, Colonel Wyman does not understand the use of or does not choose to employ the members of an organization in the generally accepted sense. Cases have come to my attention where officers have been excoriated in the presence of fellow officers and others for carrying out the duties, functions and missions for the very purpose of which they have been secured as members of his organization.

I can conceive of a man being a genius, being possessed of a superlative degree of clairvoyance, omniscience, omnipresence, perspicacity, and perspicuity, and having an indomitable will (Incidentally, Colonel Wyman does not, in my opinion, possess any of these qualities to a reasonably desirable degree). [7] A lack of understanding of the elementary principles of good leadership, a lack of tactfulness and diplomacy, a lack of the ability to inspire others and win their respect and cooperation would still cause failure in the accomplishment of a mandated objective. Particularly so, if the task is almost superhuman, as is the construction job in the Northwest Service Command.

Most of the officers in the Division Office (and in the District Offices), whatever their individual ability, capacity, resourcefulness, etc., might be, have good educational backgrounds and have had more or less military training and experience, particularly in the Construction Service. They understand the difference between good organization and bad organization, the distinction between active and dynamic leadership as against passive leadership, whereby complacency is mistaken for confidence and self-satisfaction because of sweeping blanket and not properly thought-out delegation of duties and responsibilities by faulty contractual relationships entered into with private construction companies. As a consequence, most of the officers and civilian personnel as well feel that they are superfluous, are almost morbid, and are impelled to express

the fear that they have been relegated to affiliation with a mission which is destined to be a failure.

The slow preparation of plans and specifications; the lack of faulty planning and scheduling of many features of work; the impractical manner and sequence in which work is executed and the fact that work which should be started and vigorously prosecuted according to common-sense and its important significance to other work is not started; the confusion surrounding the procurement and supply of materials and equipment; the complete lack of transportation means months after all facilities should have been in a state of immediate readiness; the lack of organization on the part of the Architect-Engineer, the Contractors and the echelons of the Division Engineer Office; and the low state of morale and feeling of frustration and despair which pervades almost everyone bespeak but one thing. It is vitally necessary that a leadership of vision, imagination, cooperation-inspiring, and which will produce results in a quick, efficient and economic manner be found at once, in the person of a Division Engineer.

II. PLANNING

The planning of all construction work in the Northwest Service Command seems to be exceptionally poor in many respects.

1. The preparation of designs, plans and specifications is far too slow, assuming all other phases of activity were reasonably satisfactory, to consummate all the work at the required completion dates as established by higher authority.

2. Many concepts of a strategic and logistic nature on the basis of which directives are issued and construction planning must predicated are ephemeral in the minds of most persons having a responsibility in the direction, preparation and supervision of design, plans and specifications. As a consequence, there is over-design as in the case of the proposed railheads at Dawson Creek, Whitehorse, and Fairbanks; faulty and under-design as in the case of the communications system; or no design as in the case of many necessary facilities at Edmonton, Dawson Creek, along the Alcan Highway, at Whitehorse, Fairbanks, and Skagway.

[8] *The true significance of the element—TIME—in a construction program having a triple purpose of defense of a territory, supply of an allied nation and means of an offensive operation against an enemy power, is not fully grasped. If the purpose and urgency of the work were correctly visualized, it would be planned and executed in segments and by phases so that at all intervals of time some use could be made of completed facilities in and to at least a limited part of the finally desired capacity sense or in the priority of requirement sense as ordained by higher authority. This procedure would also lend itself to the most rapid, efficient and economic accomplishment of the construction work.*

3. The sequence in which work is planned to be done lacks a sense of understanding of complementarity and integration of all the features of work. For example, motions are gone through, involving proposed transportation of material for Canol #1, as though it had a priority of importance over the communications system and the docks and appurtenant facilities at Prince Rupert and Skagway. Trucks are allocated for the movement of materials for the proposed over-designed railhead at Dawson Creek, but little attention is paid to the preparation for the repair of the several arteries, such as the road from Edmonton to Dawson Creek, Northern Alberta Railway, Alcan Highway, and White Pass-Yukon Railway, which, if neglected, will cause a general stalemate for months. The sense of correct relativity, proper timing, and general perspective of all the elements of the construction program are distorted. This, in my opinion, is the reason for the over-emphasis on the immediate construction of the elaborately conceived railheads for which an allotment of \$81,000,000 was requested, on Canol Projects #1 and #3, and the under-emphasis on the Ports of Skagway, Haines, and Prince Rupert, on Canol Projects #4 and #5, on the facilities along the Alcan Highway, and on the Haines-Champagne Cut-Off. It is the reason for the over-emphasis on warehousing and the under-emphasis on all roads, railways, waterways, and the instrumentalities of transportation leading to and from this warehousing.

III. SCHEDULING

The scheduling of work to be accomplished as reflected in the Off-Continent Field Progress Reports submitted by the Northwest Division is meaningless and is being prepared unthinkingly and mechanically. The estimated work schedules shown on the bar graphs cannot possibly be met for any of the projects.

Notwithstanding the fact that this data is officially submitted by the Division Engineer, it is understood and recognized as being impossible of accomplishment by officers, contractors, and employees in the field.

If these prognoses are fanciful, so must be the data and calculations on which they are predicated. One might argue that this was only the matter of the required submission of a piece of paper and the necessity for technical compliance with an order. But such is not the case. The same lack of thinking and planning generates a mobilization of field employees without material to work on so as to accomplish physical work-in-place, and leads to the procurement and delivery of materials in the wrong order, in the wrong place and without men to work on them.

[9] To a much greater degree than obtains on jobs within the Continental limits of the United States, the distances involved, the many forms of resistance and obstacles encountered, the fight against nature in the raw, require scientifically prepared and precise processes of flow engineering of materials and the vital necessity of obtaining balance and timing of and for materials and labor.

The conditions which obtain to the present time are said to say the least. Employees can be seen at many places with little or nothing to do and materials are jammed up at Edmonton because of lack of transportation facilities. The order in which materials are finally moved out in many cases adds to the already existing difficulties. No other result can be expected without properly and realistically prepared schedules.

If job control is to be had, and it will have to be established, correct planning and scheduling will have to be insisted upon at once.

IV. ORGANIZATION

The organizations of the Architect-Engineers, the Prime Contractors, the Public Roads Administration, and the United States Division and District Engineer Offices, as they are now constituted, are not of the quality, nor have they the direction, the cohesion and the coordination, to accomplish their missions in a rapid, efficient and economic manner.

1. It is our opinion that none of the above-named construction entities have become thoroughly and fundamentally indoctrinated with an understanding of the military concepts involved and with a satisfactory translation of those concepts into design, plans, specifications and physical work-in-place.

2. All of the organizations need more forceful and inspiring leadership. In the case of the private firms and the P. R. A., this can be accomplished with the acquirement of better key personnel. In the case of the Corps of Engineer forces, it is necessary to supplant the present leadership, to obtain a reasonable number of specially qualified officers, and to obtain for civilian personnel the best that can be found in the ranks of the Civil Service Commission employees.

3. In quantity, the supervisory, administrative, and technical employees of the Architect-Engineers and Prime Contractors are much too great in number; in quality, they are distinctly inferior to what obtains on most jobs in the United States and do not measure up to the requirements of the task at hand.

4. The Architect-Engineer and particularly the prime contractor Bechtel-Price-Callahan set-ups are too distended between the United States and Canada and have not been molded so as to possess the direction, cohesion, coordination and smoothness of operation vitally necessary to get the job done.

5. There is a tendency for the Architect-Engineer, the Prime Contractor, and the PRA organizations to cling too tenaciously to civilization. Something must be done to inject in them a pioneer and overcome-hardship spirit. [10] Correlative with the above-named propensity is the failure to establish echelons for direction and supervision in the field.

6. Too much temporization with plans and too much extemporization with work execution maintain. The inauguration of proper planning and scheduling, procurement, supply and balancing of labor and material should cure this defect. The change is necessary forthwith.

7. An organization of the Division Engineer and the six District Engineer offices exists but only on paper. The Division Engineer delegates responsibilities to his District Engineers through the issuance of generalized orders based on directives. But nothing has been done as yet to simultaneously establish authority and create the wherewithal in the District Offices on the basis of which the duties can be performed and the responsibilities fulfilled.

The Division Engineer does not purposefully use his own organization and seems to use the office of the Edmonton District Engineer for a multiplicity

of purposes, such as for supervision of work in the field, administration by a District Engineer over other District Engineers, preparation and consummation of contracts, so-called control functions, preparation and submission of Field Progress Reports, etc. Because of the manner of evolution of the Division Engineer Office, this practice is deleterious in many respects—it causes the District Engineer offices to be useful in only a modicum degree for the performance of many tasks for which they are better qualified than the Edmonton office; it causes the District Engineers to feel superfluous and unproductive and resentful against the Division Office and the Edmonton District Office; it causes the representatives and key personnel of the firms engaged by the Government to neglect and fail to recognize any authority of the District Engineers and to look to Edmonton with a consequent loss of time, efficiency, and coordination.

It is imperative that a sensible and workable channel of command and authority for direction, supervision, and control of the work to be established at once. The organizations of the Architect-Engineer and Contractors must be developed along echelon lines paralleling those of the U. S. Division Engineer, so that each District Engineer can perform his duties efficiently and in the best interest of the Government. Concomitantly, the necessary liaison and cooperation among the six District Engineers must be introduced.

If this is not effectuated, all the District Engineer Offices are truly superfluous and should be abolished. The only alternative to this method of operation, and a very poor alternative, is the direction and supervision of all work by the person and office of the Division Engineer through the instrumentality of assistant operations officers or Area Engineers in the field. With conditions and circumstances as they are, this will in substance be tantamount to running a job bigger than the Panama Canal job from the hat of one man whose head is already befogged.

8. More skillful and learned policy and procedure in the methods and processes of awarding contracts to private firms is essential. This should [11] be done and can be done so as to induce the best features of competitive effort, so as to provide continuous incentives to all who have contractual obligations and so as to generate the highest degree of teamwork and cooperation in every conceivable direction. In my opinion, the Division Engineer is impulsive, superficial, and wasteful in his methods of delegating work through contractual arrangements.

9. Better judgment than now obtains must be exercised in the disposition and administration of troops and in the assignment to them of their various missions.

a. The manner in which duties are assigned to troops is carried out too impulsively and with too much substitution back and forth.

b. The troops are overtaxed because of the assignment of too many missions. This has resulted because of the still existing deficiencies of the private contractors. For example, the troops of one regiment are engaged in providing their own maintenance, digging telephone pole holes, driving a winter road along a proposed pipeline from Brooks brook to Sheldon Lake, the assembly of timber for the rebuilding of bridges along sections of the highway, and what-not. The execution of most of this work, incidentally, is provided for by the contracts with firms such as Bechtel-Price-Callahan, Miller Construction Company, and several contractors under the jurisdiction of the P. R. A.

c. The troops are not only fed more poorly than are the employees of the private firms with whom they are in close proximity, but use is made of troops in such a manner and at such places as leads to the flaunting in their faces of high wages and other beneficial aspects of conditions of work by and under private contractors. This is morale-breaking to say the least.

10. The field agencies of the Public Roads Administration are possessed, in a measure, of the many deficiencies expressed relative to the organization of the Architect-Engineers, Contractors, and the United States Engineer Offices. The liaison and channelizing through echelons is particularly bad, and direction and supervision are carried on, too preponderantly, at headquarters away from the areas of activity. Because of these conditions, the proper equipment is not at the disposal of contractors at places and times when it should be, and it takes months to effect the sending and receipt of spare parts by requisition.

Because there are so many groups in being for the accomplishment of the construction work: employees, foremen, straw bosses, superintendents, subcontractors, contractors, collateral contractors, prime contractors, construction-management contractors, field agencies of the P. R. A., Area Engineer officers and employees, District Engineers and employees, Works Engineer for the P. R. A., U. S. Division Engineer, Commanding General, N. W. S. C., and his equipment and

maintenance transportation specialists, it will require the highest degree of intelligence and leadership of which one can conceive to unravel periodic snags, let alone getting the job done. This entire set-up requires immediate remedial action, so that the correct chain of authority is clearly defined, the greatest cooperation is established, and the direction and supervision processes are simplified throughout.

[12]

V. PERSONNEL, LABOR AND MORALE

1. Much of the supervisory, administrative, technical and other key personnel employed by the Architect-Engineers, Prime Contractors, and U. S. Engineer Offices is not qualified nor competent to assist in carrying out the missions which have been mandated to these agencies.

A lack of specialized training on the part of these employees, which is aggravated by the poor organizational fabric of which they are made a part, causes many mental and physical processes to degenerate to a point where they are meaningless, purposeless, completely mechanical, superfluous, mutually interfering, retardative, and generally confusion-breeding.

The recognition of these facts in the field itself, together with the knowledge of the excessive salaries and wages paid throughout the Command, causes a wide propagation of rumors, innuendos and caustic depreciations. The diatribes and informal indictments have reached a level which is spirit- and morale-shattering to say the least and has resulted in a universal bewailing stated in such terms as "we are bushed, suffering from frustration, destined to failure."

2. The efficiency of labor is very low on practically all of the construction work, when measured in terms of the productivity of labor which obtains in the United States. That the efficiency of the former would be less than the latter was to be expected because of many conditions and circumstances peculiar to work in this part of the world, particularly the hardships caused by distances, climate, temperatures, topography, lack of facilities, etc. However, the unusual depth to which it has fallen is mainly attributable to the poor leadership, lack of planning and scheduling of work, faulty and procrastinated procurement of materials, lack of organization, etc. It is our unmistakable observation that the labor does want to and will put out if all the other elements are placed in congruity. As conditions are, labor is not only non-productive but its turn-over is so great that it is unnecessarily costly and stymies progress.

3. The morale of a majority of all civilians and officers engaged in the construction task in the Northwest Service Command is as low as has ever come to our personal attention. This is due to all that has been stated heretofore in this report. As bad as the morale is, the lack of good morale is not chronic and can be and must be completely restored, the sooner the better.

VI. WORK REQUIREMENTS AND WORK ACCOMPLISHMENT

The volume of construction work in the Northwest Service Command as provided for by the directives issued from higher authority, at the required completion dates embodied therein, and the volume of construction work which can be accomplished in the same respective periods of time by the persons and organizations charged with the performance thereof are at such great variance that they cannot be reconciled. Not to recognize this, the organizations, personnel, [13] facilities, status of materials, the weather and ground conditions being what they are, might make still more difficult the general and complete transmutation of all agencies from organisms of disorder and disruption to those of harmony, cooperation, and attainment.

We feel that a priority of execution of all the work by projects and by phases of projects should be established by higher authority, expressed in definitive form and imposed upon all the agencies engaged in the construction task. Simultaneously, a review should be made of all the projects for the purpose of determining required completion dates which are more in consonance with presently existing conditions and circumstances and hence more realistic. This may appear as a deceleration on paper but, with the institution of corrective measures, will, in our opinion, bring an acceleration of all physical work-in-place in actuality. If the field is left to its own devices and exercises its own judgment based upon what are now fictitious completion dates, the lack of balance between labor and material, the faulty sequence of transportation of material, and the misconception of relative significance and importance of project completions will become more pronounced and retard the over-all effort.

To date, for the time already consumed, the physical work-in-place accomplishment is meager and subnormal. Very little physical work-in-place will be performed during the course of the next three months because of the failure to plan and execute the transportation of materials and related construction work during the months of December 1942 and January and February 1943. A very substantial volume of physical work-in-place can be accomplished during the months of July, August, September, October and possibly November, if measures are taken to insure proper planning for labor, material, equipment and supervision and the preparations are made to supply and transport all possible materials and equipment between now and when the thaw sets in and as soon as feasible after the break-up.

VII. MILITARY LIAISON AND COOPERATION

A number of incidents and conditions came to our attention which reveal that the degree of liaison and cooperation between different divisions and branches of the Army having jurisdiction in contiguous theaters of activity or over functions in the same theater can stand considerable improvement. Cited as examples are: the lack of complete understanding between the Army Air Forces and the Corps of Engineers with respect to the construction of flight strips and miscellaneous facilities; the Signal Corps and the Corps of Engineers with respect to the design and construction of the communications system; the Transportation Corps and the Northwest Service Command with respect to the operation and control of facilities and the methods of administration at Skagway; the Army Air Forces and the Northwest Service Command with respect to the transportation of gasoline and fuel from Fairbanks to Tanana, McGrath and Galena.

Based on hearsay, gleaned from several conversations with a number of officers, it is our opinion that the cooperation between Colonel Wyman, U. S. Division Engineer, and Colonel Tally, Engineer for the A. D. C., is not what it [14] should be, nor is the cooperation between the Alaska Defense Command and the Northwest Service Command developed to a level which a full impregnation of the unity and sameness of purpose should bring forth.

The liaison between the Northwest Service Command and the Division Engineer Office seems to be basically a personal one between General O'Connor and Colonel Wyman, to the exclusion of most of their respective staffs. That between the Division Engineer and his six District Engineers is to all intents and purposes practically non-existent.

The liaison and cooperation between the Corps of Engineers and the Public Roads Administration hangs on very tenuous connections. The difference between the right men and the wrong men in the respective positions of U. S. Division Engineer and Field Manager of the P. R. A. will spell cooperation or conflict and divergence of effort.

VIII. THUMBNAIL SKETCHES

A. *Northern Alberta Railroad and Road from Edmonton to Dawson Creek*

The Northern Alberta Railroad runs a distance of approximately 525 miles in a northwesterly direction from Edmonton, Alberta, to Dawson Creek, B. C. The topography in general permits of easy access but, notwithstanding, the line skirts a number of rivers and wash areas which is perhaps attributable to the desire in the initial construction to keep costs at a minimum. The line was completed to Grand Prairie in 1930 and several years later was pushed on to Dawson Creek. So-called "muskeg" supports much of the road bed; hence, even at this date, the fills are not stable. Previous to the war approximately two trains per week were operated over the line except in the fall when grain was hauled south from the farming regions near the northern terminus.

The entire line was largely constructed from relay rail varying from 85# to 55# with the majority being 65#. At the present time, numerous derailments are caused by cracked rail. The spacing of ties is a maximum for branch line construction, and it is now estimated that 50% to 75% of the ties need immediate replacement. No tie plates were used on tangents or curves and even some of the trestles are without them; hence, numerous cases of spread gauge and tipped rail delay train operations. Metal ballast is for all practical purposes non-existent. Spring thaws cause considerable heaving and shifting of the track over the entire line, with the result that the last portion of the line from McLennan to Dawson Creek will not be in operation in the spring unless sufficient man-power

is available to care for every part of track day by day. Trestles were generally designed for approximately an E40 loading and have not been maintained. E60 loadings are now being moved over the trestle at very reduced speeds from 3 to 5 miles an hour. Short sidings, which are used as passing tracks only with difficulty, are provided at 16 points along the main track.

Roundhouse facilities, passable for the use which the railroad had during peacetimes but no more, exist only at Edmonton and Dawson Creek. The Dawson Creek roundhouse was partially burned out approximately six weeks ago. There [15] is no water supply at Dawson Creek, the northern terminus of the road and all water must be hauled from the Pouce Coupe River approximately seven miles away. There are, however, approximately six sources of water along the line at which tankage on towers has been installed. All coaling except at Edmonton is done by hand-shoveling, although at certain points passenger locomotives are coaled by means of gasoline-operated cranes.

The rolling stock actually owned by this railroad is in poor condition and of negligible quantity. The CPR and the CNR, however, have loaned considerable cars and sufficient locomotives to operate the road and are in a position to provide all rolling stock which the road, as it is, is capable of using.

At the present time, the railroad does not have sufficient labor available to maintain the track even at its now questionable condition. It is recognized that it will be necessary to import labor or to use troops on the maintenance of the section from McLennan to Dawson Creek in the spring if the road is to be kept open at all. With a reasonable amount of maintenance and with good luck, it is estimated that approximately 2000 tons per day may be moved over this road during the summer months. It is, however, questionable, considering the present state of repair, that more than 200,000 tons can be moved over the railroad in one operating year. In order to place the road in a position to carry the estimated capacity of the average single-track line, or approximately 4000 tons per day, a very considerable sum of money must be spent for delayed maintenance and improvements to the right-of-way and operating installations.

At this point it is well to mention the road which now exists from Edmonton to Dawson Creek, with the view of using motor transportation not to supplant but to augment the present facilities of the Northern Alberta Railroad. This road is of regular country-type construction, such as is found in North Dakota and Montana in the United States. The right-of-way is generally narrow. The ditching is sketchy and in a poor state of maintenance. The surface is of a soil generally known as gumbo. The bridges are of light construction such as is found on any country road. During the months of middle summer and the months of middle winter, the road is passable, and it is possible to operate trucks at a speed of approximately 20 to 25 miles an hour. During the two months of freeze-up and the three months of thaw, the road is to all practical purposes impassable. It may be said that although the terrain is relatively easy, the road compares unfavorably with most of Alcan Highway. If trucks are to be operated on this road to any considerable degree, appropriate maintenance operations must be initiated at once. Bridges must be reinforced, ditches cleaned and road metal must be placed at many sections.

B. Dawson Creek Railhead

The Dawson Creek Railhead as it now exists consists of a series of buildings scattered along the Northern Alberta Railroad just inside and just outside the limits of the village of Dawson Creek itself. All construction is frame except for a number of metal huts which are used to house troops. No water facilities, no sanitary facilities, and no fire protection facilities exist. The [16] layout obviously grew like Topsy; that is, additional buildings were added during the course of the construction of the highway and later as needs developed and manifested themselves. The work was accomplished through the use of two PRA contractors, W. E. Elliott Construction Company and Currin & Briggs. The activities of the construction companies were augmented by troop labor furnished by the Second Battalion of the 341st Engineers. Facilities as now existing at this so-called temporary railhead are as follows: troop housing for approximately 2000 men, headquarters group consisting of 6 portable-type buildings; 17 warehouses 50' x 200', each with two 10' x 200' loading platforms; 2 third-echelon-type buildings 95' x 186' with two wings, one wing 47' x 35' and the other wing 60' x 35'; 2 fourth-echelon-type buildings 80' x 240', with one 32' x 40' wing; one telephone repair station; power line and transformer units; flight strip; earth roads; temporary railroad tracks and unloading ramps; and railroad yard with capacity for approximately 150 cars.

At the time of this inspection, underground tank storage for gasoline was in the process of being installed. Power generating equipment was available on the site but not installed. There exists at the site pipe, hydrants and other miscellaneous material for installation of a water system and fire protection system. Unfortunately, potable water cannot be secured from wells driven to any depth at Dawson Creek; hence, if a water system is to be installed, a line must be provided a minimum distance of seven miles from either the Kiskatinaw River or the Pouce Coupe River.

Sanitary conditions and general living conditions in the village of Dawson Creek are deplorable to say the least. The District Engineer, however, is making every effort to influence and to assist the towns people in making a general clean-up.

The proposed site for the permanent railhead lies to the south and east of Dawson Creek. The terrain is generally rolling and no great amount of grading will be necessary. Water, however, must be piped a considerable distance to this site, even as it is necessary to pipe it to Dawson Creek because of the failure of wells as a supply. The proposed construction here provides for the housing of 80 officers and 5000 enlisted men; storage and motor repair facilities consisting of 2,300,000 feet; refrigerated warehouses for the storage of food; necessary roads, railroad track, and fire protection facilities; a 200-bed hospital; dry-cleaning and laundry facilities for the troop strength; and electrical facilities.

We are told that this proposed construction is based on only 28,000 tons of pay freight per month; even so, the quantity of construction materials which must be provided and the number of men which must be employed on the construction will seriously handicap all other activities along the highway to the north. At this point, it is well to state that not only must materials for this project be moved from Dawson Creek Railhead but materials for nearly all other construction will be handled from the same point.

Therefore, it is suggested that a study of the existing facilities be made with the view of determining the means of best using and best adapting the existing construction in providing storage for general use during the next year. [17] It is felt that if one 150-bed hospital, one fire station, 750 KVA electric generating capacity, 15 additional warehouses 50' x 200', necessary cold storage facilities, and necessary water-line and fire protection facilities are constructed immediately, a railhead will be available which will handle all traffic and storage necessary during the next year. It will be noted that such a scheme uses all existing facilities and requires very little additional construction. This will release more materials for Whitehorse and for Fairbanks where the troop housing and storage capacity is more sorely needed at the present time.

C. Alcan Highway

From Dawson Creek to Ft. St. John, a distance of approximately 48 miles, the road is to all practical purposes a boulevard. Ditches are deep, well graded, the surface is smooth and well metaled, and the width is more than ample in every case. In this section, there are two major structures—the bridges over the Kiskatinaw and Peace Rivers. The latter crossing is now made by passage over a single-lane trestle bridge which has already been partially destroyed this winter by ice and, it is expected, will be entirely wrecked during the spring break-up. J. A. Rosbling & Sons Company have moved in and are at work on the necessary tower foundations for the proposed cable bridge to be erected at this point. A conversation with the workmen revealed the fact that it was the intention not to spin the 900' crossing but to draw the entire rope across in one operation. It is estimated that the bridge will not be ready for use at the spring break-up; hence, it will be necessary to assemble materials and plan on repairing and replacing the timber structures for use during the early months of the summer. To date no activity in this direction has been undertaken, and at the site a physical inspection indicated that no materials were available for this work. The road from Fort St. John to Fort Nelson, a distance of approximately 245 miles, is in good condition for a country road. It is possible to drive a car over most of the distance at a speed of approximately 30 miles an hour. Some realignment and grading has been done. However, no improved structures of any type have been installed, and most of the mileage is not metaled. This section of the road will be impassable during the spring break-up, and it will be necessary to rework ditches and small structures and do additional grading and surfacing in order to make the road useable during the summer. One major stream crossing, that of the Sikanni Chief River, is under construction. The trestle bents are in and at the time of our inspection, the PRA representative and

the contractor were waiting for the shipment of the balance of the wood truss timbers. Too, approximately 28,000 pounds of bridge hardware had left Vancouver but had not as yet arrived at Dawson Creek for shipment by truck to the site. If the timber and the hardware have arrived at the site by the date of this report, this bridge will be available for use as soon as the road itself is passable after the spring thaws.

From Ft. Nelson to Watson Lake, a distance of approximately 360 miles, the road passes through difficult construction country. The initial bad spot occurs at Steamboat Mountain, where sight distances are non-existent, grades are very steep, and rock cuts have made ditching impossible. There is sufficient activity at this point to keep a medium-size contractor busy all summer. The second source of trouble is a section of approximately 20 miles along or over [18] McDonald Creek. Within this distance, the creek is crossed nine times and a physical inspection revealed that the road here will probably be entirely non-existent after the spring thaw.

Between Mile 170 and Mile 180, as measured north and west from Ft. Nelson, the road passes on a rock shelf along the side of Muncho Lake. At the present moment, this section of road has a single lane, curves are sharp, and the grades are steep. All work here is in rock and, while this work is being done during the summer, it will probably be necessary to operate a barge service or a ferry service on Muncho Lake in order to allow traffic to by-pass this point. Stream crossings must also be made at the Kledo, Racing, Toad, and the Liard Rivers. In addition, numerous creeks and smaller rivers must be crossed. As nearly as could be determined, no construction has been started and no plans have been placed in operation to erect the permanent structures over these rivers. A physical inspection of all the sites revealed that at this time no materials have been ordered or stock-piled to reinforce or to rebuild the numerous temporary structures which will surely be destroyed with the coming of spring. Considerable realignment work must be done along this entire section—grading, ditching and metaling will be necessary before the trail can be really called a road for use in the summer or through the spring and fall changes. At the present time, however, with the exception of the three difficult points mentioned, the road is readily passable, and an average speed of 25 miles an hour can be maintained with a passenger car. Over the bulk of the distance, the road is two-lane and no difficulty is encountered in the passing of vehicles. The surface of the road is now excellent because it consists of ice and packed snow. Only in a few cases is the surface made dangerous by advancing small glaciers.

From Watson Lake to Whitehorse, a distance of approximately 330 miles, the road generally encounters less difficult terrain. The one major stream crossing exists at Teslin Lake. Construction of this crossing is well underway, and completion should be had as soon as the road itself is available for use in the early summer. Crossing is now made over the ice of the lake. Contractors are working at two points on realignment but, generally speaking, maintenance from Watson Lake to Teslin Lake is not as good as the sections of the highway to the south of Watson Lake. Speed of passenger vehicles over this section can be maintained at an average of approximately 25 miles an hour, but more precaution must be taken in passing other vehicles.

Very few contractors have camps in this section, and as far as is known, little provision has been made for work here during the summer. A physical inspection revealed no stock-piles of material for minor construction, and this section too will certainly be impassable for at least two months in the spring.

The road from Whitehorse to Fairbanks, approximately 650 miles, is generally passable and of the same character as most of the road. The Donjek, the White, the Robertson, the Johnson, and the Gerstle are the major streams crossed by this section of the road. As far as can be determined, no activities to undertake permanent installations over these rivers are visible in the field. The entire highway is generally passable with the exception of the Robertson and Johnson Rivers. These rivers are of a peculiar nature, in that they open and close intermittently. Consequently, it is never possible to estimate accurately when the road [19] will be open and when it will be closed. The river beds change in position and width, as a consequence of which the establishment of permanent crossings presents an unusually difficult if not unsolvable problem. There are no contractors along this section of the road. One PRA representative for the whole 650 miles was on the job, and at the time of our inspection he was concerning himself with the Haines-Champagne Road, hence Alcan itself had no one interested. No stock-piles for the repair or replacement of temporary structures

of any kind are in existence. The only personnel available to maintain and make temporary repairs on this road are Engineer troops (97th Engineers). It is now understood that these troops are to be moved out and used in driving through a road west of Fairbanks.

In summary, it might be said that very little traffic was moving over the entire highway. An average of less than 30 vehicles per day were passed during the three days which we spent on the road. Trucks transporting Alcan or Canol supplies seemed to constitute most of these. The balance of the trucks were about equally divided between civilian contractors' trucking and Army vehicles. The road itself offered no handicaps to the operation of trucks, and the passage of at least 200 vehicles per day over any given section should not be difficult.

Various contractors and troop camps are scattered up and down along the highway from Dawson Creek to Watson Lake. The more recently built contractors' camps between the Liard River Crossing and Watson Lake are much superior to those further south. Experience here is beginning to pay dividends. Rest stations exist as such at approximately each 100-mile point. Generally speaking, it may be said the housing does exist but it has been very poorly established and maintained. Sanitary conditions are not good and camp layouts are neither uniform nor desirable. Troop housing at scattered points is in place between Whitehorse and Fairbanks. In summation, it should be reiterated that limited housing does exist but that it is of such character as to induce low morale and is not safe from a sanitary and fire standpoint.

D. Alcan Telephone Line

The Alcan Telephone Line proper will provide communications between Edmonton and Fairbanks and all intermediate points along the highway. In addition there is a telephone line being constructed from Skagway to Whitehorse as part of the operations of the Canol pipeline between these two points. Caltel (Alcan Telephone Line) is under construction through the agency of Miller Construction Co., of Indianapolis, Ind., and the Oman-Smith Co., of Nashville, Tenn. The line from Skagway to Whitehorse is being constructed by the Hatfield Construction Company.

Caltel is of utmost importance to all operations in the northwest because it is well known that rapid construction of any undertaking is dependent largely on the availability and dependability of communications. Radio communications in this section of the world are not dependable. Conditions change very rapidly, and sometimes a unit can be heard a distance of 50 miles, then again the same unit can handle messages as far as 300 miles. Thus it is evident that an item of first priority in this entire program is Caltel. Contracts have been awarded and the work has been underway since August 11, 1942. The design work is being handled by the Canol Architect-Engineer, J. Gordon Turnbull and Sverdrup & Parcel. After these many months, little progress has been made, and at the time of our visit to Edmonton, the Division Engineer of the Northwest Division and the Commanding General of the Northwest Service Command had just reached an agreement [20] with the Signal Corps so that the design of the line would be according to Army standards and the necessary copper for its completion would be furnished. On the face of it, no matter where the fault lies, this delay is inexcusable.

The pole line itself is now in place, and in operation from Edmonton to Ft. St. John. Poles and wire have been erected for perhaps 100 miles past Ft. St. John toward Ft. Nelson. Poles are in place for an additional 50 miles and holes have been dug for yet another 25 miles. Repeater stations between Edmonton and Dawson Creek are 99% complete and are in operation. This work at the lower end of the line has been accomplished by the Miller Construction Company. Poles and wire have been erected south of Whitehorse for a distance of approximately 50 miles by the Oman-Smith Company. Poles alone have been erected over another 25 miles by the same company. There are, in addition, scattered at some few points along the road stock-piles of poles to supply immediate construction needs. The intention and plan as announced by the Division Office is to have the line complete from Whitehorse to Watson Lake by April 15, and entire Caltel complete by May 31. This, of course, is obviously impossible, and it is even questionable at the present rate of progress and state of organization whether the line will be complete by the end of 1943 construction season. In general, no housing has been accomplished along the line for repeater stations which are to be located at approximately 100-mile intervals. In the one or two cases where structures have been erected, it was found that the floors were not

strong enough to support the equipment to be installed. The materials for construction are available at Edmonton, Dawson Creek, Prince Rupert, and Skagway. Within the week, it is expected that all materials will have been moved from Prince Rupert to either Edmonton or Skagway, so that they may be delivered to the points on the road where they can be used. The contractor has insufficient manpower and insufficient equipment.

E. Whitehorse

Whitehorse, Y. T., is the headquarters for the NWSC. The Northwest Division Engineer maintains a District Office at this location, and the Bechtol-Price-Callahan Company (Canol contractors), the Oman-Smith Company (Caltol contractors), and the Currin & Briggs Company (PRA contractor) all maintain camps at this village. The NWSC offices, the officers quarters, and the civilian quarters are all of portable CCC-type construction. Troop housing is either metal huts or portable CCC-type construction. Warehousing space is extremely limited, and materials and supplies are stored in open lots under canvas or not as the case may be. Additional construction materials and supplies are scattered at various locations all along the highway south for a distance of seven miles where the so-called Fairbanks freight line has a terminal. Water supply is by means of a well or wells of very limited capacity, which constantly go dry. Sewerage disposal system is inadequate and in fact no system at all. At the time of our visit, water was rationed. Sanitary conditions within the village of Whitehorse itself, as well as fire protection facilities, are in a most deplorable state. Unless some extensive activity towards a clean-up is undertaken before spring, control of the health of the community will be most difficult. Whitehorse sprang into existence as a village during the Gold Rush days because of the fact that it was the terminus of the White Pass-Yukon R. R. over the mountains from Skagway and because of the use of the upper river steamboat operations on the Yukon and Lewes Rivers. At the present time, [21] there is practically no additional construction of any type or kind underway in the vicinity of Whitehorse, because nearly all transportation facilities available are required for the mere subsistence of the present population. To reiterate, housing, warehousing, water supply, sanitary disposal, transportation facilities are all very inadequate for the task at hand, and an immediate solution of some character must be undertaken in order to alleviate the present conditions. The NWSC headquarters and the Office of the District Engineer are not in agreement as to what should be the location of the proposed railhead—McRae or Robinson. This should be settled as soon as possible.

F. Fairbanks and Alaska

Fairbanks at the present time is the northern terminus of the Alcan Highway and also the Alaska Railroad. The discontinuance of various mines with headquarters in Fairbanks has placed at the disposal of the District Engineer located here certain facilities such as equipment, housing, and repair shops. There is, however, no storage space, no troop housing, no quantity supplies of building materials. This, however, is not a problem at the present time because there are no troops to speak of and no freight arrives over the highway or the railroad. There are no representatives of any of the contractors, Architect-Engineer, or the PRA at Fairbanks as yet. Ample building sites are available. Lumber can be and is being cut at certain points. The small amount of equipment available is being repaired. This, however, is hampered by the lack of repair parts. An occasional truck comes in over the highway to Fairbanks. There is a train twice a week over the Alaska Railroad. Most of the contact with the outside world is by air.

A number of highways exist in the territory of Alaska which have been constructed in years gone by by the Department of Interior. The Richardson Highway, which is part of Alcan Highway, as far as Big Delta, runs from Fairbanks to Big Delta to Gulkana and thence to Valdez, with a branch that strikes from Copper Center to Chitina. There is also a road which leads from Gulkana to Anchorage. At the time of our visit, the road from Gulkana to Anchorage was open, the road from Big Delta to Gulkana was closed in two places, and from Gulkana to Valdez was closed in one spot. Two rotary snow ploughs properly used can keep the Richardson Highway and the road from Gulkana to Anchorage open through the winter months. Valdez itself is an ice-free port with minor useable docking facilities. These highways are approximately 20' wide with a light metal surface. All structures are of wood. They are generally impassable in the fall and particularly in the spring. At the pres-

ent time, plans are being developed to undertake the construction of winter roads from Fairbanks to McGrath, and from Fairbanks to Tanana. We feel that the traffic facilities in Alaska already in existence are not being improved and maintained as they should be and that they are not being used cooperatively for both the A. D. C. and the NWSC to the degree that will insure the highest mutual results.

G. *White Pass-Yukon Railroad*

The White Pass and Yukon Railroad is a narrow gauge (3'-0") line which runs from Whitehorse, Y. T., to Skagway, Alaska, a distance of 110 miles. Mining in the interior led to the construction of this road between 1860 and 1890 [22] with the bulk of the original equipment having been manufactured in the U. S. around 1889. From five hours to a number of days are required for the passage of a train, depending on weather conditions.

Alignment and grades from Whitehorse to Bennett, a distance of approximately 70 miles, are about those which would be expected on any narrow-gauge installation. The minimum elevation of track in this section is 2083 feet at Whitehorse. A maximum elevation of 2499 feet above sea level occurs at Robinson. From Bennett to Skagway the curves and grades are excessive. It is estimated that the grades run as high as 5.7% and curvature as high as 16°. 2924 feet at Meadows is the maximum elevation in this section, while 15 feet at Skagway is the minimum elevation.

Muskeg provides the foundation for the first 42½ miles of road bed from Whitehorse to Carcross. Ditching in this section is practically nonexistent and, as a result, changes in season cause the track to shift, heave, or sink. Rock provides the foundation for the last 67½ miles from Carcross to Skagway. Rock cuts are tight both vertically and horizontally; hence, all clearances and sub-grade allowances are a bare minimum.

Metal ballast is to all practical purposes non-existent, and as a consequence it is necessary to shim up the rail with blocks of wood placed between the ties and the rails. Rail is blocked in position with wooden wedges to keep it from turning over. Approximately 50% of the ties will have to be replaced. 56# rail is the standard installation. Wood trestles to a height of 256 feet exist in the last 40 miles of the line.

In several locations, the trestles are on both vertical and horizontal curves. Condition of some of the structures is such that it is not known how long they will stay in place. To quote train orders received during our trip: "Proceed at a speed not to exceed 5 miles an hour over ----- trestle on account of a sag in it". Rock slides and snow slides often cover the track, wreck trestles, and stop train service for days. There are nineteen short sidings on the line and one real passing track at Fraser Loop.

Rolling stock consists of equipment originally on the line, new boxcars and flats provided by the Army, and locomotives purchased from the Denver and Rio Grande Western. The Rio Grande locomotives are much heavier than the original equipment and, as a consequence, have increased the rate of deterioration of the track. Insufficient rolling stock causes the rehandling of most freight. Freight is loaded direct from boats to cars because of small dock capacity and then hauled up the valley from ½ mile to a mile where it is unloaded and stored until cars are available to take it over the mountain.

One operating battalion is now running and attempting to maintain the road. They are doing an excellent job as are all troop units in the northwest in spite of almost insurmountable handicaps. If under present conditions the road delivers an average of 300 tons of pay freight per day to Whitehorse, it will be an excellent job.

[23] Two and sometimes four Rio Grande locomotives are now used to deliver a train up the 5.7% grade and over the summit. This operation gives the track a heavy pounding. If Shay-gear-driven locomotives were used on the first 20 miles out of Skagway and the Rio Grande locomotives were used for the balance of the distance when grades are generally less than 3%, the amount of track maintenance could be reduced considerably and the delivery of trains would be more certain.

If the plates could be provided for the trestles, trestle approaches and curves, maintenance effort would be more fruitful and less replacement material would be required. Fourteen side-dump gravel cars, such as every dam builder has used for years, together with a ½-yard Diesel or gas-driven crawler-mounted shovel, would take care of the ballasting and realignment of the most difficult sections. An additional shovel for ditching would help considerably but is not absolutely essential.

Additional box-cars would eliminate the rehandling of freight. Another operating battalion would provide men for the necessary track maintenance.

The adoption of these suggestions on motive power, rolling stock, and maintenance should increase the average pay-load delivery to Whitehorse to 800 to 1000 tons per day or about three times the present estimated average.

H. Skagway

Skagway is the southern terminus of the White Pass & Yukon R. R. and is a small village located in the narrow valley between the two mountain ranges which reach an elevation of 5500 feet. Approximately one-third of the valley is cut by the Skagway River which runs full, of course, only in the spring. A dyke has been thrown up which prevents the spring freshets from inundating the town. There are perhaps 400 to 500 useable acres of land in this valley. This area must take care of the town, the housing of the Army and contractors' forces, railroad shops, and the storage of freight.

If one faces toward the harbor, the river previously referred to is on the far right. On the far left is the old dock built and used by the White Pass & Yukon R. R. This dock has been reworked by the forces of Bechtel-Price-Callahan, and in addition a 240' extension is underway. Approximately 120' of this extension is available for use at the present time, and it is expected that it may be used in its entirety by April 15. The total length of the dock will then be approximately 480'.

In the approximate center of the harbor are a series of dolphins supporting a pipeline and anchorage for tankers and gasoline-bearing barges. The total length will finally be 680'; 380' are now in use and for all practical purposes the 680' may be used if required.

On the right of the harbor is a make-shift sort of pile and earth barge unloading dock constructed by the Transportation Corps. The piles were not driven to any great depth; hence they are now tied with cables over the top of the earth fill. This arrangement is being used, however, some better arrangement will [24] eventually have to be made. Many materials and some rolling stock for the railroad have been unloaded by running temporary track down the beach and erecting barge or scow beds to support the loads when the tide is out.

The 15 steel tanks which provide 150,000 barrels of gasoline storage for the Canol project are in place and are being used. The auxiliary buildings for housing the pumps and the personnel are not as yet complete.

There is no shed storage of any kind available in Skagway; hence, freight is stored in every vacant lot available. The port troops are now hard at work attempting to bring order out of the chaos which has existed. Housing for the Bechtel-Price-Callahan group, the port operating troops, the railroad operating battalion, and the District Engineer is scattered through the town and over the valley. It consists of steel hutments and portable CCC-type buildings. Messing facilities are provided for by the use of former hotels and cafes which existed in the community. Sanitary conditions are about average for a village of this size located in such a section of the country. At the present time nearly all available land is in use; and as a consequence, there is little opportunity or room for much expansion of housing here.

Everything done thus far has been "hit or miss". It is thought that a comprehensive plan for the use of the port and the available land area should be prepared, adjustments made, and a certain small amount of new construction settled upon. This new construction would perhaps include an equipment repair shop, additional office facilities, additional housing and warehousing space. The capacity of the port is very limited; consequently it is essential to control the arrival of boats. No more freight must be brought in by barge or ship than can be carried by the railroad over the mountains to Whitehorse because there is insufficient room for any dead storage. The port can adequately serve the railroad and no more; hence, in the final analysis the capacity of the railroad controls the capacity of the port.

I. Inland Waterways

The trip from Skagway to Prince Rupert along the Alaskan Inland Waterway was made aboard the yacht "Westward". Departure from Skagway was made at 8 p. m. on Wednesday and the boat arrived at Prince Rupert about 2 p. m. on Saturday after a 12-hour layover during the trip on account of fog. In spite of the fact that many aids to navigation in the way of buoys and lights have been destroyed by unwieldy tows, this waterway provides an excellent means of transportation by small boat and barge to Alaska.

During the summer months, the operation of tugs and barges through these waters is relatively easy and few hazards exist. In the winter, however, high seas and excessive and changing winds make the handling of large tows extremely difficult. During the past season several tugs and tows have been lost because of the lack of power and size. It is well known that tides all along the Alaskan and British Columbia coast are excessive, and that the current generated by their changes reach as high as five and six or even seven knots in some places. There [25] is one lake just below Petersburg into which the tides run in both directions from both ends making the handling of tows difficult. Most of the crafts that have been employed on the freighting operation have been underpowered for the job. In most cases, the maximum rate of travel is $7\frac{1}{4}$ to 8 knots. Such a tug with a tow bucking a 6-knot current generated by the tide is in a very precarious position when the wind is blowing. Some of the boats used in the transportation of personnel are fast and have sufficient power to buck these currents but are not of the type of construction to withstand the heavy seas which sometimes develop. That is to say, they were built for pleasure and speed and not for work.

An attempt should be made to transport as much freight as possible during the safe period of navigation—the summer. Also, it might be well to conduct a survey of all the small boats and tugs used in transportation to determine their relative type of construction, their power and their rate of travel. Perhaps by providing a few new heavy-duty engines for the larger boats it will be possible to transfer engines on down the line so that all craft will be equipped with sufficient power. More boats will then be capable of traveling at a sufficient rate to make navigation generally safe through all months of the year. Since the ports thus far available in Alaska are of limited capacity and general storage facilities are not available, it is certainly of interest to attempt to balance water transportation, port facilities, and railroad facilities. This balance should be obtained as much by the adjustment of the amount and kind of equipment as by the control of the operation of the equipment itself.

J. Prince Rupert

The port project at Prince Rupert itself is located on the same island as the city of Prince Rupert. The staging area is located on the mainland, and the ammunition storage and loading docks are being constructed at Watson Island.

The housing for the port troops located on a hill above Prince Rupert is being used and to all practical purposes is complete. The capacity of this group is 1250 enlisted men and 100 officers. The main dock, the transit shed, the railroad track, the refrigeration building, the marine repair building, and the administration building are from 60% to 70% completed and will be ready for use in their entirety on April 15. As a matter of fact, the transit sheds and dock are at the present time being used by the Transportation Corps and have been able to handle all the freight that has thus far been shipped.

The road from Prince Rupert to the mainland where the staging area is located is approximately half complete. Work here has been handicapped by the lack of rock shovels, trucks, and rock crushers. The road from Prince Rupert to the edge of the island was originally built by the Province of British Columbia. The military road running to the staging area begins just across from the bridge leading to the mainland. An examination of the road built by British Columbia reveals the fact that if it is to handle substantial traffic, it will be necessary for certain maintenance and metaling operations to be undertaken. Port operators will probably submit to the District Engineer at an early date a request for this work.

The staging area located on the mainland is approximately 50% complete and will be available for occupancy by the 15th of April. This staging area [26] site is all muskeg which had been cleared some years ago, with the exception of the stumps, for the use of a town site. Slightly more than half of the buildings are now in place, however, no work has been done on the roads and very little has been accomplished on the water and sewer lines. Construction materials are being handled by truck over plank access roads. The terrain is hilly and this fact together with the muskeg and the stumps will make road construction difficult. Here again, lack of or rather no equipment has prevented the beginning of construction on the roads.

On Watson Island work is underway on the construction of the ammunition loading docks. Progress, however, is slow because all pile driving is being handled by skid rigs which must brace and cap after each pile bent has been driven before it can be advanced to the driving position for the next line. On

the island itself, work is underway in removing large quantities of rock which is being used as fill to provide support for the rail classification yard. Construction of the wooden igloos has not as yet been started. Although this ammunition storage yard and loading dock may be available for use before July 15, a visual inspection indicated that that date would probably be the one of final completion. At a site below the staging area, Bechtel-Price-Callahan Company have under construction tank car unloading facilities, tank storage, docks and tanker and oil barge loading facilities. Work on this group is approximately 50% complete. At the present time, the dock is in and tank foundations have been poured; one complete tank out of five has been erected. Construction on the permanent houses for operating and on the pump facilities is just now beginning. The concrete footings for the warehouse have been poured.

K. C. N. R.—Prince Rupert to Edmonton

The return trip from Prince Rupert to Edmonton was made via the C. N. R. The train leaves Prince Rupert at 6:30 in the evening and is due in Edmonton at 9:45 p. m. on the second following day. On our particular trip, we left on a Monday evening and arrived in Edmonton at 5 o'clock Thursday morning.

The railroad leaves Prince Rupert by traveling south to Watson Island, thence to the mainland until it reaches the valley of the Skenna River. It follows the north bank of the Skenna River east and north until it crosses just below Hazelton, B. C. At Hazelton, it leaves the main channel of the Skenna and follows the west bank of a branch which runs due south to Smithers. From Smithers, the road wiggles through the mountains to Prince George and finally Jasper. Just west of Jasper, the line from Prince Rupert makes a junction with the main line of the C. N. R. from Vancouver to Edmonton. The road bed from Prince Rupert to Jasper is generally in poor condition. 50% of the ties should be replaced or are being replaced. No tie plates are used and the rail itself is not in the best of condition. From Jasper to Edmonton regular maintenance has been in force and the entire railroad is generally in good condition. There is a definite limit on the amount of freight that can be handled between Jasper and Prince Rupert because of the fact that a speed limit of 50 miles an hour necessitated by the poor condition of the track is in force. The situation is further aggravated by the lack of passing tracks. It might be well to mention at this point that if any holding and reconsignment points are to be constructed in support of Prince Rupert, it might be best to build them east of Jasper. "Bottle-necks," if they are to occur on this railroad, will occur between Jasper and Prince Rupert.

[27] L. Canol Project

For the period of time during which work has been going on in connection with this entire project, only a moderate amount of physical work-in-place has been accomplished. The required completion dates cannot possibly be met.

We did not have the opportunity to inspect any part of Canol #1A or Canol #6; as a consequence, our information relative to these two jobs is predicated entirely on conversations, statements, verbal and written, and a study of three consecutive monthly Field Progress Reports.

The only jobs on which any substantial amount of work has been done are Canol #1A, Canol #6, and Canol #2. The remainder of the work on Jobs Canol #1, Canol #3, Canol #4, and Canol #5 is either in the category of "barely started" or "not started."

Canol #1A is represented as being 60% done and Canol #6 as being approximately 20% done. On Canol #2, the tank farm and facilities at Prince Rupert are approximately 50% done, the unloading facilities and storage at Skagway are approximately 60% done (but are being used), the pipeline from Skagway to Whitehorse is in place and gasoline is being pumped through it. The line, however, is laid above ground, with no expansion loops, no anchorage, no gate or check valves and with insufficient pumping capacity. In some cases the line is so close to the construction of the railroad that a minor wreck will break the line and cause a damaging fire because of the high pressure under which the line is operated without check valves. Just what will happen to the line after the spring thaw, land slides and glacial movements is not known. Terminal storage exists at both Skagway and Whitehorse. Difficulties have been had, however, with excessive leakage because of the type of gasket material used. Pumping operations have to be handled on a "hit or miss" basis, since the operating communication system is only finished to a point seventeen miles out of Skagway.

Canol #1, the pipeline and appurtenant facilities from Norman Wells to Whitehorse, is only approximately 8% accomplished. This work done consists mainly of the pioneer road being built from both ends; that running from Brooks brook toward Sheldon Lake, of which approximately 50 miles is done, is now the mission of the 35th Engineers, although it is the obligation of Bachtel-Price-Callahan to put it through. No work-in-place has been done on the refinery at Whitehorse.

Canol #3, the pipeline from Carcross to Watson Lake, is approximately 6% done. Work started on this project October 7, 1942 and was required to have been completed as of January 31, 1943. The work done consists mainly of partial surveys and the delivery of some of the material.

Canol #4, the pipeline from Whitehorse to Fairbanks, might be described as 0% accomplished. It is, however, reported to have been started on January 9, 1943 and is required to be completed on April 30, 1943. This performance is manifestly impossible.

[28] Canol #5, the pipeline from Fairbanks to Nanana and thence to Tanana, might also be described as 0% accomplished. As of January 31, 1943, the job was reported as not started and it has a required completion date of May 15, 1943. This will likewise fail to be accomplished.

There are in addition certain wild-cattling operations or oil excavations being carried on in the vicinity of Norman Wells. The exact status of this work could not be ascertained. However, it is known that certain production is already available and that two more wells are in the process of being driven.

The entire Canol Project is characterized by all the deficiencies which have been expressed in this report under the headings from I to VII.

M. Division and District Offices

1. The Division Office at Edmonton might be aptly described as a conglomeration of individuals under headless (brainless would be better) guidance and direction, engaged in perpetual but wasteful notion and esconced in an atmosphere of pandemonium.

Living and working conditions at this office are exceedingly poor, almost scandalous, and conducive of the lowest morale. The new quarters being built are extremely excessive in cost and while they may provide comfort have been erected so close together as to constitute a fire hazard.

We could find no part of the office which might be characterized as having organizational cohesion and coordination.

2. The District Office at Edmonton is hybrid and is in reality a sub-office of the Division Engineer. It is attempting to perform a diversity of functions in the process of which it is losing caste with the other five districts. The office contains some exceptionally good key personnel, who could be used very effectively in a good organization. This District Office should be abolished and parts of it absorbed in the Division Office.

3. The District Office at Dawson Creek has the spirit and willingness to perform its duties and responsibilities but is helpless. Several conferences with the District Engineer, Lt. Colonel Harry A. Schuppper, who incidentally appears to be a capable and enthusiastic officer, convince me that under present conditions it is completely ineffectual. It has no knowledge of construction facts, authority, control, specifically defined objectives, nor the wherewithal to undertake anything intelligently. Most of the work done by this office has been effected on the basis of his own initiative and without instructions; if he had not so done, he and his staff and civilian employees would be homeless. Most of his officers are not particularly qualified for the work for which they have been designated to perform at this station.

4. The District Office at Whitehorse, like the one at Dawson Creek, is also completely ineffectual. Lt. Col. L. E. Laurion is a conscientious [29] and competent officer who is irked by the fact that he wants to do a real job and is stymied in every direction. Being in the shadow of the Northwest Service Command, he receives conflicting instructions, neither of which he can carry out because he lacks the means. The representative of the contractors will not recognize his authority, the Service Command will not permit him to use his initiative. Briefly, he feels and is beginning to act like a marionette. The morale of his officers and civilian employees is dropping very rapidly.

5. The District Office at Fairbanks is similar in nature to those of Dawson Creeks and Whitehorse relative to its efficacy in the construction program. Because Colonel John Moreland, the District Engineer, is an unusually fine person, possessed of high qualities of leadership, judgment and intelligence, and inspires and endears himself to the persons around him, the morale of his organization

and its quality is superior to that of all the other Engineer offices in the NWSC. If this office were part of an organization under which it could function, it would contribute in a superlative measure to any task that had to be accomplished. This office has no plans and specifications by which to supervise construction, has no liaison with Architect-Engineer or Contractor key personnel, has to resort to circuitous means to get facts, and has practically no means at hand in the way of field employees, equipment, spare parts, etc., to undertake its job. The great responsibility which Colonel Moreland feels and his complete lack of authority and instrumentality to perform a job are worrying him considerably.

6. The District Office at Skagway is in the paradoxical position of having a large force of field employees in the vicinity and large quantities of material along the docks and stored in warehouses without being able to direct the building of anything. The Bechtol-Price-Callahan Company has a field employees' camp at Skagway and materials and equipment are being delivered by boat for shipment over the White Pass & Yukon R. R. The fact that the contractor will not recognize the authority of the District Engineer, Lt. Col. Thomas Hayes, makes this office superfluous. As this officer expressed himself in a letter to the Division Office, he has been emasculated. He decries the fact that he has no authority nor the opportunity to use initiative. The disease here is the same one that plagues all the other District Offices. Lt. Col. Hayes is conscientious and, based upon his record, has all the qualifications to perform the job of District Engineer with the highest degree of satisfaction.

7. The District Engineer Office at Prince Rupert is doing a highly commendable job, and in actuality this is the only place in the entire NWSC where physical work-in-place of a substantial amount has been performed during the course of the past three months. The District Engineer, Lt. Col. Gerald R. Tyler, is deserving of much praise. Notwithstanding the fact that he inherited a bad job in mid-stream with contractors who had to be put through a process of catalysis, and not withstanding the fact that the Division Office has given him rather poor cooperation, he has managed to get much of the job done. If he is given immediate assistance in the procurement of some equipment, particularly two 1½ yard shovels, trucks and spare parts, we believe that the job be fully completed by July 1, 1943. The port facilities will be entirely completed by May 1, 1943, possibly sooner. This officer has exhibited exceptionally good business judgment in a number of matters and has demonstrated high administrative ability.

[30] IX General Conclusions

1. The breaking through of the pioneer road (Alcan Highway) was an outstanding and praiseworthy performance.

2. The planning, scheduling, methods of arranging for the execution of work, and the conduct of work performance throughout, subsequent to the breaking through of the pioneer road, have been as disgraceful as the work on Alcan was commendable.

3. The leadership in the Northwest Service Command and in the Northwest Division Engineer Office, particularly the latter, is of a very low order. This leadership and the complete lack of organization which exists have not permitted and will not permit of the rapid, efficient, and economic consummation of the construction task.

4. The requirements for construction work as embodied in the various directives issued and the capacity for the performance of this work with the instrumentalities and agencies, as they exist, are so out of consonance that they cannot be reconciled.

5. Any curtailment or deferment of the work authorized, because of changes in strategic and tactical concepts, caused by changes in war conditions, will not solve the problems in the Northwest Service Command. It is vitally necessary to change the leadership and to reorganize, revitalize and catalyze the agencies enjoined or engaged for the work performance. We are fully convinced that the present construction program, regardless of its adequacy or necessity, can be performed more rapidly, efficiently and economically by good organization and under proper leadership than a deleted program can be executed by the present forces and agencies.

6. The liaison and cooperation between the many commands, divisions and branches of the Army have not as yet reached the stage where they might be termed as completely satisfactory.

2782 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

X. Recommendations

1. That the Commanding General, Northwest Service Command, be relieved, or, alternatively, that the Commanding General be assigned a staff of officers, qualified and trained for this particular type of supply and transportation task, who in turn are further implemented in the form of expert technical assistance.

2. That the Northwest Division Engineer be relieved. There is no alternative procedure to this recommendation. The retainment of the Division Engineer in his present capacity will and must eventuate in disgraceful performance or failure.

[31] Itinerary of Colonel L. George Horowitz and Major Howard O. Helgerson

February 7, 1943:

Colonel EDWIN C. KELTON,
Corps of Engineers, United States Army,
U. S. Engineers Office, 751 South Figueroa Street, Los Angeles, California.

DEAR COLONEL KELTON: 1. This is acknowledgment of your letter of January 8, 1943, requesting clearance of Schooner VEGA.

2. Owing to the importance of the safe arrival of that vessel in connection with Naval Defense Projects in the Honolulu District, it is desired that the VEGA sail with a movement under escort leaving San Francisco about January 15, 1942.

3. The Commandant of the Naval Operating Base, San Pedro, will inform you of the time for sailing, with directions for joining the convoy.

Very truly yours,

W. K. KILPATRICK,
Captain, U. S. Navy,
Chief of Staff.

COPIES TO:
Commandant, 11th N. D.
Commandant, Naval Operating Base, San Pedro, Calif.

SVERDRUP & PARCEL
CONSULTING ENGINEERS
Bridges Foundations
Buildings Valuations

RAILWAY EXCHANGE BLDG.,
St. Louis, Mo., February 2, 1944.

Mr. RALPH BURTON,
519 Old House Office Building, Washington, D. C.

DEAR Mr. BURTON: I have waited to send you the information requested in your telephone conversation of Monday, January 31, until I could talk to our Mr. Wolfe who had general charge of our work in the South Seas after Colonel Sverdrup entered the Service.

Our South Seas contracts fall in three groups:

1. Five bombproof personnel shelters near Honolulu—Contract No. W-414-eng-808. This contract involved preparing design plans and furnishing advisory services during construction. Direct supervision was furnished by the District Engineer office. These shelters were built by the Hawaiian Constructors as contractors.

2. First Air Ferry Command—Contract No. DAW-414-eng-511. This originally covered the engineering services involved in planning and supervising the construction of airports and their appurtenances in five locations—Fiji Islands, New Caledonia, New Hebrides, Solomons and Townsville, Australia. The contract was later revised by deleting the work in the New Hebrides and Solomons, and covered five airdromes—Nandi, Narewa in the Fijis, Tontouta and Plain des Gaiac in New Caledonia, and one at Townsville. The construction at Nandi and Narewa was handled by the New Zealand government by a method resembling a force account procedure; at Tontouta the work was similarly handled in co-operation with the Free French government. At Plain des Gaiac the construction was performed by the Hawaiian Constructors. At Townsville, Australia the construction work was performed by forces furnished by the State of Queensland.

3. Second Air Ferry Command—Contract No. DAW-414-eng-585 and Contract No. DAW-eng-842. This comprised the construction of airdromes and

appurtenances at three locations—Penrhyn (Tongareva), Aitutaki and Tongatabu. We had two separate contracts on these projects, one for services as Architect-Engineer and one for services as Constructors—I. e., we were in a sense the contractors.

There was also another contract referred to in our records as Australia No. 1 negotiated with the U. S. A. F. I. A. for the planning and construction supervision of a variety of military installations in Australia. The work was all done with Australian forces, and our contract was taken over by the U. S. Army in June, 1942, after they began to arrive in force.

The work under Group 1 was performed prior to our association with Mr. Turnbull, and he had no connection with it. All other contracts noted, although they were entered into by Sverdrup & Parcel alone on the request of the Army authorities who wanted to avoid the delays involved in getting additional signatures that would be required if placed in the name of the joint venture, were nevertheless recorded on our books in the name of J. Gordon Turnbull and Sverdrup & Parcel, and the participation in these was identical with all other joint venture contracts.

I trust this will give you the desired information, but if you need any further data from us, we will of course be glad to furnish it.

Yours very truly,

SVERDRUP & PARCEL.

By /ss/ JOHN I. PARCEL.

Address reply to Chief of Engineers, U. S. Army, Washington, D. C.
Refer to File No.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, August 28, 1941
4A-e

LEMUEL B. SCHOFIELD,
*Special Assistant, Bureau of Immigration and Naturalization,
Office of the Attorney General, Department of Justice,
Washington, D. C.*

DEAR MR. SCHOFIELD: The Hawaiian Constructors, a joint venture consisting of the W. E. Callahan Construction Company, Los Angeles, California; Rohl-Connolly Company, San Francisco and Los Angeles, California; Gunther and Shirley Company, Los Angeles, California, and Ralph E. Woolley, contractor of Honolulu, T. H., are working on very important defense construction at Honolulu, T. H. pursuant to Engineer Corps Contract No. W-414-eng-602.

Mr. H. W. Rohl, 8519 Hollywood Boulevard, Los Angeles, California, one of the principal stockholders of the Rohl-Connolly Company, applied to the U. S. District Court at Los Angeles, California on January 15, 1941 for his final citizenship papers which have not, as yet, been issued. Mr. Rohl is possessed of outstanding ability, excellent judgment and resourcefulness for the management of difficult construction work. Some of the outstanding work performed by Mr. Rohl was the construction of the Los Angeles-Long Beach Detached Breakwater, the construction of the Headgate Dam at Parker, Arizona for the Indian Service and miscellaneous dams, tunnels and other heavy construction in the State of California. To date, Mr. Rohl's valuable services have not been available for Government defense projects because of his alien status.

The services of Mr. Rohl are of vital importance to the expeditious completion of the aforementioned defense construction project because of his peculiar qualifications and scarcity of qualified supervisory personnel. It is the understanding of this office that Mr. Rohl's loyalty to the United States is beyond question. It is therefore requested that the granting of Mr. Rohl's final citizenship papers be expedited.

Your consideration and cooperation will be very much appreciated.

Very respectfully,

JOHN J. KINGMAN,
*Brigadier General,
Acting Chief of Engineers.*

2786 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

EARL G. HARRISON
COMMISSIONER

DEPARTMENT OF JUSTICE,
IMMIGRATION AND NATURALIZATION SERVICE,
Philadelphia 2, December 10, 1943.
246-C-5256161

MR. H. RALPH BURTON,
*General Counsel, Committee on Military Affairs, House of Representatives,
Room 519, Old House Office Building,
Washington, D. C.*

DEAR MR. BURTON: This will acknowledge the receipt of your letter of December 4, 1943, in which you state that you have been directed to obtain, and therefore request for the use of the Committee, a fully detailed statement of the record in the files of this Bureau relating to one Hans Wilhelm Rohl.

The records of this office show that Hans Wilhelm Rohl (John William Rohl), then residing at 8159 Hollywood Boulevard, Los Angeles, California, filed petition for naturalization in the United States District Court for the Southern District of California on March 10, 1941, under the provisions of Section 310 (a) of the Nationality Act of 1940. In that petition the alien stated that he was a contractor; that he was born at Lubeck, Germany on September 29, 1886; and that he was of the German race and German nationality. He alleged that he was married on August 26, 1925, at San Francisco, California; that the name of his wife was Floy Edith; that she was born at Iola, Kansas on October 27, 1890; and that she then resided with him. He claimed arrival in the United States at the port of New York, New York on October 23, 1913, on the S. S. Santa Marta, and was legally admitted for permanent residence. He alleged that he had four children, all born in Sacramento, California, in 1916, 1918, 1921 and 1923, respectively. He claimed residence in California continuously since October 1926. His application to file a petition alleged residence in Ely, Nevada, from November 1913 to October 1914; in Sacramento, California, from October 1914 to January 1923; and in San Francisco, California, from January 1923 to October 1926. His [2] petition was duly verified by the affidavits of two witnesses, Thomas E. Connolly, contractor, 2400 Fulton Street, San Francisco, California, and Karl Lewis, physician, 9654 Olympic Boulevard, Beverly Hills, California, who averred in their affidavits that they had known the alien at Los Angeles, California, since January 1, 1937.

The record of preliminary examination of Mr. Rohl shows that he testified that his present marriage was his second one. He testified that his first marriage was to Marian Henderson at Sacramento, California, in December 1914, and that his four children were the issue of this marriage. He testified further that he and his first wife separated in 1923, and that she obtained a final decree of divorce at Sacramento, California, in 1924, on the ground of desertion. He testified further that he paid each child \$75 a month and that his first wife had remarried and was living at Sacramento, California. He promised to furnish later the address of his first wife.

Mr. Rohl produced at the preliminary examination his certificate of marriage to his present wife, which certificate was returned to him. Her birth in the United States was proved by the affidavit of her sister and her divorce from her first husband (she had been married one time before her marriage to Mr. Rohl according to the record) was proved by the production of a duly authenticated copy of the court record of final judgment of divorce.

Mr. Rohl called at the Los Angeles Office on March 11, 1941, and admitted that his testimony at the preliminary examination concerning his first marriage was not correct. He asserted that he was not legally married to Marian Henderson but that he had lived with her from 1914 to 1923; that he was the father of their four children; that they had lived together only in California (wherein common-law marriages are not recognized); and that there had not been any kind of ceremony. He asserted further that she was then living at 2371 Portola Way, Sacramento, California, and that their two minor children were living with her. He asserted further that he had entered into a property settlement with her on April 22, 1925, and furnished a copy of the written agreement. This agreement shows that he promised to pay to Marian Rohl \$70 per month during her lifetime or until she should remarry, and that he promised to pay \$45 per month for each of their four minor children, such payments to continue during the minority of each child. Mr. Rohl's first "wife", Mrs. Marian Clark, was interviewed by a representative of this Service at Sacramento on March 29, 1941, and

she confirmed the story of their relations, as admitted by Mr. Rohl, and said that he had done everything he promised in the agreement.

[3] The record shows that Mr. Rohl testified at the preliminary examination that he had never been in the United States before his arrival on October 23, 1913, and disclosed several absences since that time, which will be mentioned below.

He asserted that he left New York on November 27, 1924, on the S. S. Deutschland; that he spent three or four days in Germany and the remainder of his visit abroad in London, England; and that he returned at New York on January 10, 1925, on the S. S. France, in possession of a reentry permit. This return was verified by the New York office.

He asserted that in 1931 and 1932 he made about ten trips to Mexico in connection with construction work on a road between Monterrey and Mexico City; that the longest single absence was not over three weeks; and that he departed and reentered at Laredo, Texas. Efforts to verify these reentries were unsuccessful, the Inspector in Charge at Laredo reporting that the records of that port failed to disclose any record of any kind at any time relating to Mr. Rohl.

The record shows further that Mr. Rohl testified at the preliminary examination that he traveled on the yacht "Ramona" from New York to San Diego, California, in 1933, arriving at San Diego on the day before Labor Day, in September. The journey was through the Panama Canal. He asserted that the vessel stopped at Acapulco, Mexico for ten hours to take on fuel and that there were no other stops en route. The records of this Service at the San Diego office show that the yacht "Ramona" arrived at that port from New York on September 3, 1933, and that the owner of the yacht was H. W. Rohl, 3278 Wilshire Boulevard, Los Angeles, California. His name did not appear on the crew list.

The record shows further that Mr. Rohl testified at the preliminary examination that he traveled on the yacht "Vega" from Jacksonville, Florida, to Honolulu, and thence to Los Angeles. He asserted that he departed from Jacksonville in November 1937; that he arrived at Los Angeles in February 1938; and that the only stop en route was at Honolulu. The records of this Service at the Honolulu office show that the yacht "Vega" arrived at Honolulu on January 21, 1938, from Balboa, Canal Zone, with four passengers and sixteen crewmen. The crew list was visaed at Nassau, Bahamas, and again at Balboa, Canal Zone, since there were five aliens among the members of the crew. The four passengers were manifested and one of them was shown as H. William Rohl, (M), born September 29, 1886, at Tola, Kansas.

Information came to this Service, apparently from the records of the Bureau of Internal Revenue, that Mr. Rohl asserted in his income tax return for the years 1938 and 1939 that he was a United States citizen and that in the course of an investigation in 1934 he was [4] asked the question, "Are you a citizen of the United States" and he answered, "Yes, I am. I was naturalized in 1921."

Mr. Rohl was called to the Los Angeles office and was interrogated under oath on April 30, 1941. He was questioned about his marital history and his absences and his income tax returns, among other things. He explained his testimony at the preliminary examination that he had been married to Marian Henderson by the assertion that he believed commonlaw marriages were recognized in California. Concerning his testimony at the preliminary examination that his wife, Marian Henderson, had obtained a divorce from him, he was asked, "Were any divorce proceedings ever had between Marian Henderson and yourself" and he answered, "No, a settlement was made." He was asked further for his reasons for stating that he had been divorced, and answered, "We made settlement and signed an agreement." He asserted that he was never questioned by the officers of this Service at Laredo as to his citizenship when returning from any of his visits to Mexico in 1932, and was merely asked where he lived. He denied making any claim that he was a citizen of the United States during the course of these reentries. He asserted that he purchased the yacht "Ramona"; that it was registered in his wife's name, and that he was not inspected when he landed from this vessel at San Diego in 1933. He also asserted that he purchased the yacht "Vega"; that his wife also purchased it; and that he does not know how it happened that he was manifested as a native of Tola, Kansas, upon arrival of the vessel at Honolulu on January 21, 1938. He asserted that he was not inspected and admitted by an immigration officer; that he was not asked any questions; and that he never said that he was born in Kansas. He admitted that some of his income tax returns had shown him to be a citizen of the United States, but asserted that his income tax forms were prepared by an auditor; that he only went over the work sheets with the auditor; and that he had no knowledge until recently that the returns contained a cross in a box to indicate that he was

a citizen of this country. He denied ever making a statement to the Bureau of Internal Revenue in answer to a question, "Are you a citizen of the United States" that "Yes, I am. I was naturalized in 1921." He asserted that he was not in possession of a reentry permit or an unexpired immigration visa upon any of his reentries from Mexico, or when he landed at San Diego in 1933 from the yacht "Ramona" or when he arrived at Honolulu in 1938 on the yacht "Vega."

Another sworn statement was taken from Mr. Rohl at the Los Angeles office on May 22, 1941, which explored his absences from the United States as mentioned above. Thereafter, on May 27, 1941, the Inspector in Charge at Los Angeles submitted a formal application for warrant of arrest to the Central Office. The application recited Mr. Rohl's last [s] entry into the United States as being at Honolulu, T. H., on January 21, 1938, ex yacht "Vega" and applied for warrant of arrest on the charge that "He is in the United States in violation of the Immigration Act of 1924, in that at the time of his entry he was not in possession of an unexpired immigration visa." The Central Office concluded on July 10, 1941 that no ground for deportation proceedings appeared to exist, pointing out that it did not appear that it was necessary for Mr. Rohl to have any documents at the time of his arrival at Honolulu on January 21, 1938, he having the status of a legally admitted resident of the United States at that time. It was also pointed out that the three-year period of limitation provided by the statute had expired, reference apparently being made to the charge of entry without inspection.

Prior to the hearing on this petition, the Immigration and Naturalization Service received a letter, dated August 28, 1941, from Brigadier General John J. Kingman stating, among other things, that the services of Mr. Rohl were of vital importance because of his peculiar qualifications and the scarcity of qualified supervisory personnel. He stated further that it was the understanding of his service that Mr. Rohl's loyalty to the United States was beyond question, and then requested that the granting of Mr. Rohl's final citizenship papers be expedited.

Inquiry was made of the local office of the Federal Bureau of Investigation regarding this alien immediately following the filing of his petition for naturalization with negative results.

Mr. Rohl's petition for naturalization was heard by the court on September 15, 1941, along with the petitions of two other aliens. It was the practice at that time, when a case had facts to be presented to the court, to prepare a written report to the court reciting the relevant facts. Enclosed herewith is a copy of this report to the court. The facts in the case were presented to the court without objection and without recommendation. After considering the facts, the court entered an order admitting Mr. Rohl to citizenship on September 15, 1941.

Sincerely yours,

Earl G. Harrison
EARL G. HARRISON,
Commissioner.

Petition filed 3/10/41

Enclosures.

83608—Hans William Rohl

No objection will be made to the granting of this petition. For the information of the court, however, the results of the investigation made in connection with the case are herewith presented.

The petition was filed on 3/10/41 under the provisions of Section 310 (a) of the Nationality Act of 1940, which grants certain exemptions from the usual requirements of the naturalization law to the spouse of a United States citizen and which requires proof of good character for a period of at least one year immediately preceding the filing of the petition.

The petitioner was born in Germany in 1886 and has resided in the United States since 1913. From about 1916 to 1925 he lived with one Marion Henderson in the State of California but they were not legally married and no marriage ceremony of any kind was performed. As a result of this relationship four children were born to them. On April 22, 1925, they entered into a written agreement under the terms of which Marion Henderson was to have the use of the home property in Sacramento, Calif. and to receive \$70 per month during her lifetime or until she should marry. He was also to pay her \$45 per month for the support of each child during minority. The investigation shows that the terms of this agreement have

been fulfilled by the petitioner. He married his present wife, who is a citizen of the United States, on August 26, 1925 and has resided with her continuously since then.

There is some evidence to indicate that the petitioner has represented himself as a United States citizen. The petitioner has stated, however that he has never believed himself to be a citizen and has never wilfully represented himself as a citizen of the United States.

In 1932 the petitioner made 10 or 12 trips to Mexico in connection with a contract which he had to build roads there and on these trips left and reentered the United States at Laredo, Texas. The Immigration Service has reported that it has no record of his inspection upon his returns from these absences. The petitioner states that he was never questioned as to his citizenship but was only asked where he lived and was permitted to reenter the United States.

On September 3, 1933, the petitioner arrived at San Diego, Calif. on the yacht, "Ramona", which was registered in the name of his wife, on a trip from New York. He was not listed on the manifests as a passenger or member of the crew and there is no record that he was inspected as required by the immigration law. The petitioner has stated that the immigration officers came aboard but that he was not asked any questions by them.

On January 21, 1938, the petitioner arrived at Honolulu, T. H., on the yacht, "Vega", which was registered in the name of his wife, on a trip from Jacksonville, Florida. The manifest data on file with the Immigration Service shows that he was manifested as having been born in Kansas and he was, therefore, not inspected. The petitioner has stated that he did not claim to have been born in Kansas and he was not asked any questions by the immigration officers.

All of the facts in connection with the petitioner's reentries into the United States were presented to the Department in Washington and it was decided on July 10, 1941 that, in view of all of the evidence, it was not a proper case in which to institute deportation proceedings.

The records of the Bureau of Internal Revenue show that for the past several years it has been shown on the petitioner's income tax returns that he is a citizen of the United States. The petitioner has stated that his returns were made out by an auditor; that he only went over the work sheets with the auditor and did not know that the completed forms showed that he was a citizen and that he believes the auditor assumed he was a citizen and he is certain that he did not state to him that he was. It is understood that the classification as a citizen would not have changed the amount of the tax.

The records of the Customs Service, Los Angeles, show that the Rohl-Connolly Co., of which the petitioner is the president, owned and operated a number of vessels from 1934 to 1940 in violation of the law in that the petitioner, who was the president of and a stockholder in the company, was an alien. The penalty provided is forfeiture of the vessels. The petitioner, however, made a cash settlement of the claim against the company on 9/4/41 of \$25,000. It does not appear that there was a willful violation of the law and no criminal action is contemplated.

The petitioner is the President of the Rohl-Connolly Contracting Co., located at 4351 Valley Blvd., Los Angeles, and has been awarded a secret contract in connection with a defense construction project in Honolulu. His participation in this project is being held up until he has been naturalized.

2790 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[5719] BEFORE CALIFORNIA STATE LEGISLATURE'S JOINT FACT FINDING COMMITTEE ON UN-AMERICAN ACTIVITIES

In the Matter of HANS WILHELM ROHL, ROHL-CONNOLLY COMPANY, HAWAIIAN CONSTRUCTORS and R. W. ROHL COMPANY. Open session

Met pursuant to the call of the Chairman at 9:30 o'clock a. m., Saturday, February 27, 1943.

Present:

Senator Jack D. Tenney, Chairman, 3207 West 77th Street, Inglewood, California.

Senator Hugh Burns.

Assemblyman Nelson S. Dilworth, Columbia St. at Crest Drive, Hemet, California.

Assemblyman Jesse, Randolph Kellems, 454 Cuesta Way, Bel-Air, California.

Others present: R. E. Combs, Chief Counsel and Investigator.

Reported by: J. D. Ambrose, 322 Wilcox Bldg., Los Angeles, Calif.

[5720]

PROCEEDINGS

The committee met pursuant to the call of Chairman Tenney at Room 707, California State Building, Los Angeles, California, at 9:30 o'clock a. m.

Chairman TENNEY. The committee will come to order. Mr. Reporter, will you be sworn.

(Whereupon, the Shorthand Reporter was sworn as the Official Reporter of the proceedings.)

Chairman TENNEY. We are going to excuse all witnesses and others who might be here for a few moments. The committee is going to have a short executive session.

Will the gentlemen of the press state their names for the record.

Mr. HAGADON. James Hagadon, Herald-Express.

Mr. AUSTIN. Thomas Austin.

Mr. PHILLIPS. Edward Phillips, Herald-Express.

Chairman TENNEY. Gentlemen, the committee has ruled for this hearing the public will be excluded but the press may remain. We are asking the press to be very careful in reporting anything of a military nature or that might have any bearing on military objectives or installations or anything of that nature which might be developed in the course of the examination of witnesses.

[5721] We believe we must be exceedingly careful in reference to that. I believe with that admonition you gentlemen of the press will act accordingly. In other words, we don't want to reveal any military secrets if any should be developed in the examination.

The rest of the material brought out by the examination, of course, will be matters that can be published. We are exceedingly anxious that nothing will be revealed or any secrets made public which might be helpful to the enemy.

You gentlemen are fully in accord with that statement.

Our chief counsel and investigator, Mr. Combs, can elaborate on that statement and give you a better idea of what we have in mind. Mr. Combs.

Mr. COMBS. I thought it might be well to make a brief statement as to what we expect to show by this witness.

This witness came to the United States from Valparaiso, Chile in 1913. He is a German alien born in Lubeck, Germany.

He secured military and naval contracts to build highly strategic installations for the Army and Navy while he was a German alien.

He built Red Hill which overlooks Pearl Harbor.

He did construction work at Hickam Field.

He built anti-aircraft gun emplacements in Wake Island, Midway and Guam.

He built a ring of installations around the island of Oahu, at the southern tip of which is Pearl Harbor.

He bought a yacht in the east that cost him \$40,000 called the Vega. The Vega was built in Kiel, Germany.

[5722] He later turned the Vega over to the Army for use as a patrol vessel at a cost to the Government of \$150,000 a year.

He made many statements to the effect that he was a citizen of the United States when in fact, he well knew he was an alien.

The manner in which he obtained these contracts and how he put them into effect is, of course, what we expect to develop in this examination.

We feel it will be highly important to the public of this country and certainly to this State, to frankly reveal to them that a German alien has installed these highly strategic projects in the most critical war zone that we have.

These matters have never been revealed before and we believe that the Press should slant the story of the hearing in that direction, so that we may accomplish the public service that we are trying to perform.

That is all I have to say.

Chairman TENNEY. Are we ready to proceed?

Mr. COMBS. Yes, sir.

Chairman TENNEY. You may call your first witness.

[3723] Chairman TENNEY. Mr. Rohl, will you come forward, please?

Do you solemnly swear that the testimony you are about to give before this committee will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. ROHL. I do.

HANS WILHELM ROHL, called as a witness on behalf of the Committee, being first duly sworn, testified as follows:

Chairman TENNEY. Will you state your full name?

The WITNESS. Hans Wilhelm Rohl.

Chairman TENNEY. Is that spelled H-a-n-s?

The WITNESS. Yes.

Chairman TENNEY. Hans Wilhelm Rohl.

The WITNESS. Yes.

Chairman TENNEY. Have you ever been known by any other name?

The WITNESS. No; only H. W.

Chairman TENNEY. What is your residence address?

The WITNESS. 8159 Hollywood Boulevard.

Chairman TENNEY. Los Angeles, California?

The WITNESS. Yes, sir.

Chairman TENNEY. All right, Mr. Combs.

By Mr. COMBS:

Q. Mr. Rohl, how long have you lived in California?

A. 1914.

[3724] Q. Since 1914?

A. Yes.

Q. And have you lived in California continuously since 1914?

A. Right.

Q. You came here from Valparaiso, Chile, did you not?

A. Yes, sir.

Q. On the steamship SANTA MARIA?

A. That is right.

Chairman TENNEY. Will you speak up, Mr. Rohl, so the reporter can hear you?

The WITNESS. Yes.

By Mr. COMBS:

Q. And that was in 1913, was it not?

A. Right.

Q. Prior to the time that you were in Chile, had you been in any other South American country?

A. In Peru.

Q. What sort of work did you do in Peru?

A. I was employed by the American Smelting and Refining Company, at Rincagua.

Q. In what capacity?

A. As foreman.

Q. As foreman?

A. Yes.

Q. In one of their mining operations?

A. Yes.

[3725] Q. Now, did you ever hear of the Nevada Consolidated Copper Company of Ely, Nevada?

A. I worked for them.

Q. When did you start working for that concern?

A. When I arrived in the States.

Q. When you arrived in the States?

A. Yes, in 1913.

2792 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. Did you go then to Ely, Nevada, to work for that company?

A. That is right.

Q. And you resided in Ely, Nevada, did you not, from November, 1913 to October, 1914?

A. Correct.

Q. And then you lived in Sacramento from October, 1914 until January, 1923?

A. I believe that is right.

Q. And in San Francisco from January, 1923 until October, 1926?

A. Yes.

Q. And in Los Angeles ever since?

A. Yes.

Q. When you went to Ely, Nevada, Mr. Rohl, and were employed by the Nevada Consolidated Copper Company, what sort of work did you do there?

A. I was a construction foreman or superintendent.

Q. And had you made the arrangement for your employment [3726] in that capacity before you left South America?

A. No.

Q. Through whom did you obtain that employment?

A. Through the general manager; I don't remember his name.

Q. Was his name Walker?

A. Walker?

Q. Walker, was that his name?

A. No.

Q. Now, your activities as foreman for the Nevada Consolidated Copper Company consisted of what, generally?

A. Of construction—of making McDougal roasters—they are furnaces.

Q. And did you cease working for that company in October, 1914?

A. Yes, sir.

Q. And you then went to Sacramento?

A. That is right.

Q. What sort of work did you do in Sacramento at that time?

A. In Sacramento?

Q. Yes.

A. I was employed by the Ross Construction Company.

Q. Did you work on a causeway project there?

A. Yes.

Q. In Sacramento?

[3727] A. Yes.

Q. In what year was that?

A. (No answer)

Q. Was that in 1914?

A. (No answer)

Q. Do you recall whether that was in 1914?

A. I don't know.

Q. You don't remember?

A. That is a long time ago.

Q. If you don't remember, just state so, Mr. Rohl. Now, in Sacramento you resided for a time at 2371 Portola Way, did you not?

A. Yes.

Q. When did you first start living there? Can you give me the year?

A. (No answer)

Q. Shortly after you went to Sacramento?

A. Yes.

Q. And did you acquire that property?

A. Yes.

Q. Do you own it at the present time?

A. Yes.

Q. Now, while you were residing in San Francisco you made a trip to Germany, did you not?

A. Yes.

Q. On the steamship DEUTSCHLAND?

[3728] A. That is right.

Q. You were a German citizen at that time?

A. That is right.

Q. From whom did you obtain your passport to make that trip?

- A. I obtained a temporary passport from the German Consul in San Francisco.
- Q. I see.
- A. And a re-entry permit from the State Department in Washington.
- Q. Do you recall the name of the German Consul?
- A. No.
- Q. That was in 1924, was it not, that you left?
- A. Yes.
- Q. How long were you gone, Mr. Rohl, on that trip?
- A. Offhand I would say between two and three months.
- Q. And at that time did you have any relatives in Germany?
- A. Yes.
- Q. You were born in Lubeck, were you not?
- A. That is right.
- Q. What relatives did you have there at that time?
- A. Three sisters.
- Q. And did you visit with them?
- A. Yes, sir.
- Q. Did you go to any other place in Germany other than [3729] Lubeck on that occasion?
- A. No; I went to Hamburg.
- Q. You also visited in England, did you?
- A. Yes; I probably stayed a week in Hamburg and spent the rest of my time in London.
- Q. And from what port did you leave Europe to return to the United States?
- A. I left from Plymouth.
- Q. And landed where in this country?
- A. New York.
- Q. You came back on the steamship FRANCE?
- A. Yes, sir.
- Q. Did you then return to San Francisco?
- A. Yes.
- Q. That was early in 1925, was it not?
- A. (Nodding head in the affirmative.)
- Q. And after returning what sort of work did you do then?
- A. Contracting.
- Q. Your offices were where?
- A. San Francisco.
- Q. Had you met Mr. T. E. Connolly by that time?
- A. No.
- Q. When did you first meet him?
- A. Excuse me, I had met him, yes.
- Q. When did you first become acquainted with him?
- [3730] A. In either 1921 or 1922.
- Q. How did you happen to meet him? Do you recall the circumstances under which you met him?
- A. Probably at a contractors' convention.
- Q. He has been in the contracting business for many years, has he not?
- A. Yes.
- Q. And is a graduate of the College of Engineering of the University of California?
- A. Yes.
- Q. And is a member of the Rohl-Connolly Corporation?
- A. Right.
- Q. And his brother handles your insurance business, does he not, for your corporation?
- A. (No answer)
- Q. Mr. Connolly's brother.
- A. Glenn Connolly?
- Q. Yes, Glenn Connolly.
- A. Yes.
- Q. You built the Bay Shore Highway, did you not?
- A. Yes.
- Q. And you also built a road for the Mexican Government, did you not?
- A. Yes.
- Q. Where did that road have its northerly terminus?
- A. (No answer)

2794 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3731] Q. In other words, where did it commence?

A. (No answer)

Q. Did it run from Monterrey southerly to Mexico City?

A. It was the Monterrey-Mexico City Highway.

Q. The Pan-American Highway? Is that what it was called?

A. No.

Q. Was there any name for it?

A. They called it the "Laredo-Mexico City Highway."

Q. Did you do the work on that road in your individual capacity or as a member of the corporation?

A. Individual.

Q. As an individual?

A. Yes.

Q. The Rohl-Connolly Company was incorporated in 1932, was it not?

A. Yes.

Q. And prior to that time you operated solely as an individual?

A. That is right.

Q. When did you first enter into the contracting business?

A. In 1922.

Q. You first entered the contracting business in 1922?

A. Yes.

Q. And you have continued in the contracting business [3732] since that date?

A. Oh, yes.

Q. Until the present time?

A. Yes, sir.

Q. And you are active, of course, now, are you not?

A. Yes, sir.

Q. The Rohl-Connolly Company was incorporated in Nevada, was it not?

A. Yes, sir.

Q. Carson City?

A. (Nodding head in the affirmative.)

Q. Do you know a man by the name of S. F. Cliff or S. F. Meder?

A. No.

Q. Or L. H. Peter?

A. No.

Q. They were the original incorporators in Carson City. I presume your purpose was to form the corporation there and then set it up to transact business in California?

A. That is right.

Q. So those men were simply what is known as the "dummy incorporators"?

A. Yes.

Q. And thereafter you applied for a permit to issue stock to the Corporation Commission of California, did you not?

[3733] A. Yes, sir.

Q. And that was on May 4, 1932, according to the application.

The application was signed by yourself, by Irma Dickey, your secretary, and by Mr. T. E. Connolly?

A. Yes.

Q. And you applied for a permit to issue and sell 40,000 shares, did you not?

A. I believe that is right.

Q. For \$10 a share?

A. (No answer.)

Q. Is that correct?

A. (No answer.)

Q. I will say for your information that is what the application shows, Mr. Rohl.

A. Well, that probably is correct.

Q. And do you recall how many shares were issued to Mr. Connolly when the corporation was first set up in California?

A. Well, I would have half of it.

Q. Half to you and half to Mr. Connolly?

A. That is right.

Q. And a small percentage of the stock to Irma Dickey?

A. No.

Q. She held no stock?

A. No.

[3734] Who was the first president of that corporation?

A. (No answer)

Q. Do you recall?

A. No. We change every so often.

Q. Well, who is the president now?

A. I am.

Q. How long have you occupied that office?

A. (No answer)

Q. A matter of two or three years? I don't care about the exact date.

A. I believe we changed a year ago.

Q. And who preceded you as the president?

A. T. E. Connolly.

Q. Mr. Connolly?

A. Yes.

Q. Now, where in Los Angeles is the principal office of the Rohl-Connolly Company located?

A. 4315 Valley Boulevard.

Q. Do you have a San Francisco office?

A. No.

Q. Have you ever had one?

A. No.

Q. Do you actively attend to the affairs of the Rohl-Connolly Company in southern California?

A. I do.

Q. And you have always done that since its inception?

[3735] A. (No answer)

Q. Have you been active in handling the business down here?

A. Oh, yes.

Q. Did Irma Dickey ever occupy any official position with the Rohl Connolly Company?

A. Why, Irma Dickey is a director and secretary and treasurer.

Q. And she has been for how long?

A. Since its inception.

Q. And still is?

A. Still is.

Q. Your application for a permit to issue stock of the Rohl-Connolly Corporation was filed on May 4, 1931.

It states that you had been engaged in general construction work since 1912. That is correct, is it not?

A. Yes.

Q. What did you do prior to 1912?

A. I was still in construction work.

Q. Have you done that all your life?

A. Yes.

Q. There is also an H. W. Rohl Company, is there not?

A. H. W. Rohl Company is a fictitious name. It is H. W. Rohl operating under the firm name and style of H. W. Rohl Company.

Q. And is there anyone else interested in that concern [3736] besides yourself?

A. No.

Q. Are you familiar with an organization known as the Hawaiian Constructors?

A. Yes, I am. Rohl and Connolly are members of the Hawaiian Constructors.

Q. Is that a corporation?

A. It is a joint venture.

Q. A partnership, in other words?

A. Yes; I believe there is a little difference between a partnership and a joint venture.

Q. Well, the difference being the technical distinction between individuals as partners and an organization composed of corporations as partners engaged in a joint venture. Isn't that your understanding of it?

A. That is right.

Q. Besides the Rohl-Connolly Company, Mr. Rohl, what other concerns are engaged in this joint enterprise?

A. Callahan Construction Company.

Q. Of Los Angeles?

2796 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

A. Yes, of Los Angeles, Gunther and Shirley Company, Ralph E. Woolley and Hawaiian Contracting Company.

Q. How long has that Hawaiian Constructors company been in existence?

A. I wouldn't say—I know a long time.

Q. With the same component membership?

[5737] A. Yes.

Q. Were they doing business under the name of "Hawaiian Contractors" in 1939?

A. We are talking now about Hawaiian Contracting Company?

Q. You misunderstood me. I meant Hawaiian Constructors.

A. Hawaiian Constructors were awarded, and that is all I can say, the secret contract from the War Department.

Q. About when—what year?

A. December, 1940.

Q. Prior to that time had you individually, or had Rohl-Connolly Company done any work for the Government?

A. Yes, sir.

Q. For the Army?

A. Oh, yes. Rohl-Connolly—the only work Rohl-Connolly have done in the last ten years, ten or eleven years, is work for the War Department.

Q. How much stock in the Rohl-Connolly Company do you own now, Mr. Rohl?

A. 50 per cent.

Q. And have you always owned 50 per cent?

A. Yes, sir.

Q. Did Rohl-Connolly Company ever own any vessels?

A. Yes.

Q. Will you describe them generally? What did they consist of?

[5738] A. Tugs and barges.

Q. Has any of the stock of the Rohl-Connolly Company been issued at any time to any other persons except you and Mr. T. E. Connolly?

A. No.

Q. Did the Hawaiian Constructors conduct any business in California at any time?

A. Of course, the Hawaiian Constructors, in connection with the Pacific Ocean contracts, had an office in California.

Q. Where was the location of the Los Angeles office?

A. In California the office was in San Francisco.

Q. Didn't the Hawaiian Constructors have a berth at Wilmington in Southern California?

A. (No answer.)

Q. Berth 145, Wilmington?

A. Hawaiian Constructors were operating that berth for the Government.

Q. They operated the berth, however, in the name of the "Hawaiian Constructors"?

A. Yes, Hawaiian Constructors.

Q. And they also maintain an office at 744 Francisco Street, Los Angeles, do they not?

A. That is right.

Q. They don't operate there any more, do they?

A. No.

[5739] Q. How long has that office been closed?

A. I don't know,—I would say a year or more than a year.

Q. A little more than a year?

A. Yes.

Q. The San Francisco office is still open, isn't it?

A. What date is this?

Q. This is the 27th.

A. It was closed day before yesterday.

Q. I see. Were you ever in the San Francisco office yourself?

A. Oh, yes.

Q. When were you last there?

A. Last Saturday.

Q. Your present wife is Floy Edith Rohl?

A. Yes, sir.

Q. And you married her in San Francisco on or about August 26, 1925?

A. Yes.

Q. Had you been previously married?

A. No.

Q. Do you recall asking a question set forth in your application for citizenship to which you answered that you married in March of 1941 and stated that you were divorced from your first wife?

A. Yes, which wasn't correct.

[3740] Q. That is not true?

A. No.

Q. And you have since corrected it?

A. Yes.

Q. Of whom does your family consist, Mr. Rohl?

A. (No answer.)

Q. What I mean by that is, do you have any children?

A. Yes.

Q. And they are three daughters and a son?

A. Yes.

Q. And one of your daughters lives in Sacramento?

A. Yes, sir.

Q. Where does your son reside?

A. Where is my son?

Q. Yes.

A. He is in Edmonton, Canada.

Q. And how long has he been in Edmonton, Canada?

A. A little over a month.

Q. And where did he reside prior to that time?

A. In Colorado.

Q. What is his business or occupation?

A. He is a construction foreman.

Q. Is he employed by any concern in which you are interested?

A. No.

Q. He operates entirely independently, does he?

[3741] A. Yes, sir.

Q. Do you know whether he is acquainted with a man by the name of Theodore Wyman, Jr.?

A. Theodore Wyman, Jr. is the commanding officer.

Q. Yes, I know he is. He is also in Edmonton, Canada, is he not?

A. Yes.

Q. How long has he been there?

A. Approximately a year.

Q. Do you know whether or not your son is acquainted with Colonel Wyman?

A. Oh, yes.

Q. How long has he known him?

A. Six or seven years.

Q. Did you introduce them?

A. I believe I did.

Q. And you have been acquainted with Colonel Wyman about how long?

A. Since 1936.

Q. He, at that time, was in charge of the United States Army Engineer's office in Los Angeles, was he not?

A. That is correct.

Q. And he then held the rank of major?

A. Yes, sir.

Q. He had just gotten it, as a matter of fact, hadn't he?

[3742] A. That is right.

Q. And you did not know him at all prior to that time?

A. No.

Q. Did you know him when he was a captain?

A. Well, yes, sir, I knew him when he was a captain. He was a captain when he came out here.

Q. And he came out here when?

A. In 19—I am pretty sure 1936.

Q. July 20, 1935. Do you recall he came from Kansas City to work on the flood control project here?

A. Yes.

Q. And you met him after that, did you?

A. No, when he arrived here. Rohl-Connolly Company were building the Long Beach—the Los Angeles-Long Beach breakwater which was under his jurisdiction. That is how I met him.

Q. You met him in that way?

A. Yes, that is right.

Q. And your relations with him were of a business nature, were they?

A. That is right.

A. And they continued from that time until the present date?

A. Oh, yes.

Q. Did you ever own a boat called the "Pandora"?

A. Yes.

[§743] Q. When did you acquire the Pandora?

A. (No answer.)

Q. Do you recall about how long ago?

A. 1927.

Q. Did you ever sail it to Honolulu?

A. Yes.

Q. It was anchored where?

A. Anchored? Where do you mean, here?

A. Yes.

A. At the California Yacht Club anchorage.

Q. And the boat burned, did it not?

A. Yes.

Q. Was it insured?

A. Yes.

Q. And the insurance was payable to you, was it?

A. Yes.

Q. Did you subsequently acquire any other yacht?

A. Yes, I, or my wife did. She bought the Ramona.

Q. Did she also buy the Pandora?

A. I did.

Q. Pardon me.

A. I don't remember who bought the Pandora.

Q. But you do remember the insurance was paid to you?

A. Yes.

Q. Now, the first boat after the Pandora was the Ramona, which you acquired in 1933?

[§744] A. Yes.

Q. Who paid for that boat?

A. I don't know.

Q. Don't you recall whether or not you paid for it, Mr. Rohl, or did your wife pay for it?

A. I would assume it came—I don't know who paid for it, but I assume it came out of community property and funds.

Q. To whom was the insurance payable?

A. I don't know.

Q. Of course, that boat did not burn, did it?

A. No.

Q. Who hired the crew on the Ramona?

A. The captain.

Q. Who employed the captain?

A. (No answer.)

Q. Didn't you employ him?

A. I suppose I did.

Q. And you paid him a salary, didn't you?

A. Yes.

Q. And paid a salary to the crew?

A. (Nodding head in affirmative.)

Q. Did your wife belong to the Newport Beach Yacht Club?

A. You mean "Newport Harbor Yacht Club"?

Q. Yes, Newport Harbor Yacht Club.

A. I did.

[§745] Q. You did?

A. Yes.

Q. Were you ever Commodore of that club?

A. Oh, yes.

Q. You were?

A. Yes.

Q. Was there any regulation requiring you to own a boat in order to be Commodore of the club?

A. No.

Q. There was not?

A. No.

Q. Did you buy the provisions and pay all of the expenses in connection with the operation of the Ramona?

A. You mean personally?

Q. Yes.

A. No.

Q. Who did?

A. It went through the office.

Q. Office of the Rohl-Connolly Company?

A. No, H. W. Rohl.

Q. And you owned H. W. Rohl Company?

A. Community property again, I suppose.

Q. Pardon me?

A. Community property, I suppose.

Q. Nobody else had any interest in that but you?

A. No.

[3746] Q. So you did pay for those things inasmuch as you were an individual doing business under a fictitious name?

A. That is right.

Q. So, of course, you did pay the expenses?

A. Yes.

Q. Now, you sailed the boat—you bought the boat in New York?

A. The Ramona?

Q. Yes.

A. Yes.

Q. And you sailed it from New York to the west coast, did you not?

A. Yes.

Q. Do you recall stopping at Acapulco, Mexico?

A. Yes.

Q. Was the boat inspected by immigration officials there?

A. No.

Q. Was it inspected by immigration officials when you arrived at San Diego?

A. If you will go through the records of the Immigration Department here—I mean they have gone through all this before.

Q. Yes.

A. And they have.

Q. Well, I have gone through the records of the Immigration Department and there is no statement on the manifest that you were on the boat at all, and that is why I asked you that question. In other words, there is no record there that you, as a German alien, ever returned from Acapulco, Mexico, to the United States, and I am wondering whether or not the boat was inspected by immigration officials and if so, whether or not you were interrogated about your status.

A. No.

Q. You were not?

A. No.

Q. When did you first purchase the Vega or when was it purchased? I will put it that way.

A. In 1937.

Q. The Vega was built in Kiel, Germany originally, was she not?

A. Yes, sir.

Q. And owned by a person named Mr. Dicks, is that correct?

A. (Nodding head in affirmative.)

Q. And you bought it in New York?

A. I bought it in New York.

Q. Do you recall how much was paid for it?

A. Yes, \$45,000.

Q. Who put up the \$45,000?

A. That was the \$45,000 Mrs. Rohl got from the Ramona.

[3748] Q. She sold the Ramona?

2800 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- A. For \$45,000 and bought the Vega for \$45,000.
- Q. I see. Who hired the crew for the Vega?
- A. For the Vega?
- Q. Yes.
- A. Mrs. Rohl and Fred Rohl, my son, were back there.
- Q. Do you recall telling anyone in southern California that you intended to sell the Ramona and buy the Vega?
- A. No.
- Q. You never did much such a statement?
- A. I couldn't because I didn't know anything about the Vega.
- Q. Did you have some photographs of the Vega sent out here so you could look at them?
- A. Yes.
- Q. So you did know about the Vega when the photographs arrived?
- A. When the photographs arrived?
- Q. Yes.
- A. Which was some time after the Ramona was sold.
- Q. But before the Vega was purchased.
- A. Yes.
- Q. And after the Ramona had been sold and the photographs of the Vega arrived for your inspection, did you tell anyone you intended to buy the Vega?
- A. I probably did.
- [3749] Q. You probably did?
- A. (No answer.)
- Q. How large a boat was the Vega?
- A. 136 feet.
- Q. 136 feet long?
- A. Yes.
- Q. A steel vessel—
- A. Don't say "was"; I hope she still is.
- Q. The Government is using her now, isn't it?
- A. That is right.
- Q. As a matter of fact, the United States Army Engineers used it as a patrol vessel, did they not?
- A. No. The Army Engineers used it for a while as a survey boat.
- Q. How much rental did you receive for the Vega from the Engineering Corps at that time?
- A. \$1.00—I still have it.
- Q. You received \$1.00?
- A. Yes.
- Q. Did you ever receive any other compensation from the Government for the use of the boat?
- A. No.
- Q. You are quite sure of that?
- A. I am sure of that.
- Q. Did you apply for permission to have a radio telephone installed on the Vega?
- [3750] A. No.
- Q. Never did?
- A. Never did. That is, there is—not now—there was a commercial Mackay radio wireless station.
- Q. Who applied for that?
- A. Mackay.
- Q. At whose request?
- A. Mrs. Rohl.
- Q. You never participated in that at all?
- A. No.
- Q. And the station was KLVC, was it not, the Mackay station on the Vega?
- A. I believe so.
- Q. And application was also made for permission to use code, isn't that correct?
- A. Permission to use code?
- Q. Yes.
- A. Well, the Mackay code, yes.
- Q. Was that permission granted?
- A. Yes.
- Q. It was?

A. Yes.

Q. Are you quite sure of that?

A. The only thing I am sure of is that Mackay Radio furnished the operator.

Q. But you don't know whether or not you were permitted to use code, do you Mr. Rohl?

[3751] A. No; that is up to Mackay.

Q. As a matter of fact, the records show, those that I have seen, that the application was made and denied you for permission to use code. Why was it desired to use code on the Vega?

A. I don't know.

Q. Do you know who is listed in Lloyd's register as the owner of the Vega?

A. No.

Q. Did you apply to Lloyd's for them to make periodic inspections of the Vega's machinery and equipment and anchor chains, and so forth? I mean you personally?

A. That was probably handled as a matter of routine on the boat itself. The inspections were generally made once a year.

Q. Automatically, or at somebody's request?

A. Automatically.

Q. Is it a free service?

A. No.

Q. But you don't have to apply for it; they just keep giving you the service periodically and send you a bill, is that it?

A. (Nodding head in affirmative.)

Q. How many members of the crew were there on the Vega?

A. (No answer.)

Q. How large a crew did she carry?

[3752] A. It depends.

Q. Did you ever carry as many as 16 in the crew?

A. Oh yes, on long trips.

Q. Did you ever have a captain on the Vega called "Mathias"?

A. Yes.

Q. What was his first name?

A. Was it "Mathias" or was it "Matthews"?

Q. Matthews, I guess it was.

A. Otto.

Q. Was he a citizen or an alien?

A. A citizen.

Q. Of what extraction?

A. I don't know.

Q. Were there any aliens in the crew?

A. (No answer.)

Q. At any time?

A. I don't know that.

Q. Now, who directed the sailing of the Vega? Who determined where she would go and when?

A. The owner.

Q. Your wife?

A. (Nodding head in affirmative.) Or I did—probably both of us did.

Q. Probably both of you? Now, you sailed the Vega from Jacksonville, Florida, to Honolulu, did you not?

[3753] A. Yes.

Q. Shortly after you purchased it?

A. That is right.

Q. And you arrived in Honolulu on the 21st of January, 1938, didn't you?

A. Yes.

Q. At this time, for your information, the Immigration manifests shows you to have been born in Iola, Kansas, on September 26, 1886.

How did the Immigration officials get that information?

A. I don't know.

Q. Have you seen that manifest?

A. No.

Q. Did anybody ever tell you that that information appeared in it?

A. No—yes, yes.

Q. The Immigration inspector—

A. Here after I had applied for my citizenship.

2802 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. They told you that on that occasion you had been manifested as having been born in Iola, Kansas?

A. That is right. They called it to my attention.

Q. As a matter of fact, that was the birthplace of your wife?

A. Yes.

Q. But she wasn't born there on September 26, 1886, was she?

[3754] A. No.

Q. You were born in 1886, were you not?

A. Yes.

Q. All right. When you went to Honolulu did you go through the Panama Canal?

A. Yes, sir.

Q. And at Balboa you were examined by an Immigration inspector?

A. I don't think so.

Q. Well, the manifest shows there was an examination made but you were not listed there either as a passenger or a member of the crew, but it shows there were five aliens in the crew.

Does that refresh your memory at all?

A. No.

Q. Do you recall a fight that occurred among the members of the crew while the boat was anchored off Honolulu?

A. (No answer.) (Witness laughing.)

Q. Do you remember that?

A. Not anchored; tied up alongside of the pier.

Q. Tied up alongside of the pier?

A. Yes.

Q. By the way, did you know Mr. Wyman at that time?

A. Colonel Wyman?

Q. Yes.

A. Oh, yes.

[3755] Q. Was he in the Islands then?

A. (No answer.)

Q. You don't recall?

A. (No answer.)

Q. You have no recollection at all of that matter?

A. No.

Q. Is it possible that you may have met him there in 1938?

A. He was still there, wasn't he?

Q. I don't know; I am just wondering whether you know or not.

A. I don't remember.

Q. I see. Now, as a matter of fact, you were negotiating with the Army at that time for contracts with reference to installations in several of the Pacific Islands, were you not?

A. No.

Q. You were not?

A. No.

Q. When did those negotiations commence?

A. December of 1940.

Q. December, 1940?

A. Yes; and they ended in December of 1940.

Q. They were consummated?

A. Yes.

Q. You got the contracts?

[3756] A. Yes.

Q. And those contracts included work on the Island of Oahu, did they not?

A. Yes.

Q. And Midway?

A. No; but I can't tell you what it included.

Q. Well, the records, of course, are available.

A. The records are available.

Q. There is nothing secret about that.

A. I am not permitted to say.

Q. There is nothing secret about the places, is there?

A. There is to me—I mean I am not permitted to tell that.

Q. You are not permitted to say you did any work on the Island of Oahu?

A. Yes.

Q. Are you permitted to say whether you did any work on Wake, Guam, or Midway?

A. I can say I didn't.

Q. You did not?

A. I did not.

Q. Did anyone with whom you were connected do any work on the Island of Midway?

A. No.

Q. Never did?

A. Never did.

[3757] Q. You did work on the Island of Oahu, isn't that true?

A. That's right.

Q. And other islands?

A. Yes.

Q. You worked on other islands?

A. But if you want the specific islands, the Hawaiian Constructors operated on, you will have to get that information from someone else but me because I am not permitted to divulge it.

Q. How about your employees? Are they permitted to disclose where they worked?

A. Not supposed to, but I suppose they do.

Q. They not only do but they have?

A. I suppose they have too.

Q. Do you know Harold Cramer?

A. Harold Cramer?

Q. Yes, Harold Cramer?

A. No.

Q. He was employed on some of those islands by the Hawaiian Constructors. Now, how long did you remain in Honolulu after you sailed over there on the Vega? Did you stay there, Mr. Rohl, about two weeks?

A. About two weeks.

Q. When you left Honolulu to return to the United States who were the passengers on the boat besides yourself? [3758]

A. Well, there was Dr. Lewis.

Q. What is his full name?

A. Carl Lewis.

Q. Who else?

A. And his wife.

Q. What is her first name?

A. Virginia.

Q. Yes; anyone else?

A. Mrs. Winne.

Q. How do you spell that?

A. Ilene Winne, W-i-n-n-e.

Q. She boarded the boat at Honolulu?

A. At Honolulu, yes.

Q. And returned with you to San Diego?

A. Los Angeles.

Q. Pardon me.

A. San Pedro.

Q. Excuse me, San Pedro. Was anybody else on the boat as passengers between the time you left Honolulu and you returned to California?

A. No; of course Mrs. Rohl.

Q. Yes.

A. That is all.

Q. Nobody else boarded the boat between Honolulu and San Diego?

[3759] A. No; the boat didn't go to San Diego.

Q. I mean San Pedro.

A. San Pedro.

Q. Nobody else boarded the boat between the time it left Honolulu and the time it arrived at San Pedro?

A. Yes, that is right.

Q. Do you know Mr. E. J. Crouse?

A. Yes.

Q. Didn't he board the boat between the time it left Honolulu and arrived at San Pedro?

A. No.

Q. He did not?

A. (No answer.)

Q. Were you ever familiar with his boat, the Marlin?

A. Yes.

Q. Didn't his boat, the Marlin, hail the Vega in the vicinity of Catalina Island, and didn't Mr. Crouse come on board the Vega?

A. No, sir.

Q. You are positive of that?

A. I am positive. He came aboard inside the breakwater.

Q. Where was that?

A. Los Angeles breakwater.

Q. Wasn't that before your boat docked at San Pedro?

A. Before it docked, yes.

[3760] Q. And before it was inspected by Immigration officials?

A. There was no Immigration officials.

Q. Well, didn't somebody tell him that he had better get off the boat because he had no business on there and that you had not cleared Immigration yet?

A. That must have been the bug inspector.

Q. Didn't somebody tell him that, or do you know?

A. I don't know. There is no Immigration inspection.

Q. He did get off the boat, didn't he, before she docked?

A. I don't remember that.

Q. Now, when you went to work—strike that.

When you went in to Mexico to work on this road from Monterey to Mexico City, you went in usually through Laredo, Texas, did you not?

A. Yes, sir.

Q. How many times did you go across the border at Laredo?

A. I don't know—frequently.

Q. More than 10 times?

A. Yes.

Q. Is there an Immigration office at Laredo, Texas?

A. I don't know.

Q. Well, there is one there?

A. Well, on the train—

[3761] Q. You were going to say something about "on the train"?

A. (No answer.)

Q. Go right ahead, Mr. Rohl.

A. On the train someone asks you where you live, that is all.

Q. Do you know Mr. F. H. Crockett who was in charge of the Immigration and Naturalization Service at Laredo?

A. No.

Chairman TENNEY: Mr. Combs, I think we had better take a five-minute recess for the sake of the reporter at this point.

We will stand in recess for about five minutes.

(Short recess.)

Chairman TENNEY: The hearing will come to order.

Mr. COMBS: Will you read the last question and answer?

(Question and answer read.)

By Mr. COMBS:

Q. I believe you stated that to your knowledge there was no Immigration office at Laredo, Texas?

A. I have never seen one. As a matter of fact, I have never been in Laredo, Texas.

Q. How did you go into Mexico?

A. On the train.

Q. Across the border from the United States?

A. (Nodding head in affirmative.)

Q. You were never asked your citizenship status?

[3762] A. No.

Q. Do you recall stating during an interview with the Naturalization Examiner on April 30, 1941, that you had renounced your German citizenship in 1908 or 1909?

A. Yes.

Q. And your reason for that was because you refused to return to Germany for military service?

A. Yes, sir.

Q. And you felt then you were no longer a citizen of Germany?

A. That is right.

Q. Of what country did you believe you were a citizen from that time on?

A. None.

Q. You had no citizenship status?

A. That is right.

Q. And you thought you had none since 1908?

A. 1908 and 1909.

Q. However, when you returned to Germany in 1924 you obtained a temporary passport from the German consul?

A. That is the only way I could do it.

Q. Did you ever make application—

A. I might add to that that after the last war the citizenships—German citizenships had been revoked—I mean reinstated. I couldn't go back there until after the war anyway.

[3763] Q. You couldn't return to Germany until after the first World War?

A. That is right.

Q. And you felt that because you had refused to return to Germany for military service in 1908 or 1909 that you were from that time on no longer a citizen of Germany?

A. That is true.

Q. Now, did you ever make application for admission to citizenship in the United States prior to 1941?

A. I believe in 1915 or '16, or thereabouts.

Q. You made application?

A. Yes.

Q. Do you recall stating on your preliminary application for citizenship on March 10, 1941, that you had never made any prior application?

A. No.

Q. You did not so state?

A. No.

Q. Your application shows that you stated that you had never made a prior application?

A. (No answer.)

Q. That was your preliminary application on March 10, 1941?

A. No.

Q. If you examine it you will find that is the fact.

A. Because I showed them my declaration of intention [3764] at the time.

Q. You remember signing the application, of course?

A. Yes.

Q. Did you ever do any work for the United States Navy?

A. No.

Q. Never did any?

A. Never did.

Q. Now, when you first met Colonel Wyman he was then a major, I believe you testified?

A. (Nodding head in affirmative.)

Q. And that was about 1936?

A. 1935. I must have met him the day he arrived here because at that time Rohl-Connelly, I believe, were the only contractors in this engineering district, or I would say, the only contractors of any consequence.

Q. Did you ever have any private transactions with Major Wyman?

A. No.

Q. Did you ever lend him any money?

A. No.

Q. Did you ever have any social contact with him?

A. Yes.

Q. He came on board your yacht, the Vega, on many instances, did he not?

A. I wouldn't say "on many"—several times.

[3765] Q. Did you ever entertain him in your home?

A. Yes.

Q. Several times?

A. Yes.

Q. During the time that you first knew Major Wyman, say in 1935, '36, and '37, do you know whether or not he was having any domestic difficulties?

A. (No answer.)

- Q. Did he ever tell you about any domestic troubles he was having?
- A. No.
- Q. You knew nothing about that?
- A. I know he got a divorce and re-married.
- Q. Were you acquainted with his present wife?
- A. I am now.
- Q. Did you know that her sister was at one time his private secretary?
- A. I know that now.
- Q. And her name was Perry?
- A. I don't know—I don't remember the name.
- Q. Was Major Wyman a rather heavy drinker when you knew him?
- A. No.
- Q. He wasn't?
- A. (Shaking head in the negative.)
- Q. Did you ever see him intoxicated?
- [3766] A. No.
- Q. Never did?
- A. (Nodding head in the negative.)
- Q. Do you recall an instance when you were entertaining some people on your yacht, some women guests, and that Major Wyman was intoxicated and embarrassed those present in your main salon?
- A. (No answer.)
- Q. Do you recall that instance?
- A. No.
- Q. Are you quite sure that you have never seen Major Wyman or Colonel Wyman intoxicated?
- A. I have seen him drinking.
- Q. But you never saw him intoxicated?
- A. No. That goes back again, of course, to the old question.
- Q. You mean the difference between—
- A. I drink myself. I am not intoxicated until I fall down.
- Q. Would you apply that same rule to Major Wyman's drinking activities?
- A. I apply that same rule to everybody.
- Q. Do you remember when Major Wyman was working on the San Pedro breakwater?
- A. Yes.
- Q. Did you do any part of that work for the Army?
- [3767] A. I did all of it.
- Q. Do you recall—
- A. Long before—long before Major Wyman was ever here.
- Q. I see. There was an ammunition anchorage in conjunction with that breakwater, was there not?
- A. No.
- Q. Explosives anchorage?
- A. No.
- Q. You are sure of that?
- A. I am sure of that. That explosives anchorage has been there long before they built the breakwater.
- Q. Did you work on that at all?
- A. No.
- Q. Now, in some of your income tax returns, Mr. Rohl, you stated, did you not, that you were a citizen of the United States?
- A. (No answer.)
- Q. Federal income tax returns.
- A. Yes; I found that out—I was told that by—
- Q. By the Immigration officials—pardon me, Naturalization officials?
- A. Yes.
- Q. And did you examine the copies of your Federal income tax returns to ascertain whether or not you had made such a statement?
- [3768] A. I did after they—
- Q. After they called it to your attention?
- A. After they called it to my attention, yes. I don't sign—I do sign it, but I don't prepare my own income tax.
- Q. You don't pay any attention to it?
- A. I don't prepare them myself.

Q. Did you find that on one or more of those income tax returns there was a statement to the effect that you had been naturalized in 1921?

A. No.

Q. You never found any such statement?

A. No.

Q. Did you examine your California State income tax return since 1935 to ascertain whether or not a similar statement was made on that?

A. No, I have never seen them.

Q. You own an automobile, do you not?

A. Oh, yes.

Q. And you own it individually?

A. Yes.

Q. You never made application for an operator's license in California, did you?

A. Many years ago. I haven't been driving a car for better than 10 years.

Q. How long has it been since you had an operator's [3769] license?

A. I believe somewhere in the '20's.

Q. Now, when did you obtain your first contract to do construction work for the United States Army?

A. In 1932 or 1933.

Q. And when did you obtain your first contract to do construction work for the Army on the Island of Oahu?

A. 1940.

Q. And how long did that construction work continue from and after 1940?

A. 1940 until January 31, 1943.

Q. Was all of that work done through the Hawaiian Constructors?

A. Correct.

Q. Were you active in the enterprise at all?

A. Quite so.

Q. Made several trips there, did you not?

A. No; I spent most of my time there for a period of 14 months.

Q. Where, on the Island of Oahu, was the main office of the Hawaiian Constructors?

A. Punahou Camp.

Q. Now, your main office was located there?

A. Yes.

Q. Do you know Mr. C. C. Middleton?

A. Yes.

[3770] Q. Who is he?

A. He is the administrator for the Hawaiian Constructors; he is in charge of all of the offices.

Q. Now, at that time—strike that.

Do you know where Schofield Barracks are located?

A. Oh, yes.

Q. And do you know that Wheeler Field is a part of or an adjunct to Schofield Barracks?

A. Yes.

Q. And you are familiar with Kapupu Gulch just below Wheeler Field—you know where that is?

A. (No answer.)

Q. Did you ever hear of that?

A. Did I ever hear of it?

Q. Yes, Kapupu Gulch.

A. Yes, near Schofield Barracks.

Q. Do you know where Ewa is?

A. Yes.

Q. There is an airfield there, is there not?

A. Ewa.

Q. Yes.

A. Now, listen, I can't tell you where any airfields are.

Q. Well, it is a matter of common knowledge there is one under construction there.

A. Where?

[3771] Q. Ewa.

A. (No answer)

Q. You don't know?

A. (No answer)

- Q. Do you know where Bellows Field is?
 A. Oh, yes.
 Q. And that is on the east coast of the Island of Oahu, is it not?
 A. Yes.
 Q. And you know where Hickam Field is?
 A. Oh, yes.
 Q. And do you know where Red Hill is?
 A. Yes.
 Q. Do you know where Kahuku is?
 A. Yes.
 Q. And do you know where the Waialeale Base yard is?
 A. Yes.
 Q. At the extreme northwesterly tip of the Island of Oahu?
 A. Yes.
 Q. Do you know where all of those places are?
 A. Oh, yes.
 Q. And you know where Barber's Point is?
 A. Yes.
 Q. Now, as a matter of fact, you can answer this question yes or no: The Hawaiian Constructors did work on [3772] Bellows Field, Hickam Field, Red Hill, Wheeler Field, Ewa and Kiena?
 A. The answer is no.
 Q. They did not do work at any of those places?
 A. Oh, yes.
 Q. But they didn't do work at all of them, is that it?
 A. That is right.
 Q. They did work at Red Hill, did they not?
 A. No.
 Q. No work at all there?
 A. No.
 Q. You are quite sure of that?
 A. Why, certainly.
 Q. Did they do any work at Hickam Field?
 A. Yes.
 Q. At Bellows Field?
 A. Yes.
 Q. At Kiubla Bay?
 A. Kiubla Bay?
 Q. Yes.
 A. No.
 Q. At Kihuko?
 A. Yes.
 Q. At Hiena Point?
 A. No.
 Q. At Ewa?
 [3773] A. At Ewa? You have got that mixed up. It isn't called "Ewa." You are thinking about something else. I am not going to tell you what you are thinking about.
 Q. You are quite sure—are you very positive that they did not work at all at Red Hill?
 A. Yes, because that is a Navy job.
 Q. I know it is.
 A. And we are not Navy contractors.
 Q. You never did any work for the Navy?
 A. No; Army contracting.
 Q. Did any concern with which you have been connected now, or in the past, ever do any work for the Navy?
 A. No. Oh, ever do any work for the Navy?
 Q. Yes.
 A. That, I don't know. The Hawaiian Constructors were the only Army contractors in the Pacific Ocean.
 Q. As I recall your testimony, you said that the Hawaiian Constructors did no work at all at Wake, Guam, or Midway?
 A. That is right.
 Q. Did they do any work at Canton and Johnson Islands?
 A. Now, what is this?
 Q. Pardon me?

A. What is this? I don't know how much I can tell you—I am going to be frank with you.

Q. Yes, I understand, but we have information that you [3774] did do work at Canton and Johnson Islands from several witnesses.

A. All right. We didn't do any work at Johnson Islands; we did not.

Q. Did you do any work at Canton Island?

A. Yes, we did.

Q. You are sure you never did any work at Johnson Island?

A. That is right.

Q. Did you do any work in Australia?

A. Yes.

Q. Now, at the headquarters of the Hawaiian Constructors there is a parking space delineated outside, is there not, with the names of the owners of the various cars that are privileged to park there?

A. Yes.

Q. Is that correct?

A. That is correct.

Q. Did you have such a parking space?

A. There was a name on one, but I never used it.

Q. Your name was on it?

A. Yes, sir.

Q. But you never used it?

A. No; I had another place to park.

Q. What share did Rohl-Connolly Company own in the Hawaiian Constructors? [3775] A. It varied.

Q. Well, what share did you own in 1940?

A. 40 per cent.

Q. What share did you own in 1941?

A. 40 per cent.

Q. What share do you own now?

A. 24 per cent.

Q. Does the Hawaiian Constructors have any officers—president, secretary, and so forth?

A. No; it is a joint venture.

Q. I understand that.

A. Can't be any officers or directors.

Q. Well, I am not so sure about that, but at least there are none.

A. I am sure about it,—there can't be any.

Q. Who was in charge of construction on the Island of Oahu at the time the contract was first awarded?

A. Now, do you mean?

Q. For the Army.

A. Colonel Wyman.

Q. And was Colonel Wyman in charge of the work there during all the time that these construction enterprises were in progress for the Army?

A. No.

Q. When did he leave there?

A. He left, I believe, the latter part of April, 1942.

[3776] Q. And he was superseded by whom?

A. He was superseded by Colonel Lyman—one is Wyman and the other one is Lyman.

Q. General Lyman—wasn't he a general?

A. Well, he was—he was notified that he would be made a general, but he died the next day.

Q. Do you know whether or not he did anything about the contract that you had for the use of the Vega by the Army engineers? Do you know whether or not he canceled that contract?

A. Whether he canceled the contract?

Q. Yes.

A. Yes.

Q. He did cancel it?

A. Yes. Now that is all.—That is good enough.

Q. Now, the employees who worked on these various military installations that we have mentioned here, were employees of the Hawaiian Constructors, were they not?

A. That is right.

2810 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. And they were employed originally by Hawaiian Constructors, weren't they?
A. Oh, yes.
Q. Were they paid by the Hawaiian Constructors?
A. No.
Q. They were paid by the Army engineers, weren't they?
A. By the Army engineers.
[3777] Q. That was the invariable practice, wasn't it?
A. That was the practice at that time.
Q. And is that the practice now?
A. You mean on Army contracts?
Q. Yes.
A. No.
Q. What procedure do they follow now, Mr. Rohl?
A. The contractor pays the men.
Q. How long has that been in effect?
A. I don't know.
Q. Now, who negotiated originally with Colonel Wyman for the initial, basic contract between the Army and the Hawaiian Constructors?
A. Mr. Grafe and Mr. Connolly.
Q. Mr. Paul Grafe?
A. Yes.
Q. And Tom Connolly?
A. And T. E. Connolly of Rohl-Connolly.
Q. Did you introduce Mr. Grafe to Mr. Connolly?
A. No.
Q. He had an independent acquaintanceship with him?
A. Callahan built the Prado Dam under Colonel Wyman—
Q. Which was under the jurisdiction of Colonel Wyman?
A. That is right.
Q. Now, do you recall receiving a letter from [3778] Colonel Wyman, dated January 24, 1941, addressed to you and which reads as follows:

Via Clipper.
Address reply to District Engineer, U. S. Engineer Office,
P. O. Box 2240, Honolulu, T. H.
Refer to File No. Contract No. W-414-Eng-602.

JANUARY 22, 1941.

Mr. H. W. ROHL,
*Rohl-Connolly Company, 4351 Alhambra Avenue,
Los Angeles, California.*

DEAR SIR: Reference is made to secret Contract No. W-414-Eng-602, with the Hawaiian Constructors for work in the Hawaiian Islands.

As you are actively interested in this venture, I desire you to proceed to Honolulu at your earliest convenience to consult with the District Engineer relative to ways and means to accomplish the purpose of the contract.

You will be allowed transportation either by Clipper or steamboat both ways, and travel allowance not to exceed \$6.00 per day while en route in accordance with existing laws and regulations.

[3779] You will make application to either the District Engineer at Los Angeles or the Division Engineer, South Pacific Division, San Francisco, for transportation.

Very truly yours,

THEODORE WYMAN, Jr.,
*Lt. Col., Corps of Engineers.
District Engineer.*

You recall receiving that letter?

A. Yes.
Q. And in response to it did you go to the Hawaiian Islands?
A. I went to the Hawaiian Islands.
Q. The date of that, Mr. Rohl, was January 22, 1941.
A. I went to the Hawaiian Islands the last week of September.
Q. 1941?
A. 1941.
Q. How did you travel on that trip—by water or by air?
A. I went by air.
Q. And did you confer with Colonel Wyman there about the work?
A. Yes.

Q. Did you ever make an inspection of the work with him?

[3780] A. Oh, yes.

Q. On one occasion or more than one occasion?

A. More than one occasion.

Q. And as a matter of fact, you were in Pearl Harbor on December 6th, were you not?

A. I wasn't exactly in Pearl Harbor, but I was close to it.

Q. Too close?

A. I don't know about "too close." It missed me by about 100 feet.

Q. Were you present there all during the attack on Pearl Harbor?

A. Oh, yes.

Q. And immediately afterwards you directed the restoration of some of the damage that had been done, did you not?

A. Yes, all of it except Pearl Harbor proper.

Q. But the other areas that I have mentioned, and that has all been in the newspapers, Mr. Rohl.

A. That is all right; anything in the newspapers I can talk about.

Q. There is nothing strategic about this.

A. But when you talk about the Islands—

Q. That is something else?

A. Yes.

Q. I will stick to the Island of Oahu, is that all right?

[3781] A. That is all right, because that has all been in the papers.

Q. All right. Now, you did repair work at Hickam Field?

A. Oh, yes.

Q. At Bellows Field?

A. Yes.

Q. At Wheeler Field?

A. Yes.

Q. At Kakuku?

A. Kakuku wasn't built at that time.

Q. Were there any other installations that were damaged that I haven't mentioned?

A. Well, on December—of course martial law was declared on December 7th in the afternoon.

Q. Yes.

A. And immediately all work on the Island of Oahu was turned over to the Hawaiian Constructors, being the Army contractors.

Every contract was canceled. I mean other contracts, and it was all turned over to the Hawaiian Constructors.

Q. Under your direction?

A. Yes.

Q. And were you there while all of this work of repairing was under way?

A. Oh, yes.

[3782] Q. How long did you stay on that occasion? I mean immediately after the bombing occurred.

A. Immediately after the bombing? I believe I got out approximately the first of June.

Q. And were you there continually from December 7th?

A. I made—I went over there the latter part of September and I made one trip back here.

Q. Well, the Hawaiian Constructors had all of the work at that time under the 1940 contract, didn't they?

A. No.

Q. Well, who turned all of the work over to them?

A. Well, there were other contractors on the Island.

Q. Yes.

A. I mean there was a contractor building a street, maybe.

Q. Yes.

A. And a contractor building a building here.

Q. I see.

A. And a contractor doing something else.

Q. But those contractors did not participate in any of the reconstruction work?

A. We took over all the contractors and their organizations.

Q. So that all of the other contractors turned the work over to you—that is, turned it over to the Hawaiian Constructors, is that it?

2812 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3783] A. Hawaiian Constructors, yes.

Q. At whose instance did they do that?

A. At the instance of the Commanding General.

Q. And all of that work was under the supervision of Colonel Wyman?

A. Oh, yes.

Q. Now, was the first contract for installations on the Island of Oahu with Rohl and Connolly?

A. No.

Q. Wasn't with Rohl and Connolly.

A. The Hawaiian Constructors.

Q. The Rohl and Connolly Company never had any contracts at all with the Army for installations?

A. In the Pacific Ocean?

Q. Yes.

A. No. When I say "the Pacific Ocean," I mean any islands in the Pacific Ocean.

Q. I understand. After you returned to this country in June of 1941 did you subsequently make another trip to the Island of Oahu?

A. Yes, if I recall right, I stayed over here about two weeks and I immediately returned.

Q. Well, were you requested to go back to do more work?

A. Now, you are talking about 1942?

Q. No, I am talking about—well, strike that.

[3784] As I understand your testimony you said that after the bombing of Pearl Harbor you stayed over there until June?

A. 1942.

Q. Then you returned to the United States.

A. Yes, for two weeks.

Q. I understand.

A. On business.

Q. Then you went back?

A. Immediately.

Q. How did you go back that time—by boat or by Clipper?

A. Now, wait a minute—I made three trips back.

Q. You mean you made three trips from the United States back to Oahu?

A. No, no, from Oahu over here and back, because my work was all in the Hawaiian Islands and not here.

Q. Yes.

A. I made three trips over here and on one of them I returned on the transport.

Q. Did you maintain a residence on the Island of Oahu?

A. Yes.

Q. A home or a hotel, or where?

A. No, we operated a hotel.

Q. And you stayed there, did you?

[3785] Chairman TENNEY. By "we," whom do you mean?

The WITNESS. Hawaiian Constructors for the Army.

By Mr. COMBS:

Q. I show you the Encyclopedia Britannica World Atlas, Mr. Rohl, 1942 edition, Map No. 91. Map No. 91 is a map of the Hawaiian Islands, is it not?

A. Yes.

Q. In the upper left-hand corner in green is there delineated the Island of Oahu?

A. Yes.

Q. I want to take my own map and indicate on the Atlas map the various localities which I have designated, so we will have them accurately in the record.

Schofield Barracks is shown on the Atlas map.

A. Yes.

Q. Bellows Field is not shown on the Atlas map?

A. No.

Q. But it is shown on this map which I have prepared and which I now show you. (Handing drawing of map to the witness.)

A. Yes, sir.

Q. Is that the approximate location of Bellows Field?

A. Yes, that is right.

Q. Hickam Field is not shown on the Atlas but I show it to you on the map which I have prepared and ask you if that is the approximate location of Hickam Field.

A. You are doing pretty good.

[3786] Q. Is that correct?

A. Yes.

Q. I show you Red Hill on the map which I have prepared, and which is not shown on the Atlas map, and ask you if that is the approximate location of Red Hill.

A. Yes.

Q. I show you Wheeler Field, which is designated on the map which I have prepared, and which is not shown on the Atlas map, and ask you if that is the approximate location of Wheeler Field.

A. Well, more or less.

Mr. COMBS: And let the record show I am showing the map which I prepared, to Mr. Rohl, while asking these questions.

Mr. Chairman, this map was prepared by me from data which we have received from an informant, who will later be sworn to testify, and I offer this as Exhibit No. 1 in evidence in connection with the testimony of this witness.

Chairman TENNEY. The map will be marked Exhibit 1 in connection with the testimony of Mr. Rohl.

(The map referred to was marked Committee Exhibit No. 1, Hans W. Rohl.)

By Mr. COMBS:

Q. Mr. Rohl, the contract that you had with the Army Engineers for the use of your yacht, was that a contract entered into by Hawaiian Constructors and the Army or by Rohl-Connolly and the Army, or by you individually?

[3787] A. No. Well, sometimes I hesitate because—

Q. Well, it is perfectly all right; I am asking you a great many detailed questions.

A. There are things that I am not permitted to say, I mean you can get the information from another source, but I don't want to be the guilty one.

Q. I don't want you to be.

A. But I can say this, that contracts of that magnitude are handled by "supplements."

Now, a supplement to a contract, cost plus, straight, fixed fee contract means additional work—call it a job or whatever you might call it, but it is handled by a supplement, and the case of the Vega a supplement was issued to the Hawaiian Constructors to charter the Vega as a survey boat from Floy E. Rohl, which is my wife's name.

Q. For a consideration of \$1.00 a year?

A. For consideration of \$1.00 a year; to Hawaiian Constructors to maintain, hold the owner harmless and return it to the owner in as good shape as it was received by them.

Q. Was the Vega to your knowledge ever used by the Navy?

A. Oh, yes.

Q. Was that by a supplement to the basic contract?

A. No.

Q. Who was that contract with—

A. You mean over there?

[3788] Q. Yes.

A. No, no, the Navy didn't use it over there.

Q. Did the Navy use it over here?

A. The Navy requisitioned the Vega last July, shortly after she came back from Honolulu.

Q. Did Floy Rohl assign the Vega to the Hawaiian Constructors?

A. No.

Q. Merely leased it?

A. For a dollar.

Q. Mr. Rohl, do you know of any arrangement whereby \$150,000 a year was paid for the use of the Vega?

A. Well, as a matter of fact, it wasn't.

Q. It wasn't?

A. No. Somebody got themselves twisted again. Now, I might explain that.

Q. Yes.

A. We will have to come back again to what a supplement is. When a supplement on a cost plus fee contract—on each supplement issued—you might have 100 of them. You might have 100 of them in one month.

There is an estimate made—an estimate is made and in the supplement it says there was a supplement issued for Hawaiian Constructors to operate,

maintain, return to the owner the survey ship Vega, at a cost not to exceed \$150,000 a year—operation costs.

[3789] Q. And that was the contract?

A. That was the supplement and it was amended, and it was decided—and I can't tell you the reasons why. It was decided not to use the Vega on that particular survey. I mean the survey was abandoned so then the Vega was ordered to be returned on that supplement, and then part 2 was issued to that supplement—that for the period that the Vega was in service to the War Department, Hawaiian Constructors were authorized under Part 2 of the supplement—43, or whatever it was, to do all that and return it to the owner for a cost not to exceed \$75,000, for which Hawaiian Constructors would receive a fee of, I believe, \$570.

Q. And all of that data was contained in the supplemental contracts to the basic contract?

A. To the Hawaiian Constructors Contract No. 602.

Q. Yes.

A. That is right.

Q. Now, going back for the moment to the time when you were working in Sacramento.

Did you ever do any work up on the Bear River?

A. (No answer.)

Q. Strike that. Was the contract for the use of the Vega made between Hawaiian Constructors and Floy Rohl, or was the War Department a party to that contract also?

A. No, the War Department doesn't enter into a contract except with the principal.

[3790] Q. I see.

A. The Hawaiian Constructors.

Q. I see.

A. From then on the Hawaiian Constructors or the contractor, whoever it might be, is ordered to do certain things.

Q. By the Army Engineers?

A. By the Army Engineers, yes.

Q. And was Colonel Wyman the head of the Army Engineers at that time?

A. Oh, yes.

Q. And would actually control the movements of the boat, would he not?

A. Oh, certainly.

Q. And did that condition exist until he left the Island of Oahu?

A. Yes.

Q. Now, going back to the time you were working at Sacramento, Mr. Rohl, did you ever do any work on the Bear River?

A. Bear River?

Q. At Sacramento.

A. Where is that?

Q. I don't know; it is in Sacramento County.

A. Bear River in Sacramento County?

Q. Yes.

[3791] A. (No answer.)

Q. Did you ever know a man by the name of William Henry Enright?

A. William Henry Enright?

Q. Yes.

A. I don't know.

Q. You don't remember any such name?

A. No.

Q. Did you ever know a man by the name of Werner Plack?

A. Who?

Q. Werner Plack?

A. Not to my knowledge.

Q. You never knew Werner Plack?

A. No.

Q. Don't you remember going into the Swing Club with Werner Plack during the summer of 1938?

A. No, I don't.

Q. You have no recollection of Werner Plack at all?

A. No, I don't.

Q. Do you know where the Swing Club is or was?

A. I know where it was.

- Q. 1710 North Las Palmas Avenue, Hollywood.
A. 1710 North Las Palmas, Hollywood? That was down here?
Q. Yes.
[3792] A. Down near 833 Spring, wasn't it?
Q. Well, you know it was a club that opened, usually, after 2:00 o'clock in the morning. Do you remember that?
A. (No answer.)
Q. A night club.
A. (No answer.)
Q. You remember the Swing Club, don't you?
A. Yes, I remember the Swing Club. Wasn't that at 833 Spring, or some place?
Q. I don't know.
A. I don't know myself.
Q. When were you last there?
A. I don't know that.
Q. Well, were you ever there?
A. I suppose I was.
Q. Within the last 10 years says, or can you give us a general idea of when you were last there?
A. (Nodding head in the negative.)
Q. Have you been there within the last five years?
A. Five years—I was younger then.
Q. It was afterwards called the "1710 Club."
A. I probably have been there.
Q. They had a special song, didn't they? Do you remember the song they used to sing about you?
A. No. You must have been there yourself.
Q. I talked to some people that were very recently.
[3793] Now, do you keep copies of your Federal income tax returns, Mr. Rohl?
A. Why, certainly.
Q. Pardon me?
A. Certainly.
Q. You do?
A. Yes. I mean my office does—I do, yes.
Q. Who has the custody of them?
A. Copies of my income taxes?
Q. Yes.
A. It is either Miss Dickey or Mr. Bontems.
Q. What are his initials?
A. (No answer.)
Q. What is his first name?
A. James.
Q. And he works where—where is his office?
A. He has offices in the Security First National Bank Building.
Q. Los Angeles?
A. Los Angeles.
Q. Did he prepare your income tax returns for you?
A. Yes, sir.
Q. Under your instructions?
A. No.
Q. I mean—
A. I pay him for doing it.
[3794] Q. Who tells him to do it? That is what I am getting at.
A. Well, he has been doing it for so many years.
Q. Oh, I see.
A. More than 10 years.
Q. Yes.
A. He is the auditor.
Q. So those copies of those returns would either be in his possession or in the possession of Irma Dickey?
A. That is right.
Q. Now, you applied for admission to citizenship in 1941, in March, did you not?
A. Yes.

Q. Do you recall Rohl-Connolly paid a fine to the Federal Government of \$25,000 about five days before you were admitted to citizenship?

A. I remember that very well.

Q. That was for what reason?

A. That was a fine because I was, during that time—we owned that building equipment at one time and I was president of the Rohl-Connolly Company which I had no right to be.

Q. And wasn't it because you were an alien and owned more than 40 per cent of the stock, or pardon me, 25 percent of the stock of the Rohl-Connolly Company?

A. Yes.

[3795] Q. That was the reason, wasn't it?

A. Yes. I mean the fine was assessed and paid and everything forgiven.

Q. I understand. The original penalty was confiscation of all of the boats and launches and tugs and so forth that were registered in the name of Rohl-Connolly, wasn't that it?

A. Yes; but it was at the secretary's discretion.

Q. And the case was settled?

A. Assessed a fine.

Q. For \$25,000?

A. Yes.

Q. And that was paid about five days prior to the time you were admitted to citizenship?

A. That's right.

Q. Now, Mr. Rohl, I am going to ask you a question but I am not going to amplify it. I merely want to get the basic data in the record and I am doing it only for that purpose. I am not going into detail.

When did you first become acquainted with Marian Henderson?

A. In 1914.

Q. And she is now Mrs. Marian Clark or Mrs. Clark?

A. Yes.

Q. And she lives in Sacramento too, does she not?

A. Yes.

[3796] Q. Were you ever acquainted with Lemuel B. Schofield.

A. Schofield? Is it Lemuel B.?

Q. Yes.

A. Yes—I mean—pardon me. I just want some information. That is the Schofield who was superintendent for the contractors in San Pedro?

Q. No, this was the Immigration Commissioner for the Pacific Coast.

A. No.

Q. You never knew him?

A. No.

Q. Did you ever know Mr. Shumaker in the Immigration Department?

A. I believe he—I don't know who had my case up there.

Q. I did not mean in that way. I meant did you have any personal acquaintance with him?

A. No.

Q. That is what I mean.

A. No, I didn't.

Q. Now, you testified, I believe, that you inspected the various projects that were under construction on the Island of Oahu with Colonel Wyman several times. About how many times would you estimate?

A. I made an inspection trip with him the day after I arrived in Honolulu in September—the last part of September.

[3797] Q. What year?

A. 1941.

Q. And was that quite an extensive inspection?

A. Oh, yes.

Q. And then did you make other inspections?

A. Yes; made several inspections.

Q. When did you make the next inspection?

A. The next inspection—of course, you must remember after the seventh there were—

Q. You were making inspections all the time, I guess?

A. Making inspections all the time if and when you were able to.

Q. And you made many of them?

A. Oh, yes.

Q. Which took you all around the place, I presume?

A. (No answer.)

Q. Your base yard was up in the northwest part of the Island, wasn't it?

A. No.

Q. Your base yard No. 2?

A. No.

Q. Wasn't it?

A. No.

Q. I show you this map, marked Exhibit 1. Isn't this where the base yard was located that was used by the Hawaiian Constructors? (Indicating on exhibit.)

[3798] A. You have got it wrong. It is not there.

Q. Will you indicate where it is on the map (Handing exhibit to the witness and the witness placing a mark near the center of the map).

Q. A little to the west of the center of the Island.

A. (Nodding in the affirmative.) You are talking about base yard No. 9.

Q. Where was your base yard No. 2?

A. There is no such.

Q. Did you start out with No. 9? How did you get No. 9? Where was No. 1, for instance?

A. (No answer.)

Q. I am very serious in asking these questions, Mr. Rohl.

A. Base yard No. 1 is at Fort Camp.

Q. And where is that—what part of the Island?

A. Fort Camp adjoins Hickam Field—Fort Camp is between Hickam Field and Pearl Harbor.

Q. That is where your No. 1 base was?

A. Yes.

Q. Where was your No. 2?

A. (No answer.)

Q. Our information is, and I will tell you frankly, that your No. 2 base yard was up at the northwesterly tip of the Island of Oahu.

A. No, we have no base yard there.

[3799] Q. No base yard at all?

A. No. I mean—now, it all depends on what you call "a base yard."

Q. Well, I mean a base yard—a place where you kept your supplies and equipment for work on these various projects.

A. Well, we probably had 40 of them.

Q. You don't recall, independently, where your yard No. 2 was?

A. No, because it was not a base yard—what we call a base yard. We might take a, which we did take over, a Japanese department store, and called it "a base yard."

Q. And you didn't have any such—

A. Not on that end of the Island.

Q. On that part of the Island?

A. No.

Q. But the others—you had 40, you say?

A. (Nodding in the affirmative.)

Q. Scattered all around?

A. Scattered all over. Even if we find a vacant lot we will grab it and make a base yard out of it.

Q. I understand. In the Hawaiian Construction, Mr. Rohl, you have a general superintendent of construction?

A. Yes, we have had several of them.

Q. And did they work under your supervision?

A. Oh, yes.

[3800] Q. And did you personally direct the activities of the construction in the Island?

A. While I was there, yes.

Q. While you were there?

A. Yes.

Q. And in doing so, did you consult with him from time to time as to the technical engineering problems that were involved?

A. Oh, yes.

Q. Did you go over the plans and specifications with them—with your construction superintendents?

A. No.

Q. Never did?

2818 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

A. I don't think I ever did. The plans were plans issued to us by the Corps of Engineers.

Q. I see. Then they went to your construction superintendents, did they?

A. Well, they went through the executive committee and then handed down to whoever was in charge of that phase of the work.

Q. And those who were in charge of the separate phases of the work would, I suppose, be your superintendents of construction or construction engineers in charge of those various projects?

A. Yes.

Q. And they, in turn, worked under your supervision?

[3801] Yes. We had a general superintendent there.

Q. Was that the gentleman whose name I mentioned—Mr. Middleton?

A. No, Middleton is the—he is on the administrative end.

Q. And is his office—was his office at your headquarters?

A. Oh, yes.

Q. And there was a Mr. Stewart in charge of the Hawaiian Constructors office in San Francisco?

A. Stewart?

Q. Yes; was he in charge up there or down here?

A. Stewart? To my knowledge he wasn't any place.

Q. You never heard of him?

A. I never heard of him.

Q. Did you ever use the name of John William Rohl?

A. John William Rohl?

Q. Yes.

A. Yes.

Q. When was that? When did you use that name?

A. I used that when I made my—declared my intention for citizenship in 19—when did I say—1915 or '16.

Q. I have forgotten but you went over that.

A. The County Clerk didn't like the name "Hans." He said I better call myself "John."

Q. Well, did you have your name changed to John by any [3802] proceedings?

A. No.

Q. You just used it for a while?

A. Yes.

Q. How long did you use it?

A. For about an hour.

Q. For an hour?

A. Yes.

Q. For what purpose?

A. Because the Clerk told me I should write down "John."

Q. What clerk was that—what County Clerk was that?

A. That was at Marysville.

Q. Marysville?

A. Yes—wait a minute.

Q. Marysville is in Yuba County.

A. Yuba County?

Q. That was about when did you say?

A. '15 or '16—I am sure it was Yuba County—no—it was either Yuba County or Sacramento County.

Q. It doesn't make any difference.

A. It was in that neighborhood.

Q. And you signed your application, did you, at that place—your application for citizenship?

A. Yes.

Q. Before the County Clerk in either Sacramento or [3803] Yuba County?

A. Yes.

Q. I suggest to you, Mr. Rohl, very sincerely, for your sake, just to keep the record straight, that you might have somebody examine your application over at the Federal Building and correct the statement that you never made any prior application for citizenship.

I just looked at it yesterday.

A. I had it with me and I showed it to them, I believe they have it over there.

Q. Is it on file in the Immigration Department?

A. Yes, it is on file. I showed it to them.

Q. You stated you never made any prior application?

A. But my prior application is on file over there, too. It is in their records. I am sure it is there or they gave it back to me.

Q. I don't know—it isn't in the file over there now. I have examined the file two or three times.

Now, Mr. Rohl—

A. May I interrupt—

Q. Surely.

A. I remember now. They discounted that over there because I never made an application for citizenship. I declared—I signed a declaration of intent at that time over there.

Q. You mean over in Yuba or Sacramento County?

A. No, here.

[3804] Q. When did you sign that—

A. No, I told them over there.

Q. Told them that you did?

A. That I did, and they said, "Well, that doesn't make any difference."

Q. You are presently engaged, are you not, in negotiating contracts with the Government for the installation of military and naval construction?

A. You mean I am negotiating today?

Q. Yes.

A. No; I have been awarded a contract.

Q. When was that contract awarded?

A. February 9.

Q. And that work will be done throughout the entire Pacific area, will it not?

A. Canada and Alaska.

Q. Colonel Wyman is now stationed at Canada?

A. He is stationed in Canada, yes.

Q. And will go on to Alaska?

A. Yes, Alaska comes under him.

Q. Now, you have visited Schofield Barracks many times, have you not?

A. Oh, yes—not the barracks, no, but we are doing work—

Q. I mean there in the vicinity.

A. Yes.

[3805] Q. You are familiar with the general physical setup there?

A. Yes, sir.

Q. And Wheeler Field and Schofield Barracks are close together?

A. Yes.

Q. And you are familiar with them?

A. Yes.

Q. Did you ever go to a place there by the name of Bert Hasby—Bert Hasby's place where they have a bar and the store and all that sort of thing—where they operate the station wagons out of that sell supplies and it is a sort of post exchange?

A. No.

Q. You never did?

A. No.

Q. Did you ever see a man by the name of Bert Hasby?

A. No.

Q. Never knew such a man?

A. Never.

Q. Did you ever visit the post exchange at all at Schofield Barracks or Wheeler Field?

A. No.

Q. Do you know whether or not they ever had one there?

A. Yes; driving by there I could see a post exchange.

Q. A post exchange?

[3806] A. Yes.

Q. Will you describe him, please—will you describe his appearance?

A. I don't know him.

Q. Is it a separate building, or a main building, or is it right at Schofield Barracks?

A. I don't know.

Q. But you know there is a post exchange there?

A. There is a post exchange in every post.

Q. Well, I am only interested in this one. When did you last see it?

A. (No answer.)
 Q. How long ago?
 A. You mean when did I last drive by there?
 Q. Yes.
 A. I don't even know that.
 Q. Well, certainly it was either in 1940 or '41 or '42, wasn't it? You were there in 1942, weren't you?
 A. I was there in 1942.
 Q. Were you out to Schofield Barracks in 1942?
 A. Oh, yes.
 Q. When were you last there in 1942?
 A. At Schofield?
 Q. Yes.
 A. You mean when did I last drive through Schofield?
 Q. Yes.
 [3807] A. I would say August or September.
 Q. Last August or September?
 A. Yes.
 Q. Did you hear anything about Bert Hasby being shot on the night of December 7, 1941?
 A. No.
 Q. Never heard anything about that at all?
 A. No.
 Mr. COMBS. I believe that is all, Mr. Chairman.
 Chairman TENNEY. Any further questions of Mr. Rohl by the committee?
 Assemblyman KELLEMS. No questions.
 Chairman TENNEY. Do you have any questions, Senator Burns?
 Senator BURNS. No.

By Mr. COMBS:

Q. One more question.
 Mr. Rohl, why didn't you apply for citizenship between 1931 and 1941?
 A. Negligence—busy traveling—never gave it a thought.
 Q. When you first obtained the contracts for the construction of military installations, did you tell Major Wyman that you were an alien?
 A. I did on the Hawaiian Constructors.
 Q. But you didn't on any other projects?
 A. We don't have it—there are no restrictions—I mean on a Government contract you are not questioned as to [3808] whether you are a citizen or not, but on this particular contract, Contract 602, being a secret contract, of course, I told him—I had to tell him.
 Q. Are you familiar with the provisions of the law regarding such contracts?
 A. Secret contracts?
 Q. Well, secret, confidential, or restricted contracts.
 A. Yes.
 Q. I will read the law to you and see whether or not this is your understanding of it.
 "No aliens employed by a contractor in the performance of secret, confidential, or restricted Government contracts shall be permitted to have access to the plans or specifications, or the work under such contracts, or to participate in the contract trials, unless the written consent of the head of the Government Department concerned has first been obtained.
 "Any alien who obtains employment on secret, confidential, or restricted Government contracts by willful misrepresentation of his alien status, or who makes such willful misrepresentation while seeking such employment, shall be penalized by a fine of \$10,000 or five years in the Federal Penitentiary.
 "For the purpose of this section the term [3809] 'person' shall be construed to include an individual, partnership, association, corporation or other business enterprise."
 Is that your understanding of the law?
 A. Absolutely.
 Now, as a matter of fact, before we took this contract the War Department was told, and I didn't see the contract or the plans or specifications purposely until after I was a citizen.
 Q. Did you ever make any inspection of the work before you became a citizen?
 A. No.

Q. Never did?

A. Never.

Q. But you repeatedly made inspections of it afterward?

A. Naturally.

Q. Who did the actual bidding on the contract?

A. You have it in your record. The negotiations were conducted by Paul Grafe and T. E. Connolly.

Q. Are you familiar with the correspondence between Paul Grafe and Major Wyman?

A. You mean pertaining to Contract 602?

Q. Yes.

A. Well, it is in the files—I might.

Q. Are you familiar with it?

[3810] A. I am familiar with the file.

Q. Are you familiar with the correspondence in the file between Paul Grafe and Major Wyman?

A. I am supposed to be.

Q. Well, are you?

A. I don't know.

Q. Your employees, the employees who worked under your direction were working on these very projects, were they not?

A. Yes.

Q. And they were working under your direct supervision, were they not?

A. After October 1, 1941.

Q. And you had nothing to do with them prior to that time at all?

A. Never.

Q. Never had anything to do with the employees at all?

A. No, never, nothing.

Q. You are quite positive that you never made any inspections of any of that work prior to September 15, 1941?

A. I am certain of it because I was not over there.

Q. Did you do any work at Oxnard Beach for the Army?

A. Oxnard?

Q. Yes.

A. Beach?

Q. Yes.

[3811] Do you mean Hueneme? Rohl-Connolly built the jetties for the Oxnard—the Oxnard Harbor District.

Q. And under whose direction was that done?

A. That was under the direction of the—(witness snapping fingers.) A firm of consulting engineers—Hill, Barnard.

Q. Did Major Wyman have anything to do with that work at all?

A. No. That wasn't Army work at all.

Q. Did you build the Newport Beach breakwater?

A. Oh, yes.

Q. Was that an Army project?

A. Yes.

Q. Under whose direction was that done? Major Wyman?

A. Yes.

Q. When was it constructed?

A. (No answer.)

Q. About when?

A. '36 or '37—in that neighborhood, I would say.

Q. In 1936 or '37, is that right?

A. I think that is correct.

Mr. COMBS. That is all, Mr. Rohl.

Chairman TENNEY. Thank you very much, Mr. Rohl. We are sorry to have inconvenienced you. We hope you catch your plane.

Before we adjourn for lunch Senator Burns has a motion.

[3812] Senator BURNS. I move, Mr. Chairman, that the chairman of the committee be appointed a sub-committee of one to continue with this investigation this afternoon and Monday, even though the other members of the committee may not be able to attend.

Assemblyman DILWORTH. I second the motion.

Chairman TENNEY. All those in favor signify by saying Aye; contrary, No. It is unanimously carried that the chairman be appointed a sub-committee of one

2822 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

to carry on this investigation and hearing in the absence of the other members in the event they are not able to be present.

We will recess at this time until 1:30.

(Whereupon, at 12:30 o'clock p. m., a recess was taken until 1:30 o'clock p. m.)

[3813]

LOS ANGELES, CALIFORNIA.

February 27, 1943, 1:30 o'clock P. M.

Chairman TENNEY. The committee will come to order. Is Mrs. Floy Rohl here?

Mr. ROHL. Yes.

Chairman TENNEY. Will you please come forward, Mrs. Rohl. Will you be sworn, please? Do you solemnly swear that the testimony you are about to give before this committee will be the truth, the whole truth and nothing but the truth, so help you God?

Mrs. ROHL. I do.

FLOY EDITH ROHL, called as a witness on behalf of the Committee, being first duly sworn, testified as follows:

Chairman TENNEY. Will you state your full name, please?

The WITNESS. Floy Edith Rohl.

Chairman TENNEY. Where do you reside, Mrs. Rohl?

The WITNESS. 8159 Hollywood Boulevard.

By Mr. COMBS:

Q. Mrs. Rohl, you are the wife of H. W. Rohl?

A. Yes, sir; I am.

Q. Who testified this morning?

A. Yes, sir.

Q. When were you and Mr. Rohl married?

A. In 1925, August, 1925.

Q. In San Francisco?

[3814] A. Yes, in San Francisco.

Q. Had you been married previously?

A. Yes, I had.

Q. To a man by the name of Hubert?

A. Yes, sir.

Q. What was his first name?

A. William

Q. How did you happen to meet Mr. Rohl?

A. Well, I met him in Sacramento through my sister and her husband. They knew him.

Q. And that was when?

A. About 1922. That was 1922.

Q. What was his business or occupation at that time?

A. He was a contractor.

Q. Was he engaged in any construction work in Sacramento?

A. Yes, he was. He was doing what they called reclamation work out of Sacramento—around Marysville and Colusa and that part of the State.

Q. And do you recall when he left for Germany in 1924 on the Steamship DEUTSCHLAND?

A. Yes, I do.

Q. How long was he gone on that occasion?

A. Well, I think he left New York around Thanksgiving and was back here the first of January.

Q. 1925?

A. Yes.

[3815] Q. Shortly after your marriage in San Francisco you and Mr. Rohl established a residence in Los Angeles, did you not?

A. Yes, I think about that year. We came down here in 1927, yes, in the spring of 1927.

Q. And have you resided here ever since?

A. Yes.

Q. Your sister's name is Edna McMorey?

A. Yes, sir.

Q. Where does she reside?

A. On Catalina Street, 9th and Catalina Street, Los Angeles.

Q. At the time that you and Mr. Rohl were married did you know that he was an alien?

A. I did, yes.

Q. And did he ever tell you that he had applied for citizenship in the United States?

A. Yes.

Q. When did he make application?

A. I really don't know. It was before we were married.

Q. But he told you that he had made application for citizenship?

A. Yes, sir.

Q. Did he tell you why it was it was never consummated?

A. No, he did not.

Q. Did he tell you or did you know that he had resided [3816] at one time in Chile?

A. Yes.

Q. And did he tell you what his business was there?

A. Yes.

Q. What was it?

A. Well, he was in the mining business—building mines.

Q. Yes.

A. Copper mines, and as near as I understand it he did some road work—a survey of a road through—down the Amazon.

Q. Did he do that for the government, or did he do it for some private concern?

A. It was for some concern. I don't—for the Anaconda Copper Company—isn't it the Anaconda Copper Company? That is the way I understand it.

Q. Do you recall his work in Mexico in 1932?

A. Yes, I do.

Q. Do you remember he was building a road from Monterey, Mexico to Mexico City?

A. Yes.

Q. Did he ever mention to you any difficulty he had with the immigration inspectors in going in and out of the United States and to and from Mexico?

A. No, he didn't. I didn't know he had any difficulties.

Q. Did he tell you about any difficulties he had with [3817] the Mexican government while working on that project?

A. No.

Q. Do you know whether or not that project was ever completed?

A. No.

Q. By him?

A. No, it was not.

Q. It was not completed?

A. No.

Q. And why wasn't it completed, if you know?

A. Well, I really don't know why.

Q. Did you, yourself, Mrs. Rohl, invest any of your own assets or capital in the Rohl-Connolly Company?

A. Well, no, I didn't invest any, but I have a share of the company that Mr. Rohl—it is community property, yes.

Q. You mean you have an undivided half interest?

A. Yes, sir.

Q. Of whatever part he has?

A. Yes, sir.

Q. But none of the actual stock is in your name?

A. Oh, yes, there is stock in my name.

Q. How many shares?

A. Well, half of Mr. Rohl's—25 per cent I would say. Mr. Rohl owns 50 per cent—I mean Mr. Connolly owns 50 per cent and there is 50 per cent that Mr. Rohl and I own.

Q. I see. What you mean, in other words, Mr. Connolly [3818] owns 50 per cent of the stock?

A. Yes.

Q. And Mr. Rohl owns 50 per cent and under the community property law you would own an undivided half of what Mr. Rohl owns?

A. No, Mr. Rohl doesn't own 50 per cent. Mr. Rohl owns 25 per cent and I own 25 per cent.

Q. I see. 25 per cent actually stands in your name?

A. Yes, sir.

Q. Did you pay anything for that 25 per cent of the stock?

A. No, I didn't pay anything for it, not for mine.

Q. Was that 25 per cent transferred to you by Mr. Rohl?

A. Yes.

Q. When was that transfer made, about?

A. Well, I think it was at the beginning of the Rohl-Connolly Company—when they organized.

Q. The Rohl-Connolly Company was originally incorporated in Carson City, Nevada, in 1932, and the permit to issue 40,000 shares of stock was granted in May of 1932, in California. It would be somewhere around there, wouldn't it?

A. Yes, it would.

Q. And you have continued in the ownership of that 25 per cent?

A. Yes.

[3819] Q. Ever since that?

A. That is right.

Q. Now, do you recall when Mr. Rohl purchased his first boat, the Pandora?

A. The Pandora

Q. Yes.

A. Yes; I think it was in 1927. I think it was in the fall of 1927—around October of 1927.

Q. And that boat was destroyed by fire, was it not?

A. Yes, sir.

Q. Then did he buy another boat after that?

A. Well, we got the Ramona after that in 1933.

Q. And after the Ramona did he buy a subsequent boat?

A. We got the Vega, yes.

Q. That was in 1937, was it not?

A. '37, yes.

Q. Did you pay for any of those boats yourself?

A. Yes, I did.

Q. Which ones?

A. Both of them.

Q. Which ones?

A. The Ramona and the Vega.

Q. Well, the Pandora was insured, was it not?

A. Yes, that is right.

Q. And the insurance was payable to your husband?

A. No, it was payable to me.

[3820] Q. So, the insurance company delivered you a check, did they?

A. Yes.

Q. For the amount?

A. Yes, they did.

Q. And did you use that money for the purpose of purchasing the Ramona?

A. I used that, yes, and other moneys, of course.

Q. And those moneys were your own funds, were they?

A. Well, it was the community funds from Mr. Rohl. I have no funds of my own.

Q. And you maintained a community account, did you, a joint account?

A. Not in the bank that we both checked on, but I would get my money from his bank, of course, through his secretary.

Q. And you obtained the funds from his secretary?

A. Yes.

Q. And used them to purchase the Ramona?

A. That is right.

Q. And did you follow the same procedure in purchasing the Vega?

A. Yes. When I sold the Ramona I used the money to buy the Vega, that is right.

Q. Do you recall sailing on the Vega from Jacksonville, Florida, to Honolulu shortly after the Vega was purchased in [3821] the latter part of 1937?

A. Yes.

Q. How many men comprised the crew on that occasion?

A. I think 16. I am not sure, but I think it was 16.

Q. And about how many men normally comprised the crew on the Ramona?

A. About eight here on the California coast.

Q. Who employed the crew on the Pandora?

A. The Pandora?

Q. Yes.

A. Well, we only had two men on the Pandora, and we always had sort of a captain, a head man, but he always hired the crew.

Q. The captain did?

A. Yes, sir.

Q. And who employed the captain?

A. I did.

Q. You originally employed him?

A. Yes.

Q. Did you also employ the Captain on the Ramona?

A. Yes.

Q. And on the Vega?

A. I signed them on as captains.

Q. Did you pay the crew?

A. No, I didn't personally.

Q. Who did?

[3822] A. Miss Dickey from the office—Mr. Rohl's office.

Q. And did she also pay the captains?

A. Yes.

Q. And paid for the upkeep and maintenance of the ship and insurance premiums and all that?

A. Yes.

Q. The Vega was registered in your name, was it?

A. Yes, sir.

Q. Did you make the application for use of a wireless telephone on the Vega?

A. On the Vega?

Q. Yes.

A. I don't remember making it for the Vega. We had one for the Ramona.

Q. Did you have a wireless telephone on the Vega?

A. No, we didn't. We had a radio set—a Mackay radio set but not a telephone.

Q. Was that the one operated under the call letters KLVC, wasn't it?

A. I have forgotten the letters, but we had no telephone on the Vega at all.

Q. You applied for one on the Ramona?

A. Yes.

Q. And who applied for the permit from the Federal Communications Commission to operate the wireless station on the Vega?

[3823] A. Of the Mackay set, you mean?

Q. Yes.

A. Well, we put the man—the man in New York did. If there was any signing of papers, I did.

Q. You signed all the papers?

A. I signed all papers.

Q. When you went to the Hawaiian Islands in 1938, or the latter part of 1937, you arrived there about January 21, 1938, did you not?

A. That is right.

Q. And you sailed through the Panama Canal?

A. Yes, sir.

Q. Do you recall the occasion when the immigration inspectors came on board the ship at Balboa in the Canal Zone?

A. Yes.

Q. Did they question you about your citizenship status?

A. As I remember, yes.

Q. And who were the other guests aboard the boat at that time? Was Mr. Rohl aboard?

A. Mr. Rohl was aboard and some friends of ours, Dr. and Mrs. Carl Lewis.

Q. Where do they reside?

A. In Beverly Hills.

Q. No one else was aboard as guests?

A. No.

Q. And were you all questioned by the immigration in- [3824] spectors at that time?

A. As I remember it, yes. I guess—we were late at night, very late at night. I don't entirely recall them coming aboard but it was quite late at night. I have kind of forgotten about it.

Q. Did the boat stop at Balboa for any length of time? How long did it stop there?

A. We stopped at the—it wasn't—I always forget. Is it Balboa the first one you come to on the East coast? We didn't stop there at all, we went right on through the Canal.

Q. Well, where did the immigration men interrogate you?

A. Well, we stopped outside before you go through the locks.

Q. And that was where?

A. We anchored outside. We didn't go in. They came out in a boat.

Q. You did not go ashore?

A. No.

Q. You anchored the boat and the immigration men came from shore?

A. Yes. Then we went through the locks on Christmas day and we stayed on the other side until, I think it was, the last day of December.

Q. You were born in Iola, Kansas, were you not, Mrs. Rohl?

[3825] A. Yes, I was.

Q. And your husband was born in Lubeck, Germany?

A. Yes, sir.

Q. Were you present when Mr. Rohl was interrogated, before you went through the Panama Canal, by the immigration inspectors?

A. No, I wasn't—not right in the room, no.

Q. Were you present when Dr. and Mrs. Lewis were interrogated?

A. No.

Q. Where were you when you were interrogated?

A. Well, I imagine we were in the main salon. It was night and we should have been down below.

Q. And you recall that you were asked about your citizenship?

A. Yes, sir.

Q. And all that sort of business?

A. Yes, sir.

Q. You went through that routine?

A. Yes, sir.

Q. And you naturally assumed, I take it, that similar questions were asked of the other persons aboard the boat?

A. Yes, I suppose so.

Q. Did you proceed from that point on to Honolulu?

A. Yes.

Q. Did you anchor off of Honolulu and go through a [3826] similar procedure with immigration there?

A. Yes.

Q. And do you recall that the same questions, in substance, were asked?

A. (Nodding head in the affirmative.)

Q. On that occasion were you present when your husband was interrogated?

A. No; I was on deck and we took turns going down below.

Q. You all took turns in going down below?

A. Yes; we had people waiting outside on a boat.

Q. Oh, you went down one at a time for interrogation.

A. Yes.

Q. And then you all went ashore, did you?

A. Yes.

Q. Do you recall the incident when the trouble occurred among the crew and they were going to throw somebody overboard and they had a fight or something?

A. That was at the dock in the harbor.

Q. That fellow was discharged, was he not, the man who made the trouble?

A. Yes, sir; the Captain discharged him.

Q. Do you know Colonel Wyman?

A. Yes, sir.

Q. Theodore Wyman, Jr.?

A. Yes, sir.

[3827] Q. Was he in Honolulu on that occasion in 1938?

A. No; he was not.

Q. By the way, how long have you known Colonel Wyman?

A. I think I met him in 1933; I think shortly after we got the Ramona, as I remember it.

Q. When you got the Ramona, taking up that subject again for a moment, you sailed that boat from New York back to the West Coast, didn't you?

A. Yes.

Q. Do you remember stopping at Acapulco, Mexico?

A. I got off the boat at Panama and came up on the Steamer *Virginia*. I did not come up this side.

Q. So you were not on the boat at Acapulco?

A. No.

Q. Did you ever go aboard the *Ramona* to any other port outside of the United States?

A. No, never.

Q. How about on the *Vega*?

A. No, only to Honolulu, and I would call that the United States.

Q. Back and forth?

A. We only went there the one time.

Q. You just went over there the one time?

A. Yes; and we came back here.

Q. When you returned from the Hawaiian Islands on that occasion—you stayed there about two weeks, did you not, [3828] in 1888?

A. About two weeks, I judge.

Q. And when you returned did you have any other persons or person on board the boat except those who originally made the trip with you?

A. Yes; we brought a friend of ours back, Mrs. James Winne.

Q. And between the time you left the port at Honolulu and docked at San Pedro was anyone else on the boat?

A. No; not until we got into San Pedro.

Q. You are quite sure of that?

A. I am quite sure.

Q. So, from the time you left Honolulu until you docked in the harbor at San Pedro there were only those persons on the boat?

A. That is all, until we got into the dock at the Yacht Club.

Q. Until you docked at the Yacht Club?

A. Yes.

Q. And until after you had cleared immigration here?

A. Yes.

Q. You are quite sure of that?

A. I am quite sure. We dropped anchor out in the breakwater but the inspector came aboard. We call him the "The bug man." He came aboard to see about fruit and stuff, but that is all that came aboard.

[3829] Q. Do you know Mr. E. J. Crouse?

A. Yes.

Q. How long have you known him?

A. Let me see, probably met him in 1937. I really can't remember.

Q. Didn't he come aboard the *Vega* before it docked at San Pedro?

A. No, not to my knowledge he did not.

Q. Didn't you have a conversation with him?

A. Yes. He was on a boat—on his boat, I guess it was his boat.

Q. On the *Marlin*?

A. I don't know the name. It was a power boat and they came out to the breakwater. They had been watching for us all night, expecting us in, and he circled around and around our boat several times with his boat, and after we dropped the anchor he circled around a few times and then he went on back to their slip. I guess.

Q. But he didn't come aboard?

A. No.

Q. Did you have any conversation with him?

A. Yes. We talked back and forth—talked to him.

Q. Did you tell him he should not come aboard because you had not cleared immigration yet?

A. He mentioned that he wanted to come aboard and I called back and said, "No, you can't come aboard."

[3880] Q. Did you give any reason?

A. Yes, because I knew we had to go through immigration and I didn't think he should be aboard.

Q. When did you go through immigration? Was it that night?

A. No, early in the morning.

Q. And did the immigration inspectors board the boat while it was anchored there?

A. Yes, sir.

Q. And were you asked in substance, the same question that had been asked by the immigration inspectors on the two preceding occasions?

A. I imagine so—I don't remember.

Q. You were questioned?

A. Yes. We were questioned.

Q. Were you asked about your citizenship?

A. Yes, I guess so. I don't remember it very well.

Q. Were you present when any of the other passengers were questioned?

A. No.

Q. You are familiar with Lloyd's registry, are you not?

A. Well, I know you register, yes, the boat through Lloyd's.

Q. And you know that the register carries the names of the owners of the various boats—various yachts?

A. Yes.

[3881] Q. Do you know from what sources they get their information?

A. Well, no, I wouldn't know.

Q. Do you know that from time to time the representatives of Lloyd's registry make inspections on various yachts?

A. Yes, I know they make inspections.

Q. Do you know whether or not they ever made inspections of the Vega?

A. Well, I am not sure that I know. I don't remember.

Q. I show you, Mrs. Rohl, a 1941 Lloyd's Register of Shipping—Lloyd's Register of American Yachts, a list of the sailing and power yachts, yacht clubs and yacht owners of the United States and the Dominion of Canada, and call your attention to the entry on page 474.

This annual number which appears in column 1 in the left hand side of the page I would like to call your attention to, which is 6678. Following that is the word "Vega." "Steel." and in column 8, the owner is listed as H. W. Rohl. Do you see that?

A. Yes.

Q. And the home port is Los Angeles, and in character 10, under classification, "Character," Port of Survey—for special survey, it shows that the boat was inspected in July, 1933 and in November, 1937.

A. I see that—well, I wouldn't know.

Q. Well, did you know that all of the Lloyd Registers [3832] from 1937 down to and including 1941 have shown H. W. Rohl as the owner of the Vega?

A. Yes, they have always done that, because he belongs. The reason I figured that is because he belongs to the Yacht Club. It is always "H. W. Rohl," and everyone naturally says "Bill Rohl." It is usually called "Bill Rohl's Vega." They never say mine, and I don't go around saying, "It is not Bill's; it is mine." I don't do those things.

Q. And it is your belief that the Lloyd Registry people have just assumed—

A. Just assumed that, yes.

Q. That that must be the case?

A. They had to assume that because—

Q. And wrote that in their book?

A. Because it wasn't H. W. Rohl's—it wasn't in his name.

Q. Do you know whether or not the owner of the boat has to sign any application for periodic inspection by Lloyd's?

A. No, I don't.

Q. I was asking you some questions about Colonel Wyman when we got off on another subject. I would like to go back for a moment.

Colonel Wyman came here to work on the Los Angeles Flood Control project in 1935. Did your acquaintance with him go back that far?

A '35?

[3833] Q. Yes.

A. I thought it was before '35. I thought it was about 1933, but maybe it was 1935.

Q. Well, he came here—he was here before 1935, Mrs. Rohl, but he did come here from Kansas City in 1935 to work.

A. I did not meet him until he came here to work on the flood control, so it was '35, then, I met him, because I did not meet him before. I know that.

Q. Was your acquaintance a business acquaintance or social acquaintance?

A. Social.

Q. And did your husband also know him socially?

A. Yes.

Q. He spent a great deal of time aboard the Vega, did he not?

A. No, I would not say that. I don't think he was ever aboard the Vega but once as a guest, as an overnight guest, and I think he came aboard another time. He was a guest on another boat, and I can't think of the name of the boat or the people, but anyway his host came aboard our boat—spent an hour or so one afternoon, but I don't think he was ever aboard the Vega but once as an overnight guest.

Q. Was he ever aboard the Vega on another occasion or any other occasions, when he did not stay overnight?

A. Well, only that one time that I know of.

[3834] Q. So to your knowledge he has only been aboard the Vega on two occasions?

A. To my knowledge, that I remember.

Q. Is it possible that he might have been aboard the Vega on other occasions without your knowledge?

A. It could have been possible.

Q. Did he ever visit at your home?

A. Yes.

Q. How many times would you say?

A. Well, I could not say. He has been to the house several times—many times in the years that I have known him.

Q. Did you ever observe him in an intoxicated condition?

A. Well, I don't know what you would call "intoxicated." I have seen him have some drinks.

Q. I mean obviously under the influence of liquor.

A. No, I would not say that, no.

Q. Do you recall one occasion in your home when you were giving a Christmas party that he almost had a fight with somebody—a quarrel there?

A. No.

Q. You don't?

A. No.

Q. Do you recall an occasion aboard the Vega when a party was being given when he did have a fight with an individual aboard the Vega?

[3835] A. No, I have never known him to have a fight on the Vega or in our home.

Q. So your testimony is that you, as far as you know, he never indulged to excess?

A. Not that I know of.

Q. As far as his drinking was concerned?

A. No, he was always a gentleman. I have seen him drink, but he was always a gentleman.

Q. Did you ever tell any one of your friends that you did not like Major Wyman because he drank too much and was obnoxious?

A. No, I never have.

Q. You are quite sure of that?

A. Yes, I don't know why I should.

Q. Is it your testimony that you never did?

A. I never did.

Q. Did you know Mrs. Wyman?

A. You mean—which one?

Q. Either one?

A. Well, I knew the first Mrs. Wyman much better than I know the present Mrs. Wyman. Yes, I knew them both.

Q. Did you know his daughter?

A. Yes.

Q. Jane, wasn't that her name?

A. Jane. I have met her several times—not many because she was going to school back East when I first met [3836] her.

Q. Do you recall when Major Wyman and his wife began to have domestic difficulties?

A. No, I don't. I didn't know they were having any. They had a divorce before I knew they were having domestic difficulties.

Q. Did you know the second Mrs. Wyman prior to her marriage to Major Wyman?

A. No.

Q. How long afterwards did you first become acquainted with her?

2830 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

A. I met the second Mrs. Wyman when we had them on the Vega for a weekend. That was in the summer sometime. I really don't recall.

Q. The summer of what year?

A. I don't know what year now. It was before, of course, we went to Honolulu. They left for Honolulu shortly after that trip. I really don't know what year it was.

Q. When Major Wyman and Mrs. Wyman spent a weekend on the boat, now, do you know whether or not Major Wyman was ever aboard the Ramona?

A. Oh, yes, he was aboard the Ramona.

Q. How many times was he aboard the Ramona?

A. Well, I really can't recall—possibly three times anyway. I have had them as guests—I had him as a guest [3387] one time. We had Colonel Wyman and a number of officers and their wives and families aboard, and then I think he was aboard also on—I don't know—say three or four times aboard the Ramona.

Q. Did he ever spend several days aboard the Ramona?

A. No, only weekends, was all.

Q. Did he ever take any trips aboard the Ramona with you and your husband?

A. No, no trips.

Q. Just went aboard—

A. Over to Catalina from the mainland—from the mainland to Catalina.

Q. Accompanied you over there, did he?

A. Yes, sir.

Q. About how many times would he make trips over there?

A. Well, he didn't make more than three trips.

Q. And were they simply overnight trips?

A. Possibly two nights. Possibly might have been Saturday and Sunday or Friday and Saturday and back Sunday. I really don't recall. Or come back Monday. May go out Saturday and come back Monday. I really don't recall.

Q. Did you know that the second Mrs. Wyman was the sister of his former office secretary?

A. I heard that but I didn't know because I didn't know her.

[3838] Q. You knew her maiden name was Perry, didn't you?

A. No, I did not.

Q. Are you familiar with the H. W. Rohl Company?

A. Yes.

Q. What sort of a concern is that?

A. It is a contracting company.

Q. A corporation?

A. No.

Q. A partnership?

A. No, just H. W. Rohl.

Q. H. W. Rohl, doing business as H. W. Rohl Company?

A. Yes.

Q. And that is purely a construction company?

A. Yes.

Q. Do you have any interest in that concern?

A. No.

Q. Other than—I know you have a community interest, of course, but no other interest?

A. No.

Q. Are you familiar with an organization known as Hawaiian Constructors?

A. Yes, I am.

Q. Do you have any interest in the Hawaiian Constructors, other than the interest you would have by reason of your ownership of the Rohl-Connolly stock?

A. No.

[3839] Q. Rohl-Connolly is a member of the Hawaiian Constructors, isn't that correct?

A. That is right.

Q. And do you know how much of an interest Rohl-Connolly Company owns in the Hawaiian Constructors?

A. No, I don't.

Q. Where is the Vega now?

A. United States Navy.

Q. The Navy has it?

A. Requisitioned and bought it.

Q. For what price?

- A. \$35,000.00.
- Q. Was that paid to you?
- A. To me.
- Q. And prior to the requisitioning of the Vega by the Navy had the Army made any use of it?
- A. Yes, the Army engineers had it for a short while.
- Q. With whom was that contract consummated, if you know?
- A. The Hawaiian Constructors.
- Q. Did you sign the contract?
- A. Yes.
- Q. You are quite sure of that?
- A. Well, I am not quite sure, no, but I imagine I did. I don't know—to be sure, I don't know.
- Q. If you didn't sign it who would have signed it?
- [3840] A. Well, I don't know.
- Q. You were the owner of the boat?
- A. I know it—I wasn't here at the time, however. I was in Honolulu when they made—
- Q. When the contract was made?
- A. Yes.
- Q. Who represented you in the making of that contract?
- A. Well, I suppose Mr. Rohl did.
- Q. With whom did he negotiate?
- A. I don't know—Colonel Wyman, I suppose.
- Q. Was Colonel Wyman the head of the Army Engineers at that time?
- A. In Honolulu, yes.
- Q. And there was a contract between the Hawaiian Engineers and the Hawaiian Constructors, was there not?
- A. There was a contract, yes.
- Q. The basic contract?
- A. Yes.
- Q. And the Hawaiian Constructors, of course, was subject to the supervision and control of their operations by the Army Engineers?
- A. Yes.
- Q. And the head of the Army Engineers was Colonel Wyman?
- A. That is right.
- Q. So the negotiations for the contract were made for [3841] you by your husband and you don't remember whether you signed the contract or not?
- A. No, I don't remember.
- Q. How much compensation did you receive for the use of the Vega by the Army Engineers?
- A. Got one dollar, and I have it framed at home.
- Q. How was the boat used? Do you know for what purpose?
- A. No, I don't.
- Q. Patrol boat or something of that kind?
- A. I really don't know, because—
- Q. You don't object to having your picture taken, do you?
- A. I don't know; I take a horrible picture.
- Q. I should think you would take a very nice picture, Mrs. Rohl.
- Now, when you went to the Islands in the Vega in 1937 you stayed there about two weeks and, as you testified, came back to the United States?
- A. Yes, sir.
- Q. Did you subsequently return to the Hawaiian Islands?
- A. I went back, yes.
- Q. When did you make your next trip?
- A. I don't think I went over again until a year ago last September.
- Q. A year ago last September?
- [3842] A. Yes.
- Q. Weren't you over there in 1940?
- A. I was trying to think. I don't know—I can't remember—let me see, 1940?
- Q. Yes. You came back here in 1938 on the Vega. Now, I want to know when you next went to the Hawaiian Islands after 1938.
- A. I don't remember, but I went over in 1940. I can't remember that. It seems to me like I didn't. I don't think I had been over since we were on the Vega. Maybe I did and I don't recall it.

2832 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. You don't believe you have been back at all since 1937?

A. I can't remember going back.

Q. You don't believe you have been back at all since 1937?

A. I can't remember going back. I possibly have been, but I can't remember.

Q. When did Mr. Rohl next go back?

A. When did he go back?

Q. Yes.

A. Well, he didn't go back until a year ago last September. I know that.

Q. He did not go back until a year ago last September?

A. No.

Q. You are sure of that?

[3843] A. I am quite sure of that—positive, because I went to Honolulu several times alone or with other people or friends, but Mr. Rohl didn't go with me.

Q. You mean you went back several times with friends after 1937?

A. No, no, I mean I have made several trips to Honolulu.

Q. Before or after 1937?

A. No, before, but I can't think about 1940.

Q. Would it have been possible for Mr. Rohl to have returned to the Islands without your knowledge?

A. No, he couldn't possibly have gone without my knowledge.

Q. Now, when the original contracts between Hawaiian Constructors and the Army Engineering Corps were negotiated, did Mr. Rohl play any part in their negotiations?

A. Well, I really don't know.

Q. You don't know?

A. No.

Q. You do know that he was acquainted with Colonel Wyman well?

A. Yes, sir.

Q. And that Colonel Wyman was the head of the Army Engineers?

A. Yes.

Q. And that Mr. Rohl owned 40 per cent of the stock [3844] of the Rohl-Connolly Company?

A. (Nodding head in affirmative.)

Q. The Rohl-Connolly Company was a part of the Hawaiian Constructors and they made the contract with the Hawaiian Constructors. Who would you think would represent the Rohl-Connolly Company in the negotiations of that basic contract?

A. Well, I would imagine Mr. Rohl would be the one.

Q. He was president of the Rohl-Connolly Company, wasn't he?

A. He was for awhile. I don't know that he was president at that time.

Q. He is president now, isn't he?

A. Yes.

Q. How long has he been president, to your knowledge?

A. Well, he hasn't been president only this past year.

Q. This past year?

A. Yes, sir.

Q. Do you recall whether or not an application was made in connection with your Mackay Radio station on the Vega to use code?

A. No.

Q. You don't?

A. No, I don't, but I imagine they used code. I don't know—I don't know. I wouldn't know if it is code.

[3845] Q. You would not know whether such an application was made or not?

A. No, I don't know how they send messages. I think it was in code though.

Q. I want to ask you a question which I covered in a general way, but I want to ask it categorically of you, Mrs. Rohl: Did you, or did you not ever say to any person or persons that you tolerated the company of Major Wyman for business reasons only?

A. Well, I may have made that statement but—yes, I could have said it.

Q. To whom did you make the statement?

A. I don't know who I said it to.

Q. Do you recall making it?

A. I don't recall making it, no, not exactly, but I have made the statement but I don't know to whom.

Q. You have made the statement but you don't know to whom?

A. Yes.

Q. Why did you make the statement?

A. Well, I don't know. I just really didn't like Colonel Wyman personally so well. I liked his first wife.

Q. Why didn't you?

A. Oh, I don't know. He just was kind of—he was kind of bossy—he was a kind of bossy type of person.

Q. Arrogant?

[3846] A. Arrogant, although I never saw him fight. He was always kind of—

Q. Quarrelsome?

A. No, he knew it all—kind of knew it all.

Q. I know a lot of people that fit into that same category myself.

A. And I liked his first wife very much and I used, of course, to see them a lot and used to see her because I liked her, but I didn't particularly care about him.

Q. Did your contacts with Major Wyman, and later Colonel Wyman and his two wives originate through the contracts that were theretofore made by your husband?

A. Yes, that's how I met him.

Q. Did you know that your husband had negotiated some Army contracts through Major Wyman—through his acquaintanceship and relations with Major Wyman prior to 1941?

A. Yes.

Q. What kind of contracts were they?

A. He had some breakwater—harbor contracts at the Harbor here.

Q. Which harbor?

A. Long Beach Harbor.

Q. Long Beach Harbor?

A. Yes.

Q. How about the San Pedro breakwater?

[3847] A. That is the one I mean.

Q. That is the one you are speaking of?

A. I always call it "Long Beach." I guess it is San Pedro.

Q. Do you recall any other Army projects that Mr. Rohl worked on through his relationship with Mr. Wyman?

A. No.

Q. Just that one?

A. Just that one, yes.

Q. And that was about when—what year?

A. 1933—no, well he started work in 1933 with other engineers here before Wyman came, but he didn't negotiate the job, no, it wasn't negotiated through Colonel Wyman. He was going on with the work—the work was going on before Colonel Wyman came out here.

Q. Have you ever been at home when Colonel Wyman called your husband on the telephone from the Hawaiian Islands?

A. Yes.

Q. On one occasion or more than one occasion?

A. Well, I know one. I don't remember—I really don't remember any more.

Q. How long ago was that conversation?

A. That was a long time ago—long before we went over there in September a year ago.

Q. Long before September, 1942?

[3848] A. Yes, 1942.

Q. You say, "long before we went over there."

Q. Not 1942, but 1941.

Q. That is what I thought. You said, "a year ago."

Q. This is 1943, it was in 1941.

Q. Long before you went over there in September of 1941?

A. Some time before, yes.

Q. Can you give us an estimate of how long, in months, and of course I don't expect you to be exactly accurate in these matters?

A. Well, I think it was in the spring—possibly June.

Q. Early summer or spring of 1941?

A. Yes, because—

Q. Pardon me. I think I am misleading you there. I don't intend to. My question was, how long prior to the 15th of September, 1941 was it that the telephone conversation occurred?

2834 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- A. Well, that is what I am trying to think.
- Q. Do I understand your answer to be the late spring or early summer of that year?
- A. Summer, I think, of that year.
- Q. That is close enough.
- A. I don't remember—I don't remember that.
- Q. That is the only occasion you recall of any tele- [3849] phonic communication between Colonel Wyman and your husband?
- A. Yes; that is the only one I recall.
- Q. That is, from the Islands?
- A. Yes. There could be others; I wouldn't always know.
- Q. I understand.
- Did your husband discuss with you at any time the nature of the work that Hawaiian Constructors were doing for the Army?
- A. In Honolulu? No.
- Q. Never did?
- A. No.
- Q. How about the other Pacific Islands where there was work going on?
- A. No.
- Q. Never discussed those matters?
- A. No. It was always "a military secret." He never discussed it.
- Q. Do you know whether or not Rohl-Connolly did any work at Oxnard?
- A. Yes.
- Q. What type of work was that?
- A. Breakwater—harbor work—a small breakwater.
- Q. Was that under the jurisdiction of the Army Engineers?
- A. Yes.
- [3850] Q. And that was about when?
- A. I can't recall.
- Q. Well, I mean—
- A. The years or dates either.
- Q. A matter of several years ago?
- A. It was several years ago, yes.
- Q. Prior to 1941?
- A. Yes, prior to 1941.
- Q. Was that under the jurisdiction of Colonel Wyman?
- A. No, I don't think so.
- Q. You don't believe it was?
- A. I don't think he was here.
- Q. Are you acquainted with Harold Cramer?
- A. Cramer?
- Q. Yes.
- A. No, I don't know anybody by that name.
- Q. He was an employee of the Hawaiian Constructors?
- A. I don't know.
- Q. Are you acquainted—were you ever acquainted with Mr. Werner Plack?
- A. Plack?
- Q. No, Plack.
- A. Plack?
- Q. Yes, Werner Plack.
- A. No.
- Q. Never knew him?
- [3851] A. No.
- Q. Did you ever know Mr. William Henry Enright?
- A. No.
- Q. What?
- A. No, I don't know the name.
- Q. You are acquainted with Mr. T. E. Connolly, of course?
- A. Yes.
- Q. And you have known him for a number of years?
- A. Yes.
- Q. And he is the Mr. Connolly who is the other member of—I will put it this way, the third member of the Board of Directors of Rohl-Connolly Company?
- A. Yes.
- Q. And maintains an office in San Francisco?
- A. Yes.

Q. And does he have any active control or take any active part in the conduct of the Rohl-Connolly Corporation in Southern California?

A. Well, yes.

Q. He does?

A. Yes.

Q. Does he make frequent trips down here for that purpose?

A. Yes.

Q. Was he active in negotiating or assisting in the [3852] negotiations of the contract between the Army Engineers and Hawaiian Constructors?

A. Yes, he was.

Q. He was?

A. Yes.

Q. Did he go to the Islands for that purpose?

A. No, he didn't go to the Islands, but they held meetings, I think, in San Francisco.

Q. Did your husband go to the Islands for the purpose of negotiating the contracts or taking any part in them?

A. He went to the Islands after the contracts were negotiated. He did not go over there to negotiate them.

Q. That was the occasion you mean in—

A. September.

Q. September? Well, if he didn't go over to the Islands to negotiate them with whom did he negotiate?

A. Well, they were negotiated here in San Francisco.

Q. I see. Was Colonel Wyman then in San Francisco?

A. Yes, I think he was.

Q. So that Colonel Wyman and Mr. Connolly and your husband were negotiating in San Francisco instead of in the Islands?

A. Yes.

Q. Do you know whether or not the acquaintance between Colonel Wyman and your husband preceded or succeeded the acquaintance between Mr. Connolly and Colonel Wyman?

[3853] A. I think they—

Q. In other words, who knew him first?

A. I think they both met him at the same time.

Q. Down in Southern California?

A. Yes.

Q. Have you ever disposed of any of the stock that you acquired in the Rohl-Connolly Corporation?

A. No, I haven't.

Q. Did you know that at all the time that Mr. Rohl owned in excess of 25 per cent of the stock of the Rohl-Connolly Corporation he was a German alien and was violating the law?

A. No.

Q. Do you recall that he paid a fine to the United States government of \$25,000 because of that violation?

A. No, I did not know that.

Q. You did not know that?

Q. No.

Q. Rohl-Connolly Corporation owns several boats, tugs and barges and launches, and so forth, do they not?

A. Yes, sir.

Q. Where were they kept?

A. San Pedro.

Q. Kept at San Pedro?

A. Yes.

Q. You are acquainted with—strike that, please. [3854] Are you acquainted with Fred Rohl?

A. Yes; he is Mr. Rohl's son.

Q. How long have you been acquainted with him?

A. Well, I have known him since he was about eight years old.

Q. Do you know where he is now?

A. Yes.

Q. Where is he?

A. He is in Canada.

Q. What part of Canada?

A. Well, he is at Dawson Creek. He is working up there.

Q. That is in the province of Alberta, is it not?

A. Yes, Alberta.

Q. What town is it near?

A. Well, it could be near White Horse.

Q. Where is Colonel Wyman now, if you know?

A. I understand he has his offices at Edmonton, Canada.

Q. Which is in the province of Alberta?

A. Alberta, yes.

Q. And do you know how long he has been there?

A. Colonel Wyman?

Q. Yes.

A. Well, I think he has been there a year—no, I guess he hasn't been there quite a year.

Q. And Fred Rohl, as I recall the testimony of his [3855] father this morning, has been there just a few months?

A. Yes. He just went up there since Christmas—in January. The 9th, in fact, I think he left.

Q. Does Fred Rohl have an interest at all in any of your husband's enterprises?

A. No.

Q. None whatever?

A. No.

Q. Did he ever own any stock of the Rohl-Connolly Company to your knowledge?

A. To my knowledge no.

Q. Of course, all of these things are of your own knowledge. I realize you would not know about all of these things.

A. No, he never has.

Q. So far as you know?

A. That is right.

Q. Did he accompany you to the Islands when you went over there on the Vega in 1937?

A. No. He left the ship at Miami and came back by train.

Q. Where did he board the ship?

A. He boarded it in New York, when the boat left New York.

Q. When the negotiations for the purchase of the Vega were in progress, did you tell anyone that your husband was [3856] buying the boat?

A. I wouldn't, no. I might say "We are buying a boat." I possibly did say, "We are buying a boat."

Q. But you don't think you told anybody he was buying a boat?

A. No, no, I didn't.

Q. Did he send back and have photographs of the Vega mailed to him in order to look at it after the Ramona had been sold, and prior to the purchase of the Vega?

A. Yes. After we sold the Ramona we had the broker in New York send us pictures. We did not solicit them, they just sent them because they knew—yacht brokers are like real estate men. They know every deal that is put over and they immediately thought, "Well, we didn't have a boat and possibly we would like another one," and they tried to sell us another one.

Q. As a matter of fact, you are negotiating for another boat right now, aren't you?

A. Well, it was about a month—

Q. Pardon me?

A. We negotiated about a month after I sold the Ramona. I sold the Ramona in September and about the 1st of November—

Q. You are negotiating for the purchase of a boat now, are you not, Mr. Rohl?

A. Oh, now?

[3857] Q. Yes.

A. Oh, no, not now; I thought you meant then.

Q. You haven't approached anybody about the purchase of a yacht or a boat?

A. No; only I called Mrs. Converse about their boat—that the Government wants to buy a boat. They have a boat and I called her to ask her if Mr.

Converse would like to sell his boat to the Government, but not to us. We don't want it—we are not buying any boats.

Q. How did you happen to know the Government wanted to buy a boat?

A. Because Colonel Wyman, or his office in Edmonton—they are starting a new project up there and they want some boats and——

Q. You gained that information from whom?

A. From Mr. Rohl.

Q. When did you gain that information?

A. Just last week. Mr. Rohl got home a week ago today from San Francisco.

Q. And did you make a tentative appointment with anyone for Mr. Rohl to discuss the possibility of acquiring a boat for the Army Engineers?

A. No.

Q. Never did?

A. No; did not talk to anyone but to Mrs. Converse, and I asked her about her boat and that was all.

[3858] Q. Now, you say Fred Rohl boarded the Vega where?

A. New York.

Q. And left it where?

A. Miami, Florida.

Q. He did not make a trip to the Islands with you at all?

A. No.

Q. When you went back to get the Vega in 1937 did you accompany Mr. Rohl?

A. Yes, I did.

Q. And did anyone go with you?

A. You mean, when we purchased the boat?

Q. Yes. When he went back to take delivery of it?

A. No.

Q. How did it happen that Dr. and Mrs. —

A. Lewis.

Q. Where did you meet them?

A. Well, we went back to New York in October and Mr. Rohl only stayed a few days and I stayed on until the month of November—practically the month of November, until I got the boat in shape and ready for the trip, and hired the captain and got all of the papers signed and had taken care of everything. Mr. Rohl wasn't there then. Fred was with me, the boy, and then I came back here to bring my trunks and New York clothes that I had, and repack for the boat and for Honolulu and we all left here together on the [3859] train for Jacksonville, Florida. In the meantime we had the captain bring the boat down to Jacksonville. It was in the wintertime and very bad weather—very stormy weather, and we boarded the boat in December—December 10, I believe, and then we went south by train from here, the four of us.

Q. Then you left for Honolulu?

A. Then we left for Honolulu.

Q. As a matter of fact you and your husband had planned to take Dr. and Mrs. Lewis on their wedding trip on the Ramona, did you not?

A. Yes, we promised them that.

Q. And this was sort of a substitute trip?

A. Yes; we promised them a trip to Honolulu on the Ramona, and we were never able to make the trip, so after several years—after they had been married several years we made the trip. It was a very nice trip, too, by the way.

Q. There was one fight; other than that it was all right?

A. That wasn't much of a fight.

Q. Did you pay for the Ramona by a check or by cash?

A. By check.

Q. Did you sign the check?

A. No.

Q. Who signed it?

[3860] A. Miss Dickey, the secretary.

Q. Of what?

A. Mr. Rohl's secretary. She takes care of our money. She issues me my money and Mr. Rohl's money—any money that we want—any money that I want I get through her.

Q. Was the check payable to you?

A. No, I don't believe it was. I think it was payable to the—I don't even know if it was payable to the former owner. I don't know who the check was payable to. It might have to be a bank. I really don't remember.

Q. Did you request Mrs. Dickey to—or is it Mrs. Dickey?

A. Miss.

Q. Did you request Miss Dickey to issue the check, or did Mr. Rohl request her to do it?

A. He probably requested it, because he was here. I talked to Mr. Rohl on the phone often and requested money to be sent to me in New York. I had a bank account at the bank there to take care of all bills and things back there, but I got, of course, all of my money through the office.

Q. Well, Mrs. Rohl, has that been the regular practice, the money that you have required you get through the office.

A. Yes.

Q. That same procedure, in other words—

[3861] A. Yes.

Q. In other words, you ask for the money and Miss Dickey makes the proper entries and issues the check and so forth?

A. That is the way we have always done.

Q. Now, you said you didn't remember to whom the check was made out?

A. No, I don't.

Q. Now, how about the Vega? Did you follow the same procedure with the Vega?

A. We were talking about the Vega—I thought we were talking about the Vega.

Q. No, were speaking of the Ramona.

A. Well, it would be the same procedure, however, but I was thinking of the Vega all the time, but it would be the same.

Q. The same thing in both cases?

A. Yes.

Q. Did anyone tell you—pardon me, strike that. How long a boat was the Ramona? Was it over 100 feet long?

A. It was 110 feet.

Q. How long a boat was the Vega?

A. 135.

Q. Do you know whether or not it was against the law for an alien to own a boat in excess of 75 feet in length?

[3862] A. No, I didn't know that.

Q. You did not know that?

A. No.

Q. You are quite positive that you paid all the bills for the upkeep of the Vega?

A. (Nodding head in the affirmative.)

Q. You paid the crew and the captain and for the provisions?

A. (Nodding head in the affirmative.)

Q. The Vega had Diesel engines, didn't it?

A. Yes, sir; the Vega had Diesel engines.

Q. Did you pay for all the Diesel fuel on the Vega and all the inspections and all of that sort of thing?

A. Well, I did in New York before we started out.

Q. Who directed the sailing of the vessel?

A. The captain.

Q. Who gave the captain his orders?

A. Well, no one. Just tell the captain where we are going and then he has charge.

Q. Who told him where to go?

A. Well, I suppose I told him.

Q. Well, did you tell him?

A. Yes, yes.

Q. Did Mr. Rohl have anything to do with that at all or did he just go aboard as a passenger?

A. He just went aboard as a passenger. He never did [3863] anything about the boat.

Q. In other words, he didn't pay the bills?

A. No.

Q. Or direct the sailing of the boat?

A. No.

Q. And he didn't do anything at all except have his name in Lloyd's Register as the owner?

A. He might direct some of the sailings, because he likes sailing, but not the actual sailing of the ship.

Q. Have you discussed Mr. Rohl's testimony with him?

A. You mean today?

Q. Yes; I saw him a few minutes after he left here. I was waiting for him and he had to go to the airport. I did not see him but a few minutes.

Q. You sold the Ramona, I believe you testified?

A. Yes.

Q. Do you recall to whom you sold it?

A. Yes, to a Mr. Spaulding.

Q. Did he pay you cash or check?

A. He paid by check.

Q. And the check was made to whom?

A. To me.

Q. Individually?

A. Yes.

Q. Did you put the money—what did you do with the [3864] money? What I mean by that is—I am not interested in your personal affairs—

A. I endorsed it and turned it over to Miss Dickey and she in turn deposited it in the bank.

Q. In the account of whom?

A. H. W. Rohl Company or H. W. Rohl—not company.

Q. H. W. Rohl?

A. H. W. Rohl account.

Mr. COMBS. I think that is all, Mrs. Rohl.

Chairman TENNEY. Just one question, Mrs. Rohl. As I understand your testimony you did not know that it was illegal for an alien to own a bottom of any given tonnage?

The WITNESS. No, I did not.

Chairman TENNEY. Or size?

The WITNESS. No, I did not know it until now. If it is, I did not know that.

Chairman TENNEY. That is all. Thank you very much, Mrs. Rohl. We are sorry to have inconvenienced you.

We will take a five minute recess.

(Short recess.)

[3865] Chairman TENNEY. The committee will be in order. Will you call your next witness, Mr. Combs?

Mr. COMBS. Irma Dickey.

IRMA F. DICKEY, called as a witness on behalf of the Committee, being first duly sworn, testified as follows:

Chairman TENNEY. Miss Dickey, will you please stand and raise your right hand.

Do you solemnly swear that the testimony you are about to give before this committee, will be the truth, the whole truth and nothing but the truth, so help you God?

The WITNESS. Yes, I do.

Chairman TENNEY. Will you state your full name?

The WITNESS. Irma F. Dickey.

Chairman TENNEY. D-i-c-k-e-y?

The WITNESS. D-i-c-k-e-y.

Chairman TENNEY. Will you be seated, please. Is it Miss Dickey or Mrs. Dickey?

The WITNESS. Miss.

Chairman TENNEY. And where do you reside?

The WITNESS. 1972 Canyon Drive, Los Angeles.

Chairman TENNEY. All right, Mr. Combs.

By Mr. COMBS:

Q. Miss Dickey, how long have you resided in Los Angeles?

[3866] A. Well, practically all my life. I was born here.

Q. And how long have you been acquainted with Mr. H. W. Rohl?

A. Since I first started to work for him in 1927.

Q. And in 1927 immediately prior to going to work for Mr. Rohl, what was your occupation?

A. Well, I was doing office work—stenography, bookkeeping—general office work.

Q. In what office?

A. Well, I had been working for J. J. McCarthy in New York, and then I had come out to California and was working for Pathe for one of the men who had been with J. J. McCarthy.

Q. Do you recall when Rohl-Connolly Company made application to the Corporation Commissioner of this state for the issuance of 40,000 shares of its capital stock?

A. Yes, sir.

Q. That stock was issued to you, to T. E. Connolly and H. W. Rohl?

A. The stock was not issued to me.

Q. It was not?

A. No.

Q. Who prepared the application for the issuance of the stock, if you know?

A. Well, I believe the attorney did.

Q. Mr. Martin?

A. Yes, I believe so.

[3867] Q. The permit authorizes the issuance of 40,000 shares and the sale of those shares for \$10.00 each, to you and Mr. Connolly and Mr. Rohl but you have never owned any stock in the concern?

A. That is right, I never have.

Q. What are your general duties in connection with the Rohl-Connolly Company?

A. Well, I am secretary of the company, and my work is mostly bookkeeping—general work—just general, whatever there may be to do in taking care of the office.

Q. That is in connection with the Rohl-Connolly Company?

A. Yes, sir.

Q. Do you have any duties in connection with Hawaiian Constructors?

A. No, I do not.

Q. Nothing at all?

A. No.

Q. Do the books of Rohl-Connolly Company reflect the interest of that company in Hawaiian Constructors?

A. They show the investment, yes.

Q. And you have kept all of those entries yourself, have you?

A. Yes.

Q. And at the time the 40,000 shares of the capital stock were issued, were 20,000 shares issued to H. W. Rohl and 20,000 shares to T. E. Connolly?

[3868] A. No. I believe only 10,000 shares were issued.

Q. 5,000 to each one?

A. 5,000 to each one.

Q. And what happened to the other 30,000 shares?

A. Well, they were not issued at that time.

Q. They were authorized but unissued stock?

A. Yes.

Q. How long have you occupied your present position as secretary of the corporation?

A. Since it was first formed in 1932.

Q. How long has Mr. Rohl been president?

A. Well, he has been president—not continually but at various times. He was president and then Mr. Connolly was president and then again I believe Mr. Rohl was president. They take turns.

Q. May I ask you this question: are there any provisions in the—are you familiar with the by-laws?

A. Well, I have read them—not recently. We have them there.

Q. They alternate the presidency between them at regular intervals?

A. No, no. I believe it is just as they are elected—as they choose to elect their president.

Q. Who are the members on the Board of Directors?

A. At the present time?

Q. Yes.

[3869] A. T. E. Connolly, H. W. Rohl and myself.

Q. And have there ever been any other directors to your knowledge?

A. Well, yes, sir, Mrs. Floy Rohl.

- Q. She has been a director?
A. Yes.
Q. When did she cease being a director?
A. Just recently.
Q. Do you have any duties to perform in connection with H. W. Rohl Company?
A. Yes, I do. I keep those books.
Q. That is owned entirely by Mr. Rohl?
A. Yes, that is right.
Q. Do you keep a separate account in connection with that company?
A. A separate set of books.
Q. And how often do the Board of Directors of—how often does the Board of Directors of Rohl-Connolly meet?
A. Well, they have a yearly meeting, of course, and other meetings as the necessity arises.
Q. They are called into special meetings?
A. Special meetings are called from time to time.
Q. Now, you have custody of Mr. Rohl's Federal income tax data, do you?
A. Yes, I have copies of it.
Q. Do you keep copies of the returns?
[3870] A. Yes, I do.
Q. Do you keep copies of the State income tax return?
A. Yes, sir.
Q. You have those available at the office, do you?
A. Yes.
Q. That is at the office of the Rohl-Connolly Company?
A. Yes.
Q. Are you familiar in a general way with the provisions which are undertaken from time to time by Rohl-Connolly Company?
A. Yes, I am.
Q. Do you know what type of work the Hawaiian Constructors engage in?
A. Well, I have no special information on that.
Q. I mean in a general way.
A. Just in a very general way.
Q. Do you know where the work is—strike that. Do you know where the work was originally performed when the Hawaiian Constructors first started to function?
A. Where the actual work was?
Q. Yes.
A. No, I do not.
Q. Do you know whether or not the Hawaiian Constructors ever did any work in the vicinity of Honolulu?
A. No, I do not know.
Q. Are you acquainted with Major Wyman or Colonel [3871] Wyman?
A. No, I am not.
Q. You have never seen him?
A. No, I don't believe I have ever seen him.
Q. Have you ever heard of him?
A. Oh, yes, I have heard of him.
Q. Do you write the letters for Mr. Rohl?
A. Yes.
Q. He dictates his correspondence?
A. Frequently, yes.
Q. Has he ever dictated to you any correspondence to Major Wyman or Colonel Wyman?
A. No, I don't believe he has.
Q. Never wrote any letters?
A. I don't believe that he has.
Q. Do you know whether or not he has received any letters that came to Rohl-Connolly Company from Colonel Wyman?
A. No, I don't think that he has ever received one.
Q. You don't think that he ever did?
A. (No answer.)
Q. Do you recall writing the checks when these boats that we have mentioned were purchased?
A. Well, I believe I did. I rather recall—of course, I know the checks were written.

Q. Do you keep cancelled checks?

[3872] A. Well, for a certain period, yes.

Q. How long?

A. Well, about five years.

Q. You keep the checks for about five years?

A. Yes.

Q. You make regular ledger entries when the checks are drawn?

A. Yes.

Q. And you keep those permanently, do you not?

A. Keep them permanently, yes.

Q. Now, just what would the ledger entries and accounts reveal so far as to whom the checks were payable and by whom they were signed and so forth?

A. Well, I sign them. I think I sign all of the checks.

Q. Do you have power of attorney from Mr. Rohl?

A. No, I have power to sign the checks, but not the power to sign his name otherwise.

Q. Do you sign all the checks for him through the H. W. Rohl Company and Rohl-Connolly Company?

A. Yes, I do.

Q. So the books of those concerns would reflect, would they not, to whom the checks were payable and for what purpose?

A. Yes, they would—that is right.

Q. And those books are available at the office of the [3873] company, are they?

A. Yes, they are.

Q. You were employed by Mr. Rohl when the Pandora was burned?

A. Yes, I was.

Q. Do you recall to whom the insurance was paid?

A. Well, I do not know.

Q. That was a long time ago.

A. Well, the insurance papers quite often are made out incorrectly, or sometimes one way and sometimes another. I don't recall the Pandora. I can't remember how that was.

Q. Are you empowered to sign checks for Floy Rohl?

A. No, only for the H. W. Rohl Company account.

Q. And that, of course, is H. W. Rohl, an individual, doing business under the firm name and style of "H. W. Rohl Company", isn't that right?

A. That's right.

Q. Do you know whether or not there is a certificate of doing business under a fictitious name on file for that concern?

A. Yes.

Q. In Los Angeles County?

A. Yes; I am pretty sure there is.

Q. In any other counties?

A. Well, that I cannot be certain of. I don't know. I have forgotten.

[3874] Chairman TENNEY. How do you spell your name?

The WITNESS. I-r-m-a.

By Mr. COMBS:

Q. Miss Dickey, did Mr. Rohl pay an income tax to the State of California in 1941?

A. Yes.

Q. He did?

A. Yes, I am sure he must have.

Q. Do you prepare those returns?

A. No, I do not.

Q. Who does?

A. James W. Bontems. He is our auditor.

Q. Is he auditor for all of the books for all of these corporations?

A. Rohl-Connolly Company and R. W. Rohl Company.

Q. There are no other concerns in which Mr. Connolly or Mr. Rohl are interested, are there, besides those two?

A. There is a joint venture in which the corporation is interested.

Q. You are speaking of the Hawaiian Constructors?

A. Yes; and there is another one, the Caddoa Constructors.

Q. What is the name?

A. Caddoa.

Q. Who are the other component members of that joint venture, if you know?

A. Yes; W. El. Callahan Construction Company and [3875] Gunther & Shirley.

Q. Callahan & Company is a Los Angeles concern, is it not?

A. Yes, sir.

Q. Is Gunther & Shirley also a Los Angeles concern?

A. Yes.

Q. Both of them in the construction business?

A. Yes, sir.

Q. In what enterprise, if any, are they currently engaged—I mean as a joint venture?

A. Aside from the one in which we are interested I really would not know.

Q. I mean the ones in which you are interested.

A. Well, just Hawaiian Constructors and Caddoa Constructors.

Q. What enterprise, if any, is the Caddoa Constructors presently engaged in?

A. What type of work are they doing?

Q. Yes.

A. They are building the Caddoa Dam, at Caddoa, Colorado.

Q. The work that the Hawaiian Constructors is engaged in, is that all work for the Government?

A. So far as I know—I don't know.

Q. So far as you know it is?

A. We don't have very much of that. It is an entirely [3876] confidential document and I have no information on that.

Q. You don't have access to the basic contract?

A. No.

Q. You have never seen it?

A. I have never seen it.

Q. Do you have any correspondence as secretary for Rohl-Connolly Company with Hawaiian Constructors in San Francisco?

A. I have had occasion to write, very little, however.

Q. How much of an interest has Rohl-Connolly Company now in Hawaiian Constructors?

A. Let me see, I believe it is 24 per cent.

Q. How long have they had that interest?

A. I think it has been that since January 1, 1942.

Q. And prior to January 1, 1942, Rohl-Connolly Company had a 40 per cent interest, did they not?

A. 32 per cent I believe it was.

Q. Did they ever own 40 per cent?

A. Now, perhaps—wait until I think. It has been changed—one-fourth of that—they took in another member and I was thinking it was 32 per cent less a fourth. Perhaps they had—I don't think they had—they may have had 40 per cent at first and then 32 per cent. Now it is 24.

Q. Now, the reductions in the percentage that Rohl-Connolly Company owns in Hawaiian Constructors is attributable to the taking of new members into the joint venture from [3877] time to time?

A. Yes, that is right.

Q. What is the name of the latest acquisition to the joint venture?

A. It is called, I believe, the "Hawaiian Contracting Company."

Q. An Hawaiian firm?

A. Yes.

Q. Did Rohl-Connolly Company receive anything for the sale of a portion of its interest to the new members of the joint venture?

A. Yes, they did.

Q. Do you recall what the consideration was?

A. Well, it was based on the figures according to the audit at the end of December, 1941. I have forgotten what the exact figures were.

Q. Can you approximate it?

A. I don't like to do that. I don't know. I am not sure enough to guess at it. I am sorry.

Q. It shows on the books of the Rohl-Connolly Company, of course?

A. Yes, it does. The whole record is there.

Q. Now, they did receive adequate compensation?

A. Well, I would not know about that. It was just based on the audit and is subject, probably, to checking again.

[3878] Q. How often do you post your books of the Rohl-Connolly Company?

A. Well, what do you mean?

Q. What I mean by that is, do you keep them posted currently?

A. Yes, yes.

Q. Daily?

A. Yes.

Mr. COMBS. I think that is all, Miss Dickey.

Chairman TENNEY. That is all, Miss Dickey, thank you. Miss Dickey and Mrs. Rohl may be excused at this time and we thank you very much.

Mr. COMBS. Mr. Pine.

W. BRUCE PINE, called as a witness on behalf of the Committee, being first duly sworn, testified as follows:

Chairman TENNEY. Mr. Pine, will you please stand and raise your right hand. Do you solemnly swear that the testimony that you are about to give before this Committee, will be the truth, the whole truth, and nothing but the truth, so help you God?

The WITNESS. I do.

Chairman TENNEY. Will you state your full name?

The WITNESS. Willard Bruce Pine.

Chairman TENNEY. And your residence.

The WITNESS. 320 Carolwood Drive, Los Angeles.

[3879] Chairman TENNEY. Members of the press, we prefer that Mr. Pine's name not be used for publicity because he is currently investigator for the Committee and if you would treat it simply as "an investigator for the Committee" we would appreciate it. We have some rather important reasons for that.

Mr. AUSTIN. Do you mean we are not to mention his testimony?

Chairman TENNEY. You can use his testimony but we don't want you to use Mr. Pine's name.

By Mr. COMBS:

Q. Mr. Pine, you are now and have been for some time last past a duly accredited and authorized investigator for the Joint Legislative Committee on Un-American Activities, have you not?

A. That is correct.

Q. And did you do some investigating work on the case of Hans Wilhelm Rohl?

A. Yes, I have.

Q. And when did you commence your investigations?

A. Well, in the early part of last spring—that is, the spring of 1942.

Q. So that your investigations in the case have covered a period of a little short of a year?

A. Yes, almost a year.

Q. Almost a year?

A. Yes.

[3880] Q. In connection with your investigations did you have occasion to examine the files and records in the office of the Immigration and Naturalization Commissioner in the Federal Building in Los Angeles?

A. I did.

Q. As a matter of fact on one occasion you and I went there together, did we not?

A. That is right.

Q. And examined the file for several hours?

A. Yes, that is correct.

Q. Did you read the application signed by the applicant for admission to citizenship?

A. I did.

Q. Did you read the correspondence in the files?

A. Yes, sir.

Q. Did you read the reports from the investigative agents in the file?

A. Yes; I read them all.

Q. Did you read the interrogations of the applicants by an Immigration Inspector?

A. Yes, sir.

Q. A document comprising questions and answers of 20 pages or more?

A. Yes, sir, I read it in its entirety.

Q. As a result of reading the file are you able to testify from your own independent knowledge, gained from [3881] reading the report and recommendations of the investigators for the Immigration and Naturalization Service, as to whether they did or did not recommend that citizenship be granted to the applicant?

A. The investigator's recommendation as shown in that file, is that the applicant not only be denied citizenship but be prosecuted and deported for having entered this country without any re-entry visa on his passport.

Q. Do you recall a letter from F. H. Crocket, of the Immigration and Naturalization Service for Laredo, Texas, dated March 7, 1941, to the effect they had no record whatsoever of Mr. Rohl having been in or out of the United States at that point?

A. Yes, I remember that letter.

Q. Do you recall a statement by Mr. Wilcox Cole or any other official of the Naturalization and Immigration Service, to the effect that in 1932 it was absolutely impossible for an alien to go in and over the border of the United States into Mexico at that point without being questioned as to his citizenship status?

A. Yes, sir, that is exactly as I remember it.

Q. Do you recall a statement in the record to the effect that when the Ramona stopped at Acapulco, Mexico, where it took on gasoline and supplies, there was no record of Rohl being present on the boat either as a passenger or a member of the crew?

[3882] A. That is correct. That is exactly, from my memory, the essence of that particular paper in that file.

Q. Do you recall the letter from Lieutenant Colonel Theodore Wyman, Jr., urging that Rohl be made a citizen and that the case be expedited because he was interested at that time in secret and highly confidential contracts in the Hawaiian Islands?

A. Yes, I read that particular letter several times.

Q. And do you recollect a letter from T. B. Shumaker of the Immigration and Naturalization Service, dated February 4, 1941, asking that the case be made a special case and expediting the case?

A. Yes, sir.

Q. Mr. Pine, when you examined the file you took notes, did you not?

A. Yes, I did.

Q. Do you recall a letter written on the 13th day of March, 1941, by an official of the Immigration and Naturalization Service, stating, in effect, that when the Vega sailed from the west coast to Honolulu, that Rohl was not revealed on the passenger manifest as being a member of the crew or a passenger?

A. In substance that is exactly as I remember it.

Q. And do you recall that the manifest was reported—that is the manifest that was taken at the time the boat anchored off Honolulu, that Mr. Rohl gave his birthplace as [3883] Iola, Kansas?

A. Yes, because I remarked at the time, from previous knowledge, that that was his wife's birthplace, which she had used, and it was a lack of imagination that arose in my mind at the time.

Q. In giving his wife's birthplace in place of his own?

A. Yes.

Q. Do you recall the statement in the Naturalization and Immigration file to the effect that the Federal income tax return had been made by him under oath as a citizen of the United States?

A. I do.

Q. Do you recall that at least on one of those returns the statement appeared that he had been naturalized in 1921?

A. Yes, I recall that date, 1921, very clearly.

Q. Do you recall a statement in the file made by the applicant, Mr. Rohl, to the effect that the returns were not prepared by him but by someone for him and that he merely signed them?

A. Yes.

Q. And that you then remarked how it was that the person who prepared the returns knew that the applicant had been naturalized in 1921 unless somebody told him?

A. Yes; I remember that conversation very clearly.

Q. Do you recall an inconsistency in the file—one [3884] statement being to the effect—and I am reading from my notes a letter from William A. Carmichael, District Director of Los Angeles, to T. B. Schofield, dated March 4, 1941, regarding the Federal Communications form 501 for radio telephone on the Vega, the letter stating and quoting:

"During the course of investigation it has been learned that the subject executed a sworn affidavit in connection with this Form 501, that he was a citizen of the United States in order to secure the radio-telegraph license for the ship radio

installed on his yacht Vega, the false statement made therein being contrary to the Federal Communication Act of 1934, Section 310, Paragraph 1, wherein it specifically provides in part that 'No radio station license shall be issued to any alien or any corporation or company; any officer of which is an alien or in which more than one-fourth of the stock is owned by an alien.'"

Q. Do you recall that, in substance?

A. Yes, I recall that letter.

Q. Then, do you recall also that after a form of application blank was filled, and I have a note on it stating that the yacht Vega was licensed April 1, 1939, as KLVC under the name of the owner as H. W. Rohl.

A. Yes, I recall that.

Q. Then, do you recall the inconsistent portion where [3885] a later entry in the file stated that a mistake had been made and that the applicant for the radio-telephone had actually been signed by Floy Rohl?

A. Yes, I recall that very well.

Mr. COMBS. I think that is all, Mr. Pine.

Chairman TENNEY. Thank you, Mr. Pine. I think that is all for today.

Mr. COMBS. That is all, Mr. Chairman.

Chairman TENNEY. Very well. The hearing will recess until 10:00 o'clock tomorrow morning in this same room. It will be an open hearing.

(Whereupon, at 8:30 o'clock p. m., the Committee adjourned to 10:00 o'clock a. m., Monday, March 1, 1943.)

[3886] BEFORE CALIFORNIA STATE LEGISLATURE'S JOINT FACT FINDING COMMITTEE
ON UN-AMERICAN ACTIVITIES

In the Matter of: HANS WILHELM ROHL, ROHL-CONNOLLY COMPANY,
HAWAIIAN CONSTRUCTORS and R. W. ROHL COMPANY. Open Session

Met pursuant to the call of the Chairman at 10:00 a. m., Monday, March 1, 1943.

Present: Senator Jack D. Tenney, Chairman, 3207 West 77th Street, Inglewood, California.

Others present: R. E. Combs, Chief Counsel and Investigator.

Reported by: J. D. Ambrose, 322 Wilcox Bldg., Los Angeles, Calif.

[3887]

PROCEEDINGS

Chairman TENNEY. We do not want to divulge the name of our first witness, so I will give you his name at this time so that it will not be necessary to have him announce it at the time he is sworn. Our first witness will be Max Shapiro. Mr. Shapiro resides at 137 South Peck, Beverly Hills, California. The second witness will be Mr. Harry Flannery.

The committee will come to order. The chairman is sitting as a sub-committee pursuant to a resolution passed by the committee at its hearing Saturday.

Will the witness come forward and be sworn? Do you solemnly swear that the testimony you are about to give before this committee, will be the truth, the whole truth, and nothing but the truth, so help you God?

The WITNESS. I do.

Chairman TENNEY. You have already been identified for the record.

The WITNESS. Yes, sir.

Chairman TENNEY. All right, you may proceed, Mr. Combs.

By Mr. COMBS:

Q. Are you acquainted with an individual by the name of Hans Wilhelm Rohl?

A. I know him by the name of Bill Rohl, but that is the same person.

Q. The same person?

A. Yes.

Q. How long have you been acquainted with him?

[3888] A. Since 1936.

Q. Have you been on board his boat the Vega?

A. Yes.

Q. At the time you went aboard the vessel where was it?

A. It was anchored off of Catalina.

Q. Are you acquainted with the group of people—several persons who commonly went aboard the boat on different occasions?

A. Yes.

Q. Were you acquainted with Major Wyman of the United States Army Engineers, who used to visit aboard the boat?

A. I met him, yes.

Q. About how long ago was it that you met him?

A. It was either in 1936 or 1937—the summer or fall of that period.

Q. Were the people with whom you were at that time acquainted, and who used to visit aboard the boat from time to time, also acquainted with Major Wyman?

A. Yes.

Q. How frequently, according to your best recollection, did Major Wyman visit aboard the Vega at that period?

A. Very frequently.

Q. Did you ever see him intoxicated?

A. Yes.

Q. Once or more than once?

[3889] A. Twice.

Q. Do you know what his general reputation for sobriety was among the people who used to visit aboard the boat frequently, and with whom you are acquainted?

A. Yes.

Q. What was it?

A. Not very good.

Q. Would you elaborate on that, please?

A. Well, I would say that he was considered by that group to be a heavy drinker.

Q. Have you, yourself, discussed his drinking habits with those people?

A. Yes.

Q. During how long a period of time, according to your best recollection, did the Major visit aboard the boat?

A. It was during the period of that particular summer and early fall of either 1936 or '37. I had no particular reason to make any record of it.

Q. Yes.

A. So it was either '36 or '37 during the summer and fall—it was during the summer and fall of either one of those two seasons.

Q. Were you ever acquainted with an individual by the name of Werner Plack?

A. Yes.

[3890] Q. When did you first meet him?

A. '35 or '36.

Q. And how long did your acquaintanceship with him continue?

A. During that year—the first year I met him.

Q. What was his nationality, if you know?

A. He claimed to be a Holland Dutchman, but, of course, we found out later that that was not true.

Q. And what was his nationality?

A. It was German.

Mr. COMBS. That is all.

Chairman TENNEY. You are excused. Thank you very much. We will take a few minutes recess.

(Short recess.)

Chairman TENNEY. The committee will come to order. Mr. Anderson, will you be sworn? Do you solemnly swear that the testimony you are about to give, will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. ANDERSON. I do.

[3891] RAY ANDERSON, called as a witness by the Committee, having been first duly sworn, was examined and testified as follows:

Chairman TENNEY. Will you stake your full name, please?

The WITNESS. Ray Anderson.

Chairman TENNEY. Where do you reside?

The WITNESS. 2249 20th Street, Santa Monica.

Chairman TENNEY. And what is your occupation?

The WITNESS. Electrician.

Chairman TENNEY. Are you presently employed?

The WITNESS. By the Douglas Company.

Chairman TENNEY. All right, Mr. Combs.

By Mr. COMBS:

Q. Mr. Anderson, how long have you resided in Southern California?

A. 12 years.

Q. Prior to that time where was your residence?

A. I lived in New York City for 15 years.

Q. How long have you been engaged in the electrical business?

A. All my life.

Q. Were you ever acquainted with Hans Wilhelm Rohl?

A. Yes.

Q. When did you first make his acquaintance?

A. I think about the end of February, 1942.

Q. Are you acquainted with an organization known as the Hawaiian Constructors?

[3892] A. Yes; I worked for them eight months.

Q. When were you first employed by that concern?

A. January 14, last year.

Q. And where were you employed?

A. In San Francisco.

Q. Did you leave San Francisco and go to the Hawaiian Islands to enter into your duties for that company?

A. I did.

Q. Who employed you?

A. A man by the name of Fitzgerald, I think it was.

Q. In San Francisco?

A. Yes, in San Francisco.

Q. And when did you leave for the Hawaiian Islands?

A. Somewhere about the 6th of February.

Q. Did you go by airplane or by boat?

A. We went by boat, the Lurline.

Q. Were any other employees of the Hawaiian Constructors aboard the vessel when you were?

A. There were 1171 of us.

Q. 1171 of you?

A. Yes.

Q. And did you go from San Francisco to the Island of Oahu?

A. I did.

Q. And you were there employed, were you, as an electrician for the Hawaiian Constructors?

[3893] A. Yes.

Q. Were your pay checks drawn on the Hawaiian Constructors or on the War Department?

A. United States Treasury checks, all of them, except one. We were paid \$1.25 per day on the boat going over there and that check was a Hawaiian Constructors check, signed by Mr. Woolley,—Ralph Woolley.

Q. Will you spell that?

A. W-o-o-l-l-e-y.

Q. What was his position with the Hawaiian Constructors, if you know?

A. He was chairman of the executive board which was composed of Mr. Rohl and Mr. Benson—three of them.

Q. What were Mr. Benson's initials, do you know?

A. I don't remember.

Q. Do you remember his first name?

A. No, I don't.

Q. And other than the one check drawn on the Hawaiian Constructors all of the other checks were drawn on the United States Treasury Department?

A. All on the Treasury, that is right.

Q. Now, when you first arrived at the Island of Oahu in pursuance to your new employment, where did you go?

A. Ponahou School.

Q. Where was that located?

A. That was located in Honolulu. I think it would be [3894] called the southeast part of Honolulu.

Q. Just what did your duties comprise as an electrician for the Hawaiian Constructors?

A. Three days after I was there—after I arrived there, I was taken to General Emmon's headquarters in the mountains, about three or four miles from Fort Shafter, with a construction gang.

Q. Go ahead, Mr. Anderson.

A. And we worked there until the beginning of April, constructing electrical equipment, when they moved in there on December 7. They had thrown wire all

over the place and they brought in a couple of Diesel engines and a transformer bank and just the soldiers had hooked it up on nails and wire any way they could get it, and we went in there to clean that mess up and put it in proper order. And when we finished, I was asked by Major Henderson to remain there as maintenance electrician.

Q. Now, had the Hawaiian Constructors done any work on the Island of Oahu, to your knowledge, before you arrived there?

A. There were some men out at one or two of the fields there. Now, exactly how much they had done I don't know. They were a group that went there in October or November ahead of us.

Chairman TENNEY. That would be 1941?

The WITNESS. 1941.

[3895] By Mr. COMBS:

Q. Did your activities in pursuance of your duties take you generally around the Island of Oahu?

A. On our off days we went all over the place. We had friends at different places and they had camps scattered all over the Island.

Q. The Hawaiian Constructors?

A. They were doing all of the civilian work for the Army on the Island of Oahu.

Q. Who was in charge of those installations and the construction activities for the Army?

A. They had split it up into areas. There were 14 areas and there was a superintendent of each area.

Q. A civilian superintendent?

A. Yes, civilian superintendent, who belonged to the Hawaiian Constructors, and with him there were always officers or an engineer from the U. S. E. D.

Q. Who was that?

A. Colonel Wyman.

Q. Colonel Wyman was in charge?

A. Yes.

Q. That was Colonel Theodore Wyman, Jr.?

A. Yes.

Q. You have seen him, have you not?

A. Oh, I have talked to him.

Q. Now, I show you a sketch which is marked Committee Exhibit No. 1, and which purports to be a sketch of the Island [3896] of Oahu, and ask you whether or not that is a fairly representative map of the general configuration of Oahu.

(Handing exhibit to the witness.)

A. Yes, sir.

Q. Are you familiar with Pearl Harbor?

A. Yes.

Q. Which I have indicated here?

A. Yes. I was located right in front of this hill here (indicating).

Q. In front of Red Hill?

A. Yes.

Q. You know where Pearl City is?

A. Yes; I have been out there too.

Q. And you see where Hickam Field is delineated on the map?

A. Yes, sir.

Q. And the City of Honolulu?

A. Yes, sir.

Q. And going around the Point up to the southeast coast you see Bellows Field?

A. Yes, sir.

Q. And the Naval Hospital?

A. Yes, sir.

Q. And Kahuko?

A. They had that—

Q. The base yard was there (indicating)?

[3897] A. That is right.

Q. Now, going down from the northerly tip of the Island in a general south-westerly direction, there is Klena Point and Schofield Barracks?

A. And I had worked there.

Q. And Wheeler Field?

A. Yes.

Q. And Kapoku Gulch, Ewa and Barbers Point?

A. Yes, sir.

Q. You are familiar with those places, are you?

A. Yes, sir.

Q. Did you personally visit all of those points?

A. Yes, sir; we went all over the place but not in the capacity of working, because I didn't work any place except in the headquarters. You see, as far as my actual work was concerned, I did not go to those other places, but I had friends in several of the camps that we used to visit, one and another and get around that way. Of course, it isn't much of a drive around the Island.

Q. Did you do any work at Red Hill?

A. No; the Navy had the Red Hill job but the Constructors sent men up there.

Q. The Hawaiian Constructors?

A. Yes, sir; I never did quite understand what the setup was at Red Hill. There was several men sent there. Whether they were transferred to the Naval contractors or [3898] whoever had that job I don't know.

Q. You are positive, are you not, that Hawaiian Constructors did send some of their employees to work at Red Hill?

A. They sent men in there because people out of Ponahou School went into that camp.

Q. And the school was where the Hawaiian Constructors maintained their headquarters?

A. Yes, sir, Alexander Hall was their headquarters.

Q. Do you know whether or not most of the installations at Red Hill were underground?

A. Yes, sir.

Q. They were, were they not?

A. Yes, sir; they all were underground—underground tanks and tunnels from there to Pearl Harbor.

Q. Now, did the Hawaiian Constructors put in any gun emplacements in the Island of Oahu?

A. They did work at Fort Camp and their electricians hooked up the guns there.

Q. Did they put in any ammunition dumps?

A. They handled oil dumps—all kinds of things of that kind—eight-inch guns, twelve-inch guns, which they did all of the concrete work on.

Q. Do you know whether or not they installed any underground facilities for the storage of ammunition?

A. They had some tunnels at Bellows Field and also near [3899] Wheeler Field. Now, whether they were going to be ammunition dumps I could not say.

Q. The Hawaiian Constructors did work at Hickam Field, did they not?

A. Yes.

Q. Did they do any work in Ewa?

A. That I can't say. There was a Marine Base at Ewa. There was a Marine runway and airfield near Ewa, but I never knew they did do any work on that field.

Q. Now, Mr. Anderson, did the Hawaiian Constructors do any work on the east coast of the Island of Oahu near Skailua Bay in the construction of Naval works?

A. Kahuku Point.

Q. Now, is that on the northeast coast of the Island?

A. Yes, sir.

Q. What was the general nature of the work done there?

A. They had a small field there.

Q. What kind of field?

A. Small airfield.

Q. I see.

A. And I think fortifications up in the hills. I didn't go up into there.

Q. Was any work done on the east coast for a Naval hospital by the Hawaiian Constructors?

A. I don't know that they did the Naval Hospital.

Q. When did you first make the acquaintance of Major [3900] Wyman or Colonel Wyman? Was he a colonel when you knew him?

A. Colonel? When we went there he was a colonel.

Q. Did you have frequent contact with him?

A. I met him three times, and it was always a battle over our food and our bedding.

Q. How were your general living conditions there?

A. Rotten.

Q. Will you elaborate on that, please?

A. Well, I will tell you. They issued us Army rations. They used Rice Hall and another hall down in the school as mess rooms. One hall had been fixed up for the men and the other evidently for the staff, but the men kept going backward and forward from one to the other, the whole gang. They would eat wherever they wanted to—in either hall. But they had eggs and meat and stuff like that that we could not eat. We would get up in the morning for breakfast and the stuff would be so cold that you could stretch the eggs like rubber and you couldn't get a second helping of food without paying 35 cents for it, so I got to Colonel Wyman on that question, and finally he turned me over to Woolley and Middleton, and Woolley and I went to it about the beds.

Now, in the meantime they had three truckloads of beds dumped into the basement of Castle Hall. I had seen the trucks going in there and empty beds and mattresses and we were sleeping on veneer boards.

Q. How many of you were quartered in that particular [3901] locality?

A. In that particular building I think there were 288—something like that—between 275 and 300.

Woolley finally—I was sent in to see Woolley, and I went in to see him and I went in and talked to him about the beds and he told me he would meet me in Castle Hall, and he came over there and Middleton came with him.

Q. That is C. C. Middleton?

A. Yes, C. C. Middleton, who was administrator for the Hawaiian Constructors in the Hawaiian Islands—he was in the headquarters.

Q. Headquarters where?

A. Alexander Hall.

Q. Yes.

A. And Middleton told me that—I was kicking about the eggs, and Mr. Woolley told me that they couldn't buy them. I told him it was not a question of buying eggs, that we had the eggs but they were being ruined the way they were cooked.

We were allowed \$75 a month for food and the civilians that did not belong to us could come in and eat in those halls for 35 cents a meal or \$1.05 a day and we were paying, roughly, \$2.50.

Colonel Wyman informed me that as far as the beds were concerned, the General had issued an order that a man could sleep on the ground like a soldier. I told him that that was O. K. with me provided we have to, but not when beds are idle [3902] in the basement. He finally told George Campbell he could do anything for us in an administrative way he liked, but not one nickel was to be spent on us.

Q. How long did that condition continue?

A. I think we got the beds about a week—I think it was Thursday I saw Wyman the last time and on the following Tuesday night the man in charge of the hall informed me that we would start changing beds the next morning. In the meantime Ralph Woolley told me to get inside somewhere, due to my cold—that it might lead to pneumonia in the Islands.

Q. Do you have a claim against the Hawaiian Constructors for Compensation?

A. Yes, \$682. They have \$125 cash of my money.

Q. In addition to the \$600?

A. They took that from my pay.

Q. What was the reason for that?

A. That was for fare home, or fare over there—expenses somewhere or other.

Q. What effort, if any, have you made to collect that sum?

A. I tried through the Attorney General, I tried through the State Compensation in this building, and they informed me here that we were out of the State, and I made a claim that the contract was drawn within this State and that whatever took place outside of the State the responsibility lay here, and then I tried to find out whether the Constructors [3903] were registered in this State. If not, it was a criminal offense to start out with, and I don't know to this day whether the Constructors ever registered in the State of California.

Q. They did not register with the Franchise Tax Commission I can tell you that.

A. I would like to mention something else. There is a contract drawn between Hawaiian Constructors and I think 449 engineers—602 or 662.

Q. 414, isn't it?

A. It might be 414. It is 400 and something. I wanted to get a hold of that contract because all of us over there thought that part of the contract had us

tied down and we thought that we had been taken there under subversive setup. Now, our contract price was \$225 a month for 44 hours, which I claim was illegal on the 40-hour basis in this State and the United States.

And further, they didn't want to pay us overtime. They tried to make us work 48 hours.

Now, Wyman was behind all of that with Rohl and Woolley and Benson backing him up.

Q. Did you see Rohl and Wyman together in the Islands?

A. No, I didn't. I will tell you—up to the time Wyman left there his office was on the sixth floor of the Young Building at the corner of King and Bishop Streets in Honolulu.

[3904] Woolley and Rohl and Benson were installed in the Alexandria Hall when I arrived in Honolulu and they were there all the time and were there when I left.

Q. When did you leave Honolulu to return to the United States?

A. Somewhere around the 9th of August.

Q. Were you discharged, or did you resign?

A. No. On the 10th of July they came out with an increase in our pay to \$1.45 an hour. You see, on the overtime we were getting \$9.00 a day and then they came out with that. They would give us the rate but would reduce our subsistence allowance to \$45.00 a month and pay us \$1.45. As we were living on soldier rations we didn't see we were losing by it, so we took that.

On the 30th of June the doctor discharged me for varicose veins and my pay stopped that day and I never had another dime out of the Constructors.

Q. Now, while you were over there, Mr. Anderson, did you ever have any occasion to see Major Wyman in an intoxicated condition?

A. Yes.

Q. When was that?

A. During February and March and five days before Colonel Wyman left his job he lay in the hotel drunk all the time.

Q. For how long a time.

[3905] A. Five days.

Q. Do you know that of your own personal knowledge?

A. Yes, I can prove it.

Q. While you were working over there, Mr. Anderson, were there any Japanese employed by the Hawaiian Constructors in executive capacities?

A. There were Japanese in the office, Japanese superintendents—that is, superintendents over—not of an area but superintendents over different constructors, such as carpenters and electricians, and gangs like that; the Merchant Electrical Contractors and Supply Company which Vera—

Q. Who is the head of that?

A. Vera. They employed 36 electricians. They came into our gang. When I left Honolulu, two days before I sailed I was at their stockroom and five of our men were in this Japanese gang. They worked out of area 10.

Q. Was a portion of the work actually supervised by Japanese?

A. Yes. The Japanese were permitted to go into every part of the Island except Pearl Harbor and Diamond Head tunnels and General Emmons tunnels, where the headquarters were.

Now, I went on to Hickam Field after I was there, I think, two weeks, with a Hawaiian Constructors' badge on me. I spent three hours in there. I went all over the hangars and everywhere and I came back up to G2 and talked to the captain there about it, asking why in the world that they permitted people [3906] with those badges to walk into a place like Hickam Field with the setup they had there, and he said he didn't know.

Q. When was that?

A. That was in the early part of March of last year.

Chairman TENNEY. 1942?

The WITNESS. Yes.

Chairman TENNEY. Let me ask a question, Mr. Combs.

Is it your statement, Mr. Anderson, that these Japanese had considerable to do with the supervision of the work on the island?

The WITNESS. They were working in the office and in places where they have the plans of the United States Engineers. They had them in the offices with them. They were in every position there except certain places. They could not go into Diamond Head Tunnel or General Emmons Tunnel or into Pearl Harbor. You had to have special passes that were good only for that particular setup in those places. They could not go there but everywhere else that I know

of on the island, including Hickam Field they could go. Last August the Japanese were working in there.

Chairman TENNEY. Were those in the category of secret installations?

The WITNESS. Well, I should say that they would be because they had the Aircobras and the Boeings and all the big airplanes scattered throughout those fields.

The men had a row at Bellows Field and refused to work [3907] for one day, or a part of a day, until certain Japanese were removed from there. That was some time last April.

Chairman TENNEY. 1942?

The WITNESS. Yes, sir.

Chairman TENNEY. It is your testimony that the Japanese had considerable to do with the supervision of the work?

The WITNESS. They tell you there that the Japanese are 90 per cent more loyal than we are ourselves.

Chairman TENNEY. That is what they tell you in Hawaii?

The WITNESS. They tell you that in Hawaii. They tell you that they don't like us there. There is no fooling about that.

Chairman TENNEY. The Japanese you mean?

The WITNESS. No, the white people that live with the Japanese. There is a peculiar financial setup in the Hawaiian Islands in which the sugar interests dictate the financial setup there. The poor man was never able to get any money there. The only place he can get money or credit is from the Japanese banks and stores and consequently he is friendly to the Japanese.

It was my firm opinion from the time I got there that they didn't particularly care whether we had the Islands or whether the Japanese had them.

Chairman TENNEY. It was immaterial?

The WITNESS. Yes.

Chairman TENNEY. Were these Japanese that you have referred [3908] to employees of the Hawaiian Constructors?

The WITNESS. Yes. You see, a civilian there, except a few engineers when we went there belonged to the Constructors—they were working under the U. S. E. D. I will tell you it is a super W. P. A. set-up.

By Mr. COMBS:

Q. You mean the United States Engineer Corps?

A. U. S. E. D. Just like you had with the W. P. A. in the States. That is what they called it.

Q. What did that stand for?

A. I never did know—U. S. Engineer Department, I guess.

Q. Mr. Rohl testified, Mr. Anderson, that he was personally directing the work on the Island of Oahu and under him worked these individuals whom you have mentioned as superintendents, on the various projects. Was that the fact when you were there?

A. Mr. Woolley was considered the head.

Q. Yes.

A. He was the chairman of the executive committee which consisted of Mr. Woolley, Rohl and Benson. Now, whether Rohl—I have always believed that Ralph Woolley was the front man.

Q. A front man?

A. Yes. Ralph Woolley was the man who would do the right thing if he could. He talked very little. You could [3909] get very little out of Ralph Woolley.

Q. Who did you believe he was fronting for?

A. For the outfit that came from here. There is some connection between this gang in the States and that outfit and they wanted men from there so if there is any question raised there is a possibility that we would get out of it.

Q. In what business was Mr. Dillingham engaged?

A. They were part of the Constructors and pulled out I think in May or June.

Q. Of 1942?

A. 1942, yes. For some reason Dillingham came out and the assistant superintendent in area 10. I don't remember his name at the present time. He was taken from there and sent to Johnson Island with certain men that he took with him.

Q. Did the Hawaiian Constructors also do work on Johnson Island?

A. I don't know whether they did or not. They did work at Christmas and Canton. General Tinker ran them out of Christmas Island.

Q. For what reason?

A. Weren't getting any work done.

Q. After the battle of Midway did the Hawaiian Constructors do any work on Midway?

A. There were some men went over there. There was a fellow by the name of Miller here in Glendale who went there on the air conditioning. He was a Hawaiian Constructors man. [3910] He was over there 10 days. He came back in the same convoy. I don't know anything about him personally, but they had five or six men out there—shipped them somewhere where we didn't even know. Miller told me then that he had to go to Midway and what had taken place in Midway.

Now, there is another feature behind this whole thing of which I can only give you indirect evidence. If I can find the man today I will get him.

Last year, in March or April there were 180 men shipped to New Caledonia by the Hawaiian Constructors. They didn't even know where they were going. When they arrived there in New Caledonia they found out it was a French Possession and refused to land. They said, "Anywhere in American territory but not in foreign territory," so they came back. They brought them back to camp. They were shipped to sea in an open barge with an ocean-going tug pulling them for five and a half days to Suva. I saw the letter signed by the Governor of Suva to the effect that if those men crossed certain lines they were to be shot down. That was Governor Wild.

Q. When was that trip to Suva made?

A. Some time, I think, in March. I met the man in April.

Q. March, 1942?

A. Yes, sir.

Q. What was the nature of the work that that party was to do?

[3911] A. They went out there—they were building an airfield and submarine base.

Q. Building an airfield and submarine base?

A. Yes.

Q. And that was the Hawaiian Constructors?

A. Yes.

Q. On the Island of Suva?

A. No, on the Island of Canton.

Q. Canton Island?

A. Yes. They pulled them out from there to Suva.

Q. Are you acquainted with Paul Grafe?

A. Is this the gentleman here?

Q. No, No, I am just asking you.

A. No, I don't remember, but this gentleman's face is familiar to me.

Q. Did Mr. Rohl make frequent trips away from the Island of Oahu while you were there?

A. Yes.

Q. Will you explain what you observed to that regard?

A. Well, I will tell you. When Rohl left his car—he always parked his car on the lot—Rohl parked right behind Alexandria Hall when he used to go there to eat and, of course, we could always tell when he wasn't in Honolulu.

Q. You could tell what?

A. That he was gone.

Q. Rohl was gone?

[3912] A. Yes, because it was impossible to follow him. There was a rumpus raised in San Francisco when some of the men came back in regard to their pay and the claim was filed with the Compensation Commissioner here for \$8,000 and Rohl was—he flew back here. We never saw Rohl that time for three or four weeks. He disappeared completely and finally he showed up again.

Q. Now, you are speaking about the parking space which was allocated to Mr. Rohl. Where was that parking space?

A. Exactly behind the back door of Alexandria Hall, the headquarters.

Q. Was there any marking or designation on it?

A. Yes.

Q. To show to whom each individual space was allocated to?

A. Rohl, Middleton, Woolley and Benson each had a spot there.

Q. Were their names painted on the asphalt?

A. No; there was a fence rail—a one by three plank painted white there with their names on each one of them.

Q. In black paint?

A. Black paint.

Q. Were you familiar with the automobile commonly used by Mr. Rohl when he was on the Island?

A. Yes, he used a black car then.

Q. Of course you were able to observe at times, the car [3913] was occupying the space which was allocated to him?

A. Yes.

CHAIRMAN. TENNEY. Mr. Anderson, have you any further light you can throw on this matter that you think might be of interest?

The WITNESS. I would like to go into something about the plans. We never did, and to my knowledge to the day I left there, we never had a plan for the headquarters job that we did.

They left a hole in the tunnel six by seven foot that never was closed up.

Mr. COMBS. What tunnel?

The WITNESS. Headquarters of the United States Army, Hawaiian Department, and things of that kind. We couldn't get material, we couldn't get anything. You couldn't get anybody to do anything.

We believed that sabotage, in the sense that they were holding up the work and blaming the men, was going on.

Q. By Mr. COMBS. Who was holding up the work?

A. Whoever had charge of it.

Q. Of the Hawaiian Constructors?

A. Evidently, because they were our bosses.

Q. You say this tunnel was located—the United States Army headquarters tunnel was located where?

A. In that tunnel.

Q. Where was the tunnel on the Island?

[3914] A. Right in front of Red Hill.

Q. That is what I want.

A. There is a big magazine there.

Q. And Red Hill overlooks Pearl Harbor?

A. Yes, and there is a hill in front of Red Hill towards Hickam Field. This hill lays between Hickam Field and Red Hill. There were eight tunnels there and they had lateral tunnels and they had been preparing that for a year. The soldiers had driven a vehicular tunnel through the west end of it, from one end to the other of it.

We went in there and we fixed it up so it was gas-proof and installed all kinds of equipment, including air-conditioning and stuff like that. We did it without plans and without any help from anyone whatever.

Q. Who was in charge—who, individually, was in charge of that installation?

A. The superintendent was Charles Winstead.

Q. Did he work under the immediate direction of Mr. Rohl?

A. He was working under him—he was working under—I will think of his name in a minute—Frank Olmstead, or something like that. He was the Army superintendent.

Q. Under whom did Mr. Olmstead work?

A. Under headquarters at Alexandria Hall.

Q. And Alexandria Hall was where Mr. Rohl's car was parked?

[3915] A. Yes, that is where the Hawaiian Constructors headquarters were. They had all their equipment there except the personnel department, which was in a school—a grammar school.

Q. Mr. Anderson, how do you know Colonel Wyman was intoxicated for five days?

A. Well, I saw him up there three or four times and everyone that is in there—the place was run for that purpose, practically. Japanese girls hanging out there every night for that crowd and the ones that stay in the main part of the hotel—you see the hotel is split up into several large bungalows or dormitories outside, and then the hotel proper was occupied by some Army officers and Colonel Wyman.

Q. Including Colonel Wyman?

A. Yes.

Q. What was Colonel Wyman's general reputation among the employees of the Hawaiian Constructors for sobriety?

A. Colonel Wyman was a man who liked liquor exceptionally well. He may never get drunk, but he likes it.

Q. What do you mean, "he may never get drunk"?

A. A lot of them can carry a lot of liquor and you don't think they are drunk.

Q. But you testified that he was drunk for five days.

A. Yes, he was.

Q. Have you seen people in an intoxicated condition before?

[3916] A. Oh, yes.

Q. And that would be your opinion of his condition during those five days?

A. Absolutely.

Mr. COMBS. I think that is all unless you have something else to add that you think might be helpful to the committee.

The WITNESS. Well, some of the stuff wouldn't have anything on this matter, but I wish this thing could be brought to the attention of Washington.

Q. We wish so too.

A. Things are rotten out there. There is no kidding about it. I am an American 61 years old, and I went to Honolulu with the idea of helping out and I tell you honestly once I finished that job there it done no good. I tore stuff apart there five and six times and put it together. There was never any reason for it. Charlie Winstead, who I was speaking about, treated me fine but still down in a man's heart he is not an American in any sense or form because he believes the Japanese is the right fellow and I know he is not.

There isn't a question on earth but everything has been blocked up there, either from Washington or some other position, and it is about time that somebody did something about it. Emmons is absolutely helpless now. I hear a lot of things in that tunnel because I work in those offices with them while business was going on, and we hear a lot of things that we can't talk about any place unless it goes into the [3917] place where something will be done about it.

I made three reports to G2 because I would walk right into them and talk to them. They knew of the things that happened, but there was never anything done about it.

Chairman TENNEY. Was there any discussion with reference to the loyalty of these men to the United States?

The WITNESS. I will tell you candidly as far as our men were concerned, Senator, I don't think there was any of them—the majority of the men that went over there were men over 40 years old and the only reason they were there was because they could not take a gun. I have been quite a bit here in Southern California and worked on these defense jobs and I couldn't understand why the young men didn't want to go to war, but that gang of men that went there really wanted to go and do some good, and most of them were so disgusted after six weeks they didn't know what to do, and it was our idea that the thing was done with the purpose of making us disgusted, and they could put it down that we wouldn't work.

Now, I have been in defense work ever since December of last year with the idea of trying to help out. I am an electrician and a good one. I had a contractor's license in this State and I know what I am doing, and when you turn around and find things like that it hurts down deep because you know that certain men, either for money or for some other reason, are destroying the morale of the workers.

Chairman TENNEY. What I mean, Mr. Anderson, was there [3918] reflection or opinion expressed in reference to the loyalty of the men that were in charge of all this work?

The WITNESS. The men out there thought Wyman and the whole gang of them ought to be shot. That is the truth.

Chairman TENNEY. You know that of your own knowledge?

The WITNESS. Yes, I do.

Chairman TENNEY. And upon what did they base that particular opinion?

The WITNESS. The accusations of them. We couldn't get paid. We couldn't get our overtime. We couldn't get nothing at all. We would get, "This is a new setup. This is this and that is that," and other things. One man told me out of his own mouth that we were at sea four days before they knew we were coming and they didn't know how many were coming until we actually landed.

Chairman TENNEY. I am referring more specifically to the progress of the work and the way it was carried on.

The WITNESS. The work has dragged. They will be another year. They have moved hills and moved them back again, and they have filled and holes and dug them out again; and I will swear that that runway, from what I can hear of it, at Bellows Field, has been done a dozen times.

Chairman TENNEY. Do you think that has been done intentionally?

The WITNESS. I do. I honestly believe it is intentional. After the Battle of Midway it was a great thing while [3919] it happened, and those planes came in and out of there for three days. We needed those fields but they weren't ready. They sent a man from here to be a superintendent who belonged to the Musicians Local 47. They put him on the job and in three days shipped him home.

Chairman TENNEY. What was his name?

The WITNESS. I will think of it in a minute. His name is on the tip of my tongue. Going over on the boat he sent for me. He was making up a gang.

Chairman TENNEY. You can't recall his name?

The WITNESS. Not just now. He worked for the Abbott Kinney Company in 1921 as a maintenance electrician. From there he went into a band and carried a card in Musicians Local 47.

Chairman TENNEY. I think that is all, Mr. Anderson. We thank you very much for coming before the Committee.

The WITNESS. I hope you can do something about it.

Mr. COMBS. We appreciate your cooperation very much. I will call Mr. Pine for a few more questions.

[3920] WILLIAM BRUCE PINE, having heretofore been duly sworn, was recalled for further examination.

Chairman TENNEY. You have already been sworn, Mr. Pine?

The WITNESS. Yes, sir.

By Mr. COMBS:

Q. You were here on Saturday, were you not?

A. Yes.

Q. Were you here during the entire time that Mr. Hans Wilhelm Rohl testified?

A. I was.

Q. Had you ever met that man before?

A. Yes, on several occasions.

Q. When did you first make his acquaintance? About how long ago?

A. I would say roughly, about 1933 or '34.

Q. And since the time that your acquaintance with him originated, have you met him on various occasions since?

A. Yes.

Q. Did you hear him testify specifically that he had never known a man by the name of Werner Plack?

A. I did.

Q. Did you ever know Werner Plack?

A. Yes, I knew Werner fairly well.

Q. When did you acquaintance with him commence?

A. I should say about the year 1935.

[3921] Q. What was his nationality, if you know?

A. He was German.

Q. Do you know whether or not Mr. Rohl and Mr. Plack were acquainted?

A. I know definitely they were acquainted.

Q. Did you see them together on several occasions?

A. I saw them together on one occasion, which naturally stands out in my mind, and the other occasions—so many years have gone by and I had no reason to mark the occasion, that I hesitate to testify definitely. But on one occasion I specifically saw them together because something occurred which made me remember it.

Q. Was that the occasion concerning which I questioned Mr. Rohl in your presence on Saturday?

A. That was the occasion.

Q. That was when Mr. Rohl and Mr. Plack came into the place commonly known as the Swing Club together?

A. Yes. It had been known as the Swing Club and then the name was changed to "1710 Club" which was the name of the same place.

Q. It was the same, identical place?

A. Yes, same identical place and the same identical building.

Q. About when was that? I mean when you saw them together there?

A. Well, I believe it was in the summer of either [3922] 1938 or 1939. The reason I recall that it must have been during the summer was because I had been to a baseball game earlier in the evening.

Q. Did Mr. Plack and Mr. Rohl come to that place together?

A. They came together with one other gentleman whom I did not recognize. He was a tall, distinguished looking, white haired man.

Q. What particular incident occurred at that time and place which called your attention to the fact that Mr. Rohl and Mr. Plack were together? Of course, you knew them both, did you not?

A. Yes, I knew them both. I might say I knew Plack at that time better than Rohl because I have never known Rohl intimately, although I met him many times and talked with him.

Q. What incident occurred which called your particular attention to the fact that they were together at that time and place?

A. Well, they ran a little floor show at the Swing Club and the floor show was going on when all of a sudden the orchestra leader stopped the music. He stopped the music and he stopped the floor show. The music changed, and all the girls in the floor show, including the band, sang, "Here comes Bill, here comes Bill, here comes Bill Rohl now," so that was why it was so vividly marked in my recollection, [3923] and with him were Werner Plack and the one other man who I never remember having seen before or since.

Mr. COMBS. That is all. Did they sit at the same table?

A. Oh, yes, they sat at the same table and rapidly acquired other guests.

Q. How long were they there?

A. Well, I think they were there for at least two hours, and they were still there when I left.

Q. Together?

A. Yes, together.

Mr. COMBS. That is all.

Chairman TENNEY. Thank you, Mr. Pine.

(Witness excused.)

Mr. COMBS. Mr. Flannery.

Chairman TENNEY. Will you please hold up your right hand and be sworn? Do you solemnly swear that the testimony you are about to give before the committee will be the truth, the whole truth, and nothing but the truth, so help you God?

Mr. FLANNERY. Yes.

[3924] HARRY FLANNERY, called as a witness by the Committee, having been first duly sworn, was examined and testified as follows:

Chairman TENNEY. Will you state your full name?

The WITNESS. Harry Flannery.

Chairman TENNEY. And your address, Mr. Flannery?

The WITNESS. 6766 Milner Road, Hollywood.

Chairman TENNEY. And your occupation?

The WITNESS. Radio news analyst.

Chairman TENNEY. All right, Mr. Combs.

By Mr. Combs:

Q. Mr. Flannery, how long have you resided in southern California?

A. A little short of a year.

Q. Prior to that time where was your residence?

A. Prior to that time my residence was in New York.

Q. And how long did you reside in New York immediately prior to coming to southern California?

A. From October, 1941, until I came here, which was in March of last year.

Q. And from where did you come when you established your last residence in New York?

A. From Berlin, Germany.

Q. And how long a time did you spend in Berlin, Germany?

A. Approximately a year.

Q. How did you happen to go there?

[3925] A. I was sent to Berlin as correspondent for the Columbia Broadcasting System.

Q. And was it your business to make broadcasts from Berlin?

A. Right.

Q. Which you did, of course?

A. Right.

Q. During the entire period you were there?

A. Yes.

Q. While there did you know a man by the name of Werner Plack?

A. I did.

Q. When did your acquaintance with him originate?

A. Early in 1941.

Q. That was when you first went to Berlin?

A. I had been there several months at that time. I arrived in 1940.

Q. How did you happen to make his acquaintance?

A. I made his acquaintance through Charlie Lanius of N. B. C.

Lanius had met Plack, who had just come to Berlin and was at the time connected with the radio department for the German foreign office.

Lanius brought Plack up to my room and I met him up there, and we talked afterwards. I met Plack a number of times principally because of his connections with radio for [3926] the foreign office. He was a censor and he also arranged programs. He arranged the Wodehouse release.

Q. Spell that, please.

A. P. G. Wodehouse, an English author who was released from an internment camp and then principally because of publicity he broadcast for the Germans. Plack arranged that.

Q. Plack arranged that?

A. Yes, he got the idea it would be a good stunt to release Wodehouse and make a little publicity out of it, because Wodehouse would be more listened to than some of the Germans who were on the air, and they might, thereby be able to get over their story better.

He also planned, so far as I know, to put on Luckner, the Sea Devil—Count Felix von Luckner, who is well known in this country and who has been well liked; also the Crown Prince.

Q. The Crown Prince of Germany?

A. Yes; one of the Eckeners and a number of others of that same kind, figuring that these people would get audiences in the United States and German propaganda would be more listened to.

Q. Do you know whether or not Werner Plack had any connection with Fritz Weidemann at any time?

A. Not from personal knowledge, although I understand he was connected with Fritz Weidemann before he left California.

[3927] He principally sold wines here. He came out here to go into the movies but found out that he wasn't able to get into the movies and instead made connections by selling wine, German wines, principally.

Q. Do you know whether or not Werner Plack had any connection with Dr. Geisling, the German consul, while in the United States?

A. I know nothing of that.

Q. Now, will you please describe in detail, Mr. Flannery, just what duties Plack had to perform in connection with his position with the German foreign office while you were in Berlin?

A. Well, his principal duties were to arrange broadcasts to go to the United States.

Q. Yes.

A. He was not the head of that department. The head of that department was a fellow by the name of Lilyenfeldt. His first name escapes me—George von Lilyenfeldt. At times when Lilyenfeldt was away Plack had complete charge of the department for the foreign office.

For several months, three or four months after the Russian campaign had begun, Lilyenfeldt, who had been a resident of the Baltic States, was sent up there to do some work, and during that period Plack was completely in charge of the radio department.

Among his duties was to act as a censor for the foreign [3928] office for radio broadcasts to the United States.

I might mention that at least one-third of the times that he came out to do the censoring he was drunk and a few occasions he was so tight he could not read my copy, and one night he asked me to read it to him, which was very foolish. I could have read him anything and he would have O. K.'d it, except he thought something should be changed in it, so he suggested, "Let us change this thing up here," and he started scratching out stuff. I had to stop him because I could not read anything after he would get through with that sort of thing.

In addition to acting as censor he was one of the contact men for us who would arrange for us to go on various trips. For instance, when Matsuoko came there he arranged the trip for me. We met Matsuoko and went down to Potsdam and he would always arrange those things, whereby we would be able to make other trips and make other contacts and so forth.

The foreign office propaganda ministry had men for that particular purpose. Their job also was trying to make us fellows feel better and thereby hoping we might be sold more on Nazi Germany.

They had men selected for that purpose to try to sell the correspondents.

Q. Was Plack one of those men?

A. Plack was one of those men. Of course Plack liked it very well because it gave him a big expense account.

[3929] Q. He was rather convivially inclined?

A. Oh, yes, he would like a job of that kind.

Q. As a matter of fact, you mentioned Plack in your books, "Assignment to Berlin," did you not?

A. That is right.

Q. How is the book doing?

A. Pretty well, thank you.

Q. A very interesting book.

A. Thank you.

Q. When did you come back from Germany?

A. I arrived back here October 14. I left Berlin September 29, 1941.

Q. Do you know at all how long it was after Werner Plack arrived in Germany that he obtained this position in the German foreign office?

A. As far as I know, it was immediately.

Q. Immediately upon his arriving?

A. I know of no lapse in between. Of course, there may have been, but I know of none.

Q. Do you know when he arrived there, about?

A. No. I estimate it was—that is pretty difficult for me to place, because I don't seem to be able to connect it with anything except the fact I mentioned Lanlus—that Lanlus did not arrive until early in 1941 and that I met him with Lanlus, so I know it was early in 1941, but I cannot place it more definitely than that. I can't set it as to what [3930] part of January or whenever it was.

Chairman TENNEY. It was early in 1941?

The WITNESS. Early in 1941, yes.

Q. By Mr. COMBS. Mr. Flannery, in your conversations with Werner Plack from time to time, did he ever boastfully mention any of his propaganda activities in the United States—and of his pro-German activities in the United States?

A. Yes, in a certain respect. He is a peculiar fellow. He had an article from one of the magazines over here. I think it was one of the movies magazines. I am not sure of that. I remember he had it. He had all kinds of American magazines, particular Vogue, which he liked to show to the ladies, in which there was an article about German people who had operated in the United States, and accused them of espionage, and merely among the names down at the end was "Werner Plack," which he seemed to be very proud of. He took it around and showed it to everybody. It did not in any way speak very respectfully of Mr. Plack but he did not seem to be bothered by that fact.

Q. I think that is all, Mr. Flannery, unless you have something to add, which you think might be helpful to the committee.

A. I think that is about all. Oh, there is one thing we might put in. This is a story he told us when he first met us there—how he left the country.

[3931] Q. Yes.

A. He left under considerable cloud. He said that all of his telephone calls had been checked and he said that he had been making them to girls. He was always talking about how he got along with the ladies, and he had been making telephone calls all over the country to the girls he knew, but he said that the F. B. I. was suspicious and that he had been grilled so much that he had not been able to sleep one night before he left on the boat, and that when he did get on the boat the F. B. I. continued to grill him and to go over all his papers that he was taking back with him and that he had a lot of American cigarettes—the Germans like American cigarettes, and that they had broken every second cigarette in two to see whether he had anything in them. And he also told about the incident in which he was in one of the night clubs here and some resident of Hollywood came up to him and said, "There you are, you dirty Nazi," and slugged him, and Plack contends that because he was behind one of these large tables that the waiters usually move so you can't get up and, therefore, he was taken advantage of or he would have done something in return. He did nothing, apparently.

I think that is about everything.

Q. Did he tell you or didn't he tell you how he came from the United States to Berlin? Did he immediately go to Germany or did he go by way of circuitous route?

A. He went by way of Japan and Russia.

[3932] He went from Japan to Russia and then to Germany?

A. Yes, that is right. Russia wasn't in the war at that time and apparently, therefore, came from San Francisco.

Mr. COMBS. I think that is all, Mr. Flannery. We thank you very, very much for your cooperation.

[3933] Chairman TENNEY. Call your next witness, Mr. Combs.

Mr. COMBS. Dr. Lechner.

Chairman TENNEY. Will you come forward and be sworn, Dr. Lechner?

Do you solemnly swear that the testimony you are about to give before the Committee, will be the truth, the whole truth and nothing but the truth, so help you God?

Dr. LECHNER. I do.

JOHN R. LECHNER, called as a witness on behalf of the Committee, being first duly sworn, testified as follows:

Chairman TENNEY. Will you state your full name?

The WITNESS. John R. Lechner.

Chairman TENNEY. And your residence address.

The WITNESS. 332 West 64th Street, Inglewood.

Chairman TENNEY. And your business address.

The WITNESS. 838 South Grand Avenue.

Chairman TENNEY. And your occupation.

The WITNESS. Executive director of the Americanism Educational League.

Chairman TENNEY. All right, Mr. Combs.

By Mr. COMBS:

Q. How long, Dr. Lechner, have you held your present position with the League?

A. Sixteen years.

Q. Sixteen years continuously?

A. That is right, yes.

[3934] Q. And during that period of time will you describe what the general nature of your duties have been?

A. Primarily the investigation of un-American activities in this area and the interpretation to the general public through public meetings and literature of those activities.

Q. How, generally, have you gained your information concerning subversive activities in this area?

A. For the most part we have very splendid sources of information through our contacts with fact-finding groups—responsible groups. For example on the Japanese situation we have worked very closely with Mr. Kilsoo K. Haan and his counter-espionage group against the Japanese.

Q. Kilsoo Haan is a Korean, is he not?

A. Yes.

Q. Do you know whether at any time he was employed by the Foreign Office of the Japanese Empire?

A. For three years, yes. He was with the consular office of the Honolulu Japanese government.

Q. During that time was he doing any espionage work?

A. Yes, sir.

Q. Counter-espionage work?

A. Counter-espionage work, yes.

Q. And he has quite a large group of individual workers working as informants under his direction?

A. Yes, sir.

[3935] Q. And has had for a number of years?

A. Yes, sir.

Q. And he fluently reads and writes the Japanese language, does he not?

A. Yes, sir.

Q. When did you last see Kilsoo Haan?

A. Friday night of this past week.

Q. Last Friday night?

A. Yes.

Q. And he left this vicinity Saturday morning, did he not, for Washington?

A. Yes; he left for Washington, D. C.

2862 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. And how long a time did you spend with him on the occasion of his visit here?

A. He was here four weeks this time.

Q. Were you with him in Senator Tenney's office when you and I and Kilsoo Haan had a conference?

A. Yes, I was.

Q. And was that on Thursday of last week?

A. That was Thursday of last week, yes.

Q. And were you with Kilsoo Haan and Senator Tenney when you and I and Kilsoo Haan had a conference on Friday of last week?

A. Yes, sir.

Q. Were you present at that time and place when I put Kilsoo Haan under oath?

[3936] A. I was.

Q. And he gave his statement as a sworn statement?

A. Yes, sir.

Q. And that conference on Friday lasted about how long?

A. Two hours.

Q. And we discussed at that time and place the testimony which you intended to give heretoday?

A. Yes, sir.

Q. Did you bring with you, Doctor, photostatic copies of documents which you obtained from Kilsoo Haan?

A. Yes, sir. I also brought here a report which we just had published on behalf of the American Legion. It is the inside story of the Japanese problem, which I should like to have entered in the record here.

Q. Who is the author of this report?

A. I am.

Q. The report deals with what basic subject?

A. It deals primarily with the Japanese-American situation—the Japanese-American citizen problem on the Coast.

Q. On the Pacific Coast?

A. Yes. Both the psychological aspect and the subversive organizations existing here on the Coast in which the Japanese-Americans took a primary part.

Q. When did this publication come off the press?

A. About three weeks ago.

Mr. COMBS. Mr. Chairman, I ask this report be received [3937] as an exhibit for the Committee in connection with the testimony of Dr. Lechner.

Chairman TENNEY. The report will be attached to the Committee's transcript and marked "Dr. Lechner, Exhibit No. 1."

(The report referred to was marked "Dr. Lechner Exhibit 1, and made a part hereof.)

Q. By Mr. COMBS. The material set forth in this report, Dr. Lechner, is predicated, I take it, on documents and photostats and the reports of informants, that came to you in connection with your capacity with the League?

A. Yes, sir. It came from various sources. You understand, of course, that during a long period like that we would have open to us sources of information not only from men like Haan but from Japanese themselves.

Q. And a great deal of your information did come from Japanese informants?

A. Yes, sir. We have been studying this problem for many years; long before there was a thought of war on the part of our people.

Q. As a matter of fact from some of the information you obtained you accurately predicted the occurrence of war and the attack on Pearl Harbor, did you not?

A. As a matter of fact on March 15, 1941, we released an Associated Press story, which was a front page story, that went all over the country, telling of the inevitability of the war, giving the Japanese plans of attack on Pearl Harbor [3938] and even suggested in a chronological scale the time they had set for it to take place. We stated that they had set aside December for that attack.

Q. With an alternative date?

A. In February 1942 in case that didn't work out.

Q. In your opinion, Dr. Lechner, based on your experience and activities as you have related, is there a tendency now on the part of the American public to soften its attitude toward American born Japanese in internment camps—internment centers?

A. There is a tremendous movement on foot, Mr. Combs, to soften up the American people to placate the local Japanese. If I may be permitted as you ask questions, to give some of the information we have on that matter, I think it would be helpful. I would like to name some of the organization involved in that very definite program—a very definitely programmed approach to the softening up process.

Q. Before you make a statement, Dr. Lechner, let me ask you whether or not your information indicates that Japanese propagandists have taken advantage of that tendency on the part of the American public to soften its attitude toward Japanese internees.

A. The Japanese have certainly taken advantage of it. I have here the notes which were made by a Japanese-American citizen in one of the camps. These are the actual notes.

(Handing sheaf of papers to Mr. Combs.)

[3939] Q. Are these notes in your informant's own handwriting?

A. They are in his own handwriting. This is the situation, if I may explain it. The government decreed that the Japanese-American citizen and other Japanese in evacuation centers were not permitted to listen to broadcasts (but the government gave permission to small groups to appoint committees to listen and to go over the broadcasts of the day and then in turn to re-broadcast over a camp radio broadcasting station the news for the day.

These notes are most significant in that all of the information, or practically all the information, given to the Japanese evacuees in that internment camp was very much colored pro-Jap. Many of the statements which I have checked in the notes, contain conclusions that are definitely in favor of the Japanese. Such things as "Russia is ready to pull out of the war," and that Australia was going to be taken, and building up the Japanese cause so as to give encouragement in building the morale of the internees—both Japanese-Americans and Japanese aliens.

Q. You gave me this sheaf of notes last Friday, did you not?

A. Yes, sir, I did.

Q. And I have had them ever since and have just handed them back to you this morning?

A. Yes, sir.

[3940] Q. And have you read them in their entirety?

A. Yes, I have.

Q. Have you seen any single statement any place in these notes detrimental to the Japanese war effort?

A. In all those pages, representing, I should say, twenty-five or thirty pages, there is not a single statement that is detrimental to Japan.

Q. Are all of the statements made in these notes generally pro-Axis?

A. They are generally pro-Axis.

Q. And are generally anti-Ally?

A. Yes. I may point out one other very interesting thing there. You will notice on the bottom of each page there a notation of the number of ships that are lost and the number of planes that were brought down. In every case the ships are listed only on the part of the Allies.

The United States ships and the British ships and the planes reported there, are those that came down here in this country. In one instance the broadcaster has four different crashes listed. Always the losses are American planes or British planes.

Q. Never any Jap losses?

A. No.

Q. And no record of any Jap ships sunk?

A. No record of Jap ship sunk, no.

Q. Now, this individual in this Japanese internment [3941] center made these broadcasts in the American language or in the Japanese language?

A. Made them in the Japanese language.

Q. Did he make them daily?

A. Yes, he made them daily.

Q. Of course I shall not ask you for the name of the camp nor the name of the informant nor the name of the person who made the broadcasts, but you have that information available?

A. Yes, I have that information.

Q. Do you have any objection to my reading some excerpts into the record?

A. Very happy to have you do so.

2864 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Q. This particular broadcast is under date of August 6, 1942. I think you testified these are the original notes in the handwriting of the Japanese broadcaster.

A. Yes. He is a Japanese-American citizen.

Q. A Nisei?

A. Yes, a Nisei.

Q. "France might as well fly the Swastika." "Tokio is waiting for a complete collapse of the Soviet." "When the Japanese attack Siberia it will be sudden and decisive." "Japanese Russian propaganda is very active against communism and the communist United States." "When Russia is beaten she will become like China." "Britain after losing Singapore and Hong Kong cannot expect to get them back in British hands [3942] again." "Why India should remain under British rule to make India a British sphere which will eventually turn India into future British frontier?" "Unless Britain can influence Jinah and Nehru against Gandhi's idea, which is too late, Britain cannot turn India's tide to British satisfaction." "Big, important meeting in Moscow is another development of Allies discord." "Nazi blitz speed is astonishing."

On the same date: "The Australian forces are not strong enough to check Japanese invasion."

Under date of August 5, 1942: "All of the Pacific will be blacked out and the Japanese may attack the Pacific Coast with submarines."

"Japanese air forces is wiping out the United States-Chinese air force."

"Japanese activities in Australia is on increase. The Australians say the air strength is not sufficient to check the Japanese assault."

The same date: "Japanese planes attack Queensland for the first time."

"Four Japanese planes bomb Tourinville. Japanese also bomb Darwin. Japanese threat via Buna also serious."

"One-twentieth of United States population in Australia. Japanese secretly landed in Australia a month ago when Japanese landed in New Guinea. Japanese again landed at Buna. Allies have not checked their threat. New United States plane, Mustang, 1,400 horsepower, may out-do Japanese [3943] Zero. Burma Japanese may invade into China or India."

August 4th, 1942: "Japanese destroy 55,000 tons of Allied shipping in last week. Japanese sent more reinforcements. Allies blasting Buna-Gona area. Japanese submarine sinks British ship. Another large naval engagement coming. British attack Burma force and lose."

Same date: "Big quake in north island of New Zealand. Japanese cruiser was bombed for second time, but Japanese established an air field in Cocoda." Gandhi says, 'unless Allies gives complete independence India may welcome Japs. The Japanese in Burma are preparing to start fresh movement into India. Next Friday is the dead-line for India's independence. 219 Japanese planes attacked United States air base.'

July 29th, 1942: "Goebel says: 'Nazi welcomes the British in Europe; even the Yankees if they want to taste German punch.'"

July 28, 1942: "Japanese landed in Australia in submarine. In New Guinea Japanese set up at Cocoda upland, fifty miles from Moresby. Japanese attack Darwin and Tourinville. In New Guinea the Japanese are advancing by bicycle troops."

July 27, 1942: "Allies attack Buna. More Japanese landed at Buna; more at Gona, 160 miles north of Gona. Japanese attack British force near Moresby. Tojo said: 'Japan holds the initiative in western Aleutians; Japan will [3944] go the limit to crush the United States and Britain. Chunking bombed by fifty Japanese bombers. United States planes countered.'"

The same date: "United States losing this war because they cannot fill orders for spare parts. Nazi using transport planes. United States is trying to convert bombers into cargo planes. C. I. O. auto workers union demands double pay for Saturdays, Sundays and holidays. During the first six months of the war 4,000 seamen's lives were lost. Indian situation is more critical. Gandhi demands negotiation with British to grant India complete and immediate independence or India will become turmoil of trouble. Our (United States) June production is behind schedule. Gandhi says 'Britain is India's friend.' India neither sides with or rejects the United States or the Axis countries. India asks United States, China and Stalin to induce British to accept India's independence plea, but no one acts. Gandhi has political power but not military power—naturally, India relies on Japanese aid. Britain today ordered all essential commodity dealers closed. What next!"

July 25, 1942: "United States citizens arrived in east Africa. Japanese occupies Buna-Gona. 18 Japanese bombers and 8 Zeros attack Moresby."

July 21, 1942: "Japanese attacked Port Moresby with 41 planes. 'Don't neglect Australia for Japanese pilots are darn good and are a good match for United States flyers.'"

[3945] This is under date of July 19, 1942: "Japanese carried out their plan. India will become yoke of Japan after this Friday."

August 7th, 1942: "Only one percent of United States production, or three days production in Australia. How can Australia stop the Japanese?"

Same date: "United States losing this war unless it can produce more war material, and the United States can make this a total war. Only a trickle of supplies coming to Australia. Japanese are undoubtedly occupying many important coastal regions on continent of Australia. We are beaten in India, Turkey, and losing in Siberia and Australia. If Russia gives in the United States must lose China and Australian interests. There may be a negotiated peace!"

And there are many other excerpts I could read, Dr. Lechner, but I think that will suffice to show the general character of the broadcasts which were made by this Japanese-American citizen in an American internment center.

Chairman TENNEY. Dr. Lechner, is there any censorship of the broadcasts made by this announcer in the internment center where these broadcasts were made, by the authorities?

The WITNESS. No censorship whatever on the part of the War Relocation authorities. The little group of five or six in this particular camp were given autonomous power in the matter of broadcasts.

Chairman TENNEY. Is that under the Army or under [3946] civilian control?

The WITNESS. It is under civilian control—under civilian administration.

Chairman TENNEY. Do you feel the Army would permit that sort of thing?

The WITNESS. No, sir; I think we are making a big mistake, if I may give my opinion here, in taking away the administration of these camps by the Army and placing it in civilian hands. For example on July 4th, 1942, in Inyo County, near our aqueduct, a strategic area, as far as we are concerned, Mr. Meyers came out here, who had at no time before his experience with the War Relocation Board or Authority, had anything to do with the Japanese—he came out here as an expert in charge of the Japanese in the relocation centers.

Mr. Meyers delivered an address on the 4th of July, apologizing to the 12,000 Japanese at Manzanar, for the big mistake the Government had made in evacuating them in the first place.

Chairman TENNEY. Which Meyers was that?

The WITNESS. I don't recall his first name. I have his name, however, and can supply you with it at the next session.

Chairman TENNEY. I think we are going to close after your testimony. You may proceed, Mr. Combs.

By Mr. COMBS:

Q. Dr. Lechner, in your opinion should [3947] American-born Japanese be released through the relocation authority of the Federal Government any time while this war is in progress?

A. Should they be released from the internment centers?

Q. Yes.

A. I believe that every able-bodied Japanese who is not considered by the various government agencies as a real dangerous Japanese, who has not been connected in the past with propaganda activities or sabotage, should be released but placed in certain sections in the interior of the country, under Army control, and put to work in agricultural work. But they should not be released as they are being released now. 1300 of them were released to go to universities. They are absolutely free and are getting more money than they know what to do with together with free scholarships, while our boys are fighting in the Solomons and elsewhere. These Japanese are enjoying a university career with their way paid by our Government while our own boys are fighting all over the world.

I think every able-bodied Japanese male should be put to work, but under strict Army control.

At the present time there is no control. At Manzanar for example, my report shows, and I believe it was verified by Congressman Leland Ford, who issued a statement for the Congressional Record just before he finished his term, stated that groups of ten, twelve or fifteen Japanese were allowed [3948] to go

through Inyo County in trucks without restriction whatever, and the people of that county objected to there being no control of them at all.

Q. Last year, Dr. Lechner, and shortly prior to the time the Japanese in this area were interned, the Committee held a hearing in Los Angeles for the purpose of placing in its sworn records, the ideology and fanatic attitude of the average Japanese on the Pacific coast. Among the witnesses who testified were Togo Tenaga and Fred Tayama—

A. I know them very well.

Q. When did you first become acquainted with Togo Tenaga?

A. About three years ago.

Q. At that time was he one of the editors of Rafu Shimpō?

A. He was editor in Los Angeles.

Q. That was a newspaper, was it not?

A. A daily newspaper, yes.

Q. A Japanese daily newspaper, and it was published in Los Angeles?

A. Yes, in Los Angeles.

Q. And disseminated all up and down the Pacific coast?

A. Yes, sir.

Q. Togo Tenaga was a Nisei, was he not?

A. Yes. A graduate of the University of California.

Q. Now, in 1941 did the Rafu Shimpō publish a directory?

[3949] A. Yes.

Q. Was the directory printed in the United States or in Japan?

A. In Japan.

Q. And the one with a cardboard slip cover the committee has a copy of?

A. Yes.

Q. I am just getting these facts in the record.

A. Yes; I understand.

Q. And it had a stamp on it "made in Japan?"

A. Yes; that is right.

Q. Now, when the committee asked Togo Tenaga to produce a copy of the 1941 Rafu Shimpō directory, he did so, but in preparing the copy which he produced with the copy of the committee already had, we found that certain pages had been taken out of the Tenaga copy, those pages being a folding page in colors of the Imperial family of Japan and on the next page there was a large Japanese ideograph which, when translated, meant "Japanese supremacy in the Pacific Sphere."

You are familiar with that?

A. Yes, I am.

Q. And do you know that that translation is substantially accurate?

A. I do; it is.

Q. Now, what did the bulk of that directory contain, if you know, Dr. Lechner?

[3950] A. It comprised, of course, the names of Japanese firms in this country dealing with Japanese firms in Japan proper.

Q. Tenaga, under examination, testified that in his opinion that directory was nine-tenths subversive. Does that tally with the information in your possession concerning that publication?

A. That is right. You asked something about the spirit or morale of the Japanese. I have something here which you may be interested in.

Q. Would you like to read it into the record? How long is it?

A. It is very short.

Q. Will you read it into the record, please?

A. It is regarding the national philosophy which is injected or, rather, instilled into all Japanese, whether they be American citizens or not.

In the case of American citizens it is instilled through Japanese language schools. It is called the "Shinto Faith." It is stated to be a faith but it is not a religion. It is a State philosophy and holds, of course, that the Emperor is the direct descendant of the Sun Goddess and by virtue of that fact every Japanese is of divine origin and owes his allegiance to the Japanese Emperor.

We have read that on many occasions but have failed to look into the deeper aspects of it. It is actually the [3951] controlling force in the life of the Japanese; and that is also the case with the Japanese who are living in this country. For example, there were more than 19,000 boys and girls of Japanese parents, born in California, who attended Japanese language schools before the war. In Hawaii out of 46,670 boys and girls of Japanese extraction attending American schools, 43,000 were going to Japanese schools at the same time.

If I may give this expert's opinion and testimony of the Shinto Faith, which bears out all of the information that we have. It is by Dr. Shunzo Sakamaki, Assistant Professor of History of the University of Hawaii.

Q. When was that published?

A. This was published in the Honolulu Star-Bulletin on April 25, 1942.

At the beginning of 1941 the Japanese Imperial Government issued an edict declaring all Shinto priests in the United States and Hawaii and all Japanese language school teachers were from that date (and that was in January) were to be considered as officials of the Japanese government. In other words they took them openly out of the field of religion and made them agents of the Japanese government, thereby changing their status, so far as we were concerned, of all language schools to centers of Japanese espionage and propaganda.

Dr. Sakamaki said, in part: "Why have Japanese officials for the past two generations been so eager to protect the [3952] special status of State Shinto? Why have they insisted that State Shinto is not a religion but the embodiment of Japanese patriotism?"

"Basically, the reason is that the Japanese government has been in Shinto a political tool of the greatest potency for keeping the fires of nationalism burning at white heat and making the doctrine of political absolutism in Japan virtually inviolable."

"* * * Japan's constitution of 1890 guarantees freedom of religious worship, but the government has taken the position that State Shinto is not a religion and that, therefore, all Japanese must participate in State Shinto ceremonies, as part of their patriotic duty to the state."

"* * * Operation of State Shinto here is inimical to American interests because it both directly and indirectly fosters Japanese nationalism, and arguments by Shinto champions that we cannot infringe their right to free worship contradict responsible pronouncements by Japanese officials denying the religious status of State Shinto."

"We are at war with Japan, and State Shinto is an arm of the government of Japan. Amputation of that arm here in Hawaii is a prerogative of our government that cannot consistently be protested by the government of Japan."

I might add that this particular philosophy of the State is so thoroughly instilled in most Japanese, regardless of whether in California or some other place, that it confronts [3953] us with a paramount problem to determine just to what degree the Japanese are loyal and to what degree they are disloyal.

An external manifestation of that problem is in dual citizenship. When Togo Tenaga and Fred Tayama admitted to me before a committee of Japanese they didn't know how many dual citizens there were, they did admit that the majority held dual citizenship.

In 1924 the Japanese government told the Japanese in this country to register their children with the Japanese consuls so that they might hold dual citizenship. In the first ten years in Hawaii, after the law was established, less than 5 percent of the Japanese were registered with the foreign office of the Territory of Hawaii. We have those figures. That is a matter of record.

Q. What other activities did Togo Tenaga engage in in southern California, in addition to being the English language editor of the Shimpō?

A. Togo Tenaga was the front man for the Japanese. We called on him and Fred Tayama and asked them to demonstrate the sincerity of their particular group by cooperating with our Federal Government.

Q. What was the name of that group?

A. Japanese-American Citizens League.

Q. The Japanese-American Citizens League?

A. That is right. And in order to put the Japanese on a test, and I was asked confidentially by a source from [3954] Washington if I would do that, we called two or three conferences of Japanese Americans under the leadership of Tayama, who was then chairman or president of the League, and Togo Tenaga as spear-head of the organization. We had two or three meetings. One was on April 15, 1941. We had a little dinner in Little Tokio to arrange a meeting. A mass meeting subsequently was held on May 10 at the Hollywood-American Legion Clubhouse. It was attended by over 1,000 Nisei—second generation Japanese.

The purpose of this meeting was to challenge the second generation Japanese, who were professing then through meetings all over, before service clubs and in publications, that they were completely loyal to the United States. We challenged them to set up an inner committee among the Japanese-Americans to give our Government information on Japanese subversive organizations within California and within this area.

In the first place, in the series of two conferences before this meeting at the Hollywood Legion Clubhouse, and my office, both Tenaga and Tayama denied the existence of any Japanese subversive organizations in California, and then I openly challenged the 1,000 Nisei and told them unless we could get that cooperation voluntarily and they cleaned up their own ranks, and because of the inevitability of war, from records we had which all indicated there would be a war, that it would be very bad and very hard on the Japanese-Americans if they did not do so. In other words, they would [3955] have to undergo tremendous changes in their whole sociological structure, and we challenged them to set up the organization for this work and we were turned down flatly.

I have here a program of that particular meeting together with the names who participated in the organizations represented.

Q. I would like to introduce this into the record as Exhibit 2 in connection with Dr. Lechner's testimony.

Chairman TENNEY. This will be marked Dr. Lechner Exhibit 2.

(The document referred to was marked "Dr. Lechner Exhibit No. 2," and made a part hereof.)

The WITNESS. I have here a list, to demonstrate the accuracy of the figures of the Hawaiian situation. These are the names of the Japanese language schools in Hawaii, with the addresses of the schools and the names of the principals. I would like to keep this for my record, but you may glance at it.

Q. Yes.

Chairman TENNEY. Are you introducing that as an exhibit?

The WITNESS. No; it is not necessary.

By Mr. COMBS:

Q. What is meant by "the age of moral responsibility" in computing the percentage of loyal as contra-distinguished from disloyal American-born Japanese?

A. That is a relative matter. In the opinion of some [3956] of the experts with whom I have spoken they say, "Well, we will compute the age of moral responsibility as far as Japanese are concerned, at 17. Below 17 a Japanese-American citizen is not considered to be experienced, primarily in a political structure in this country or in Japan, although he has been given the infusion of Japanism, but he is not actively engaged in organizations."

So, if we consider that, we find that out of 96,000 Japanese-American citizens, in computing the percentage of loyalty and disloyalty among the Nisei, we must remember that approximately 45 percent of the 96,000 are below what we term there, "the age of moral responsibility," so that if, as we show in this report, have two organizations alone had over 12,000 members, then the percentage is not as 12 to 96 but as 12 to 45.

I bring that point out because we make a big mistake in all of our newspaper stories because we fail to take into consideration the fact that 45 percent are below the typical group who would be engaged in subversive activities.

By Mr. COMBS:

Q. Do you have any information or any proof to the effect that plans were made in Japan to finance and direct the education of Nisei in the United States?

A. Yes, very, very definite proof on that. I have here two Japanese documents which were translated, and I have the translation of this particular report. It is on page 5 of the report.

[3957] Q. And you have a photostatic copy of the original Japanese document?

A. Yes.

Q. Which was used as a basis for those translations?

A. Yes; there are three organizations; The Institute for the Education of Over-sea Japanese, the General Board of Overseas Association and Imperial Educational Association. All of these have headquarters, and the main headquarters is in Tokio. They were well financed by the Japanese government. The only purpose is to direct the education of Nisei in the United States and Hawaii from Tokio.

We uncovered a document, by the way, in El Centro, in 1941 which is called, "The Future Road of Nisei." If I may give you that, that will tell the importance of these organizations which are so well financed. This book was discovered in the hands of Japanese agents in El Centro and through one of the men with whom we worked we were able to get a copy of it.

It was endorsed by General Sugiyama, Japanese Imperial Army chief of staff, and Tokashi Zuzuki, Director of Kinmon Gakuin, one of the leading schools of Japanese language in San Francisco.

This was to show the Nisei the appreciation of the Japanese government for the work they were doing.

There was quite a bit of difficulty here in the relations between Japan and the United States after Japan stepped [3958] into China and started their aggressive program, so the Japanese government, according to the information we have, documentary information, demanded that the Nisei soften the public opinion on the part of Americans with reference to that.

"Several hundred lectures have been delivered on the China incident by Nisei in America.

"Many Nisei also returned to Japan with a mass of material collected in California.

"Things of this sort are typical of the work performed in the past by the Nisei for Japan. What they gain and what they do is by no means unimportant. The Nisei have made significant contributions to Japan, but in many cases these facts must remain hidden.

"When the China incident occurred, it became necessary to broadcast to the world the news in the English language. At this most crucial moment the Nisei did the work by assuming responsibility as is befitting great patriots.

"The role of Nisei at the present moment is of utmost importance. Nisei always take the leadership. In the world where English language newspapers and magazines are most influential, the Nisei are in an excellent position to do their share.

"We have seen to it that they shall be well prepared for their task."

And I would like to enter this as a matter of record.

[3959] (Handing paper to Mr. Combs.)

Mr. COMBS. They are in the Japanese language and I will offer them as an exhibit in connection with the testimony of Dr. Lechner.

The WITNESS. And the translation, by the way, you will find on page 5 of this record.

Chairman TENNEY. Let them be marked Dr. Lechner Exhibits 3 and 4.

(The documents referred to were marked as "Dr. Lechner Exhibits No. 3 and No. 4," and were made a part of the record hereof.)

By Mr. COMBS:

Q. Do you have any information regarding trips made by Nisei or Kibel to Japan?

A. Yes.

Q. For the purpose of indoctrination and instruction and returning to disseminate propaganda in the United States?

A. Yes. The term "Kibel" is applied to the Japanese-American who has gone back to Japan at the request of some organization connected with Japan, or directly by the Japanese government itself.

In the State of California there are eleven distinct, separate Kibel organizations, and they are listed here.

Q. On what page?

A. Page 7.

Q. Page 7 of your report?

A. Yes. There were so many Japanese in 1938—that [3960] is Japanese-Americans, who were in Japan visiting and studying in Japan, that two organizations, locally, got together because of the American situation with which they were confronted. People asked, "Where is Togo?" And "Where is Harry," and so on, and these young Japanese boys were in Japan. The record shows here that there were at one time as many as 20,000 Japanese-American boys in Japan, and the situation was so embarrassing that two organizations, the Japanese Chamber of Commerce and Japanese Association of Los Angeles, in 1938, appointed a delegate and sent him to Japan to plead with the Japanese government to send some of these boys back as fast as the Japanese government could, to avoid suspicion and embarrassment here in California. At that time, in 1938, there were 20,000 Japanese-Americans studying in Japan. It was presumably cultural training but we know in reality they were getting the final dose of Japanism preparatory to the war.

Chairman TENNEY. That was in 1938?

The WITNESS. Yes, 1938.

By Mr. COMBS:

Q. Do you have in your possession any document or report setting forth what transpired when a group of Japanese went to Japan for that sort of indoctrination?

A. I have a very important document here. May I qualify the introduction of this document with this statement: Here we have pressure brought to bear on the American Government to release Japanese-Americans because there is no indication at all of any subversive activities or sabotage having been committed after Japan attacked this country. They say most of them are loyal—in fact, all are loyal.

There was a group of 400 from this country and 500 from Tokio itself and the Japanese area. These 900 Japanese-Americans were called to a conference in Japan. I have the translation here of a Japanese release. It was reprinted in English by the Hawaiian Hochi on October 8, 1940.

The Hawaiian Hochi is an agency of the Domei News Agency of Japan.

Q. It is printed in Honolulu?

A. Yes, and it elaborates on this evidence here which I should like to submit because it is quite important. At this particular conference held in Tokio, and this is a report of it, the Japanese-Americans, 900 of them, were put through a course of study for a few days and committees were appointed to lead the Japanese-Americans in preparation of this move. The course of study was the Japanese plan of attack on the Dutch East Indies, and here is a very interesting Japanese way of presenting their thoughts to the Japanese-Americans.

Page 1 contains the name of a Japanese officer and a group photograph of important officials. 2 contains a map of the Dutch East Indies and you will notice this umbrella over it all. That is the Oriental way of showing how the Japanese are going to smash whatever the British and Dutch holdings there are.

[3962] The first page shows a cartoon of how the Dutch and English will dynamite oil wells, and there is a very interesting thing here. This brings out the fact that although the British and the Dutch believe that dynamiting the oil wells in the event of a Japanese attack will cripple Japan, this report here shows that is just what they want because they would dynamite the wells themselves to get higher octane gasoline by going down to the lower levels, and that is an explanation of that.

I don't need to go into the rest of it, but I do want, with your permission, to turn it over to the Committee.

Chairman TENNEY. You are turning it over to the Committee, Dr. Lechner?

The WITNESS. Yes, sir.

Chairman TENNEY. That will be received as Exhibit No. 5 to the testimony of Dr. Lechner.

(The document referred to was marked "Dr. Lechner Exhibit No. 5 and made a part hereof.)

Mr. COMBS. Exhibit 5 is a group of photostats handed to me by Dr. Lechner with the translation in English.

Chairman TENNEY. What was the date of that conference?

The WITNESS. The conference would run the first two weeks in October. This report is dated October 18, 1940. The report of this conference that we are talking about now, and which is in the record, was published and distributed by the Japanese Overseas Association. That is the association [3963] of which we spoke a moment ago. It was distributed for the Nisei. It was published in February, 1941. (This is important, Mr. Chairman, for this reason, that the 400 Japanese-American citizens coming from this country and the 500 Japanese-American citizens residing temporarily in Tokio, knew of the Japanese plans to attack the Dutch East Indies and were given the complete details. There is nothing in the records of our Government that we can find anywhere of the so-called loyal American citizens ever reported these plans to our Federal Government.)

By Mr. COMBS:

Q. Now, Dr. Lechner, there is at the present time a definite, nationally organized movement to soften the American public against the time when the Japanese-Americans will be released from these internment centers, is there not?

A. A tremendously powerful movement.

Q. Will you describe that briefly, please?

A. Yes. There are several organizations who are now engaged in a campaign to discredit the United States Army policy to evacuate the Japanese and the entire policy of the Government holding the Japanese in concentration or restricted areas.

This group is comprised largely of church and educational leaders.

Here is an article which was written by Norman Thomas, head of the Socialist Party, and distributed by the Post War [3964] Council.

I understand that several hundred thousand were sent out. This is a scathing indictment against the United States policy employed so far as the Japanese are concerned, and he advocates the immediate release of all Japanese-Americans, the Churchmen's Committee for Christian Peace, and the president of that is Dr. Albert Palmer, the head of the Chicago Seminary. Two months ago Dr. Palmer announced that he had over 1600 leading ministers in this country who had signed up as active members. Palmer's statement on the unconditional surrender of Japan is this, and it is described. In such things as these we are getting the first announcement of a very carefully worked out plan of all of these groups I am going to mention, for a negotiated peace with Japan. In speaking of unconditional surrender he said, "This goal is not likely to be reached by any method of total military victory; some kind of negotiated peace is a desirable alternative." This statement was made in December, 1942.

They claim to have 12,000 or more active members throughout the United States. The principal theory is that war is not compatible with the teachings of Christ. In addition to that there is the National Committee for Prevention of Wars. This organization held its national convention in Philadelphia on November 11, 12, and 13, 1942. One of the aggressively active leaders is Theodore Walser, an American missionary in Japan for 23 years.

[3965] He spoke before the members of the Pilgrim Church, one of the large churches in Washington, D. C. This was his statement: "Japan was justified in her attack on Pearl Harbor." He gave for the reasons, first, that America had no right to interfere with Japan's "Asia for the Asiatics" policy in the Far East. Secondly, Japan is only doing what America did to Mexico and to Central and South American Republics.

The National Committee for the Prevention of War, their convention adopted the following aims for 1943, and I list there five or six points. First, is a negotiated peace with the Axis powers, following Dr. Albert Palmer's idea. Second, to give financial and moral aid to conscientious objectors; three, to give financial aid and scholarships to Japanese-Americans so they may complete their university educations; four, to release the Japanese from the relocation camps and give the relocation civilian authorities more power to act, because they were, apparently, from their statements, they were already conscious of the fact that they were wielding a great deal of influence over these civilian authorities. Five, give favorable publicity to the Japanese-Americans and the Japanese point of view in the public press, and particularly stress that point of view in church publications throughout America; set up an employment agency to aid the Japanese as fast as they are released from the relocation camps.

Incidentally, one point here about the church publica- [3966] tions. From our information it is very apparent that a definite policy is being employed to create a favorable attitude toward Japanese-Americans in this country, and so favorable that naturally we will build up a sympathetic attitude for Japan. That is what we call the "softening up process" so that these various organizations can put across with full steam by the end of 1943 a terrific campaign for a negotiated peace with Japan, and it is a very clearly worked out scheme.

As an indication of how far they will go, Senator Tenney, from December 4 to December 14 in Quebec, Canada, the Institute of Pacific Relations, which has a very powerful branch here, held what they called "A Pacific Conference" for the purpose of discussing post-war problems in the Pacific area. At that conference the leaders refused admission of a Korean participant, although they claimed that they were interested in establishing the Atlantic Charter and the Four Freedoms in all of the subjugated nations in the world. Finally after a threat was made to expose the Pacific Conference held by the Institute of Pacific Relations, they agreed to allow a Korean as an observer. The opposition came from some of the missionaries who came from Japan, representing the Far East.

Underneath that whole conference was this underlying motive, to build there at that Pacific Conference in Quebec, the structure for the cooperation of the Institute of Pacific [3967] Relations for a negotiated peace and the leaders in that conference were former missionaries and educators in Japan. That was why they had this antipathy for the Korean, because they felt that if he were a part of the conference he would expose the things that were going on inside. That is a matter of fact that Mr. Haan testified to.

The purpose of these groups, is to soften American public opinion against Japanese and pave the way for a negotiated peace with Japan.

These are other organizations who are doing the same thing, and we have many men who feel the same way. For example, it was my experience in Bakersfield to talk to an organization there a month and a half ago, on the Japanese situation. A minister sat in front of me. I didn't know he was a minister, but I noticed that he was not reacting very well to my talk on the Japanese situation. The chairman told me that the Board had just turned him down on his application for four new tires. So after some considerable argument this prominent minister asked for retreads and they said, "No."

He said, "Why can't I have retreads? I am an important man in this community," and they said, "No, we give no man retreads or any tires of any kind who drives 400 miles every week going to Manzanar to attend to somebody else's business rather than attend to church affairs."

I debated with one man on the radio a short time ago who is interested in the Japanese problem, and he drives 600 miles [3968] every week to the internment center.

The purpose of this, Mr. Chairman, is to show that there is a lot going on underneath with which we are not familiar. We are taking a wishful attitude in this whole thing. We have got to understand the tremendous forces that underlie the whole Japanese-American groups. I believe this information should be brought out to show the public the problem is not an easy one.

Chairman TENNEY. You are also an ordained minister, are you not?

The WITNESS. Yes.

By Mr. COMBS:

Q. Dr. Lechner, just one other matter I want to take up before we adjourn. You recall that on the anniversary of Pearl Harbor, that was December 7, 1942, there was a riot at Manzanar?

A. Yes.

Q. During which Fred Kayama was severely beaten?

A. Yes, sir.

Q. Are you familiar with the general details of that occurrence?

A. I am somewhat familiar with the details. I have here a report of what transpired shortly before that, leading us to believe that a riot would occur. We had a pretty good idea two or three months before that the thing would explode from within.

Q. There is an internment center in the United States [3969] in the western part of the United States, the name of which we are not permitted to mention, at which a group of Japanese prisoners who were captured during the Solomons Island campaign were placed, is that not correct?

A. Yes; they were placed there to mingle with the Japanese-Americans.

Q. And were allowed to talk with them in the Japanese language?

A. Allowed to talk to them in the Japanese language, yes.

Q. And after those conditions had continued for a time there was a riot in that camp, was there not?

A. Yes, sir.

Q. Describe that riot, if you will, but first, how did you gain your information as to what transpired on that occasion?

A. Through a camp bulletin, Bulletin No. 56, and it was at Camp Lordsburg, New Mexico. It was published on October 29, 1942. It is a mimeographed news sheet issued daily.

Q. At Lordsburg, New Mexico?

A. Lordsburg, New Mexico, yes, by the evacuees themselves.

Q. English or Japanese?

A. In Japanese, and it is printed with the sanction of the administrative heads there.

[3970] CHAIRMAN TENNEY. Which is civilian?

The WITNESS. Which is civilian, yes. This Bulletin 56 described the number of Japanese prisoners who were brought into that camp as of maybe the day before or the day before that, so the news was up to the minute. They gave details as to where they came from and the boat they came in on, information which our own metropolitan papers are not allowed to use, and these men when they contacted the Japanese-American citizens gave them so encouraging a picture of the Japanese victories and their program, and they carried the story right from the inner circles of the Japanese to the Japanese-Americans and they got this particular camp all fired up. That particular attitude came out one morning shortly after this bulletin came out. There was a big demonstration in the

morning. There were several thousand Japanese participating in the demonstration. They were marching through the camp and singing and having a great time.

Our informant tells us that he happened to be with two or three of the officials—

By Mr. Combs:

Q. Is your informant a Japanese?

A. Yes. He is placed there by the Federal Government and I don't dare tell his name. He said that the two or three civilian officials patted them on the back and said: "Our policy for the Relocation Board is pretty good, we are giving them all the leeway possible; look how happy they are," and this informant turned around and said, "Do you know what [3971] they are singing?" They said, "It doesn't make any difference. They are happy."

He said, "They are singing the Japanese national anthem."

They said: "They can't do that here," but he said, "If you will look at that flagpole you will see what they can do," and they looked at the flagpole and during the night the Japanese had lowered the American flag and had placed the Japanese flag on the pole. My report shows it took the threat of machine guns by the Army to permit a man to go up and take that flag down.

Now, during the period that these prisoners came in, the civilian authorities were permitting visitors to come into that camp from anywhere east of the Rockies. These Japanese visitors would come and get the information from these Japanese-Americans and from the prisoners and in turn visit the other camps and spread the story. Our report shows it was this type of encouragement and propaganda which started the stirring up of the situation at Manzanar.

Q. Which led to the demonstration on December 7, 1942?

A. That is right. And also a camp in Nebraska had the same difficulty.

Q. And that, of course, was before all of the Japanese were interned in that area so they could visit back and forth?

A. They took them all there first. The first group they took, I believe, down to Lordsburgh. To me that all shows, I believe, a very unrealistic attitude on the part of the [3972] civilian authorities in handling the Japanese. I think we are making a tremendous mistake in opening up channels for the inciting of feeling because, as a matter of fact, in this document here, which was brought into Los Angeles in 1941, and written in 1940. It is the war instructions by Matsuo, head of the Intelligence Department for the Japanese Navy.

Q. Entitled "How Japan Plans to Win"?

A. "How Japan Plans to Win." Matsuo mentions in there the Japanese Government does not expect sabotage from any Japanese or Japanese-Americans during the first stage of the war; describing the attack on Pearl Harbor, saying no acts of sabotage would be done then, but when Japan is ready to come in the second time and take the islands and then on to the coast, Japan expects a volunteer army be formed to assist the Japanese forces in taking over the territory.

Now, we are playing with dynamite when we release the Japanese and Japanese-Americans as we are, by the thousands, because Japan has not called for their cooperation yet, and having this information and knowing their connection with Japan it is my firm belief as a matter of our own security and national defense, that we have got to take a far more realistic attitude toward the Japs.

Q. There is one other point I would like to cover, an illustrative incident, Dr. Lechner, when you and I had the conference with Kilsoo Haan last Friday. He was relating an incident in connection with the raising of a volunteer group [3973] of Japanese to fight for the United States.

A. Yes.

Q. Do you recall that?

A. Yes.

Q. Will you briefly explain about wearing the belt of a thousand stitches?

A. Yes. This is an important thing. This is just a news release that came out on February 26, 1943.

Kilsoo Haan warned us against the very fact that you might put these men in an Army uniform but that does not necessarily mean you have established their loyalty to this country. That is very difficult for them to get away from—the old traditions and teaching of Japan. May I read this:

"America's new all Japanese Army unit will go into battle carrying the potent good-luck charm of their ancestors.

2874 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"Officials at the Heart Mountain Relocation Center disclosed today that women evacuees are making traditional Japanese belts of 1,000 stitches for their husbands and sons joining the American armed forces.

"The belts, regarded as certain charm against evil, consist of white cloth with 1,000 red stitches sewed in. Each women adds one stitch to each belt."

This belt is passed from one woman to another, and each one adds a stitch until 1,000 stitches have been put in the belt. The theory is that this belt of 1,000 stitches ties the wearer into the whole system, Japanese ancestry and [3974] ancestor worship. In other words, it brings to the bearer all the Japanese traditions, security, and safety. So, instead of throwing that aside, the Japanese traditions, these men are actually wearing these belts. The belts are regarded as certain charm against evil.

I maintain that this is a clear demonstration of the fact, even though we organize an army of Japanese-American citizens they are still tied to their ancestors and still tied to Japanism.

Before closing I would like to read into the record the article from the Hawaiian Hochi, of October 18, 1940, that we discussed awhile ago.

Chairman TENNEY. Very well.

The Witness. It is entitled "Second Generation Japanese Take Part in Overseas Tokio Convention."

The article is as follows:

"The committee in charge of the Overseas Japanese Tokio Convention to be held in commemoration of the 2600th anniversary of the founding of the empire, has decided to allow about 500 second generation Japanese residing in Tokio to participate in it, and give these second generation Japanese, who have had no organ of unity and liaison in the past, a chance, and as preparation committee, members of the various second generation Japanese organization and educational agencies held a meeting with the convention committee at the Choutei of Marunouchi from 6:00 p. m. on September 26. The organizations [3975] that were represented on that day were as follows:

"* * * Overseas Education Association, Japan-America-Hawaii Society, Nippon Home, Waseda International School, McKinley Alumni Association of the Keizen Girls School, Todo Gakuin of the North American Butoku Kai (7,000 members in Hawaii), Japanese-American Society, Pacific Young Men's Club, Japan Cultural Forum, Tokyo chapter of the Boy Scouts, P. S. P., Second Generation Japanese Society, Little Club, Second Generation Japanese Club of the Union Church, the Nisei Club of Yokohama, Sigma Kappa, Self-Supporting Students' Association of Japan, Mizuho Gakuin, Sayama Home, Gekkei Home, Shoko Girls Schools, Overseas Women's Federation, Musashino Girls School, Young Women's Federation, Musashino Girls School, Young Men Buddhist Association of Japan, Japanese-American Young Men's Federation, Foreign Ministry's Bureau of American Affairs, Foreign Ministry's publicity Bureau, Overseas Affairs Ministry's Bureau of South American Affairs and the International Division of the Japan Broadcasting Association.

"* * * Handling the key of solution to the second generation Japanese, Lt. Gen. Kichijiro Hamada, executive vice president of the convention committee, stated as follows at this meeting:

"The second generation Japanese problems [3976] should be studied and solved by the second generation Japanese, themselves, and are not matters to be coerced into the manner of thinking of a third party, regardless of whom, I think. I am only old and am saying this because I have tasted a little more worldly experience than you, young people, and I wish that the following three points will be taken into consideration in solving the second generation Japanese problems. The means of solution are all in the hands of you, people. The first is that the color of our skin, which has been derived from the Yamato race, will not change, even if it comes to the periods of the third, the fourth and the fifth generations. That they will be of yellow race ancestry will be the same. The second is that I do not think that there will be a change in the superiority complex of the white race fifty or hundred years from now. Russia was defeated by Japan, but the people of Soviet Russia are boasting that they are superior than the yellow race. The third is the world situation. It is extremely shaky, but the actual condition of the world must be considered. Well, I hope you will take into consideration the above three points.

"Then the 11 second generation Japanese, including Mr. Yu Murayama, reporter of the Domei [3977] News Agency, each stood up and expressed

his opinion. Among them Kazuma Nakayama, a native of Vancouver and presently attending the Misuho Gakuen, stated as follows:

"The key points expressed by the Honorable Mr. Hamada have certainly incited in us a certain determination. That is that we must study, learn and master the Japanese spirit and make the Yamato race into a superior one. We must compensate the great effort made by our parents by improving the level of our culture. I have become spiritually stronger since I came to Japan. I intend to study with all my effort."

"Both eyes of Lt. Gen. Hamada became red, while Mr. Goro Shakahisa of the Bureau of American Affairs wiped his tears with one of his hands when this sincere cry was made. Thus, the 11 second generation Japanese, who attended that night, were elected as members of the committee to pilot the second generation Japanese into the course they should take."

Mr. COMBS. Thank you very much.

Chairman TENNEY. I have just one question. It is your opinion, briefly, then, that the American Legion's contention that these relocation centers should be under military supervision?

[3978] The WITNESS. Under strict Army supervision, yes.

Chairman TENNEY. Thank you very much, Dr. Lechner.

Mr. COMBS. Mr. Chairman, I would like to read into the record in connection with the Rohl testimony, a recapitulation of certain inconsistencies that appeared in the testimony of Mr. and Mrs. Rohl.

The testimony was somewhat complex and in order to epitomize it and coalesce those inconsistencies for our record, I wish to read the following.

Chairman TENNEY. Proceed.

Mr. COMBS. Mr. Rohl testified when he came to this country from Valparaiso, Chile, in 1913, that he was in the construction business, but on his statement to Immigration officials he said he was a merchant.

From the time he arrived in the United States he consistently and carefully concealed the fact that he was an alien. He told Immigration officials at least once that he was born in Iola, Kansas, the birthplace of his wife.

During the several yachting trips he made to Mexico and to Panama and to the Hawaiian Islands the names of all persons on board except his, appears on the ship's manifest.

Although he made 10 or more trips into Mexico he testified that no one questioned him about his citizenship.

He swore on his Federal income tax return that he was a citizen of the United States.

He testified that he had made an affidavit at an earlier [3979] date under the false name of John William Rohl, but he swore on his application for citizenship in 1941, that he had never made such application.

He testified that he owned the Yacht Pandora and personally received the insurance money when the yacht was burned. Mrs. Rohl testified she owned the boats and that the insurance money was paid to her.

Rohl testified that the Ramona was in his wife's name but that he hired the captain and directed the sailings; paid the crew and all expenses for the upkeep of the boat.

Membership in the Newport Beach Yacht Club was in his name.

Rohl also testified that the Vega was registered to his wife, but that he likewise controlled her movements and paid all expenses in connection with her operation.

Mrs. Rohl testified that she paid all those expenses.

Lloyd's registry of American yachts for 1941 lists the Vega's owner as H. W. Rohl.

Rohl testified that none of the stock of the Rohl-Connolly Company was ever issued to anyone but him and T. E. Connolly, but Mrs. Rohl swore she owned 25 percent of it. She also stated she didn't know that Rohl paid a \$25,000 fine to the Federal Government five days before becoming a citizen because the boats, tugs, launches, and other vessels were owned by Rohl-Connolly, a concern in which Rohl, a German alien, owned more than 25 percent of the stock.

[3980] Both Rohl and his wife swore categorically that they had never seen Major Wyman intoxicated, and that he had been aboard their vessel twice.

Now, I put that in the record, Mr. Chairman, for the simple purpose of having it at the end of the testimony—the inconsistencies in the statements made by H. W. Rohl and Floy Rohl.

That is all we have at this time.

2876 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Chairman TENNEY. At this time the Committee will stand adjourned to reconvene at the call of the Chairman.

(Whereupon, at 3:30 o'clock p. m., the hearing was concluded.)

ARMY PEARL HARBOR BOARD EXHIBIT No. 8

Vol. 49

REPORT OF PROCEEDINGS

HEARING HELD BEFORE EXECUTIVE SESSION, SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS, HOUSE OF REPRESENTATIVES, U. S., WASHINGTON, D. C., JANUARY 24, 1944

Testimony of Robert Hoffman-----	2188
Exhibit No. 1 (1/24/44)-----	2202

[2188]

EXECUTIVE SESSION

MONDAY, JANUARY 24, 1944

HOUSE OF REPRESENTATIVES,
SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C.

The special committee met, pursuant to call, at 10:40 o'clock a. m. in room 1310 New House Office Building, Honorable Andrew J. May (chairman), presiding.

Present: Representatives May (chairman), Sparkman, Costello, Durham, Elston, Martin and Fenton.

Also Present: Lt. Col. Knowles; H. Ralph Burton, General Counsel to the Committee; and Mr. Joseph Colgan, special investigator.

The CHAIRMAN. The committee will be in order.

Mr. BURTON. Mr. Hoffman.

TESTIMONY OF ROBERT HOFFMAN

(Mr. Hoffman was duly sworn.)

Mr. BURTON. Please state your full name.

Mr. HOFFMAN. Robert Hoffman.

Mr. BURTON. Please give your home address, your occupation, and something of the background and the experience which you have had.

Mr. HOFFMAN. The permanent address is 651 South Dunsmuir [2189] Avenue, Los Angeles; present address Ramon Guzman 96, Mexico City, D. F.; civil engineer in field construction, railroads, tunnels, highways, utilities, hydrolytic plants for 22 years.

Mr. BURTON. Mr. Chairman, I submit several letters of commendations which have reference to the capability, integrity, and responsibility of Mr. Hoffman and ask that they be spread upon the record.

The CHAIRMAN. Be it so ordered.

(The letters referred to are as follows:

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Honolulu, T. H., March 17, 1942.

Refer to File No. ND 312.1

Mr. ROBERT HOFFMAN,
c/o Hawaiian Constructors,
Honolulu, T. H.

MY DEAR MR. HOFFMAN: I have your letter of March 15th and thank you for the statements contained therein. I desire to thank you for the service that you have rendered and the support that you've given me while on duty as District Engineer.

I hope that I will again have the pleasure of working with you under conditions where we can build up an organization with the efficiency that all true construction men love.

Sincerely yours,

/s/ THEODORE WYMAN, JR.,
Colonel, Corps of Engineers,
District Engineer.

[2190]

HEADQUARTERS 7TH AIR FORCE,
Hickam Field, T. H., 6 April 1942.*To Whom It May Concern:*

During the period October 27, 1941 to February 9, 1942, during which the undersigned was stationed at and in Command of Bellows Field, T. H., Mr. Robert Hoffman was area Superintendent for Hawaiian Constructors.

I found him to be especially cooperative.

He seemed to anticipate the construction needs of the post and missed no opportunity to offer practical suggestions.

His company, through him, was willing to do everything practical to speed up construction so the field could be gotten ready for operations.

(s) LEONARD D. WEDDINGTON,
Colonel, Air Corps,
Deputy Chief of Staff.

HEADQUARTERS BELLOWES FIELD,
OFFICE OF THE COMMANDING OFFICER,
Bellows Field, T. H., 8 April 1942.

AM/jsv

In reply refer to:

Mr. ROBERT HOFFMAN,
Hawaiian Constructors, Bellows Field, T. H.

DEAR MR. HOFFMAN: It has been a distinct pleasure to be connected with you [2191] during the past four months. In my capacity as S-4 of this station, I was in almost daily contact with your activity.

Since the outbreak of war, there has been an incredible increase of the work heaped upon your organization, with all its attendant confusion. It was often a thing to marvel at to know that one man could handle all the details that came under your care, and still stand up under it with a smile.

Few people here know or properly appreciate the many things that you have done for the men of the service. Fortunately you were just a bit out of reach of a lot of red tape. This enabled you to do many of the things that you have done for the men here. However, without your intense desire to do things for the comfort and recreation of the soldiers, many of these things would have been left undone.

Your all around spirit of cooperation has been "above and beyond the call of duty". My only hope is that your successor may be half as cooperative and half as interested in our fighting men as you have always been.

With the sincere hope that our paths may cross again, I wish to bid you

Aloha,

(s) A. MEULENBERG,
Lt. Col., Air Corps.

HEADQUARTERS BELLOWES FIELD,
OFFICE OF THE COMMANDING OFFICER,
Bellows Field, T. H., 20 April 1942.

[2192] In reply refer to:

Mr. ROBERT HOFFMAN,
c/o Hawaiian Constructors, Bellows Field, T. H.

MY DEAR ROBERT: It is with sincere regret that I find you leaving your work with the Hawaiian Constructors at Bellows Field. Since I have been in command of Bellows Field, I have worked with you daily and have always found you to be very, very cooperative, and in my opinion, an excellent engineer and constructor. I don't believe it would be possible for them to fill your place adequately.

I wish you great success in your undertakings, and please remember always that you carry my sincere respect and affection with you wherever you go.

Truly and sincerely,

(s) W. O. FARNUM,
Colonel, Air Corps,
Commanding.

HEADQUARTERS SEVENTH AIR FORCE BASE COMMAND.
OFFICE OF THE COMMANDING GENERAL,
Hickam Field, T. H., 21 April 1942.

To Whom it May Concern:

I have known Mr. Robert Hoffman since September, 1941, in the capacity of superintendent of construction for the Army project at Bellows Field, T. H.

Mr. Hoffman is an exceedingly trustworthy man who will [2193] give complete cooperation to his superiors. He will, however, insist upon honest dealings which is an asset hard to find. He is eminently qualified to direct airport construction.

The above opinions are based upon my observations of him while I was serving as Commanding Officer of Bellows Field, T. H., and as Commanding Officer of the Seventh Air Force Base Command, a command which supervises all Air Corps construction in the Hawaiian Islands.

It is with much regret that our associations are now terminated.

/s/ W. E. FAETHING,
Brigadier General, U. S. Army,
Commanding.

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
McMurray, Alberta, Canada, August 2, 1942.

Address replies to: Officer in Charge.

To Whom it May Concern:

I have known Mr. Robert Hoffman for a period of two months through intimate daily contact on the Canol Project.

In his position as Superintendent for the constructors, Bechtel, Price and Callahan, he has at all times displayed untiring energy and a rare ability to get things done in a minimum of time.

/s/ J. N. KRUEGER,
Lt. Col., Corps of Engineers,
Base Zone Commander.

[2194] Mr. BURTON. Had you occasion to be in Hawaii and surrounding territory?

Mr. HOFFMAN. Yes, from March 1941 until May 2, 1942.

Mr. BURTON. In what capacity were you there?

Mr. HOFFMAN. As area superintendent for the Hawaiian Constructors who held the prime Army contracts with the U. S. Engineers. The various superintendency covered everything on the windward side of the Island of Oahu, from Diamond Head to Kuhukua. It embraced all of the defense work, airports, utilities, artillery camp stations, roads, air raid warning stations, in fact all Army work for a distance of some 70 miles along the coastline, especially Bellows Field, Camp Ulupau, Canica Hospital Base and Airfield Zero as it was not named at that time. Total valuation of that portion of the contract was approximately \$20,000,000. Prior to assuming the area, set up the working force at Wheeler Field, and prior to that the working force at Hickam Field, all of the work done under the District Engineer, a Colonel Theodore Wyman, Jr., succeeded in February 1942 by Colonel Lyman, who, in April, became General Lyman, now deceased.

Mr. BURTON. Did you have any supervision over any other construction work in that territory?

[2195] Mr. HOFFMAN. All construction work in the territory.

Mr. BURTON. Did you have any supervision over construction work on any of the Pacific Islands?

Mr. HOFFMAN. None at all.

Mr. BURTON. Do you know the firms which composed the Hawaiian Constructors?

Mr. HOFFMAN. Yes, the Rohl-Connolly Company who started the original negotiations with Colonel Wyman in Los Angeles; the Callahan Construction Company of Dallas and Los Angeles; the Gunther-Shirley Company of Lincoln, Nebraska, and Los Angeles; the Hawaiian associate operating under the name of Ralph A. Wooley.

This group of constructors was augmented shortly after December 7, 1941 when all contracts by other contractors were cancelled by Colonel Wyman and the concern known as the Hawaiian Contractors, sponsored by Walter Dillingham, and actually headed by a Mr. Bennett were taken in the organization.

Mr. BURTON. Do you mean that the Hawaiian Contractors did have contracts and they were cancelled by Colonel Wyman after December 7, and that thereafter the Hawaiian Contractors became associated with the Hawaiian Constructors?

Mr. HOFFMAN. Correct. Mr. Dillingham put on the active operating committee, which was the top committee, a Mr. Bennett.

Mr. BURTON. You spoke of an operating committee, of what persons was that composed?

[2196] Mr. HOFFMAN. Hans Wilhelm (Bill) Rohl, Paul Grafe, Mr. Bennett, and Ralph Wooley.

Mr. BURTON. What were the dates of the first negotiations?

Mr. HOFFMAN. Talk of it started in December 1940, the actual contract came into effect sometime in February. I didn't get over there until the latter part of April 1941.

Mr. BURTON. Do you know anything about the negotiations for these contracts?

Mr. HOFFMAN. The close association of Rohl and Major Wyman during Major Wyman's tenure of office as District Engineer of Los Angeles; it was common knowledge among the contractors on the West Coast that nobody could get a contract outside of Rohl with Major Wyman.

Rohl had secured one contract down at Long Beach through Major Wyman.

Mr. BURTON. Did you ever talk with any contractors about this?

Mr. HOFFMAN. Yes, I talked to several contractors offhandedly, as to just where Rohl got his pull and how he became so powerful in being able to pick up these contracts out of the air when the rest of them were fighting for them.

Mr. BURTON. Did they give you any reason why he had that influence?

Mr. HOFFMAN. No, just that the reputation of Rohl was such that he was known to have paid and bought his way in contractual [2197] work for years on the West Coast. Rohl was not liked by the West Coast contractors.

Mr. BURTON. Coming back to this operating committee in Hawaii, can you state whether any one person was a dominant figure?

Mr. HOFFMAN. Rohl was the dominant figure. In fact, so much so that after the committee was formed, along the latter part of September or the first part of October, conditions for the operating superintendents became much worse.

Mr. BURTON. Was that in 1941?

Mr. HOFFMAN. It became much worse for procuring of equipment and materials due to Rohl consistently bungling as operating director.

Mr. BURTON. Could you say that any delay in the construction work was occasioned by the handling by Rohl?

Mr. HOFFMAN. Definitely so. Let me add that can be verified by a statement from Mr. Clapp, who was brought over there to Hawaii as project engineer about the first of December 1941, and who after four weeks had a very severe verbal battle with Rohl on account of the operations and he left the island and came back to the mainland.

Mr. BURTON. Do you know of any protests on the part of Wyman to Rohl that the work was being delayed?

Mr. HOFFMAN. No, the incompetence of Colonel Wyman could offer no protest to anyone.

[2198] Mr. BURTON. Do you mean that Colonel Wyman was inefficient?

Mr. HOFFMAN. Definitely so.

Mr. BURTON. Can you give any reason for that?

Mr. HOFFMAN. As a field construction engineer, Colonel Wyman couldn't handle a construction job in civilian life. He surrounded himself with men who would say nothing but yes, therefore he denied himself the privilege of ideas that would expedite the work and the materials; in other words doing a good job, it could not be done with his arrogance.

Mr. BURTON. Do you recall when Rohl came to Hawaii?

Mr. HOFFMAN. I would say the latter part of September 1941.

Mr. BURTON. Did Colonel Wyman act upon the recommendations of Rohl in opposition to those of other persons?

Mr. HOFFMAN. Yes, the recommendations of Rohl who wasn't qualified to handle that job were detrimental to good operations in completing the work assigned.

Mr. BURTON. Did you find that non-completion of the work was detrimental to the interests of the United States?

Mr. HOFFMAN. Yes, time and time again.

Mr. BURTON. Did Colonel Wyman have the absolute control of the work?

Mr. HOFFMAN. Absolute control.

Mr. BURTON. Did he have to report to any superior officer?

Mr. HOFFMAN. I imagine he had to report to Colonel Hannum who was, up until December 7, the District Engineer with head- [2199] quarters in San Francisco. Hawaii at that time was not an individual Division Office—it was part of the Division Office of San Francisco. After December 7 it became an individual office and Wyman was made a District Engineer.

Mr. BURTON. From that time on he was in complete authority?

Mr. HOFFMAN. He was in complete authority prior because his reports, if he made any and he must have, could not have been truthful based on the actual work completed at that time. Any ordinary construction man by checking the reports could have found out that something was vitally wrong.

Mr. BURTON. Did you ever have any conferences with Wyman about the delays?

Mr. HOFFMAN. Yes, many of them in which there was very little satisfaction and one in particular which took place at Colonel Wyman's call for all of the area engineers and area superintendents to meet in his office. This was in the latter part of August 1941 and in the presence of Paul Grafe, one of the associate contracting companies in the Hawaiian Constructors. The statement best remembered is one by Colonel Wyman who said, "You men have fallen down. I expected you to spend two million dollars a week and you are only spending one. What are you going to do about it?"

Mr. BURTON. Do you recall any of the answers made to Wyman?

Mr. HOFFMAN. There were many answers. In fact, all of the superintendents said, "Give us more equipment and more material [2200] and we will give you the expenditure."

Mr. BURTON. Is it a usual thing to complain to contractors that they are not spending enough money?

Mr. HOFFMAN. On the contrary, it is the usual complaint of the owner to ask for expeditious completion of the assigned tasks at the lowest possible costs. We never speak of making expenditures without a definite assignment of a definite task or certain work to do.

Mr. BURTON. Do you recall whether Rohl was present at that meeting?

Mr. HOFFMAN. He was not at that time.

Mr. BURTON. Did any of the persons present complain about Rohl's attitude and activities?

Mr. HOFFMAN. I might safely say that every superintendent on the job complained of Rohl's bungling of the whole job, in fact, several of the superintendents resigned and broke their contracts because of it.

Mr. BURTON. Do you recall what part of this construction was the installation of permanent warning signals, or are they air raid signals?

Mr. HOFFMAN. Permanent Air Raid Warning Signals, referred to as AWR.

Mr. BURTON. Do you recall if there was any delay in the installation of these stations?

Mr. HOFFMAN. Yes, in my areas there were delays on four of [2201] them.

Mr. BURTON. Can you give any reason for that?

Mr. HOFFMAN. Inefficient operation and direction by the operating committee of the Hawaiian Constructors, of which Mr. Rohl was the head.

Mr. BURTON. Could those warning stations have been completed by December 7, 1941, the date of the attack upon Pearl Harbor?

Mr. HOFFMAN. Yes, sir. There were ample men and ample material. All of the AWR stations on that side of the island particularly were tunneled out of the rock formations along the sea, and we had ample tunnel equipment as far back as August 1941.

Mr. BURTON. Had those stations been completed and in operation by December 7, would it, in your opinion, have aided in detecting the approach of planes?

Mr. HOFFMAN. Yes. If the stations were working, in effect and force, they would have detected the approach of planes.

Mr. BURTON. Had Rohl conducted the contract work in an efficient manner and utilized the men and equipment as he should have done, could these air raid warning stations have been completed by December 7?

Mr. HOFFMAN. Yes, sir.

Mr. BURTON. Can you state whether or not it was generally understood that these Air Raid Warning Stations were considered [2202] vital to the defense of Hawaii?

Mr. HOFFMAN. Very much so.

Mr. BURTON. I show you a document which is entitled, "State by Robert Hoffman, Area Superintendent, 5th Field Area, Bellows Field", and ask you if that document was prepared by you.

Mr. HOFFMAN. Yes, sir.

Mr. BURTON. Mr. Chairman, I ask that that be submitted as Exhibit No. 1.

(The document referred to was marked as Exhibit No. 1, of 1/24/44.)

Mr. BURTON. Can you give the date that this was prepared?

Mr. HOFFMAN. It was completed April 29, 1942.

Mr. BURTON. This statement is composed partly of narrative and partly of exhibits?

Mr. HOFFMAN. That is correct.

Mr. BURTON. Do any of these exhibits reflect upon the progress, or lack of progress of the construction work in Hawaii?

Mr. HOFFMAN. They do.

Mr. BURTON. I will ask you to point out some of the exhibits which bear upon these questions.

Mr. HOFFMAN. These are the exact copies of the originals. One or two are addressed to Rohl that definitely tie him into the thing you want, I think. Exhibit No. 20, dated March 10, [2203] 1942, is a memorandum to Mr. Rohl asking reasons why the tunnel work was stopped at Bellows Field after General Tinker and General Farthing agreed to go ahead with it immediately, as the tunnel would be the only supply depot for aviation gas for the windward side of the island. General Tinker advised me personally that it was one of the most important items of quick defense required for Hawaii.

Mr. BURTON. Mr. Chairman, I ask that this particular memorandum be spread upon the record.

Mr. COSTELLO. Be it so ordered.

(The memorandum referred to is as follows:)

Exhibit No. 20

Memorandum to H. W. Rohl.

From Robert Hoffman.

Date: March 10, 1942.

We are at a loss to understand why our original list, which you recommended be mailed to the 15th Area, on equipment necessary for tunneling, was stopped. Mr. Lomax advises that you held up this list without notation to hold in abeyance. Your call last night seemingly advised that we proceed at once.

Will you kindly advise this office whether we are to proceed and, if so, give us some help in securing the equipment and we shall give you a pretty good job. I have the men and am anxious to hand much the second tunnel cheaper and faster than was done with the equipment on the previous job.

[2204] We fully understand the difficulty in securing equipment and general conditions pertaining to the entire setup, but we still feel that you can give us some help, and we shall do our best with what we have to work with.

We thank you for your help.

ROBERT HOFFMAN,

Superintendent Fifth Field Area.

RH/nf

Address Reply to District Engineer

U. S. Engineer Office

P. O. Box 2240, Honolulu, T. H.

[2205] Mr. BURTON. Have you any knowledge of contracts which related to defense installations and projects on the islands of the Pacific held by the Hawaiian Constructors?

Mr. HOFFMAN. Yes, general knowledge. The heads of the Hawaiian Constructors had another organization called Territorial Constructors which was headed by Paul Grafe, who was second in command of the Hawaiian Constructors. Those contracts were let, however, by Colonel Wyman on the Island of Hawaii, the Island of Lanai, and the Island of Kauai, but the two organizations didn't mix although they were headed by the same group. One was called Territorial Constructors on the outlying islands.

2882 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mr. BURTON. Is it true that the Hawaiian Constructors had a contract on some of the Pacific Islands?

Mr. HOFFMAN. That is true, sir. Some of my men were shipped down to some of those islands at various times to work.

Mr. BURTON. Did you have any occasion to come in contact with Paul Grafe?

Mr. HOFFMAN. Yes, Paul Grafe was my immediate superior and up until the time that Rohl came to Hawaii, Paul Grafe was in command of the work.

Mr. BURTON. Did each of the companies associated with the Hawaiian Constructors have their representatives on the jobs?

Mr. HOFFMAN. No, not at all. Paul Grafe acted for all of them when he was head, with the exception of Mr. Wooley who was the Hawaiian part of the constructors. Paul Grafe [2206] acted for Gunther-Shirley and Callahan, and if you look back to Los Angeles, you will find that the Gunther-Shirley offices and the Callahan offices are in the same building, Suite No. 714 West Olympic Boulevard.

Mr. BURTON. After Rohl came to Hawaii in September of 1941 did he supersede Grafe so far as having charge was concerned?

Mr. HOFFMAN. Yes. He seemed to be the top man.

Mr. BURTON. That was for all of the companies?

Mr. HOFFMAN. All of them.

Mr. BURTON. Mr. Chairman, I would like your permission at this point to submit and be spread upon the record a letter dated December 10, 1943, from the Immigration and Naturalization Service of the Department of Justice to me which gives the Immigration and naturalization record of Hans Wilhelm Rohl.

The CHAIRMAN. Be it so ordered.

Mr. BURTON. I would like to say at this point that this letter shows that Hans Wilhelm Rohl came to the United States the first time on October 23, 1913. It further shows that during all of the years he was in the United States until September 1941 he made no attempt to become naturalized, although during the latter part of his being in the United States he enjoyed the benefit of Government contracts.

Mr. ELSTON. Before he was naturalized?

Mr. BURTON. Before he was naturalized.

Mr. ELSTON. Where did he come from?

[2207] Mr. BURTON. He came from Germany.

The CHAIRMAN. Had he taken out any papers prior to September 1941?

Mr. BURTON. He apparently had taken out first papers. On September 15, 1941, after he had obtained contracts for installations of defense work in Hawaii he made strong effort to become naturalized and on September 15, 1941, he was naturalized in the Court of Judge J. F. T. O'Connor and left that day for Hawaii.

(The letter referred to is as follows:)

[2208]

EARL G. HARRISON, COMMISSIONER

246-C-5256161

DEPARTMENT OF JUSTICE,
IMMIGRATION AND NATURALIZATION SERVICE,
Philadelphia 2, December 10, 1943.

Mr. H. RALPH BURTON,

*General Counsel, Committee on Military Affairs,
Room 519, Old House Office Building,
Washington, D. C.*

DEAR MR. BURTON: This will acknowledge the receipt of your letter of December 4, 1943, in which you state that you have been directed to obtain, and therefore request for the use of the Committee, a fully detailed statement of the record in the files of this Bureau relating to one Hans Wilhelm Rohl.

The records of this office show that Hans Wilhelm Rohl (John William Rohl), then residing at 8159 Hollywood Boulevard, Los Angeles, California, filed petition for naturalization in the United States District Court for the Southern District of California on March 10, 1941, under the provisions of Section 310 (a) of the Nationality Act of 1940. In that petition the alien stated that he was a contractor;

that he was born at Lubeck, Germany on September 29, 1886; and that he was of the German race and German nationality. He alleged that he was married on August 26, 1925, at San Francisco, [2209] California; that the

name of his wife was Floy Edith; that she was born at Iola, Kansas on October 27, 1890; and that she then resided with him. He claimed arrival in the United States at the port of New York, New York on October 23, 1913, on the S. S. Santa Marta, and was legally admitted for permanent residence. He alleged that he had four children, all born in Sacramento, California, in 1916, 1918, 1921 and 1923, respectively. He claimed residence in California continuously since October 1926. His application to file a petition alleged residence in Ely, Nevada, from November 1913 to October 1914; in Sacramento, California, from October 1914 to January 1923; and in San Francisco, California, from January 1923 to October 1926. His petition was duly verified by the affidavits of two witnesses, Thomas E. Connolly, contractor, 2400 Fulton Street, San Francisco, California, and Karl Lewis, physician, 9654 Olympic Boulevard, Beverly Hills, California, who averred in their affidavits that they had known the alien at Los Angeles, California, since January 1, 1937.

The record of preliminary examination of Mr. Rohl shows that he testified that his present marriage was his second one. He testified that his first marriage was to Marian Henderson at Sacramento, California, in December 1914, and that his four children were the issue of this marriage. He testified further that he and his first wife separated in 1923, and that she obtained a final decree of desertion. He testified further [2210] that he paid each child \$75 a month and that his first wife had remarried and was living at Sacramento, California. He promised to furnish later the address of his first wife.

Mr. Rohl produced at the preliminary examination his certificate of marriage to his present wife, which certificate was returned to him. Her birth in the United States was proved by the affidavit of her sister and her divorce from her first husband (she had been married one time before her marriage to Mr. Rohl according to the record) was proved by the production of a duly authenticated copy of the court record of the final judgment of divorce.

Mr. Rohl called at the Los Angeles Office on March 11, 1941, and admitted that his testimony at the preliminary examination concerning his first marriage was not correct. He asserted that he was not legally married to Marian Henderson but that he had lived with her from 1914 to 1923; that he was the father of their four children; that they had lived together only in California (wherein commonlaw marriages are not recognized); and that there had not been any kind of ceremony. He asserted further that she was then living at 2371 Portola Way, Sacramento, California, and that their two minor children were living with her. He asserted further that he had entered into property settlement with her on April 22, 1925, and furnished a copy of the written agreement. This agreement shows that he promised to pay to Marian Rohl \$70 per month during [2211] her lifetime or until she should remarry, and that he promised to pay \$45 per month for each of their four minor children, such payments to continue during the minority of each child. Mr. Rohl's first "wife", Mrs. Marian Clark, was interviewed by a representative of this Service at Sacramento on March 29, 1941, and she confirmed the story of their relations, as admitted by Mr. Rohl, and said that he had done everything he promised in the agreement.

The record shows that Mr. Rohl testified at the preliminary examination that he had never been in the United States before his arrival on October 23, 1913, and disclosed several absences since that time, which will be mentioned below.

He asserted that he left New York on November 27, 1924, on the S. S. Deutschland; that he spent three or four days in and the remainder of his visit abroad in London, England; and that he returned at New York on January 10, 1925, on the S. S. France, in possession of a reentry permit. This return was verified by the New York office.

He asserted that in 1931 and 1932 he made about ten trips to Mexico in connection with construction work on a road between Monterrey and Mexico City; that the longest single absence was not over three weeks; and that he departed and reentered at Laredo, Texas. Efforts to verify these reentries were unsuccessful, the Inspector in Charge at Laredo reporting that the records of that port failed to disclose any record [2212] of any kind at any time relating to Mr. Rohl.

The record shows further that Mr. Rohl testified at the preliminary examination that he traveled on the yacht "Ramona" from New York to San Diego, California, in 1933, arriving at San Diego on the day before Labor Day, in September. The journey was through the Panama Canal. He asserted that the vessel stopped at Acapulco, Mexico for ten hours to take on fuel and that there were no other stops en route. The records of this Service at the San Diego office show that the yacht "Ramona" arrived at that port from New York on September 3, 1933, and that

the owner of the yacht was H. W. Rohl, 3278 Wilshire Boulevard, Los Angeles, California. His name did not appear on the crew list.

The record shows further that Mr. Rohl testified at the preliminary examination that he traveled on the yacht "Vega" from Jacksonville, Florida, to Honolulu, and thence to Los Angeles. He asserted that he departed from Jacksonville in November 1937; that he arrived at Los Angeles in February 1938; and that the only stop en route was at Honolulu. The records of this Service at the Honolulu office show that the yacht "Vega" arrived at Honolulu on January 21, 1938, from Balboa, Canal Zone, with four passengers and sixteen crewmen. The crew list was visaed at Nassau, Bahamas, and again at Balboa, Canal Zone, since there were five aliens among the members of the crew. The four passengers were manifested and [2213] one of them was shown as H. William Rohl, (M), born September 29, 1886, at Tola, Kansas.

Information came to this Service, apparently from the records of the Bureau of Internal Revenue, that Mr. Rohl asserted in his income tax return for the years 1938 and 1939 that he was a United States Citizen and that in the course of an investigation in 1934 he was asked the question, "Are you a citizen of the United States" and he answered, "Yes, I am. I was naturalized in 1921."

Mr. Rohl was called to the Los Angeles office and was interrogated under oath on April 30, 1941. He was questioned about his marital history and his absences and his income tax returns, among other things. He explained his testimony at the preliminary examination that he had been married to Marian Henderson by the assertion that he believed commonlaw marriages were recognized in California. Concerning his testimony at the preliminary examination that his wife, Marian Henderson, had obtained a divorce from him, he was asked, "Were any divorce proceedings ever had between Marian Henderson and yourself" and he answered, "No, a settlement was made." He was asked further for his reasons for stating that he had been divorced, and answered, "We made settlement and signed an agreement." He asserted that he was never questioned by the officers of this Service at Laredo as to his citizenship when returning from any of his visits to Mexico in 1932, and was [2214] merely asked where he lived. He denied making any claim that he was a citizen of the United States during the course of these reentries. He asserted that he purchased the yacht "Ramona"; that it was registered in his wife's name; and that he was not inspected when he landed from this vessel at San Diego in 1933. He also asserted that he purchased the yacht "Vega"; that his wife also purchased it; and that he does not know how it happened that he was manifested as a native of Tola, Kansas, upon arrival of the vessel at Honolulu on January 21, 1938. He asserted that he was not inspected and admitted by an immigration officer; that he was not asked any questions; and that he never said that he was born in Kansas. He admitted that some of his income tax returns had shown him to be a citizen of the United States, but asserted that his income tax forms were prepared by an auditor; that he only went over the work sheets with the auditor; and that he had no knowledge until recently that the returns contained a cross in a box to indicate that he was a citizen of this country. He denied ever making a statement to the Bureau of Internal Revenue in answer to a question, "Are you a citizen of the United States" that "Yes, I am. I was naturalized in 1921." He asserted that he was not in possession of a reentry permit or an unexpired immigration visa upon any of his reentries from Mexico, or when he landed at San Diego in 1933 from the yacht "Ramona" or when he arrived at Honolulu in 1938 on the yacht "Vega".

[2215] Another sworn statement was taken from Mr. Rohl at the Los Angeles office on May 22, 1941, which explored his absences from the United States as mentioned above. Thereafter, on May 27, 1941, the Inspector in Charge at Los Angeles submitted a formal application for warrant of arrest to the Central Office. The application recited Mr. Rohl's last entry into the United States as being at Honolulu, T. H., on January 21, 1938, ex yacht "Vega" and applied for warrant of arrest on the charge that "He is in the United States in violation of the Immigration Act of 1924, in that at the time of his entry he was not in possession of an unexpired immigration visa." The Central Office concluded on July 10, 1941 that no ground for deportation proceedings appeared to exist, pointing out that it did not appear that it was necessary for Mr. Rohl to have any documents at the time of his arrival at Honolulu on January 21, 1938, he having the status of legally admitted resident of the United States at that time. It was also pointed out that the three-year period of limitation provided by the statute had expired, reference apparently being made to the charge of entry without inspection.

Prior to the hearing on this petition, the Immigration and Naturalization Service received a letter, dated August 28, 1941, from Brigadier General John J. Kingman stating, among other things, that the services of Mr. Rohl were of vital importance because of his peculiar qualifications and the scarcity of [2216] qualified supervisory personnel. He stated further that it was the understanding of his service that Mr. Rohl's loyalty to the United States was beyond question, and then requested that the granting of Mr. Rohl's final citizenship papers be expedited.

Inquiry was made of the local office of the Federal Bureau of Investigation regarding this alien immediately following the filing of his petition for naturalization with negative results.

Mr. Rohl's petition for naturalization was heard by the court on September 15, 1941, along with the petitions of two other aliens. It was the practice at that time, when a case had facts to be presented to the court, to prepare a written report to the court reciting the relevant facts. Enclosed herewith is a copy of this report to the court. The facts in the case were presented to the court without objection and without recommendation. After considering the facts, the court entered an order admitting Mr. Rohl to citizenship on September 15, 1941.

Sincerely yours,

/s/ Earl G. Harrison

83608—Hans William Rohl

Petition filed 3/10/41

No objection will be made to the granting of this petition. For the information of the court, however, the results of the [2217] investigation made in connection with the case are herewith presented.

The petition was filed on 3/10/41 under the provisions of Section 310 (a) of the Nationality Act of 1940, which grants certain exemptions from the usual requirements of the naturalization law to the spouse of a United States citizen and which requires proof of good character for a period of at least one year immediately preceding the filing of the petition.

The petitioner was born in Germany in 1886 and has resided in the United States since 1913. From about 1916 to 1925 he lived with one Marion Henderson in the State of California but they were not legally married and no marriage ceremony of any kind was performed. As a result of their relationship four children were born to them. On April 22, 1925, they entered into a written agreement under the terms of which Marion Henderson was to have the use of the home property in Sacramento, California, and to receive \$70 per month during her lifetime or until she should marry. He was also to pay her \$45 per month for the support of each child during minority. The investigation shows that the terms of this agreement have been fulfilled by the petitioner. He married his present wife, who is a citizen of the United States, on August 28, 1925, and has resided with her continuously since then.

There is some evidence to indicate that the petitioner has represented himself as a United States citizen. The peti- [2218] tioner has stated, however, that he has never believed himself to be a citizen and has never wilfully represented himself as a citizen of the United States.

In 1932 the petitioner made 10 or 12 trips to Mexico in connection with a contract which he had to build roads there and on these trips left and reentered the United States at Laredo, Texas. The Immigration Service has reported that he has no record of his inspection upon his returns from these absences. The petitioner states that he was never questioned as to his citizenship but was only asked where he lived and was permitted to reenter the United States.

On September 3, 1933, the petitioner arrived at San Diego, Calif., on the yacht, "Ramona", which was registered in the name of his wife, on a trip from New York. He was not listed on the manifests as a passenger or member of the crew and there is no record that he was inspected as required by the immigration law. The petitioner has stated that the immigration officers came aboard but that he was not asked any questions by them.

On January 21, 1938, the petitioner arrived at Honolulu, T. H., on the yacht, "Vega", which was registered in the name of his wife, on a trip from Jacksonville, Florida. The manifest data on file with the Immigration Service shows that he was manifested as having been born in Kansas and he was, therefore, not inspected. The petitioner has stated that he did not [2219] claim

to have been born in Kansas and he was not asked any questions by the immigration officers.

All of the facts in connection with the petitioner's reentries into the United States were presented to the Department in Washington and it was decided on July 10, 1941, that, in view of all of the evidence, it was not a proper case in which to institute deportation proceedings.

The records of the Bureau of Internal Revenue show that for the past several years it has been shown on the petitioner's income tax returns that he is a citizen of the United States. The petitioner has stated that his returns were made out by an auditor; that he only went over the work sheets with the auditor and did not know that the completed forms showed that he was a citizen and that he believes the auditor assumed he was a citizen and he is certain that he did not state to him that he was. It is understood that the classification as a citizen would not have changed the amount of the tax.

The records of the Customs Service, Los Angeles, show that the Rohl-Connolly Co., of which the petitioner is the president, owned and operated a number of vessels from 1934 to 1940 in violation of the law in that the petitioner, who was the president of and a stockholder in the company, was an alien. The penalty provided is forfeiture of the vessels. The petitioner, however, made a cash settlement of the claim against the company on 9/4/41 of \$25,000. It does not appear [2220] that there was a willful violation of the law and no criminal action is contemplated.

The petitioner is the President of the Rohl-Connolly Contracting Company, located at 4351 Valley Blvd., Los Angeles, and has been awarded a secret contract in connection with a defense construction project in Honolulu. His participation in this project is being held up until he has been naturalized.

Mr. BURTON. I would like also at this time to submit a list of long-distance telephone calls between Hans Wilhelm Rohl and Colonel Theodore Wyman, Jr., in Hawaii, both before and after September 15, 1941, on which date he became naturalized.

The CHAIRMAN. The name Hans Wilhelm Rohl is rather significant, I think.

Mr. ELSTON. Do I understand he got contracts before September 15, 1941?

Mr. BURTON. Yes, he got the first contract in Hawaii on December 20, 1940.

Mr. ELSTON. Had he taken out his first naturalization papers then?

Mr. BURTON. He apparently had taken out first papers at that time because he became naturalized in 1941, September 15.

(The list of telephone calls is as follows:)

[2221] TELEPHONE CALLS—HANS WILHELM ROHL TO COL. THEODORE WYMAN, JR.

Los Angeles, California, from Room 9334, Biltmore Hotel, Rohl to Wyman, Honolulu. Telephone No. 98874, between 2:00 and 3:00 P. M. Person to person call. Charge \$10.20. (July 15, 1940.)

Los Angeles, California, from Room 9227, Biltmore Hotel, Rohl to Col. Wyman, National 8400, Washington, D. C., between 2:00 and 3:00 P. M. Person to person call. Charge \$.60. (December 21, 1940.)

Los Angeles, California, GRA 4489, Rohl to Colonel Theodore Wyman, District Engineer, Telephone No. 98874, Honolulu, Oahu, Hawaii, at 7:42 P. M. Time 8 minutes. Person to person call. Charge \$24.00. (January 4, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Wyman, District Engineer, (Major Robertson?), Telephone No. 3471, Honolulu, Oahu, T. H., at 5:21 P. M. Time 3 minutes. Charge \$9.00. (January 9, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wyman, District Engineer, Telephone No. 3471, Honolulu, Oahu, T. H., at 8:10 P. M. Time 11 minutes. Person to person call. Charge \$33.00. (January 17, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wyman, District Engineer, Telephone No. 67731, Honolulu, Oahu, T. H., at 2:55 P. M. (February 5, 1941.)

[2222] Los Angeles, California, GRA 4489, Rohl to Col. Wyman, District Engineer, Honolulu, Oahu, T. H., at 5:47 A. M. (March 19, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wyman, Telephone No. 67731, Honolulu, Oahu, T. H. Time 16 minutes. Person to person call. Charge \$48.00. (May 22, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wyman, Telephone No. 67731, Honolulu, Oahu, T. H., at 10:13 A. M. Time 5 minutes. Person to person call. Charge \$15.00. (October 30, 1941.)

Los Angeles, California, GRA 4489, Rohl to Theodore Wyman, District Engineer, U. S., Telephone No. 67731, Honolulu, Oahu, T. H., at 4:12 P. M. Time 8 minutes. Person to person call. Charge \$24.00. (October 31, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wyman, District Engineer, Honolulu, Oahu, T. H. Time 5 minutes. Person to person call. Charge \$15.00. (October 31, 1941.) At 1:45 P. M.

Los Angeles, California, GRA 4489, Rohl to Theodore Wyman, District Engineer, U. S. Army, Telephone 67731, Alexander Young Bldg., Honolulu, Oahu, T. H., at 12:20 P. M. (November 3, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Wyman, District Engineer of U. S. A., Telephone No. 67731, Honolulu, Oahu, T. H., at 12:32 P. M. Time 5 minutes. Charge \$15.00. [2223] Person to person call. (November 8, 1941.)

Los Angeles, California, GRA 4489, Rohl to Col. Theodore Wieman, District Engineers Office, Honolulu, Oahu, T. H., at 3:36 P. M. Time 8 minutes. Person to person call. Charge \$24.00. (November 12, 1941.)

Mr. BURTON. Did Paul Grafe act with efficiency?

Mr. HOFFMAN. No, because Paul Grafe is not a construction man nor an engineer. He promoted the jobs and kept the contact good. By that I mean he was very close to Colonel Wyman. They were constantly together.

Mr. BURTON. How close was he to Rohl?

Mr. HOFFMAN. Paul Grafe was Rohl's closest associate.

Mr. BURTON. Do you know anything of Grafe's background?

Mr. HOFFMAN. No, only that I understand he married into the Callahan family, and nothing else.

Mr. BURTON. Did you have any opportunity to observe Colonel Wyman both in and out of office hours?

Mr. HOFFMAN. I did.

Mr. BURTON. Can you state whether or not he indulged heavily in drink?

Mr. HOFFMAN. Yes, I have seen him intoxicated.

Mr. BURTON. Did you have difficulty in getting in contact with Colonel Wyman?

Mr. HOFFMAN. Yes, on many occasions. We could not find him [2224] for a day or two and the usual excuse was that he was out looking over some other project, which was entirely possible.

Mr. BURTON. Did the Hawaiian Constructors have offices in the Pleasanton Hotel?

Mr. HOFFMAN. They had quarters in the Pleasanton Hotel and their offices were in the Panahou School. That was a school comprised of about twenty-five different buildings and immediately after the attack of December 7, Colonel Wyman took over the entire school, gave one building to the Hawaiian Constructors for their offices and he took two or three for himself. Up until that time, their offices were on the fifth and sixth floor of the Young Hotel in Central Honolulu.

Mr. BURTON. Did they do any reconstructing of the school buildings?

Mr. HOFFMAN. Yes, he, Colonel Wyman, did. He built the most expensive air raid shelter imaginable connecting his office building underground where it was air conditioned and good enough to live in.

Mr. BURTON. You mean the air raid shelter connected with his office?

Mr. HOFFMAN. Yes.

Mr. BURTON. How much do you suppose it cost to build?

Mr. HOFFMAN. Offhand, I would say \$125,000 or \$150,000.

Mr. BURTON. In your opinion, was there any need to spend that much money?

[2225] Mr. HOFFMAN. It was not necessary at all because it was given up three or four weeks after that.

Mr. BURTON. Then what became of the expenditure?

Mr. HOFFMAN. It was just charged off.

Mr. BURTON. Did any other officers or Government officials build an air raid shelter?

Mr. HOFFMAN. Not that I know of.

Mr. BURTON. Did he reconstruct any other office buildings?

Mr. HOFFMAN. Yes, they were continually remodeling the offices, tearing out partitions and creating new rooms. They had a maintenance crew around the buildings doing this remodeling with the home crew on the grounds. I would say the crew was composed of probably 150 men.

2888 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mr. BURTON. They were constantly at work, then, repairing and reconstructing?

Mr. HOFFMAN. Yes, sir.

Mr. BURTON. In your opinion, was there any need to do that to the extent that it was done?

Mr. HOFFMAN. No, not to the extent that it was done.

Mr. BURTON. Can you state whether Rohl had complete access to the plans and designs and locations of the defense projects and installations in Hawaii?

Mr. HOFFMAN. He had access to every single plan there. He was the boss.

Mr. BURTON. Do you have any knowledge as to whether he was [2226] advised of those plans before he came to Hawaii?

Mr. HOFFMAN. I wouldn't know, but after he came there he had every access.

Mr. BURTON. Did the firm of Sverdrup and Parcel have anything to do with the construction on Hawaii?

Mr. HOFFMAN. No, nothing on the island at all. They had work on the outlying islands.

Mr. BURTON. Can you state anything about the personal relations of Rohl and Wyman?

Mr. HOFFMAN. Rohl was very close to Wyman and Wyman to Rohl. Their drinking parties at the Moana Hotel were dual drinking parties between the two of them and it became common property around Honolulu that you do business only with a bottle of gin between you, this always referring to Rohl and Wyman.

Mr. BURTON. Just what was the occasion of Rohl calling you when he was drinking?

Mr. HOFFMAN. The actions of drunken men are beyond by understanding. Can I refer you to Exhibit No. 11 dated March 18 in which I called Mr. Rohl's attention to calling me at 2:30 in the morning the evening of March 17, 1942, in which I took exception to his drunken talk and wrote him a letter about it?

Mr. BURTON. I hand you a memorandum dated March 18, 1942, from you to H. W. Rohl; subject—Defense at Ulupau. Is that a copy of the letter?

[2227] Mr. HOFFMAN. That is an exact copy of the letter to which I just referred.

Mr. BURTON. Mr. Chairman, I ask that this letter be spread upon the record.

The CHAIRMAN. Be it so ordered.

(The letter referred to is as follows:)

[2228]

Exhibit No. 11

To: H. W. Rohl.

From: Robert Hoffman.

Date: March 18, 1942.

Subject: Guns at Ulupau.

Your call at 2:30 the morning of the 17th, requesting additional information on the replacement of guns at Ulupau, while merited, was a surprise, in view of the facts as chronologically related below:

It so happens that on the morning of March 16th, at 9:30 the writer for the first time saw the detail plan of the bolt and plate installations on this gun—in the office of Mr. Lloyd, the assistant area engineer. The writer to date, two days later, still has no plans, but merely a takeoff which was made.

There have been constant rains in the Ulupau and Bellows areas since March 2nd and, with the red clay surrounding Ulupau, it was, therefore, impossible to even move into excavation, although two gun excavations had already been made, with the exception of the trim.

Yesterday morning, just six hours after talking to you and Colonel Robinson, we are advised that the grade had been changed on the excavations, made by the survey party, so that we had to work back in again and reset.

The bolts for the gun plates had not been ordered by the Engineers and are still not available, as far as I know.

[2229] It is impossible to understand how anyone could expect a job to be done, without plans, pre-ordered materials, favorable weather conditions and with the existing deficiencies on the part of those who started direction of the work.

This is no alibi of the writer or any part of this organization, but merely a statement of fact.

ROBERT HOFFMAN,
Superintendent,
Fifth Field Area.

RH/nf

Mr. BURTON. You may proceed, Mr. Hoffman, to describe that.

Mr. HOFFMAN. Rohl was drunk when he called. His conversation did not make sense. You knew that he was drunk calling a man at two-thirty with Colonel Wyman sitting right there in the room just because the two men had gotten drunk and gotten into an argument and they called me to settle their argument.

Mr. BURTON. Did they make calls frequently?

Mr. HOFFMAN. I would say about once a month.

Mr. BURTON. Could you definitely say that they were drunk?

Mr. HOFFMAN. Definitely.

Mr. BURTON. Where did Rohl live?

Mr. HOFFMAN. The first known residence was a house on Blackpoint on Diamond Head Road. His next known residence was a house in Nuannu Field and then after December 7, Rohl told me personally that the Colonel thought it was unsafe for him to be in a house so they moved to the hotel.

[2230] Mr. BURTON. You say "they" moved?

Mr. HOFFMAN. Yes, Rohl and his wife.

Mr. BURTON. Where did Wyman live?

Mr. HOFFMAN. Wyman had a private house prior to December 7. I do not know the address.

Mr. BURTON. Where did he live after December 7?

Mr. HOFFMAN. I understand he moved to the hotel.

Mr. BURTON. Did you ever see him there?

Mr. HOFFMAN. Yes, I saw him there often.

Mr. BURTON. Did you ever see him with Rohl there?

Mr. HOFFMAN. Yes, many times.

Mr. BURTON. I shall appreciate it, Mr. Hoffman, if you would now give a narrative in the nature of an over-all picture of what you found upon arrival in Hawaii, of your experience with the construction work, until you left, and the same regarding your work in Alaska.

Mr. HOFFMAN. I arrived in Hawaii on April 26, 1940, with instructions to report to the Hawaiian Constructors' Office, then quartered at Pier 2, Honolulu. On reporting there, I was advised to proceed to Hickam Field for assignment.

At Hickam Field the following morning, you could find no one who could give any directions as to what was to be done. I had learned from the cutting platform foreman that while he had one or two plans for Army barracks and buildings, that he had no list of pre-cut materials to follow. In order to keep [2231] busy, I took the plans and worked for five days preparing the pre-cut list of lumber and necessary hardware, including concrete aggregates for all the type buildings for which plans were available and submitted them to the Hawaiian Constructors' office who, in turn, gave them to the United States Army Engineers. These lists were then used as examples for the balance of the entire work in Hawaii.

On the sixth day or approximately May 13, I was ordered to Wheeler Field to straighten out a new construction crew who were just starting a contract at that point. After lining up this crew, which took a week, I was ordered to report to Bellows Field and start operations there.

During the first two weeks at Hawaii I quickly found there were no pre-arranged plans for scheduling of work, that the various foremen and superintendents did not know what they were doing, and that the contractors were blaming the engineers and the engineers blaming the contractors.

The work started at Bellows Field about the last week in May 1941, and the problems of construction began due to the inability in securing the necessary materials from the United States Engineers. The supply yards at Fort Kan, which adjoins Hickam Field, had adequate materials and lumber to complete all of the assigned work at that time, but the confusing red tape of the engineers was such that it was impossible to get a requisition through in less than three or four weeks although [2232] the distance was only about twenty miles.

The Area Engineer at Bellows Field for the Fifth Area was Paul J. Lynch, a recognized construction engineer in the United States who, on his own initiative and through pressure on the United States Engineers at Fort Kan, began bringing materials to Bellows Field with the result that this field, *the last one to start in construction*, was the first one to finish at the *lowest cost* per square foot. The operation committee of the Hawaiian Constructors, inadequately manned by incompetent help, were in part responsible for the deficient progress made in the construction program. To this may be added the gross inefficiency of the United States Engineers who, because of lacking plans and lack of plan-

ning, were detrimental in completing the assigned tasks. While materials were plentiful in all the supply yards, they were difficult to secure for the assigned work due to a lack of systematic requisitioning in the United States Engineers Office.

From the start of excavation for the runways at Bellows Field during the middle of July 1941, until the actual completion of the movement of some two million yards of decomposed coral, there was but one two-yard shovel to do this job. Had there been adequate equipment there the field would have been finished prior to December 1, 1941.

The gasoline storage tunnels at Bellows Field originally scheduled for completion on November 15 were finally completed [2233] in March 1942, due to stoppage orders on the part of the United States Engineers. That is a part of the record completed on April 29.

While there was ample tunnelling equipment, there was no adequate reason why the work did not go on. Gasoline storage of aviation gasoline to supply the gas for the airfield, the nearest one, was thirty miles away.

Mr. BURTON. Did there happen to be need for it on December 7?

Mr. HOFFMAN. The only gasoline truck on Bellows Field was bombed and burned on December 7 and there was no gas for the planes.

Mr. BURTON. How many planes would you say were on the field which could have been used?

Mr. HOFFMAN. Twenty-two P-40's.

Mr. BURTON. Had there been gasoline in those tunnels, they could have been used?

Mr. HOFFMAN. Yes, they could have been used.

Throughout the entire job, in brief summary, there seemed to be no coordination between the Army Engineers and the Army, nor between the United States Engineers and the contractors, nor between the contractors' own employees.

The labor turnover was great with competent efficient field men resigning due to lack of cooperation and lack of assistance. The staff of both the United States Engineers and the contractors [2234] were much overstaffed with no allocated authority so that a definite positive order could be issued and followed. In one particular instance a change of the fill at Bellows Field was reversed four times within seven hours.

Colonel Wyman, the District Engineer, was credited with having the most inefficient organization in the history of construction and it became common knowledge that his removal in February 1942 was definitely due to this inefficiency.

The assumption of director of operations for the Hawaiian Constructors by Rohl seemed to muddle the situation more after he assumed office and the work slowed down.

On May 2, 1942, the day I left Hawaii, I witnessed an incoming convoy of twelve ships which were then bringing in motive equipment that was due in July 1941, to a job that was 95 per cent complete.

It was my understanding from Colonel Wyman himself that most of the equipment belonged to Rohl and had been lying on the docks of San Francisco since the previous May.

During the latter part of August 1941, the Hawaiian Constructors who carried their own payroll with U. S. E. D. money became so inefficient in their payroll accounts with the men that the U. S. Engineers relieved them of paying the payroll and while we all hoped it would be better, the U. S. Engineers' management of the payroll was even worse than when it was handled by the contractors.

[2235] The personal difficulties between the various officers under the command of Colonel Wyman and the difficulties between those officers and his own area engineers made it very difficult to execute any order that came out.

Let us refer to the various exhibits of my report of April 29, which substantiates that there were constant stoppages in assigning work which could have been completed prior to or before December 1, 1941.

Mr. BURTON. Can you state at this point, Mr. Hoffman, whether or not failure to complete the projects about which you are talking played any part in the lack of defense on December 7, 1941?

Mr. HOFFMAN. Yes, I can answer that with one particular incident. There were 38 changes made in the plans and grade for the major runways at Bellows Field between June and December 1, 1941. The removal of two million yards of dirt which is a major task in itself and a change of one inch in the grade would mean a possible delay of two weeks in either the cut or fill due to the length and width of the runways.

It is a known fact that had the runway at Bellows Field been completed on December 7, additional planes from the mainland could have been able to have landed in Hawaii either on Monday or Tuesday, December 8 or 9; but because of the constant delay due to contradictory orders the runways were only 50 per cent completed and after the attack of December 7, I received [2236] orders from General Farthing to please work 24 hours a day and to complete the runways not later than Friday, December 12, in order to receive the first contingent of supporting planes from the mainland.

By working three shifts in total darkness during the blackout we completed a coral runway 6,000 feet long and 300 feet wide and had it in condition at 2 p. m. Friday, December 12, in time to receive the first supporting planes that arrived on the same day at 4:15 p. m. It must be remembered that this was the only runway that was undamaged and capable of receiving large aircraft on the Island.

The responsibility, due entirely to inefficiency, is laid on both the contractor and the Army, particularly the Army Engineers.

During the entire period that I was in Hawaii, I never had the pleasure of finding a single estimate of cost of proposed work that came within 25 per cent of the actual expenditure.

The absolute power invested in Colonel Wyman was such that his word was final on all orders and plans without regard to cost. It was common knowledge that the entire work that was done in Hawaii could have been done under good planning at half the amount of expense.

Mr. BURTON. That is your own opinion as an engineer?

Mr. HOFFMAN. Yes, sir.

[2237] Mr. BURTON. Do you know anything about a boat called the Vega?

Mr. HOFFMAN. Rohl told me personally that the Army had asked for his boat and that he had given it to them for \$1 a year and that after the Army had spent approximately \$100,000 in reconditioning the boat that they found it could not be used below the equator due to certain insurance restrictions and, as a result, the boat was turned back to them in first-class shape at no cost for the reconditioning.

Mr. BURTON. Do you know who was responsible for that?

Mr. HOFFMAN. Colonel Wyman was the only man who could authorize it.

Mr. BURTON. Did Rohl say for what purpose it was to be used?

Mr. HOFFMAN. No. In fact, no one knew there was a boat coming over there until it landed.

Mr. BURTON. Did you ever see the Vega?

Mr. HOFFMAN. Yes, I saw it.

Mr. BURTON. What type of boat was it?

Mr. HOFFMAN. Sort of a pleasure yacht, I would say.

Mr. COLGAN. Could it have been used for moving cargo?

Mr. HOFFMAN. No, it was not a cargo boat.

The Engineers took the position in June of 1941 that in issuing the plans they would order all the material and equipment necessary to execute the work. In many instances, it was [2238] found that while they issued the plans they forgot to order the material. For example, the sewerage system pumps at Bellows Field, a most important item, which were to be ordered in July 1941 and delivered in November, were never ordered and this error was not discovered until after the pits were complete and the men ready to move into the barracks. In other words, the camp could not be used because of the lack of sewerage.

The Aqua system and pump system for gasoline storage at the new tunnels at Bellows Field was to hold 600,000 gallons of aviation gasoline to supply the entire windward side of the island. After the tunnel was completed and the tanks were in position it was discovered there had been no pumps of any kind ordered to fill the tanks with, and with no railroad spur less than 26 miles away, and with only eight 1,500 gallon gasoline trucks to haul gas on the island, it would take six months to fill the twelve 50,000 gallon tanks if they could get the gas out there.

Mr. BURTON. Do you recall the date?

Mr. HOFFMAN. Yes, they discovered they had no pumps in February 1942. The tanks were of no use because there was no way to get the gas into them.

Mr. BURTON. Do you know how long it was before they got the pumps?

Mr. HOFFMAN. No. I left on May 2, 1942, and they still were not there.

[2239] Mr. BURTON. Was it completely the fault of the engineers?

Mr. HOFFMAN. The man who does the planning makes the take-off. I refer to the take-off of materials. The engineers felt that the contractor was incompetent in anything pertaining to figures, as was evidenced by the taking away of the payroll, which was quite a severe blow to the contractor. They just could not get the help that they wanted. That was only one instance. This happened all over the island on all the jobs.

Another instance was when they ordered some eight-inch guns on December 16, 1941, right after the attack. They ordered some guns to protect the artillery camp and they claimed they had everything ready to go in if I would get a crew out there quickly. I borrowed two cranes from Captain Miller, unloaded the gun, first the mounting, and then the rifle, each gun weighing about 80 tons, and then discovered that the engineers forgot to order the bolts to fasten them down into the cement base. They were, therefore, worthless and it took about four weeks to get the bolts after that.

This is contained in a letter of protest known as Exhibit No. 11, dated March 18, 1942.

Mr. BURTON. That has already been spread upon the record.

The CHAIRMAN. I would like to ask whom the letter was addressed to.

Mr. HOFFMAN. That letter, I think, was directed to Mr. Rohl. [2240] It is in the record and is marked Exhibit No. 11. Mr. Rohl was the directing head of the operation committee of the contractor.

Mr. BURTON. Did these conditions which you are describing obtain generally?

Mr. HOFFMAN. They were universal throughout the series of jobs for the entire contract.

Mr. BURTON. You mean by that the defense projects?

Mr. HOFFMAN. The defense projects within the Hawaiian Islands.

Mr. BURTON. Upon whom would you place responsibility for these conditions?

Mr. HOFFMAN. I would say the contractors as well as the engineers' inefficiency, and add to that that the U. S. Engineers were the controlling directing force; they were the last word. We, as contractors, were inefficient because we did not have top men in directive posts and the men we imported from the mainland were not the top mechanics or artisans such as you had on the West Coast. The wage scale was lower in Hawaii than it was in California. For example, why should a good carpenter who could get \$1.25 an hour in Los Angeles or San Francisco go to Hawaii for \$1 an hour?

Mr. BURTON. Is there any reason why this wage scale could not have been changed?

Mr. HOFFMAN. They could have changed it but Colonel Wyman [2241] did not think it was necessary because, prior to the starting of defense projects in Hawaii, the majority of the carpenters were Japanese, and their wage scale was \$3.50 a day. It was the thought of the engineers that they would upset the economic structure of Hawaii if a sudden raise from \$3.50 to \$10 a day were to take place.

Mr. BURTON. Is it not true, however, that they were necessary for the interest of installing defenses without delay?

Mr. HOFFMAN. It is true. It was the most important defense job in the holdings of the United States. It was the midway and the defense base of the Pacific for the entire United States mainland. It was even more important than the Philippines and this assertion is from ranking Army officers whom I talked to in Hawaii.

Mr. BURTON. Do you know of any protests that were made by any of the engineers, such as yourself, about the inefficiency of the workmen and other employees?

Mr. HOFFMAN. Yes, there were continual complaints from the area superintendent for better men from the mainland. Due to the fact that I started the last job on the island of the big fields, it was necessary that I should not disturb the working personnel of the older jobs like Hickam, Wheeler, Cunningham, with the result that I had to employ the castoffs from these other fields and Japanese. It was also necessary to hold classes during the noon hour to teach these men how to build.

[2242] At Bellows Field I had 1,000 Japanese carpenters, and when it appeared from all newspaper accounts that there might be trouble with the Japanese, I prevailed upon General Farthing to have all of my Japanese examined by the Army Intelligence and either given a clearance slip or removed from the field. This was about August 1941. All I had in mind was, in anything did happen the work in my field would not be disturbed. This was done and of the 1,000 Japa-

nese I had but four were removed from the field; the balance were given Army Intelligence buttons with their picture and number and also the Honolulu police gave them a clearance slip so they were marked O. K.

In the meantime, the other fields that had a preponderance of white help were having strikes along in November 1941. There was a two-day shutdown at Hickam Field by the imported Americans from the mainland, while my Japanese kept right on working. After the attack of December 7, and because of these Japanese having been examined and passed, none were removed from the field for any reason at all.

However, the Hawaiian Constructors were advised to get more workmen into Hawaii and about the middle of January 1942, 1200 assorted employees in the category of caterpillar operators, shuttle operators, truck drivers, bakers, cooks, carpenters, plumbers, et cetera, were brought over to Hawaii and of these 1200, 400 were sent to Bellows Field, to the camp I had established there and that is when my trouble started.

[2243] In the first four days after their arrival, 16 were returned because of illness, some with severe venereal diseases; one man with arthritis so bad that when he bent over he could not straighten up; two men with very bad hearts, all these men who, under the ruling of the War Department, were to be thoroughly examined before embarkation from the mainland. Three hundred of the 1200 had to be sent back because of someone's oversight.

Mr. ELSTON. What do you mean by that, someone's oversight?

Mr. HOFFMAN. It was the rule, sir, that all men leaving the mainland were to be given a physical examination to determine their fitness for the occupational work assigned in Hawaii. It is quite evident the examination was either never made or was so slight that men with those illnesses were allowed to pass quickly.

Mr. SPARKMAN. You do not mean 300 out of the 1200 were sent back?

Mr. HOFFMAN. Yes, were sent back.

Mr. SPARKMAN. Because of physical defects?

Mr. HOFFMAN. All of them. It is a matter of record in the files, sir.

Mr. ELSTON. Within what period of time?

Mr. HOFFMAN. Within sixty days.

Mr. DURHAM. Who sent them over from the mainland?

Mr. HOFFMAN. The contractors recruited them and they were sent over by the Army Engineers that controlled the trans- [2244] port. It was during a stress period, of course. I mean the Japs had just attacked and everything was upset and topsy-turvy and there may be some reason for it. I do not know.

Mr. MARTIN. That was at the time there was an urgent need and appeals were made for laborers to go to Hawaii for employment?

Mr. HOFFMAN. That may be true, but still cripples could not work.

Mr. SPARKMAN. I would like to ask a question at this time, even though it is a little out of order,—but I am going to have to leave.

I notice your memorandum 31-G1, I think it was, or maybe E—but it is the one you wrote to Mr. Tilman protesting his letter of April 8, 1942, in which you state that that letter of his should have been addressed to a Mr. Hutchinson because you say that you had previous to that time been relieved.

Mr. HOFFMAN. Yes.

Mr. SPARKMAN. Who relieved you?

Mr. HOFFMAN. Mr. Hutchinson.

Mr. SPARKMAN. I mean, who ordered you relieved?

Mr. HOFFMAN. I had a contract over there for a year and my many attempts to break it and come back prior to December 7 and after were of no avail.

Mr. SPARKMAN. You had been trying to get relieved, is that correct?

[2245] Mr. HOFFMAN. Yes, from June 1941 on.

Mr. SPARKMAN. Then your being relieved there in the early part of April was voluntary on your part?

Mr. HOFFMAN. That is correct, sir.

Mr. SPARKMAN. It was not a case of your being discharged or anything like that?

Mr. HOFFMAN. No. In fact, I was offered more money to stay.

Mr. SPARKMAN. Who was it that gave you the relief that you asked for?

Mr. HOFFMAN. Mr. Rohl and Mr. Bennett.

Mr. SPARKMAN. In other words, they were your superiors?

Mr. HOFFMAN. That is right.

Mr. MARTIN. That was April of what year?

Mr. HOFFMAN. 1942.

Mr. SPARKMAN. That is all I have at this time.

The CHAIRMAN. And this attack was December 7, 1941.

Mr. HOFFMAN. Yes.

Mr. SPARKMAN. And Mr. Tillman was the area engineer?

Mr. HOFFMAN. Mr. Lynch, who was the area engineer, walked out on the job. It was too bad for him. He walked out and Mr. Tillman replaced him.

Mr. ELSTON. How could he walk out without permission from somebody?

Mr. HOFFMAN. He told Colonel Wyman to take his job, that [2246] all. You do not know Mr. Lynch.

Mr. SPARKMAN. You say that Mr. Lynch told Colonel Wyman he was leaving. Was he not an Army officer?

Mr. HOFFMAN. No, the area engineers were mostly civilians but they were the direct representatives of the Colonel.

Mr. SPARKMAN. And Colonel Wyman gave him the relief he wanted?

Mr. HOFFMAN. Yes.

Mr. SPARKMAN. And Mr. Tillman succeeded him?

Mr. HOFFMAN. That is right.

Mr. SPARKMAN. Was Mr. Tillman your superior?

Mr. HOFFMAN. No.

Mr. SPARKMAN. Were you working under Tillman?

Mr. HOFFMAN. Tillman, as area engineer, was the watchdog for the Army Engineers to see that the plans and specifications were followed. That was the purpose of the area engineer.

Mr. SPARKMAN. And an area engineer, as applied there, meant only on that one job, did it not?

Mr. HOFFMAN. On the entire area that he commanded.

Mr. SPARKMAN. Was that just Bellows Field?

Mr. HOFFMAN. That is right, sir.

Mr. SPARKMAN. And you still are of the same opinion as expressed in that letter to Mr. Tillman that he was wholly inefficient and had broken down the morale of the workers?

Mr. HOFFMAN. He had. And as a result, he was relieved seven [2247] weeks later.

Mr. SPARKMAN. Seven weeks after you wrote that letter?

Mr. HOFFMAN. He was relieved by somebody else who discovered it long after I had gone.

Mr. ELSTON. May I ask some questions, Mr. Chairman?

The CHAIRMAN. Yes.

Mr. ELSTON. Mr. Hoffman, these things that you have described, do you attribute them to negligence, mismanagement or deliberate acts?

Mr. HOFFMAN. I would say inefficient management and lack of planning, right offhand.

Mr. ELSTON. You did not see any evidence of deliberate acts on the part of any of these people against the Government of the United States?

Mr. HOFFMAN. No, sir, I did not.

Mr. SPARKMAN. I notice in your statement that you refer to some officer whom you say ought to be court-martialed for the sabotage that he committed. That is pretty strong language.

Mr. HOFFMAN. It is. I had to use strong language to get along. If I had not, that field would never have been ready over there and it was the most important field in Hawaii. It must not be forgotten that the windward side of Hawaii was the possible attacking side.

Mr. SPARKMAN. And up to that time, it had been left undefended?

[2248] Mr. HOFFMAN. It had been left undefended. There are two roads across the island and in some instances, we had to use our own judgment. On December 7, I loaded two trucks of dynamite and told Colonel Farnham, who has a letter in here, that if there was an attack either on December 7th or 8th, we not knowing what was happening, we would block those roads and blow them up, which were the only ways of getting across to the Honolulu or Pearl Harbor side. That was not on the say-so of Colonel Wyman or anybody else. We were using our own judgment for protection.

Mr. BURTON. Is it true that would have been the point of invasion?

Mr. HOFFMAN. That would have been the point of invasion if one on Oahu had been made.

There were perfect beaches there with no protection. The first guns that were put there I put there myself the first of January.

Mr. SPARKMAN. My question was prompted by the one from Mr. Elston and your reply was to the effect that these things you mentioned you thought were

simply mismanagement and not premeditation; and yet I call your attention to the fact you did use language there saying that some officer ought to be court-martialed for acts of sabotage he had committed.

Mr. HOFFMAN. That letter refers to Colonel Robinson?

Mr. SPARKMAN. Yes.

[2249] Mr. HOFFMAN. Fine. I believe he should have been court-martialed in that particular instance. The only gasoline supply on the windward side of the island was in that tunnel and they were short of trucks to bring gasoline to that field. It was 30 miles from Bellows Field to the gasoline supply over the mountains.

Mr. SPARKMAN. Was Colonel Robinson responsible for the pumps not having been ordered?

Mr. HOFFMAN. He ordered work stopped on the tunnels to put the tanks in there and he was later removed for inefficiency and sent somewhere else.

Mr. ELSTON. May I ask another question there?

The CHAIRMAN. Yes.

Mr. ELSTON. You said there were 22 P-40's at Bellows Field at the time of the attack on December 7, 1941, but there was no available gas supply within 26 miles.

Mr. HOFFMAN. That is correct, sir.

Mr. ELSTON. Were those planes without gasoline while they were standing on the field?

Mr. HOFFMAN. They may have had some gasoline in them. They were standing out in the open on the field but the usual custom was for the gas trucks, which there was a deficiency of, to bring gasoline out every morning at ten-thirty. It happened that the attack on Bellows Field occurred at about ten minutes of eight and the trucks had not gotten out there.

[2250] Mr. ELSTON. Were there any alert crews at the field who could have flown the planes?

Mr. HOFFMAN. Yes, there were crews and all of the officers stayed there.

Mr. ELSTON. Did any of the planes take off?

Mr. HOFFMAN. Three of them.

Mr. ELSTON. Why did not any of the others take off?

Mr. HOFFMAN. I do not know. That is for the Army to explain. I cannot.

Mr. SPARKMAN. Were they destroyed on the ground?

Mr. HOFFMAN. Some of them were.

Mr. ELSTON. The runway was not destroyed there?

Mr. HOFFMAN. The runway was not complete. The runway at Bellows Field was a temporary runway which could not take a ship larger than a P-40. The runways we were building were to take the heaviest type of aircraft possible. However, we did have a very narrow strip that could have been landed on and we immediately deployed our equipment with our men on this strip to prevent any Japanese planes from landing on that strip as it was the longest unprotected strip on the island.

Mr. MARTIN. In your opinion, was the work and the improvement on the pleasure yacht done expeditiously?

Mr. HOFFMAN. That I would not know, sir. I would not know.

The CHAIRMAN. I want to ask a question here, Mr. Burton.

[2251] You said that this officer was removed for inefficiency and sent somewhere else. Was the practice there that when a man was proven inefficient they would move him out and put him somewhere else?

Mr. HOFFMAN. No, it was not, sir. It seemed that these people moved in cliques. All through the operation of the U. S. Army Engineers in Hawaii, they were constantly at loggerheads with the Regular Army, particularly the Third Engineers headed by Colonel Lyman. The constant bickering and fighting between the Army itself was such that they were the laughing stock of Honolulu.

The CHAIRMAN. Did the same thing exist as between the Navy and the Army there?

Mr. HOFFMAN. No, that did not happen. I say to you frankly that the Army and the Navy got along beautifully over there, as far as I know. There was no time that I could call on the Navy, on Captain Martin, who was commandant of the windward base, that he did not give all cooperation possible. At no time did I see evidence of lack of cooperation. Maybe a soldier did not like a sailor on the streets, but we are talking about the services as a whole. I thought they were very good.

In fact, I even stole some pipe from the Navy and a certain captain accused me of piracy, but he said that he liked that kind of piracy as that was for Army work.

[2252] Mr. ELSTON. Were any of these things brought to the attention of the Hawaiian Command of the Army?

Mr. HOFFMAN. Yes, they were, and as a result, Colonel Wyman was relieved. They were brought to General Emmon's attention by Colonel Lyman who succeeded Colonel Wyman and who later became General Lyman, who is now deceased. In fact, things got so bad with the accounting department of the U. S. Army Engineers that the businessmen of Honolulu were practically on the verge of bankruptcy as there had been no bills paid for months.

Mr. ELSTON. That was after the attack?

Mr. HOFFMAN. Before.

Mr. ELSTON. When was Colonel Wyman relieved?

Mr. HOFFMAN. February 1942.

Mr. ELSTON. That was after the attack.

Mr. HOFFMAN. I know, but the bills had accumulated for six months before that.

Mr. ELSTON. When were these things called to the attention first of General Emmons or whoever was in command of the Hawaiian area?

Mr. HOFFMAN. I could not answer that. I could not say that but it must have been going on some time prior to the attack.

Mr. ELSTON. General Short was in command, was he not?

Mr. HOFFMAN. General Short, prior to December 7, yes.

[2253] Mr. ELSTON. Did General Short ever have called to his attention any of these things that you have described for us this morning?

Mr. HOFFMAN. That I would not know definitely, sir.

The CHAIRMAN. Whose duty would it have been to call his attention to it when these things were discovered?

Mr. HOFFMAN. I imagine it would have been the duty of the commanding officer, known as G-2.

The CHAIRMAN. Who was he?

Mr. HOFFMAN. At that time, it was Colonel Weddington, assisted by Colonel Farnham.

Mr. ELSTON. Did the Army not employ inspectors on these projects?

Mr. HOFFMAN. Yes, there were inspectors.

Mr. ELSTON. Under whose jurisdiction were they?

Mr. HOFFMAN. They were under Wyman.

Mr. ELSTON. Where is Wyman now?

Mr. HOFFMAN. I do not know.

Mr. ELSTON. Is he still in the Army?

Mr. HOFFMAN. Yes, he is still in the Army.

Mr. BURTON. I have been informed by the War Department he is in England.

Mr. ELSTON. Does he have charge of any projects in England, or what is he doing?

Mr. HOFFMAN. I would not know. I have not heard of Wyman [2254] in months.

I was finally sent down to the North Island Naval Base and I thought perhaps I would go to work for the Navy and I was to finish up the \$22,500,000 base down there, but I found the Navy was not any better than the Army, so I left them both.

Mr. ELSTON. You were there when Justice Roberts came over to make an investigation?

Mr. HOFFMAN. He was there.

Mr. ELSTON. Were any of these things brought to his attention?

Mr. HOFFMAN. I do not know.

Mr. ELSTON. Did not the committee go out on the field and go around the island and make some investigation?

Mr. HOFFMAN. They did not make an investigation in that field or that area. They were not there.

Mr. ELSTON. Did they not call any of the witnesses to these things before them and interrogate them?

Mr. HOFFMAN. They called none of the superintendents that I know of. In fact, we did not know they were there for a few days after they got there; but they were not particularly looking for that.

Mr. ELSTON. What were they looking for?

Mr. HOFFMAN. I do not know. Nobody has ever found out.

Mr. ELSTON. You, of course, knew they were sent over for the purpose of finding out how it was possible for the Japs to [2255] bomb Pearl Harbor and other installations on December 7th. The things that you have detailed to us today were certainly matters which should have been brought to the attention of that committee and would have been very helpful to the committee in making a report. Do you know of any effort that was made by anyone to bring these things to the attention of the committee?

Mr. HOFFMAN. I do not, sir.

Mr. ELSTON. Did you make any effort?

Mr. HOFFMAN. I was nobody over there and I am nobody over here. There was nothing that I could do or say or get before that committee to explain anything.

Mr. ELSTON. You were not in the Army.

Mr. HOFFMAN. No, I was a civilian.

Mr. ELSTON. As a civilian, you had a perfect right to bring these things to the attention of the committee.

Mr. HOFFMAN. Yes, I should have done that, but there were more important men who knew more about it, the contractors themselves, Colonel Wyman and his pledge of duty to support any and all action that would solve any detrimental action against his command.

Mr. ELSTON. You would not expect Colonel Wyman to do it because, in doing so, he would necessarily expose his own mismanagement.

Mr. HOFFMAN. Then he has violated his oath of office.

[2256] Mr. ELSTON. When did you call it to anybody's attention?

Mr. HOFFMAN. I did not bring it to anybody's attention. I brought this to nobody's attention. I have kept quiet and I wanted to forget it.

After I finished my work in San Diego, I went to Mexico to do some work for the Mexican Government.

Mr. ELSTON. Of course, I think it is commendable that it is brought out even now but I was simply trying to find out why it was not brought out any sooner, because these are very serious things and I think it is highly important that we know about them; and the more we know about these things the better. I have always felt that there were a lot of things that occurred over there that we did not know about; and even though it may be late, we ought to know about them now.

Mr. BURTON. I would like to ask at this point if a copy of this report of yours was ever delivered to any official?

Mr. HOFFMAN. No.

The CHAIRMAN. Who is that report to?

Mr. HOFFMAN. Let me explain that report for just a moment, if I may. After the completion of my contract, and I wanted to get out of there, realizing some day there would be an accounting of that job and the reasons for its delay; the job was not doing me any good and I could not do any more good because I had lost faith and confidence, I went up to see Colonel Lyman and told him that my contract had expired and that I [2527] wanted to leave the island with my family. My family was there with me.

Colonel Lyman told me they had a commission as a colonel ready for me and all I had to do was to step from one to the other and I was off to the races. I told Colonel Lyman that I would accept no colonel's commission; that I wanted four stars or nothing. In other words, I did not want it in the first place because it was not suitable. After the incompetency of the U. S. Engineers over in Hawaii, I could not stand as a practical engineer and take orders from a man who was a superior in rank, who did not know what he was going to do; and I felt I could do much better staying a civilian and helping to do the work that was necessary.

The argument became very heated with the result that Colonel Lyman threatened me that I would not leave the island until he got damn good and ready.

The CHAIRMAN. Who was that?

Mr. HOFFMAN. Colonel Lyman, who later became General Lyman.

I went home that night and thought the matter over and finally decided to appeal to some other ranking officers, and I did. I appealed to General Farthing who was the commanding general of the Seventh Air Force Command and it

appeared that General Farthing did not have much use for Colonel Lyman and he told me that I had no worry, that I would be going home in about two or three weeks—but would I write a report about what [2258] was going on in Hawaii?

Mr. MARTIN. When was that?

Mr. HOFFMAN. This was in April 1942.

General FARTHING called in a Colonel Rice of the Inspector General's Office and said, "I do not want to blackmail you but if you will write a report about conditions with some original exhibits showing the stoppages which have hurt the Air Corps from going ahead and completing their defenses of Hawaii, I will see what you get home."

The CHAIRMAN. Off the record.

(Discussion was had outside the record.)

Mr. BURTON. Will you continue with your statement, Mr. Hoffman?

Mr. HOFFMAN. The balance of the white men at the camp disturbed the camp so badly by getting drunk, that it came to the attention of Colonel Farnham, the commanding officer, who threatened to have the camp removed unless it was stopped immediately. I eventually disposed of most of those men to other fields. This was known to Colonel Wyman and the U. S. Engineers, and the Area Engineer, Paul J. Lynch, backed me up.

Personally, had it been possible to have resigned my position in Hawaii as early as June 1941, without breaking a contract, I would have left at that time, realizing that the job was badly mismanaged; that it would do me no good in the future as a reference, or as an accomplishment.

[2259] About the Japanese, it was difficult to say whether they were loyal or not. I will truthfully tell you that the best work performed, and the quickest, was done by the Japanese help. The American-born Japanese, most of whom had brothers in the United States Army belonging to the 288th Infantry, or some relative who had been in the Army long before the attack took place. I have heard through the Army Intelligence, who made another examination of all the Japanese working for the contractor, that only one Japanese had been removed from Bellows Field after the attack.

An amusing incident occurred during September of 1941 when it was decided to place an eight-inch rifle on the ledge off the Diamond Head Lighthouse. The only available road is known as the Diamond Head Road around the south end of the island, and due to the height of the ledge, it was necessary to do all the preliminary work and hoist the base of the rifle, as well as the rifle itself, off of the road proper to the top of the ledge, which was about 100 feet. The plans showing how the rifle was to be installed were stamped secret and had to be returned to the office every evening before five o'clock and could not be taken out until nine o'clock in the morning. Still, every Japanese driving along the road was able to stop without molestation and watch every operation in the mounting of this rifle. The secrecy was only for the Americans, the Japanese had access to the complete operation.

[2260] Mr. BURTON. On what date did you leave Hawaii?

Mr. HOFFMAN. May 2, 1942.

Mr. BURTON. Did you then become associated in the performance of any other contracts?

Mr. HOFFMAN. I embarked from Honolulu on May 2, 1942, arriving ten days later in San Francisco, where I was immediately contacted by Colonel Theodore Wyman.

Mr. BURTON. Had he left Hawaii?

Mr. HOFFMAN. He left in February of 1942.

Mr. BURTON. We can stop right there, Mr. Chairman.

The CHAIRMAN. All right. The committee will stand adjourned until Thursday morning at ten o'clock.

(Whereupon, at 12:05 o'clock p. m., an adjournment was taken until 10:00 o'clock a. m., Thursday, January 27, 1944.)

EXECUTIVE SESSION

THURSDAY, JANUARY 27, 1944

HOUSE OF REPRESENTATIVES,
SPECIAL COMMITTEE OF THE COMMITTEE ON MILITARY AFFAIRS,
Washington, D. C.

The special committee met, pursuant to adjournment, at 10:30 o'clock a. m. in room 1310 New House Office Building, Honorable Andrew J. May (chairman), presiding.

Present: Representatives May (chairman), Sparkman, Elston, Martin, and Fenton.

Also Present: Lt. Col. M. H. Knowles, H. Ralph Burton, General Counsel to the Committee, and Mr. Joseph Colgan, Special Investigator.

TESTIMONY OF ROBERT HOFFMAN—Resumed

Mr. BURTON. Before this committee adjourned on January 24, you gave testimony in reference to a report dated April 20, 1942, which appeared in the record as Exhibit 1.

I now ask if you will state to whom you delivered that report and what action was taken?

Mr. HOFFMAN. That report was part of a private deal with the Army to get off of the Island of Hawaii with my family. The suggestion was made by General Farthing, who was in command of the Seventh Air Force Command, that if I would tell the story of [2262] what was happening in a complete report and turn it over to Col. Rice, he would see that I had transportation from the Island within two weeks.

The report was made with five copies, of which four were turned over to Col. Rice in General Farthing's Headquarters at Hickam Field.

Col. KNOWLES. May I ask a question at this point, Mr. Chairman?

The CHAIRMAN. Yes, Col. Knowles.

Col. KNOWLES. Would you mind spelling Col. Rice's name?

Mr. HOFFMAN. As far as I know, I think it would be spelled, R-i-c-e.

Col. KNOWLES. Do you think it could have been "R-o-w" instead of Rice?

Mr. HOFFMAN. It may have been. I just met the man once, that is all. His name may have been Row, but I thought it was Rice.

Col. KNOWLES. Thank you.

Mr. HOFFMAN. The fifth copy I had left at home, and three days later I got a call from General Farthing saying that the report was all wrong and to forget it, and did I have any copies? I said, "Yes," I had one, and if they wanted it destroyed, I would destroy it.

Accordingly, I told Mrs. Hoffman to destroy that copy, but being a thrifty soul, she did not destroy it and stuck it in the [2263] bottom of a trunk and I did not know she had it until five months ago. That is the report that has been submitted in evidence.

Mr. BURTON. Do you recall having written a letter to any officer of the United States Army relative to the conditions you found in Hawaii?

Mr. HOFFMAN. I was in Washington on about January 10, 1943, just about a year ago, for some other business. I tried to get in touch with General T. L. Robbins, the Assistant Chief of Engineers at that time, hoping I could tell him something, as a matter of courtesy, about the way the job was going on up in Canada, the job I had left contrary to the orders of Col. Wyman, but I could not get to see General Robbins. He was too busy, so I wrote him a letter on Roosevelt Hotel stationery here in town telling him I thought the job was pretty bad, and that perhaps if he looked into it a little bit closer, he might make some changes, particularly since the architect engineer was not on the job for three months, and the contractor had not had any plans to work on at all.

I never heard from General Robbins and I never heard of the letter.

The CHAIRMAN. That was January of what year?

Mr. HOFFMAN. January of 1943, just last year.

I promptly forgot about the entire matter, feeling nobody wanted to know anything about the matter, and, therefore, it was no concern of mine.

[2264] Mr. BURTON. Mr. Chairman, at this time, I ask permission to submit a certified copy of a transcript of the testimony taken on the 27th day of February, 1943, before the California State Legislative Joint Fact-Finding Committee on UnAmerican Activities, containing testimony relative to Hans Wilhelm Rohl and Col. Theodore Wyman, Jr.

The CHAIRMAN. That may be done.

(The document referred to was marked Exhibit No. 2 of 1/27/44.)

Mr. SPARKMAN. May I interrupt right there, Mr. Chairman?

The CHAIRMAN. Yes.

Mr. SPARKMAN. It seems to me at that point in the record it might be a very appropriate place to incorporate a copy of the letter which Mr. Hoffman wrote to General Robbins, if and when you obtain such copy.

The CHAIRMAN. I thought a copy was in the record.

Mr. HOFFMAN. No, a copy of the letter I wrote to General Robbins is not here. It must be in his files.

Mr. SPARKMAN. We can ask for a copy of the letter.

Mr. HOFFMAN. I am sure he will recollect the letter, because it was written in my own handwriting and mailed right here.

Mr. ELSTON. You say it was not even acknowledged?

Mr. HOFFMAN. No, it was not acknowledged.

I left Washington the following day after I had tried to get in touch with him all day in order to tell him about the [2265] situation merely as a matter of courtesy.

The CHAIRMAN. Mr. Burton, I would like to make an inquiry here. Has this witness told anywhere in the hearings—and I have not been present during all the time—what he knows personally and what he observed with respect to when the bombing occurred over in Honolulu?

Mr. BURTON. He has not, and I think it would be proper at this point to describe what he saw.

The CHAIRMAN. I will ask this question: Where were you when that bombing occurred?

Mr. HOFFMAN. I was standing up on top of some framework of a building on Diamond Head.

The CHAIRMAN. How far away were you from the Harbor?

Mr. HOFFMAN. A mile and a half. You could look right down on the Harbor. Maybe it was two miles.

The CHAIRMAN. Would you tell us what you saw?

Mr. HOFFMAN. I had decided to take December 7th off, the first day that I was away from work since I had been over there, and I went out to help a Dr. Campbell, who was building a house on Diamond Head. He had a crew working there on Sunday, and he wanted to know if I would not come over and show those fellows how to get along. So I went over there at about 6 o'clock in the morning and was standing on the studding on the first floor at one of the corners of the room. In my car, I carried a powerful pair of field glasses that I used in my work.

[2266] I would say that shortly after seven o'clock, I saw a lot of black puffs in the sky, and saw a lot of planes flying, and I remarked to the Japanese foreman, Kokuda, that it was funny they would have target practice so early Sunday morning when everybody wanted to sleep. I got down and went over

and got my field glasses from the car and climbed back up where I could get a good look, and at that time, I saw one of the tanks on the side of the road away from Pearl Harbor, hit, and there was a big flame and a lot of black smoke.

Then I put my glasses down and kept looking and it appeared to me that a battleship was rolling and rocking over. I thought my eyes had gone bad, then. When I put my glasses back to my eyes, I could see that was the battleship Arizona that was going over on its side.

Just about that time, Dr. Campbell drove up, and he said that the Japs have attacked us, and I replied that something was going on over there with all of those planes, because none of the planes had split up, and it looked as if there were probably 50 planes in this group.

I got in my car and drove to my home, and as I got into my house I heard the radio calling, "Robert Hoffman, call Col. Wyman," and the radio kept repeating that. I immediately called the operator and she said that I could not call. I told her it was Robert Hoffman and she said, "Yes, they have been trying to get hold of you."

[2267] I got in touch with Col. Wyman, who said, "Get out to Bellows Field and protect that runway," which I did. I was there half an hour later.

I got to Bellows Field just in time to see the first B-17 that was landing on that short strip, come downwind, which was never done, because the wind came in from the sea. It came downwind, rolled over the end of the runway and over the parapet into the antenna, and rolled, I would say, about a hundred feet. Just as he came to a stop, two Jap planes came over the top of him and strafed him. Right behind me was Paul J. Lynch, the area engineer, and of course we were mystified, and we could not understand what was happening, because there had never been a plane larger than a P-40 land on that runway. It was too short and narrow and there was no foundation under it. It could not hold a big ship.

We finally got to the big ship and got the cockpit door open, and there was a group of flyers, all young fellows, and one of them was wounded. I asked the pilot where he came from, and didn't he have more sense than to land on that runway. He asked who I was. I told him, and that I wanted to help them. He told me he was in a flight that left Hamilton Field, and when he was over Hickam Field, the radio went dead, and he did not know where he was going to land, so he wanted to pick a nice, quiet spot on Bellows Field. They did not know what was going on because they could get no radio report of any kind.

[2268] If I remember correctly, the pilot's name was Carlson. I think that is the name that he gave me.

The CHAIRMAN. How long after this first group of ships, this squadron of Japanese bombers, came over, until there was some response from the anti-aircraft equipment?

Mr. HOFFMAN. I would say within ten minutes. It seemed to happen all at once. In other words, you could see the explosions in the air of shells going up.

May I go further?

The CHAIRMAN. Yes.

Mr. HOFFMAN. Honolulu was known, as far as the service was concerned, as a Saturday night town. They worked hard all week, and when Saturday night came, they all holed up and it was the party night of the week. Contrary to general belief, people did not play very much in Honolulu during the week, and everybody, if they had a party, it was at their home and things were very quiet around 10 to 10:30 every night except Saturday night.

We were totally unprepared, because, on Saturday night at my home, I would say, around 8 o'clock I had Mr. P. S. Pell, President of the Pell Company in Honolulu, at my home. We were playing bridge, and the radio came on and broke into a program. It was a special announcement from Washington, D. C. If I remember the words correctly, the announcer said that a meeting had just been held and terminated between the Secretary of State and the representatives of the Japanese Government and [2269] that it appeared that probably by Monday everything would be settled satisfactorily.

There was no reason in the world why anybody would expect any attack. In fact, we did not know it was one. It was a total surprise and nobody knew it. Nobody knew it at all. I talked to most of the officers over there after that and nobody knew anything.

The CHAIRMAN. I think maybe that is far enough into that.

Mr. ELSTON. I would like to ask a question at this point.

The CHAIRMAN. Yes.

Mr. ELSTON. The B-17 that came down on this runway at Bellows Field picked out the only runway that was available, did it not?

Mr. HOFFMAN. No, there were two more at that time on the north end of the Island, up by the R. C. A. Station, a small field called Cunningham Field.

Mr. ELSTON. Did these other B-17's come down?

Mr. HOFFMAN. I never found out. I asked the officer how many were in the flight and he said, I think, there were nine that had come over in this flight.

I do not know where the rest of them went.

A very funny thing occurred, however. I saw a moving picture about four months ago, something about an Air Force picture, that depicted the actual flight of these planes in getting over to Honolulu the following morning, and I think the picture was - [2270] based on these ships.

Mr. ELSTON. You said the runway was not strong enough to hold a large ship?

Mr. HOFFMAN. No, it was not.

Mr. ELSTON. But was not that runway built to hold bombers?

Mr. HOFFMAN. No, Mr. Elston. That runway was built, primarily, I would say, as a fighter station at that time. All they had on there were P-40's, and in fact the field had not really been started. It was a new field. It was the largest field on that side of the Island.

The runway was laid on dune sands, with a little foundation as an emergency field sometime before that. It was only 75 feet wide and about 3800 feet long, which is not large enough to take a ship of that size. It could not take a B-25 but it did take the P-40.

Mr. ELSTON. I would like to ask one more question of Mr. Hoffman, Mr. Chairman.

The CHAIRMAN. All right, sir.

Mr. ELSTON. In your opinion, if the installations on which you were working and which you have already described to this committee had been handled properly, if they had been completed expeditiously, would it have been possible for the Japs to have gotten into Pearl Harbor and bombed it on December 7?

Mr. HOFFMAN. If your air raid warning stations had been completed, they surely could have detected incoming planes. That [2271] is their purpose. I know nothing about the mechanism of A. R. W. stations. I do not know about that. I do know the actual statements could have been complete because it did not take much construction equipment for these stations.

The mechanical equipment we knew nothing about. That is something the Army was doing themselves. The contractor had nothing to do with the equipment for the actual detection. There was time, as far as construction was concerned, to complete all of the stations they had planned.

Mr. ELSTON. And why were they not completed?

Mr. HOFFMAN. Well, there were just stoppages in work, and lack of plans, and lack of planning. There did not seem to be any coordinated effort between the Army and Army Engineers and the contractors. Everybody seemed to be fighting everybody else. It was the common talk around there after the attack that the reason that the Japs did not come in and invade Honolulu was because they did not want to have to take in the United States Engineers.

We became the laughing stock of the entire country. We were the laughing stock of the whole darn country.

The CHAIRMAN. I would like to make this brief observation off the record.

(There was discussion off the record).

Mr. BURTON. Is it agreeable now, Mr. Chairman, to proceed with Mr. Hoffman's testimony?

[2272] The CHAIRMAN. Yes.

Mr. BURTON. We will take up at the point where he discontinued on January 24.

The CHAIRMAN. Yes.

Mr. BURTON. Will you proceed, Mr. Hoffman, with your statement?

Mr. HOFFMAN. I embarked from Honolulu on May 2, 1942, arriving ten days later in San Francisco, where I was immediately contacted by Col. Theodore Wyman, who had left Hawaii in February of 1942. Col. Wyman suggested that I join him in the creation of the largest project the United States Government had to offer in the building of a pipeline from a point in the Northwest Territory, known as Norman, and which ranged westward a little south to Whitehorse in the Yukon Territory.

At the time Col. Wyman contacted me, I had made plans to go on to South America in a projected plan of building air bases across some of the connecting islands from Chile to New Zealand. Due to the fact that diplomatic relations

had not been broken between Chile and the enemy, there was no possibility of the southern job going on, and after some sales talk on the part of Col. Wyman, I decided to join him in this great project in the Arctic.

At the time that Col. Wyman talked to me there was no contractor on the job, nor could the Colonel tell me who the contractor was, but that I was to go up as general superintendent [2273] in the actual construction of the work.

Accordingly, Colonel Wyman, Mrs. Ruth Wyman, his wife, and I left in a plane from San Francisco on or about the 18th day of May, 1942, and proceeded to Edmonton, Canada, arriving there the 19th. We immediately went to the McDonald Hotel and for the following three or four days, I was trying to find plans of any type or sort that would tell me just what the project was.

On or about the 26th of May, the Colonel called me in to his makeshift office in the hotel and gave me a letter of instruction which directed me to proceed to Waterways, Alberta, 300 miles north of Edmonton and at the head of the railroad where I was to find a suitable site for some 3,000 troops; that I was to provide suitable unloading ramps for unloading operations; that I was to immediately design and erect necessary buildings, warehouses, administration buildings, a hospital and hotel; that I was to prepare roads, repair and strengthen bridges, build a railroad spur into Fort McMurray some three miles distant, and, in other words, to act in general as paymaster, quartermaster, chief engineer for the United States Army, architect-engineer for the Architect-Engineer and chief engineer for the contractor.

Mr. BURTON. Did you know who the contractor was to be at that time?

Mr. HOFFMAN. I did not, sir.

In fact, the actual contract was not signed with the contractor until the 29th or 30th of May, and the actual contract was [2274] not signed with the architect-engineer until the middle of June.

The special transportation that Colonel Wyman provided for me consisted of a two-man open-air gasoline put-put in which I rode three hundred miles in the north country to arrive at Waterways, where I immediately established quarters at the hotel.

The following day I found a suitable piece of ground along the Athabaska River, midway between Fort McMurray and Waterways as the number one site and a second location along the river below the town of Waterways as the second site and when the Colonel arrived three days later and saw site number one, he immediately selected it as the troop camp. Without any attempt on his part to lease the property from the four owners who controlled it, he just took possession and said, "That's it." About four days later the first troop train arrived with troops which I learned had been on the road then for two weeks.

Mr. BURTON. Did you have any quarters prepared for them?

Mr. HOFFMAN. I had nothing. I did not even know they were coming.

Mr. BURTON. How did you take care of them?

Mr. HOFFMAN. I put them out in the open field, helped them put up their tents, and gave them all of the assistance I could, as recorded in the letter from the second officer in charge.

Then I learned that Bechtel-Price-Callahan were the constructors, and that the group, with the exception of Steve [2275] Bechtel, formerly of Bechtel-Kaiser Company, were the same group that dominated and owned the Hawaiian Constructors in Hawaii.

Mr. BURTON. Did that group include Hans Wilhelm Rohl?

Mr. HOFFMAN. To my knowledge, that included Hans Wilhelm Rohl, with this supporting statement: That in February of 1943 when discussing with Paul Grafe in his office in Los Angeles, he told me that due to an investigation by some State Department of California in Mr. Rohl, that Mr. Rohl was no longer president of that little syndicate, and that he, Paul Grafe, had assumed that office, I mean the office as president of the syndicate.

Mr. BURTON. Did Paul Grafe say that Rohl had given up his financial interest in the syndicate?

Mr. HOFFMAN. He did not say that Rohl had given up his financial interest in it. He just said that he had given up the presidency of the syndicate. That was the syndicate that was to handle the Canol project.

When the troops started to arrive at Waterways I immediately called Mr. Grafe, who was then in Edmonton, that I needed some help in the form of carpenters and mechanics, and they hastily recruited 205 Canadian men whom they sent to me by special train to Waterways.

I instructed my foreman to secure a service record of the history of these men and learned to my surprise that not one of these men had ever held a position for more than four weeks during the previous two years. They were all cripples, more or less, [2276] running from 35 to 60 years of age, and the type of help that would hang around the various missions and Volunteers of America Hotels.

At that time it was understood there could be no American help transported due to the very low wage scale of Canada's industry and it was explained that it might upset the economic structure of the North Country. However, I was authorized to pay these men 50¢ an hour with no double time for overtime, and this wage scale resulted in a very serious argument between the Ottawa government and the Hudson Bay Company which had set a standard wage scale for laborers at \$30 a month, out of which they paid 75 cents a day for their keep.

The result of my paying 50 cents an hour and working these men ten hours a day, 7 days a week, plus their bunkhouses and meals gave my men \$35 net per week and their board and room, and while it increased the purchasing power of the community 400 percent, the resounding roar from the Hudson Bay Company was heard all the way to Washington. Eventually we were forced to discharge every Canadian because of this dispute.

From May until August we unloaded and loaded 25,000 tons of freight, which was 18,000 tons in excess of any previous yearly loading by the Hudson Bay Company. I designed and erected 20 buildings, put up a utility plant, provided a water supply, built 200 barges, built a railroad spur and drove a trestle across a creek which the railroad said was impossible; provided transportation [2277] for some 3,000 troops, built the roads, provided nets and stoves for the soldiers in their experimental trips down the river and, in general, acted as a wet nurse for the entire Army without benefit of plans or direction or anything concrete from anyone including Colonel Wyman himself.

In fact, the Architect-Engineer, who should have had plans on the job for the contractor to work with, did not have representatives at Waterways until about July 20, after 80% of the work of the first section was completed, but for which he drew a fee for the work which was accomplished.

Mr. ELSTON. How much did he receive?

Mr. HOFFMAN. That I cannot say. That is in the vouchers which are in the main office.

Mr. BURTON. I have a record of that.

Mr. HOFFMAN. Nor were there any plans for the actual direction of the pipeline; nor were there any plans for the tanks at Skagway which were drawn about the first day of August in Edmonton by Turnbull, Sverdrup and Parcel; nor did anybody know or see any plane; nor could anyone tell what they were going to do, when they were going to do it, or how much it was going to cost.

Colonel Wyman arranged the advance payment of some three million dollars to the contractors, so that there was no investment on the part of the contractors, and the amount of equipment which was shipped to me at Waterways was sufficient to have [2278] completed a half-dozen pipelines of the size they contemplated, with 25% of the total I had on hand.

The pipeline was to run from Norman Wells to Norman, which was 50 miles on the east side of McKenzie, then to White Horse, 510 miles in a country where the temperature is 50 degrees below zero, where no pipeline will hold up without having pump stations at least every 30 miles which must be maintained in the cold weather and which is not warranted in the tremendous expenditure and which cannot possibly pay out in at least 200 years.

Mr. BURTON. Do you know of any other potential oil fields that could have been tapped and saved the building of this line?

Mr. HOFFMAN. I do. One-half mile out of the city of Waterways was the first large deposit of what is known as the Athabaska oil sands. When I arrived at Waterways, I discovered that there was a small refinery then in operation turning out approximately 500 barrels of oil a day, which is extracted from these oil sands.

I became interested in the Athabaska oil sands, and much to my surprise I learned from countless authorities that in three issued volumes by the Canadian Government, entitled, "Oil Sands of the Athabaska," that the potential oil reserves exceeded 6,300,000,000 of oil for these sands, and this had been a known fact for some 50 years.

In further talking with the refinery superintendent—and I might mention his name, John B. Cram, formerly superintendent [2279] of the Bartles Oil

Company of Oklahoma—he told me that if he could enlarge the size of his refinery to 2,000 barrels a day it would cost approximately \$2,000,000, and he could turn out more oil than the potential oil field of Norman Wells at a fraction of the contemplated cost.

Mr. BURTON. Had this been called to the attention of Colonel Wyman?

Mr. HOFFMAN. I wrote a letter calling the matter to the attention of Colonel Wyman, and he told me to mind my own business.

The CHAIRMAN. Let me interrupt here to make this statement: Something like a year ago, former Representative Jim McClintic from Oklahoma, who was then an employee in the Department of the Interior, came to my office with some photographs of an oil field in Alaska somewhere and a refinery. He told me the story of the great possibilities of it and asked me to introduce him to Secretary Patterson.

I invited Secretary Patterson to have dinner with me at the Washington Roof Garden and Mr. McClintic also. He was there with his file and his maps and presented the matter to Judge Patterson, and he agreed to look into it and see what there was to it. That is the last I have heard of it and I do not know any more about it, but that was an oil field in Alaska somewhere, and I looked at the derricks standing up in the photograph and tanks for containing the oil, and the building that looked like the refinery. I do not remember any other details.

[2280] Mr. ELSTON. This project you are talking about is in Canada, is it not?

Mr. HOFFMAN. In Canada, yes.

The CHAIRMAN. That is not in Alaska?

Mr. HOFFMAN. That is in Canada, 300 miles north of Edmonton, with a railroad to serve it. This is right at Waterways.

I might add for the record that in the issue of Newsweek which we are trying to locate, either June or July of this year, there was a full-page article in there showing a picture of the refinery there, and quoting some of the prominent geologists which give this as the largest oil reserve, I think, in the history of the world, in these oil sands.

This morning we have a copy of a publication which gives you the area as being 110 miles long and 80 miles wide of nothing but oil sands, oil-impregnated sands, which are known as the Athabaska oil sands.

The CHAIRMAN. What is the name of this project, the Canol Project?

Mr. HOFFMAN. The Canol Project. This had nothing to do with that.

The CHAIRMAN. How far is this refinery from the Canol Project?

Mr. HOFFMAN. One thousand six hundred miles. The Canol Project is 1,600 miles north of Waterways, and from the railroad.

The CHAIRMAN. It is beyond this project you are talking [2281] about?

Mr. HOFFMAN. Beyond this project, farther north of the McKenzie.

Mr. BURTON. I have here two volumes which I obtained from the Library of Congress. One is entitled "The Lower Athabaska and Slave River District—Its Development and Resources." It touches upon these sands.

I have another volume entitled "Oil and Gas Prospects of the Northwest Provinces of Canada," by Wyatt Malcolm, which also refers to these sands.

Mr. MARTIN. I have a question at this point. Is this large deposit of oil sands now reachable by rail transportation?

Mr. HOFFMAN. It is right at the rail head, sir. It has been there. I used the oil for my equipment.

The CHAIRMAN. What grade of oil was it?

Mr. HOFFMAN. Well, it is the finest Diesel oil I have used in my construction experience. The gasoline has an odor which was temperate, and I bought all they would give me at one cent and a half less per gallon than I could buy it from the Imperial Oil Company. When somebody found it, I was ordered to stop buying from the Athabaska oil sands, and to buy from the Imperial Oil Company.

Mr. ELSTON. And you had to pay more?

Mr. HOFFMAN. Yes, but they had the contract.

The CHAIRMAN. Who gave that order?

[2282] Mr. HOFFMAN. Colonel Wyman. I was told to stop. I did not, because I needed oil. I just kept right on.

As a matter of record of the oil, in a volume called "McKenzie on Exploration," which is some 100 years old, you will find there that he originally discovered the oil seepage of the oil sands in the far North when he came down the McKenzie from Aklavik.

Every Eskimo, every explorer, every fur man in Canada, and every geologist knows there has been oil seepage in Canada for a hundred years. It has been no secret.

The Imperial Oil Company did not control the oil sands of the Athabaska, but they did, in this contract, control the drilling operations for the exploration of the Norman Field. I might say this: The little refinery at Waterways was turning out 500 barrels of oil. The process has been proven successful. I was using the Diesel oil, and I say to you it is the best Diesel oil I ever had. I cannot even tell you the name of the people who own the oil property. I do not know.

I was interested in good equipment and good materials. I tried to make a deal with them whereby they would give me all of the 500 barrels every day because I wanted to send the refined oil up the river to the stations, Fort Fitzgerald, Fort Smith, Fort Resolution, and three or four others, which would save the haul from Edmonton up the railroad, and I would be buying it at less money, but the oil was so good that the gold companies up at [2283] the gold fields along Great Slave Lake beat me to it and they made a contract to take the entire output. What they did not take I could have, with the result that I did not get very much of it. I would say perhaps 150 barrels a day, refined, of course, which was not what I needed. I needed a whole lot more than that.

The CHAIRMAN. How long is this pipeline that was built under General Somervell's orders with respect to the Canol Project?

Mr. HOFFMAN. All told, it would 560 miles from the line at Norman Wells to the McKenzie and to White Horse; approximately 560 miles as the crow flies.

Mr. ELSTON. Is this project you were working on part of it?

Mr. HOFFMAN. That was the project. I was the general superintendent of the Canol Project. I was the first man up there.

The CHAIRMAN. Did you call the attention of the War Department to the fact that this other source of supply was available at Waterways?

Mr. HOFFMAN. No, Mr. May. I did not call it to the attention of the War Department, because, as I say, I am nobody. I was nobody there and I am nobody here. I did tell Colonel Wyman, the top officer, about it, and I was told to keep still, so I decided I had better get out of the job as quick as I could.

When my agreement was up, I quit, and I was all through. I wanted no part of it.

[2284] To go further, the Dominion Government of Canada, they are pretty smart and conservative people, have gone into the oil sands and taken over that refinery and they have invested \$500,000 and they will produce more oil within the next six months after they get that refinery working, than the whole Norman Wells project will do.

The CHAIRMAN. Is this the Canol Project?

Mr. HOFFMAN. That is the Canol Project.

Mr. MARTIN. They will produce more in six months than the whole Canol Project can do in how long?

Mr. HOFFMAN. I mean on a daily rate. They will produce more oil with a \$1,000,000 investment than we will with \$250,000,000, daily.

The CHAIRMAN. In other words, Mr. Hoffman means that after they have had six months to bring up the development, they will be doing it.

Mr. HOFFMAN. That is right.

Mr. ELSTON. The Canol Project took longer than six months, did it not?

Mr. HOFFMAN. The Canol Project is not done yet.

Mr. ELSTON. How much time has been consumed already?

Mr. HOFFMAN. Well, I got there on May 18, 1942, and today is January 27, 1944, and they are not done yet.

Mr. ELSTON. How far along are they?

Mr. HOFFMAN. I do not know. I heard somebody say they would [2285] be done in February. Nobody is able to get any information out of there now, and I am not interested enough to find out.

Mr. FENTON. How long were you there?

Mr. HOFFMAN. I was there three months on the first section.

Mr. ELSTON. I was going to ask who owns the Imperial Oil Company?

Mr. HOFFMAN. Standard Oil Company of New Jersey.

Mr. BURTON. Will you proceed, Mr. Hoffman?

Mr. HOFFMAN. The Athabaska oil sands deposits were not controlled by the Imperial Oil Company and evidently were of no interest to them. But had the plan been followed, which competent oil men told me was reasonable and

intelligent to do, the actual operation of refining at that point, and by that point we are talking about Waterways, would have produced within 90 days about two thousand barrels of oil a day that could be shipped by rail and water to Edmonton and to Prince Rupert where it could have been unloaded into barges and towed up the inland passage to Skagway and could have provided more oil than is possible out of the potential oil field of Norman Wells.

Mr. BURTON. You spoke of some equipment that was shipped to you. Can you state how much there was and of what it was composed?

Mr. HOFFMAN. I ordered a one-ton truck or a little sedan for myself to get around and they sent me 24 brand new Ford sedans, which I had to park because there were no roads to drive them on. I ordered two 1½ ton trucks to haul supplies and they sent me 196.

[2286] I had over 60 D-8 bulldozers and over 50 D-7's and 6's. In fact, I had \$4,000,000 worth of equipment that was of no earthly use to the job, because in order to lay the pipeline across the muskeg, it was only necessary to provide a road and you could have but one unit working on that road. Instead of having 100 bulldozers, I could have done just as well with 10.

I might explain that. If you are going through the muskeg, you cannot work ahead of yourself. You have got to provide a road to get your equipment over, and therefore, but one unit can work on that road. If it is all muskeg, you cannot get into a station because there is no road.

The CHAIRMAN. In other words, you build your grade?

Mr. HOFFMAN. You had to, because it was muskeg and swamp and it was impossible to work more than one unit.

The CHAIRMAN. What did you use to pick up the earth?

Mr. HOFFMAN. We had shovels. We had shovels and bulldozers and scrapers. We had all of the equipment in the world. In fact, I got so much equipment in Waterways that I had to go up in the hills and cut trees down and park my equipment and build land to put it on. I had so much equipment I thought I was really going to do a job.

Mr. ELSTON. With whom did you place these orders?

Mr. HOFFMAN. I did not place any orders.

Mr. ELSTON. You said you had placed an order for one car.

Mr. HOFFMAN. That was with our office in Edmonton.

[2287] Mr. ELSTON. Were you not consulted about all this equipment that would be needed?

Mr. HOFFMAN. Nothing. I did not know a thing about it. In fact, I did not even think it was on the way.

Mr. ELSTON. You were the man in charge and the one whom they should have consulted, were you not?

Mr. HOFFMAN. That is right. None of this was pre-planned. On a construction job the general superintendent or chief engineer, as I was, must have something to work from. I must have a plan and I state definitely here there were no plans for that pipeline and there were no plans for that job. There were no plans of any kind until the day I left and then I did not see any.

I did see Mr. Turnbull making up plans for a tank farm up at Skagway which was a supplement to the contract.

The CHAIRMAN. What do you mean by "tank farm"?

Mr. HOFFMAN. They were going to store oil up at Skagway and they were going to build storage tanks. I did not know why they were going to store at Skagway if they were going to bring it across to White Horse—this oil was supposed to go into Alaska—I did not know why they would bring it 110 miles south to go north. Those are some of the things I do not know about.

I did not find out enough about them. I had too much to do as it was.

Mr. BURTON. Off the record.

[2288] (There was discussion off the record.)

Mr. BURTON. I show you a report dated July 15, 1942, addressed to S. D. Bechtel, H. C. Price, Paul Grafe; subject: "Progress Report on the Canol Project, Contract No. W-412-eng.-53, Report No. 1 (Edmonton)" and ask you if that is a report which you submitted.

Mr. HOFFMAN. That is the report, sir.

You will find the equipment lists right on the bottom showing the tremendous amounts I received there.

Mr. BURTON. I ask that that be marked as an Exhibit.

The CHAIRMAN. It is so ordered.

(The document referred to was marked Exhibit No. 3 of 7/15/42).

2908 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mr. BURTON. I submit herewith a copy of the "Norman-Whitehorse Pipeline Project General Equipment—to be delivered at McMurray, Canada (except planes and four Fords)" and ask you if that also is a record of equipment.

Mr. HOFFMAN. That is a record of equipment there, calling for about 16 or 18 planes and a lot of other miscellaneous things.

Mr. BURTON. I ask that that report be admitted as an exhibit.

The CHAIRMAN. All right, it may be done.

(The document referred to was marked Exhibit No. 4)

Mr. BURTON. I submit herewith a memorandum dated June 28, [2289] 1942, addressed to Bechtel, Price and Callahan, Waterways, Alberta, Canada—Attention Mr. Robert Hoffman, and signed Theodore Wyman, Jr., Colonel, Corps of Engineers, Officer in Charge. I ask if you can identify that, Mr. Hoffman?

Mr. HOFFMAN. That is a true copy of the original letter sent to me by Colonel Wyman to do certain work in waterways; an open letter authorizing me to spend as much money as I wanted to without any restriction of any kind.

Mr. BURTON. I ask that that be spread upon the record.

The CHAIRMAN. That may be spread upon the record as an exhibit.

(The letter referred to is as follows:)

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
McMurray, Alberta, Canada, June 28, 1942.

BECHTEL, PRICE AND CALLAHAN,
Waterways, Alberta, Canada,
Attention: Mr. Robert Hoffman.

DEAR SIR: In accordance with the terms of Contract W-412-eng-53 and in connection with the movement of personnel (Civilian and Military) equipment, materials and supplies, to Norman Wells and other places on the Canol Project, you are directed to perform the following work at Waterways, Alberta, and McMurray, Alberta, and at the locality known as the Prairie, located [2290] between Waterways, and McMurray:

(a) Loading and unloading of freight for the Canol Project delivered by the Northern Alberta Railroad to the railhead at Waterways.

(b) to assist the Hudson's Bay Company in the handling of freight destined for Norman Wells and other points in the Canol Project. Any service rendered to the Hudson's Bay Company will be charged to that company and payment received credited to the United States.

(c) The construction of railroad facilities extending from Waterways to the Prairie with the cooperation of the Northern Alberta Railway and military forces located at Camp Prairie.

(d) The rental of lands necessary for the movement and storage of freight and the construction of necessary facilities to expedite the movement of freight and its transfer from rail to boat, and for such other purposes as necessary.

(e) The reconstruction of the highways from Waterways to Camp Prairie and to the loading ramps located on the Clearwater River at Camp Prairie, and the maintenance of these roads and the construction of such additional roads as necessary at Camp Prairie and to the Clearwater River. This construction will be prosecuted in cooperation with Military forces located at Camp Prairie.

(f) The construction of the following buildings at Camp Prairie: Administration Building, approximately 25' x 130'; [2291] Warehouses for the storage of Quartermaster supplies, consisting of two buildings, approximately 25' x 200'; Board House approximately 50' x 200' to accommodate 104 people; two Bunk Houses, approximately 50' x 200'; to accommodate 104 people; two Bunk Houses, approximately 26' x 100', to accommodate 96 people each; a Mess Hall approximately 25' x 160'; a Hospital Building approximately 25' x 110'; a Post Office Building approximately 25' x 60' and such other office buildings and store houses as may be necessary. Camp facilities for the civilian employees of your Company and such other persons who may be authorized to occupy them.

(g) To furnish camp equipment, including mosquito bars and head nets for crews of tows operating on the Athabasca River system.

(h) To furnish lumber for decking over open boats for use in tows hauling freight down the Athabasca River.

(i) To furnish road oil for the maintenance of all roads being used by either Army or Constructors vehicles.

(j) To furnish a staff of native pilots and guides for use on pioneer tows on the Athabasca River and for such other purposes as may be necessary.

(k) To construct utilities, including water supply, sewer system, electric lighting for Camp Prairie, both Civilian and Military Camps, and to construct refrigerator plants, as necessary, for Warehouses.

[2292] (l) To furnish gravel for the construction and maintenance of the road system and about the railhead and Camp Prairie.

(m) To furnish motor fuel and lubricants to military organizations until such time as a regular supply of motor fuel is established.

(n) To arrange with the Hudson's Bay Company to furnish wood for fuel for the S. S. Athabasca River at Waterways, at a price of \$4.00 per cord. All monies received from the Hudson's Bay Company will be deposited to the credit of the United States with the nearest Finance Officer.

Any stevedore service furnished either the Hudson's Bay Company, Northern Transportation Company or any other common carrier, will be charged to the respective companies and the funds deposited with the Finance Officer for the credit of the United States.

/s/ THEODORE WYMAN, JR.,
Colonel, C. of E., Officer in Charge.

CC. Bechtel Price and Callahan, Edmonton
Bechtel Price and Callahan, San Francisco
U. S. Engineer Office, Edmonton
U. S. Engineer Office—Canol Project, San Francisco.
Original to Edmonton Office.

Mr. SPARKMAN: Off the record.

(There was discussion off the record.)

Mr. HOFFMAN: Here, on page 3 of the Progress Report [Exhibit 3]. [2293] Paragraph 4, it states:

"Engineering Studies in Connection with the Skagway and Whitehorse Pipeline and Facilities as per Contracting Officer's authorization, dated July 3, 1942."

Does that tell you that there are any plans prepared for that part of the line at all, when it is authorized in this report, as of July 3, that there were no plans of any kind. It is right there under their own signature. This report was prepared by the main office. This is not my report.

Mr. SPARKMAN. I asked you off the record, Mr. Hoffman, if the contract at Edmonton, Canada, about which you have been testifying, was not subsequent to your leaving the job in the Islands and subsequent to the difficulty, if you want to call it such, or certainly the criticism that you had of Colonel Wyman in the Islands?

Mr. HOFFMAN. I knew nothing about the Canol Project or the Canol pipeline until my arrival in San Francisco on May 12, at which time Colonel Wyman contacted me.

Mr. SPARKMAN. It was subsequent to that time, was it not?

Mr. HOFFMAN. It was subsequent to that time.

Mr. SPARKMAN. I am just trying to get this on the record. The question that comes to my mind is this: That after you had known something about the inefficiency, if you want to describe it as such, of Colonel Wyman in the Islands, and you had rather severely criticized him, how did it happen that you undertook [2294] this new project with him?

Mr. HOFFMAN. The first reason was that I received a letter from Colonel Wyman, which is a matter of record, in which he, in the wording of his letter, said he hoped the day would come when he and I could do a real construction job together, and from that letter he infers that all was not well in Hawaii.

Mr. SPARKMAN. You make reference to a letter that has already been put into the record, do you not?

Mr. HOFFMAN. I think it was. It was signed by Colonel Wyman and addressed to me in Hawaii.

Mr. BURTON. This letter is on record on page 2189. That letter is dated March 17, 1942, addressed to Mr. Robert Hoffman, and signed Theodore Wyman, Jr., Colonel, Corps of Engineers, District Engineer. That is in the transcript of record of these hearings, dated January 24.

Mr. HOFFMAN. When I arrived in San Francisco, with no intention of contacting Colonel Wyman, and with the hope that I was going to South America to build some air bases for another contractor, Colonel Wyman contacted me and asked me to come down to his office on Montgomery Street and talk to him about the greatest project that was being offered. He did get me enthused over that project.

It was something new, and they said it was impossible, and that is the kind of a job I wanted.

After a day and a half of telling them that I had an [2295] obligation, and that I had to call the man on the South American work, I learned that diplomatic relations had not been broken between the Axis and Chile and it would not be possible to continue with that work, so I agreed to go with Colonel Wyman for a period not to exceed four months on the first section, and I was to be released after that time.

Mr. SPARKMAN. Did that Colonel Wyman at that time virtually admit that the situation in Hawaii had not been a happy one?

Mr. HOFFMAN. That is correct.

Mr. SPARKMAN. And promised the one in Canada would be a better one?

Mr. HOFFMAN. A much better one, and a different job altogether. In fact, I told Colonel Wyman we could not duplicate what we did over in Hawaii or I wanted to quit right then and there.

Mr. ELSTON. I would like to ask a question about what disposition was eventually made with all this equipment?

Mr. HOFFMAN. Mr. Elston, that is in this record as we go on.

The CHAIRMAN. All right.

Mr. BURTON. Did you offer any protest about the quantity of equipment that was sent you?

Mr. HOFFMAN. Yes, I wanted to know. I asked what the quantity of equipment was for after it arrived, not knowing that it was coming, even. They said it was to build a pipeline. Well, that [2296] is when I decided to get out of there, realizing the construction of a pipeline up in the muskeg country, where I had made several trips for inspection, I decided the thing to do was to get out of that job quickly. My protests would have meant nothing because the equipment was ordered without my consent or advice. It was ordered by the contractor and approved by Colonel Wyman. It had to be approved by him before it could be ordered.

Mr. BURTON. Do you know what became of this equipment?

Mr. HOFFMAN. Yes, if I can go on with the story.

The McKenzie River flows north from McMurray and empties into the Arctic at Aklavik, 1600 miles from McMurray. The river runs over limestone and is never more than 42 inches deep, and therefore, the barges cannot take over three feet of water. When the barges arrive at Fort Fitzgerald, 300 miles north of McMurray, everything must be unloaded and transported over a portage of 20 miles to another town called Fort Smith, and it is then reloaded and sent down the river which enters Great Slave Lake and then westwardly across the end of the lake about a distance of 80 miles and then into the McKenzie and then again up to Norman Wells.

Great Slave Lake is a very treacherous body of water because of its shallowness and a storm can produce 30-foot waves within a half hour. When the first two barges loaded with \$200,000 worth of equipment started north, a storm came up, and the total equipment load of both barges was lost in the only deep spot in [2297] the Great Slave Lake.

The balance of the equipment was left waiting at Fort Smith in 50 degree below zero weather through the winter of 1942-43 with the result that considerably over 25% was lost to future use as there was no cover provided for it. This applies to trucks, maintainers, portable sawmills, shovels, electric welders, air compressors, and all construction equipment of that type.

Mr. BURTON. Let me interrupt there off the record.

(There was discussion off the record.)

Mr. HOFFMAN. As I said, you could not use all of the equipment for the job. It was impossible. You cannot use a hundred bulldozers when you can only work then on the road, with the result that I learned that a friend of mine whose name is Mickey Ryan, who controls the portage between Fort Smith and Fort Fitzgerald, now has a contract to bring the equipment back. I had word just this morning that some of the equipment went up there, never turned a wheel in work, but is now being returned.

Mr. ELSTON. Do you know how much?

Mr. HOFFMAN. I do not know. I just got this word this morning and I will find out within a week or ten days when I will know more.

Mr. MARTIN. About what percentage of the total amount of equipment was lost in that storm?

Mr. HOFFMAN. I would say conservatively 25%. Conservatively, I would say 25%. You cannot leave steel equipment stand out in [2298] 50 degree below zero weather without cover or any care.

Mr. MARTIN. You mean, exposure through the winter?

Mr. HOFFMAN. That is true, and mishandling.

Mr. MARTIN. I also wanted to ask what percentage of it was lost in the storm on the lake?

Mr. HOFFMAN. \$200,000 worth on the two barges. The bulldozers run around \$12,000 apiece and there were eight of those on one barge.

Mr. BURTON. Did you come in contact with an explorer by the name of Stephanson.

Mr. HOFFMAN. I did not. However, I know the explorer's first name starts with V. Stephanson, and I knew of a survey that he made of the potential oil fields of Norman Wells. However, Stephanson's recommendations either for or against, were of no importance, as the original discovery of oil seeping from the ground was made first by the Scotch explorer McKinzie, and then by every other hunter and Eskimo that traveled the area.

There are seven or eight volumes published in the open libraries on the oil seepage of the McKenzie Valley.

Mr. MARTIN. According to geologists, the oil field deposits of the Athabasca were a part and parcel of the same seepage.

Mr. BURTON. Do you know of any work that was performed by the soldiers on this project?

Mr. HOFFMAN. Yes, I used soldiers in the building of the railroad, in the building of the airport, and in laying the [2299] utility pipelines of the camp.

There was not sufficient work for the soldiers sent to this camp. When I asked one of the officers why they had troops up there, he said they were there in case of invasion. It developed that these troops were engineer labor troops, and there were only 9 rifles and 4 pistols among the 3,000 men there. They were not gun troops.

Mr. BURTON. Did these labor battalions help to do the work?

Mr. HOFFMAN. These labor battalions helped me to build the railroad, helped perform other labor. Of course, the total expenditure of the cost of the project was figured in the amount of the fee to be paid to the contractor.

Mr. BURTON. You mean the fee paid the contractor was based on the estimated cost of the work done?

Mr. HOFFMAN. That is right. The contractor took the credit for all of the work performed up there. It was *my* railroad, *my* project, *my* buildings, *my* this and *my* that, although a large part of the work was performed by Army battalions.

Mr. BURTON. Then a large part of the work was performed by the Army battalions?

Mr. HOFFMAN. I would say not a large part, I would say a generous part at the Waterways station, which was the first section of the work. They had to build that before they could go farther north.

Mr. BURTON. Did you find any lack of equipment for the [2300] soldiers?

Mr. HOFFMAN. Yes. Due to the fact I did not know what troops were going to be there or the purpose they were going to be therefor—I knew they were engineer troops, of course, and an engineer, to me, means the man who does the things—I neglected to take my level and my transit with me from San Francisco.

When I was ordered to build the railroad and to drive the trestles, I had to have a level to set the grade for the bed. Of the 3,000 engineer troops, there wasn't a level or a transit among them. The engineers that were there were not that kind of engineers. They were pontoon and labor battalions, but called engineers of the Army.

Mr. BURTON. Do you know anything about the character of the officers who were sent there to supervise this work for the Army?

Mr. HOFFMAN. The officers were not capable of supervising that type of work up there. These were primarily labor battalions, with probably one or two companies specialized in pontoons.

Mr. BURTON. How about Colonel Wyman and his staff?

Mr. HOFFMAN. Colonel Wyman did not have a staff. He had to accept these officers who came with these troops.

Mr. BURTON. How did they conduct themselves?

Mr. HOFFMAN. Just like a bunch of fellows in the country without responsibility. There was not enough for them to do. They were not the best behaved officers.

Mr. ELSTON. What was the highest ranking officer in command?

2912 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[2301] Mr. HOFFMAN, A lieutenant colonel. The first ranking officer was Jim Krueger, the son of Lt. General Krueger, whom I might say was drunk 50% of the time up there. There were some officers there that were really sincere. I particularly refer to the medical officers who had a job to do, and they did a marvelous job up there. As far as sanitation and keeping the men healthy, for the bugs and mosquitoes and flies were such that they would really make you sick if they bit you often enough, the doctors did a marvelous job.

Mr. BURTON. You had a little something to say about the contractors. What part did they play?

Mr. HOFFMAN. The contractors themselves knew less than the engineers and had no plans to build the project. The contractors were interested primarily in spending the money to secure a fee, as was evidenced by the building up of an office force of some 200 people that had nothing to do for three months, while the only work that was going on was the work I was doing in Waterways with three people.

The CHAIRMAN. That was on a cost-plus-fixed-fee contract?

Mr. HOFFMAN. That is right.

Mr. ELSTON. Did the cost of the material enter in any way into the fee?

Mr. HOFFMAN. Yes, the cost of the project. The entire cost of the project, the fee is based on that and the only way the contractor can secure his earned fee is by the report of [2302] expenditures.

Mr. ELSTON. And all these bulldozers and these other items of equipment that you say were unnecessary but were sent up there nevertheless, who paid for those, the contractor or the Government?

Mr. HOFFMAN. The government paid for everything.

Mr. ELSTON. Did the cost of that equipment have anything to do with the fixing of the fee of the contractor?

Mr. HOFFMAN. It is included in the total cost of the project. If you will look at that report again, you will find that the original estimated cost of that project is \$30,000,000. The original estimated cost of the project is \$30,000,000 with a fee of \$1,500,000.

Mr. ELSTON. And the \$30,000,000 includes all the equipment?

Mr. HOFFMAN. Everything that is the cost of the project.

Mr. ELSTON. And the fee was \$1,500,000?

Mr. HOFFMAN. \$1,500,000.

Mr. ELSTON. And that was arrived at in what manner, do you know?

Mr. HOFFMAN. No, I do not.

The CHAIRMAN. That was fixed by the Blossom board down here?

Mr. MARTIN. But the exact number of bulldozers and the other equipment did enter directly into the computations?

Mr. HOFFMAN. No. The fee is based on an approximated cost [2303] of a job.

The CHAIRMAN. On a percentage basis?

Mr. HOFFMAN. On a percentage basis. In other words, that job was supposed to start at \$30,000,000 and the fee was \$1,500,000. The fact it ran to \$130,000,000 by supplements, nullified the original fee altogether.

The CHAIRMAN. But there would be additional fees fixed?

Mr. HOFFMAN. There were additional fees fixed.

Mr. MARTIN. Then the cost of this additional excess equipment was finally reflected in a larger fee?

Mr. HOFFMAN. Yes, it must be.

Mr. ELSTON. And some of that \$1,500,000 fee was paid rather early was it not?

Mr. HOFFMAN. That is right. It was paid right off. In fact, they had to advance the money before they started.

Mr. ELSTON. Do you know how much they were advanced?

Mr. HOFFMAN. \$3,000,000.

Mr. ELSTON. I mean do you know how much of their fee was advanced?

Mr. HOFFMAN. No, Mr. Elston, but the way the auditing was set up in Edmon-ton, the contractor got \$3,000,000 to start doing business. The Army Engineers, of course, through their auditing department would check expenditure of money, but that did not stop the contractor from paying any such bills, that he thought necessary and right, and whether it was a fee or a bill, it would [2304] not make a bit of difference.

The CHAIRMAN. Except if they were bills accumulating on and on until it ran to \$130,000,000 or \$150,000,000, his fee on the side would be increased accordingly, would it not?

Mr. HOFFMAN. For every addition on there, there was a supplement issued. The Architect-Engineer had ten supplements in addition to the original contract, and for each one they got an additional fee.

Mr. ELSTON. I am not clear what it was that increased the cost of the original project to about \$130,000,000.

Mr. HOFFMAN. Mr. Elston, if there are no plans for a project and you do not know what you are going to do, how can you estimate the cost?

Mr. ELSTON. The thing that is going through my mind is this: Were there additional projects taken on that ran it above a hundred million, or was it the original project that they estimated at \$30,000,000 and later found it would cost more than \$100,000,000?

Mr. HOFFMAN. They added more work to it, but they had no plans for the original project. I do not know what the original project was. I have never seen a plan of the line.

Mr. ELSTON. What was the \$30,000,000 based on?

Mr. HOFFMAN. It was based on drawing a line and some drilling and getting the line into Whitehorse with a refinery.

Mr. ELSTON. Was that not the ultimate project?

[2305] Mr. HOFFMAN. That was supposed to be the ultimate project.

Mr. ELSTON. So the very plan they had in the beginning, if it was a plan at all, was the plan they ultimately intend to complete and which will cost over \$100,000,000?

Mr. HOFFMAN. That is correct.

Mr. ELSTON. So that they missed—

Mr. HOFFMAN (interposing). The boat.

Mr. ELSTON. No, their estimate was perhaps only 25% and maybe less than that of what it actually cost?

Mr. HOFFMAN. That is correct.

Mr. ELSTON. Of what it will actually cost.

Mr. HOFFMAN. I think if you take in all the costs, the line will run in excess of \$250,000,000, if you take in the costs of your troops and everything else.

Mr. ELSTON. It is worse than the Pentagon Building.

Mr. HOFFMAN. Well, as bad, anyway.

Mr. FENTON. Mr. Hoffman, if you had not seen any plans at all, how did you proceed with your work?

Mr. HOFFMAN. In that letter, sir, from Colonel Wyman, I could have spent the entire Treasury of the United States, based on this letter. He tells me here that I can build buildings; that I can reconstruct the highways; that I can rent all the lands; that I can construct railroad facilities; that I can assist the Hudson Bay Company in the handling of freight and I can load and unload freight; cut wood for the Hudson Bay Company at a price of [2306] \$4.00 a ton, when it costs me \$6.24 to cut and deliver it; that I can furnish stevedore service to either the Hudson's Bay Company, Northern Transportation Company, or any other common carrier; I can furnish a staff of native pilots and guides; I can construct utilities, including water supply, sewer system, electric lighting and everything else. He goes on further and states that I can construct any such a thing that I think is necessary in my own belief.

Mr. ELSTON. Who were you working for? Who paid you?

Mr. HOFFMAN. The contractor.

Mr. ELSTON. Did you have any contact at all with the heads of this firm or were your dealing all with Colonel Wyman?

Mr. HOFFMAN. They were with Colonel Wyman. I never saw the heads of my concern for a month and a half.

Mr. ELSTON. When you did finally see them, did they give you orders, or anything of the kind?

Mr. HOFFMAN. No, they told me to get along with Colonel Wyman, that I was doing fine. We lived right next to each other, but I was fighting with him all the time.

Mr. FENTON. He would tell you what you were to do the next day?

Mr. HOFFMAN. He would tell me to build a 60-bed hospital and I would ask about the plans and he would say—and I will put this in the record—"What the Hell have I got you here for?"

[2307] Well, I am no designer. I am an engineer. He would say, "Can't you draw plans?" I would say, "I haven't got the time." Then he would say, "Put up a hotel of 200 rooms". So I went ahead and built the hotel. I was five minutes ahead of the carpenter. When I got through in my spare time, when

2914 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

I was resting about midnight, I would get out the board and draw the plans. I was working on reverse.

Mr. ELSTON. What kind of plans did you draw?

Mr. HOFFMAN. I was pretty good.

Mr. ELSTON. I have no doubt you were, but did you draw plans from which you took blueprints?

Mr. HOFFMAN. Yes.

Mr. ELSTON. Were specifications written up?

Mr. HOFFMAN. I wrote the specifications for just what was put up.

Mr. ELSTON. Were you your own draftsman too?

Mr. HOFFMAN. I was.

Mr. ELSTON. Did you not have draftsmen?

Mr. HOFFMAN. The architect-engineer did not show up. In fact, I built his office without any plans, and when he got there he thought I had done a pretty good job.

The CHAIRMAN. Off the record.

(There was discussion off the record.)

Mr. BURTON. If you will continue your statement, Mr. Hoffman.

[2308] Mr. HOFFMAN. Men that I had in Hawaii as superintendents and foremen and who were earning anywhere from \$300 to \$500 a month were sent up north for the contractor and they were drawing salaries from \$500 to \$800 a month, and were given bonuses along in November of 1942 for meritorious conduct.

Mr. Bendit, who was chief auditor and who since has left the organization, told me personally the bonus payments exceeded \$150,000, which were made by the contractor to the men.

The CHAIRMAN. Were these Japanese employees that you had over beyond or American?

Mr. HOFFMAN. No, these were all American. There were no Japanese on this job at all, sir.

Mr. ELSTON. You said a while ago you were compelled to get rid of your Canadian help, did you not?

Mr. HOFFMAN. Yes.

Mr. ELSTON. Because you were upsetting the labor market in that area?

Mr. HOFFMAN. That is right.

Mr. ELSTON. And you were paying those men 50¢ an hour?

Mr. HOFFMAN. That is right, sir.

Mr. ELSTON. When you got rid of them, who did you get in their places?

Mr. HOFFMAN. They sent up Americans at 90 cents and one dollar an hour and their keep.

Mr. ELSTON. Were they more efficient?

[2309] Mr. HOFFMAN. No, on the contrary they were not. The average Canadian laborer in the North Country is a worker because he has to work to survive in the north woods.

Mr. ELSTON. How many Americans did they send up there?

Mr. HOFFMAN. The shipments were coming in there pretty fast. At one time, I had, I would say, about a thousand.

Mr. ELSTON. So, with the manpower shortage, or alleged manpower shortage in the United States, you were compelled to get rid of Canadian labor and use American labor that had to be transported up there?

Mr. HOFFMAN. That is right, sir.

Mr. ELSTON. They were transported clear up into that country and given wages at least double what you were paying the Canadians?

Mr. HOFFMAN. That is right, sir.

Mr. MARTIN. And a greater number of laborers than you could use?

Mr. HOFFMAN. That is right, sir.

Mr. ELSTON. On whose orders did you do that?

Mr. HOFFMAN. I did not even order them. They were sent there. I did not even know they were coming.

Mr. ELSTON. Who ordered you to discharge the Canadian help?

Mr. HOFFMAN. The original letter came from Colonel Wyman to Bechtel, Price and Callanhan, at Edmonton. I got a copy of the [2310] letter. They attached to it a memorandum and said, "please comply."

Mr. ELSTON. What would you say the substitution of American labor for the Canadian labor amounted to in dollars and cents, all told?

Mr. HOFFMAN. It would be very difficult, Mr. Elston, for me to estimate, because after I left I had no knowledge of the job. However, you could get those records out of the voucher files. They are very complete.

Mr. ELSTON. I think we should get them.

The CHAIRMAN. Yes.

Off the record.

(There was discussion off the record.)

Mr. BURTON. For what reason and when did you leave the Canol Project?

Mr. HOFFMAN. I left the Canol Project on August 3, 1943, after being warned in a wire by Colonel Wyman that I could not leave. I wired him back that I was leaving just the same.

When I got to Edmonton on the train with my family, I was advised that Colonel Wyman was looking for me, and Sunday morning at 100 o'clock, I got a call from Colonel Wyman saying he would like to talk to me and for me to come to his office which was then in the McLeod Building in Edmonton.

He wanted to know why I was leaving and I told him the job smelled to high heaven and that I was getting out of there, and [2311] quick.

He asked me if I had another job, and I answered, "No," which was the truth. I did not have anything in mind. I just wanted to get away before it opened up. By that I mean before they started investigating the job, which had to come.

Colonel Wyman said, "You are the only man that has accomplished anything here and knows what is going on. The contractor has received no reimbursement for any expenditures for materials and supplies."

He said, "Won't you please sign the Receiving and Inspection reports so that the Bechtel Company can get its money out of this thing? I will regard that as a personal favor."

Accordingly, I told him I would, and for five days I signed Receiving and Inspection reports to the tune of 80,000 stampings and 26,000 signatures, and those Receiving and Inspection reports bear my signature for the material I know had actually gotten up to Waterways. Those R. and I. reports which I could not identify were set aside without signature.

In the three months of operation, the Army had not made out a single receiving and Inspection report for anything received on the job, although the engineers' office crew was exceptionally large.

In other words, there is no record today, nor can anybody identify some of the missing equipment that came up there originally, and the only records of receipt of equipment was the record [2312] I carried in my office at Waterways, and which is part of the files there now.

Mr. ELSTON. May I ask a question, Mr. Hoffman?

Mr. HOFFMAN. Yes.

Mr. ELSTON. When you signed those Receiving and Inspection reports, did you have any records in your possession that you checked against those?

Mr. HOFFMAN. I did. That is what I am talking about, the records that I had made myself and out of, well, there must have been 2000, or maybe more, each one of these reports had 10 or 11 copies and it was a big job, because I got a girl and worked in the hotel, worked up until 1 or 2 o'clock in the morning to get these things out.

Where it would not check with an actual record from my file, of actually having been received, I would refuse to sign. I had no right to sign those R. and I. reports. I was not an Army man. They should have been signed by the Architect-Engineer, who should have been on the job and for which he drew a few from the United States Engineers.

I merely acknowledged that this material had been received at Waterways, was either shipped north or used on a certain project and that corresponded with my daily reports, which are on file up there now.

Mr. ELSTON. You did not certify that the equipment was used?

[2313] Mr. HOFFMAN. No, just received and each number. The material came up unnumbered and I put the allocated number on the equipment which corresponded with my file and which were in use from that time on.

In other words, I gave each one an identity. I signed nothing that I could not identify positively. It was either there or it was not.

The CHAIRMAN. Is that all, gentlemen?

Mr. BURTON. Off the record.

(There was discussion off the record.)

Mr. BURTON. Do you know whether or not it is true that Colonel Theodore Wyman, Jr., received a Distinguished Service Award?

Mr. HOFFMAN. Yes, he did. It is a matter of open record in the War Department and in the records.

Mr. MARTIN. For what services?

Mr. HOFFMAN. For the service performed in Hawaii.

2916 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mr. MARTIN. The service that you have described here in these hearings?

Mr. HOFFMAN. That is correct, sir.

May I add one thing more to the record to make it complete.

In June, probably a month after I was there, General Reybolt, who was then Chief of Engineers, arrived in Edmonton and it was at that time that they knew that the job could not be completed in the specified time, December, 1942, and it was at [2314] that time that the extension was made, giving him another year to go ahead with the job. There was so little done then that it could have been stopped quickly with very little expenditure.

The CHAIRMAN. Colonel Knowles, do you want to ask any questions?

Colonel KNOWLES. Yes. Are you associated with any construction companies, Mr. Hoffman?

Mr. HOFFMAN. Now?

Col. KNOWLES. Yes.

Mr. HOFFMAN. No, sir, not any.

Col. KNOWLES. Have you been associated as a part owner or co-owner in the past two years?

Mr. HOFFMAN. Never. I have never owned anything. I have worked.

Col. KNOWLES. You have never been in control of any heavy construction equipment?

Mr. HOFFMAN. Never. I never owned a piece in my life; never owned a piece in my life. I might say for your further information that when I left Canada I was called to complete the North American bomber plant at Kansas City, Kansas, which I did, and when I completed that I went back to my home in California and was called by the Navy to come down and complete the North Island Navy Base, which cost \$22,500,000. I did that in 1943, and then I went to Mexico because I decided I needed a rest.

[2315] Mr. FENTON. Mr. Hoffman, you said you never saw any plans at all?

Mr. HOFFMAN. Never, sir.

Mr. FENTON. Did you ever come in contact with the person who was supposed to be the architect-engineer?

Mr. HOFFMAN. Yes, I did.

Mr. FENTON. Did he get on the job while you were there?

Mr. HOFFMAN. He got on late in July of 1942.

Mr. FENTON. Did he tell you anything with regard to the plans or anything like that?

Mr. HOFFMAN. No, he did not. The man I talked to was J. Gordon Turnbull. I had several talks with him and he said he was as much mystified as to what they were going to do as anybody else.

Mr. FENTON. Did he make any observations about the plans not having been presented to you to work with?

Mr. HOFFMAN. Only that he told me that the contract, as far as he was concerned, was not signed until June. The usual procedure is for the architect-engineer to get on the job and prepare the plans, and that is done in order to make the estimate and to find out what it is going to cost.

Mr. FENTON. When did you first see the architect-engineer?

Mr. HOFFMAN. I first saw him in July, 1942, when he got off of a plane at Waterways with Colonel Wyman.

Mr. ELSTON. I would like to ask Mr. Hoffman this [2316] question: I notice from the Public Record about the awarding of the Distinguished Service Medal to Colonel Wyman, that it was granted to him for exceptionally meritorious and distinguished service in the performance of duty and great responsibility as District Engineer at Honolulu, Engineer's District, from October 14, 1941 to March 15, 1942.

You were working there during all that period of time, were you not?

Mr. HOFFMAN. Yes, I was there before and after that time.

Mr. ELSTON. Did he leave Hawaii at any time and proceed anywhere else and do any work for the Government?

Mr. HOFFMAN. He had work on the outlying Islands, too, that the Army controlled.

Mr. ELSTON. Do you know anything about the work that he did there?

Mr. HOFFMAN. No, only that generally they set up airports as stepping stones all the way from Honolulu to Australia.

Mr. ELSTON. This refers to his being directed to proceed with construction in the South Pacific Area and to be available for use by January 15, 1942, at locations difficult of access and widely separated.

Do you know anything about that work?

Mr. HOFFMAN. Yes, those are the islands. I had some of my own men go down and took them off my field. They were building temporary coral runways as stepping-stones all the way down to [2317] Australia.

Mr. ELSTON. He was commended for getting the work completed in 11 weeks from the date of the notice to proceed, and on December 28, 1941, which was two weeks ahead of schedule—

Mr. HOFFMAN (interposing). That work was started in July of 1941. Your definition there is work to be completed that had been in process for months. How long do you think it takes to make an airport?

Mr. ELSTON. Do you know whether it was completed in advance of schedule?

Mr. HOFFMAN. That I would not know, sir.

Mr. BURTON: Off the record.

(There was discussion off the record.)

The CHAIRMAN. I think we will excuse the witness at this time.

We will adjourn subject to call of the Chair.

(Whereupon, at 11:55 o'clock a. m., the hearing was recessed, to be resumed at the call of the Chair.)

ARMY PEARL HARBOR BOARD EXHIBIT NO. 8B

STATEMENT BY ROBERT HOFFMAN, AREA SUPERINTENDENT, FIFTH FIELD AREA,
BELLAWS FIELD

The incidents relating to actual stoppages of work due to the indecisive, changeable orders by the U. S. E. D. are substantiated by such exhibits as are available from the files. These pertain only to Bellows Field, as the writer has no authoritative knowledge of the goings on elsewhere. I therefore list below some of the items which merely confirm the statements of this report as I must again say that it would be too lengthy a report were all the items enumerated.

[1] The foregoing statement is made at the request of the Executive Committee of the Hawaiian Constructors for the purpose of record in conjunction with the progress of construction of what is today known as Bellows Field. This statement is made voluntarily and is subject to such oath as may be required now or at a later date and does not serve the purpose of indictment against either the U. S. E. D. or the Hawaiian Constructors. These simple facts as recorded have no bearing as to the personal feelings of the writer nor has the writer an "axe to grind" toward any one individual or any group collectively, and under no circumstances are they to be treated in that light.

The undersigned was employed by the Hawaiian Constructors with the consent of the District Engineer of Honolulu as a construction superintendent at Los Angeles, California, on or about April 20, 1941. After confirmation by Mr. Middleton in the Division Engineers' office at San Francisco, the writer embarked and arrived in Honolulu the morning of April 30 with no apparent assignment and no adequate direction as to where he might end up at. I was finally sent to Hickam Field where I created my own assignment by making take-offs of materials from blue prints (this was definitely a U. S. E. D. work task). After nine days of this I was shifted to Wheeler Field where the writer laid out the first sectionalized two story officers' quarters to prove the theory that mass production in sectionalized work was possible. On the sixteenth day of May I was assigned to Bellows Field, the original task for which I was employed [2] and immediately began the organization of a field force to construct the camp. There were no materials on hand, nor was there any equipment on hand, and there were but eleven men on the job. Because of a lack of knowledge of methods and ways to secure materials, equipment, and men, it was necessary for the writer to blunder for the succeeding two weeks, as no body seemed to know the method. Finally, on May 24, I was advised by the Area Engineer, Mr. P. J. Lynch, that we had a work order No. 20.0 which comprised sixteen sixty-three men barracks, one mess hall and two administration buildings. There were no blue prints on the job and the writer finally made a trip to Hickam Field and made some quick sketches of the barracks at that point, and on returning to Bellows Field the following day we started forming, preparatory to pouring concrete. This statement merely to indicate lacking cooperative effort in furnishing blue prints for proper work plan. From May 26 until June 17 we poured, beamed, framed and sheeted eleven buildings, and still no plans from the U. S. E. D.

covering these items. It was impossible to secure anything more than a one sack mixer, nor was it possible to secure adequate transportation for the movement of lumber because of the lack of directional cooperation on the part of the Hawaiian Constructors' downtown office. Lumber was sent out to the field on city trailer trucks at all hours of the night and was dumped anywhere with the result that for the months of June, July and August we incurred a labor cost of \$2,600.00 for the removal of lumber to the designated buildings into which it was to go.

[3] In the meantime, these barracks buildings, which are ordinarily a six to seven day completion job, were kept waiting for completion because of our inability to secure the necessary building hardware, mill work, electrical fixtures and plumbing fixtures. The Base Yard at Fort Kam, controlled entirely by the U. S. E. D., appeared to be without definite guidance with the result that a requisition to the store keeper was very seldom filled and at no time in the entire year of activity at Bellows Field was a complete requisition having more than three items ever filled.

The writer appealed to Mr. Lynch, the Area Engineer, pointing out that this field up until this time had the lowest labor cost on the Island and that unless we were able to secure millwork, spring bolts, simple door locks, BX cable for wiring, and plumbing fixtures, that our costs would go out of sight. I personally know of Mr. Lynch appealing to Captain Shields, then in charge of procurement, who turned down requisition after requisition with the remark that all the materials had been ordered and we would just have to wait. The result of this inefficient and detrimental policy on the part of the U. S. E. D. resulted in a labor cost of twelve barracks, which was 58¢ per square foot, to rise to \$1.10 per square foot, due entirely to delay, and this, added to the tremendous overhead of the U. S. E. D., caused an ultimate excessive cost, far exceeding comparative mainland costs for a like work. Outside of the extra freight costs, but bearing in mind cheaper labor cost on the Island, and bearing in mind that labor on this type of work comprises approximately 50% of the cost, the statement of excessive ultimate costs [4] is easily confirmed, and in the case of the U. S. E. D. must share the entire blame for this condition.

It appeared that the general feeling on the part of the U. S. E. D. was that they were acting as a super contractor, whereas in reality the Hawaiian Constructors, the contractors, were appointed to fulfil the obligations of a written agreement to construct, erect, and complete certain designated jobs as directed by the District Engineer. The animosity and harsh feelings which definitely placed the U. S. E. D. on one side of the fence, with the Hawaiian Constructors on the other, was so apparent as early as 1941 that it became common talk throughout Honolulu and even reached the mainland as was evidenced in a letter from George Gregory, a friend and engineer widely recognized on the East coast. It became a fight on the part of the Hawaiian Constructors to try and secure necessary materials and equipment to complete the task assigned, and it would take too long an enumeration to list the hundreds of stoppages due entirely to the fault of the U. S. E. D., who failed to realize the three fundamental principles of construction, namely field analysis, field production and finally field completion. It became apparent to all concerned that the U. S. E. D. with its inefficient help was trying to direct by remote control varied activities on a large scale which in the history of engineering construction has never been successful. The stormy sessions between those directing the work of the Hawaiian Constructors with some personages of the U. S. E. D. were a matter of common talk. It does not appear possible that such a state of condition could have existed, but the facts and incidents speak for themselves.

[5] Skipping over that period up to and including December 7, a new era came into being. Mr. Henry Brewer was placed in charge of procurement of the U. S. E. D. and undoubtedly due to the excited conditions brought on by the attack of December 7, the procurement gates opened up and any material that was available in the city of Honolulu was purchased at the request of the area office or the area engineer. It is safe to say that at Bellows Field fifty percent of the work allowed for this project was done between the period of December 7 and February 28, a short three months as compared with seven previous months in which work was slowed down by a continually lacking, inefficient system, heavily overhauled and conspicuous by its inability to give dollar value for the projects listed for erection and completion. It must be said at this time that the energy, stamina and eagerness of Colonel Lyman, the District Engineer, was beyond reproach. It is also the personal belief of the writer that no other man that I have known in twenty-five years of construction accomplished as

much as Colonel Lyman did. While it is true that his work was expensive and loaded with errors, the fact remains that he did accomplish and do a job. This opinion is concurred in by all of the top construction men on the job. The writer understands, without any confirmation of the fact, that it was impossible for Colonel Lyman to secure "top flight" men which were necessary for so vast a task, and as a result he was burdened with inexperienced, inefficient, title seeking men who cared more for the rank they could attain than for the completing of a job. To him goes our sympathy at this time.

[6] The Following Items From the Daily Work Book:

June 3, 1941: No beam stock for buildings G or H. Delay two days.

June 5, 1941: Was ordered to move pier boxes $\frac{1}{8}$ inch in 130 ft. building.

June 9, 1941: No reinforcing steel for piers for buildings O and P. Delay four days.

June 17, 1941: No gasoline. Trucks down two days.

June 20, 1941: No 2 x 10's or 4 x 4's. Delay three days.

June 21, 1941: No studs. Delay two days.

June 27, 1941: Ordered by Area Engineer to cease concrete pouring. See attached Exhibit No. 1. There seemed to be some argument between the Area Engineer and the District Engineer's office regard the type of concrete mix for Bellows Field. This argument was carried on for seven days with no concrete poured due to the interorganization squabble. After the fifth day advised the Area Engineer that unless we were permitted to keep on our work, I would shut the job down. On the seventh day he finally permitted us, in the face of this threat, to again start.

Monday, July 7: Because of District office holding up further work, laid off twenty-seven carpenters and eight laborers. Advised Mr. Lynch that unless the buildings were released, would lay off thirty more carpenters Tuesday morning.

Tuesday, July 8: Was given six more buildings.

July 11, 1941: Have been held up four days due to lack of lumber for the four recreation buildings. There is plenty of lumber in the yard.

[7] Saturday, July 19: Finally received lumber for five hundred man Mess and four recreation buildings. Delay nine days.

July 21, 1941: No electrical supplies. All buildings held up. Captain Shields refuses to honor requisition.

Tuesday, August 5: After eight days, still waiting for lumber for warehouse #32 and Administration building C. Understand U. S. E. D. yard holding up requisition.

Friday, August 8: No plumbing fixtures for barracks as yet. These have been ready for thirty-two days. Also have been ready for sash for five weeks. Shields refuses to honor requisitions. All sash could have been built locally within five days.

Saturday, August 9: Screen hangers on order five weeks. Still no material.

Wednesday, August 13: No cement. This has been on order for seventeen days.

Friday, August 15: No No. 9 tie-wire which has been on order six weeks. No reinforcing steel. This has been on order sixteen days.

The above are but a few of the enumerations which should be convincing enough regarding delays caused by inefficient procurement and distribution by the U. S. E. D.

Exhibits No. 2 and No. 3, dated September 9 and September 25, are confirmed by requisitions now on file which we were unable to get to complete the barracks.

Please note copies of reports running from November 4 to January 30. All of these reports, if carefully read, will indicate a lack of cooperation on the part of the U. S. E. D., and, in some instances, a lack of cooperation on the part of the Hawaiian Constructors. These reports are true copies and indicate clearly the progress of the job which was stopped and held back only by the direction of the U. S. E. D. office. These reports are marked A, B, C, D, E, F, G, H.

[8] Exhibit No. 4: You will note this memorandum dated December 15 signed by the Area Engineer, shows the priorities of work. No. 1 is the bunkers and it is hardly believable that even though they were plans supposedly made out by the U. S. E. D., on April 9, 1942, exactly four months after this first note, the go-ahead signal was given the superintendent at Bellows Field to place these bunkers. It is possible to understand a delay, but hardly one of this type where inefficiency was so apparent on the part of the planning office of the U. S. E. D. that this item became the laughing stock on the island. It is a known fact that Colonel Robinson and the Directing Office of the District Engineer was opposed to any action that the area engineer might make.

Exhibit No. 5: This memorandum called for 5,000 lbs. of caulking lead vitally necessary to the main water lines for the main camp at Bellows. Though ordered on April 22 it finally arrived November 27. In the meantime, the soldiers carried their water while the Honolulu Iron Works had 80,000 lbs. on hand merely for the waiting for a purchase order.

Exhibit No. 6: Because of our inability to secure any better than a one sack mixer in pouring 200 cu. yd. buildings, we appealed to the area engineer for a larger mixer. Finally, early in November, after six months of operation, and after having poured over 3,000 yards of concrete, we were given a two sack mixer.

Exhibit No. 7: The seeming inability of the U. S. E. D. office to properly estimate the yardage of materials is evidenced in this memorandum. After any experienced person looked at the ground to see [9] what these buildings went into, he could easily have realized that their prescribed yardage was deficient for the work. This is another example of U. S. E. D. inefficiency.

Exhibit No. 8: Changes in plans were made by work of mouth with no consistent policy of confirmation. This memorandum indicates a change in the shower rooms of all the barracks, and, as far as the writer knows, it has never been confirmed nor decided. The writer finally prevailed upon the Area Engineer for a "yes" or "no" answer, and this exhibit is the result.

Exhibit No. 9: This memorandum clearly indicates that our requisitions for materials actually having arrived at Base Yard No. 1 and our inability to receive same from the U. S. E. D. Our requisitions were bandied around the U. S. E. D. offices for over five weeks and finally returned to the area office. We never did get the material which was originally purchased for Bellows Field even though the manifest showed them as having arrived and unloaded. To the inefficient bungling of Lieutenant Wilbur, of the U. S. E. D., must go this piece of fine work.

Exhibit No. 10: A, B, C, D, E. These exhibits are self explanatory which shows the new system of the U. S. E. D. which was so inefficient as to be more than ordinarily irritating to the best man. This new system was set up with Lieutenant Rowland in charge and the delay occasioned by the issuance of tally outs and then not finding the materials in the yards designated would sometimes delay the work from three to four weeks. It is inconceivable that so poor a method could have been devised by intelligent men whose first interests were the defense of their country.

[10] **Exhibit No. 11:** This memorandum is self explanatory. The excitement created by Lieutenant Colonel Robinson was unwarranted and without fact. The truth of the matter in this case was that there were no plans for the bolts on the guns, and when Colonel Robinson called at 2:30 the morning of March 15, he was probably intoxicated to talk the way he did. The fact of the matter in this case is that two of the excavations were done and one complete for building, and under no circumstances were any of the statements made by Colonel Robinson true or reasonably intelligent. To this man must go the credit of being one of the most inefficient officers in the U. S. E. D.

Exhibit No. 12: At the time this memorandum was written there was ample dynamite on the island and it could have been released by the U. S. E. D. Their reason for this stoppage is still a mystery.

Exhibit No. 13: This memorandum is merely one of many to show counter-acting orders which were constantly delaying the allotted work. In the files at Bellows Field there must be at least 150 different types of orders stopping this work.

Exhibit No. 14: On receiving this order on January 18, the area engineer directed the immediate starting of this work. Fortunately, we had about 3,000 feet of 15 lb. rail which was left over from the tunnel work. We actually started at 2:00 o'clock the afternoon of the 18th and at 4:00 o'clock the same day two trucks came into the field under orders from Colonel Robinson to take the rail away. With no rail to move the twenty-five ton tanks into the tunnel we had to re-requisition enough rail for the job with the result that due to Robinson's misdirected [11] order these tanks were delayed twenty-three days. It seems silly now to think that the rush on the tanks was important in face of Robinson's order, which was the real cause of all the delay.

Exhibit No. 15: This memorandum is self explanatory from the area engineer which gives a work order with no specifications, no drawings, no nothing, as the area engineer indicates. This was a common practice of the U. S. E. D. office.

Exhibit No. 16: This memorandum from Plummer, who was a requisition chaser and a member of the U. S. E. D. force. This non-important member, who assumed great importance by driving a big Buick car, was constantly giving his untruthful information regarding the procuring of equipment. This memorandum, the same as many others, was not truthful nor was the equipment procurable, but merely caused us extra transport trips to some cost without results.

Exhibit No. 17: This memorandum from the Hawaiian Constructors' planning office is one of a series where requests had been made for drawings and wherein delays from two to six weeks were encountered in securing these drawings. It was a common practice to have to wait from three to six weeks for requested drawings.

Exhibit No. 18: This memorandum is self explanatory and confirms the statements that indecisive orders from the district engineer was more confusing than the common enemy. Trying to get a decision from the U. S. E. D. was as difficult as trying to personally say hello to Hitler.

[12] Exhibit No. 19, A. B: These two memorandums show the confliction between the various directing members of the area engineer's office. The first dated March 14 directs us not to fix the yard for proper coverage of materials, and on March 22 one from the area engineer complaining that the materials are not covered. It was indeed difficult to understand some of these nit-wits who could not understand themselves.

Exhibit No. 20: This memorandum is self explanatory and is one of the reasons for the delay in the tunnel work. It is my understanding, without authoritative confirmation, that Colonel Robinson stopped the equipment from coming to Bellows Field to do this important tunnel job.

Exhibit No. 21: The new Area Engineer, Mr. Tillman, who ordinarily would not make a third class foreman on a fourth class job, wrote this memorandum. He did not understand the reason for the delays, nor was he competent to judge. This stupidity was only in line with the rest of the U. S. E. D. management.

Exhibit No. 22: Another order from the area engineer, who did not understand that the channel to the sea had to be kept open for the water run off from the mountains. Because Tillman had an argument with Mr. Bennett, he issued this order which the writer did not follow as the water would have backed up into the cane fields causing damage beyond understanding.

Exhibit No. 23: This letter confirmed a conversation between the Commanding Officer, Mr. Tillman, and the writer. Mr. Tillman later denied that he ever talked about this matter and Colonel Farnum had to remind [13] him in no uncertain terms. How the U. S. E. D. could employ a man of so little ability for so important a task is still a mystery.

Exhibit No. 24: The redwood tanks in this order were purchased and designated for the water supply in Bellows Field. The area engineer, who did not take time nor the trouble to find out what they were for, ordered them out of Bellows Field because of simple stupidity.

Exhibit No. 25: The camouflaging was delayed almost five weeks because of indecision by the U. S. E. D. district office. The attached memorandum confirms this fact.

Exhibit No. 26: These memorandums are self explanatory. Purchase of asphalt in fiber drums was a serious mistake. Unquestionably the cost of handling these paper drums raised the cost of the asphalt at least twenty-five percent and the procurement department of the U. S. E. D. must assume this blame. Also, the procurement should have consulted the contractor who had a knowledge of asphalt before purchasing 60/70 and should have realized that in this tropical climate that 50/60 is the proper asphalt to use.

Exhibit No. 27: This is self explanatory and indicates again that the U. S. E. D. made no attempt to look at our mix, but found continual fault even though all tests were more than satisfactory.

Exhibit No. 28, A, B, C, D, E, F, G: These memorandums on this exhibit prove that personal feelings on the part of Colonel Robinson against the Area Engineer, P. J. Lynch, were most detrimental [14] to the defense work at Bellows Field. A letter on December 11 from Mr. Woolly, attached, requested an arrangement with the Waimanalo Sugar Company for machine shop work. The writer consulting the area engineer received his consent. This arrangement saved the Government at least \$10,000.00. When the bill was finally pre-

2922 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

sented, Colonel Robinson refused to O. K. it, and this correspondence was sent back and forth until the writer threatened to take the matter to General Emmons, as is evidenced in my letter dated March 21, attached, at which time the bill was taken care of. The writer is compelled at this time to state that Colonel Robinson on many occasions placed obstacles in the way of the area engineer and thereby slowed up work. This officer should be roundly censured and court martialed for his acts of sabotage.

Exhibit No. 29, A and B: These exhibits are from the new superintendent and shows the indecision of the area engineer in the important work of bunker construction. It is indicated that the area engineer was looking for an argument from his notation on the letter of April 18. Under these circumstances, how could a field man perform without directives ordering the work.

Exhibit No. 30: This is one of many memorandums from the area engineer in which he did not understand the work accomplished. At no time was work held up except by reason of U. S. E. D. approval. This memorandum clearly shows that the Hawaiian Constructors were ready and willing, but needed approval to do certain work.

Exhibit No. 32, A, B, C, D, E, F, G, H, to N: On these memorandums it shows the conflicting orders from the area engineer [15] and his interference with men on the field which lowered the morale of the entire organization. On exhibit 31 C it shows a statement which is not true, and a reply to this memorandum is found in exhibit 31 J. The statements in Exhibit 31 E regarding equipment is made up entirely of falsehoods and when I called his hand he just merely laughed and said something had to be done. His lack of knowledge and understanding of construction was so apparent that Mr. Tillman evidently wrote letters to cover his deficiencies. Exhibit 31 F and H shows where he gave away materials without charge or without consulting the field superintendent, thereby interfering with normal work. Exhibit 31 G shows one of the many requests for assistance in procuring materials through his own office which invariably he merely filed and forgot. Exhibit 31 J is in reply to several of these memorandums, and 31 K, L, M, N have assumed a proportion of seriousness, and some action should be taken quickly.

Property, as we know, was ordered to Hawaiian Constructors, and if the area engineer is permitted to take it out without proper signature with the charge remaining against the Hawaiian Constructors, then some real trouble will soon start.

This record in its entirety is merely a statement of fact, far from being complete, but merely to show instances taken at random that were possible for stopping of work at once in action and inefficiency, direction and operation, which is the result of ual control in construction. Far from absolving the Hawaiian Constructors, there is hardly a doubt but [16] what their work could have been more efficient had there been less hampering and indecisiveness on the part of the U. S. E. D.

The full record is in the files at Bellow Field, and when the final chapter of this job is written there is no doubt that somebody will be called for explanations. These files should be guarded and kept intact for just that purpose.

ROBERT HOFFMAN.

April 29, 1942.

Exhibit No. 1

JULY 31, 1941.

Where cement is to be added by the sack, the following volumes per sack of cement should be used:

	<i>Field, Loose Volumes</i>
No. 3 Aggregate-----	4.075 cu. ft.
No. 4-----	2.30 cu. ft.
Sand-----	1.28 cu. ft.
Water-----	7.75 gallons
Absorbed Water-----	1.2 gallons

(Written note:) Use half large rock and half small rock.

Exhibit No. 2

SEPTEMBER 9, 1941.

Mr. HOFFMAN: The following is short of fixtures for the 65 man Barracks Job.

Short 12-24" enameled iron lavatories
 " 8 Pony Laundry Trays and 8 stands
 " 28 Vitreous China Closet Bowls
 " 28 Kohler Closet Seats
 4 Kohler (K8954) Laundry Tray Swing Spiut Faucets
 4 " (K9020) Adjustable P trays (1½")
 4 " (K9060) Continuous Chrom. Drains
 8-1½ x 1½ Chrom. P. O. Plugs (tail pieces) Chain & Rubber Plugs
 24—Crane C31843—R. N. Jr. Lavatory
 Crom. Faucets
 24—Crane C32647
 ¾-6 x 6 Chrom. Lavatory supply pipes
 With C634260 Escentrics nuts and ¾ x ¼ ground joint tail pieces.

F. W. WITT, Plumbing Foreman.

Exhibit No. 3

SEPTEMBER 25, 1941.

Mr. HOFFMAN: Please find out for me at once what kind of fixtures go in 500 man mess hall and order them as I never saw any specifications for same:

I need the Dish Washer Machine
 Two 20 x 30 One Piece Sinks
 Four Grease Traps for Scullery Sinks
 Two Kohler K9060 Continuous Wastes }
 Two Kohler K8954 Swing Spout Faucets } Now at Mess Hall
 One Kohler Closet Bowl and seat }
 One 20 x 24 enameled lavatory } In rear toilet room
 One electric water cooler Drinking Fountain
 Two wall hung urinals for both Administration Bldgs.
 If not correct sizes order per specifications which I can't find out.

F. WITT, Plumber.

Exhibit No. 3-A

NOVEMBER 4, 1941.

To: E. E. Ashlock, General Superintendent.
 From: Robert Hoffman, Area Superintendent, 5th Field Area.
 Subject: Report, week ending November 1, 1941.

Progress of all jobs in this area is quickly summarized in the following:

Job 20.0: The culvert on 20.2 completed and ready for use. No new building scheduled outside of the telephone building and gas station building, which means four days work for the carpenters. Emphasis is stressed to the effect that more releases of future buildings are necessary in order to keep these crews intact. Our experience in training crews has been a difficult one and we would hate to see a new start made for retraining new crews. Insufficient work means lay off of old crews.

Water lines complete as far as grades allow. Sewer lines will be complete in the building circle by November 6, 1941. Again lack of essential Y's is holding up the speed of laying sewer lines. Power distribution is complete in the building circle and 80% of all buildings in the field are now occupied with 100% of all buildings ready for occupancy.

Job 20.5—Runways: This work has been slowed down due to lack of powder. A lack of parts has kept 25% of the truck inactive. A recommendation is made than an adequate parts order be instituted so that we may realize the full production value of all equipment. This recommendation also applies to parts for "Cats" and shovels. Another factor towards slowing this work has been the lack of 6" pipe which was necessary to properly water the lifts as they were made on the runways. We have solved this problem by using 6" cast pipe on a loan with the result of having adequate water and the runways are now showing good progress.

2924 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Job 20.130—Tunnel: Again the lack of axles and wheels for the dump cars; the lack of 1" air hose and fittings has slowed this work down. We are informed that new cars are on their way and that soon we will have sufficient equipment to make the allotted borings so that a real showing can be made. We might also advise that our supply of powder on the tunnel is almost out and when this happens a shut down is inevitable.

Job. 20.1—Tanks: Due to the urgency of fabricating special work for Station X, it was necessary to move the entire crew to both the Base Yard and Pier 2 so that a delay of five days on the completion schedule of the tanks resulted. The crew is now at work and completion of the tanks is scheduled for Saturday, November 15, 1941.

Job. 20.5—Asphalt Plant: We again repeat our urgent requirements for aggregate so that we may put this plant into operation as it is already to go. It is our thought to start our first work on the roads in the camp and in this manner be able to get all the "Bugs" out of our future operations. May we ask that a determined effort be made to not only secure aggregate but a "Clam" as well for the proper operation of the plant. Should we secure the aggregate for the plant, our first operation is scheduled for November 7, 1941.

In general summary, the entire job has moved along as well as can be expected under existing conditions. We realize the urgency for completion of all work allotted us, but in the absence of required materials and equipment, over which we have a limited control, we can only say that our best efforts have been spent in the direction, in line with our organization policy.

ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors.*

RH/

Exhibit No. 3-B

NOVEMBER 12, 1941.

To: E. E. Ashlock, General Superintendent.

From: Robert Hoffman, Area Superintendent, 5th Field Area.

Subject: Report; week ending November 8th, 1941.

A consistent delay of essential materials again becomes our theme in reporting work progress for this area.

Job 20.0—Completion of the gas station, the telephone building and interior finishing of the infirmary were the major accomplishments for the week. Continuous laying of sewer lines and continued laying of water lines right up to the engineers flags kept the men busy on this job for the period noted.

Job 20.5—One orders of the Area Engineer, we were stopped from further fill on the runways. Kindly refer to letter dated November 5th, addressed to the Fifth Area Engineer and signed by Col. Wyman, which for the first time specifically gives specifications and instructions in working the runways. It should be noted that in complying with these instructions by Col. Wyman, it becomes absolutely necessary to have 6" pipes and pumps, which would give us the necessary pressure of 80# on the nozzle for sluicing. We might advise that we have made requisition for 12,000 feet of 6" galvanized screw pipe, 1,800 feet of 2½" high pressure hose and four high pressure nozzles. As soon as this equipment is on hand we can proceed with some speed. Should this equipment be delayed on arriving here in excess of one week, we would be hard pressed for sufficient work to keep the crews going.

Job 20.2—Particularly in excavating the pump station, which is at -7 elevation, we experienced sufficient pressure to weaken the excavated walls, so that a drag line or "Clam" must be used before we can proceed. Proper requisition has been made for this equipment. Sewer lines and water lines are progressing on schedule.

Job. 20.5—Asphalt Plant. This unit is all ready to go and we are merely awaiting necessary aggregate. At this date, we have 500 feet of fine grade complete and the plant can be in operation within one hour from the time we receive the necessary material. The Area Engineer is doing all he can in trying to procure the rock. May we ask your additional help.

Job. 20.1—Tanks: Merely a clean up operation for the completeness of these twelve units. This work was originally scheduled for completion on Saturday, November 15th, but due to a hurry call of the complete welding crew for some special work, we will have to advance our completion schedule to November 20th, providing the crew return not later than Monday, November 17th.

Job. 20.130—Tunnel: Better progress has been made this week due to receiving several additional dump cars, additional air hose and the more determined morale of the men. It is our hope and belief that we can soon be doing some 10 to 12 feet a day so as to rapidly complete this project.

In summary, while the progress still seems slow, the prospects of faster work looks much better and we feel sure that a brighter report will be available on November 15th.

T.

ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors.*

RH/ac

Exhibit No. 3-C

NOVEMBER 21, 1941.

To: E. E. Ashlock, General Superintendent.

From: Robert Hoffman, Area Superintendent, 5th Field Area.

Subject: Report, Week Ending Saturday, November 15, 1941.

The general work in the Area is slowing down noticeably due to conditions and circumstances as noted below:

Job 20.0—A lack of orders for new buildings which we have been expecting for the past six weeks has not materialized. Hence, our carpenter crews have been reduced to a small working force. All building work orders are complete as far as structure is concerned, with only minor mechanical placements to do.

Our suggestion that we secure more building orders, which our Area Engineer has been trying to get for us, would be our immediate solution.

Job 20.1—The removal of welding equipment and welders holds back the completion of this job. Three or four days of minor work would complete the tanks with the exception of their priming. The tanks are starting to rust and it is suggested that they be wire brushed and primed to preserve them. Your comment would be appreciated on this.

Job. 20.130—Progress on the tunnel has moved faster than in the previous week. A little more equipment and better application is giving us results. The digging is hard but we still believe that eight to ten feet can be made a day as soon as our equipment is working without the constant break downs that have been our luck.

Job 20.2—Sewer and water lines, including all hydrants and man holes, have been completed in the building circle, with water now serving both the new and old camps. This work has not stopped with the exception of a lack of ten inch vitreous pipe for the sewer line which held us up for a day. Our schedule calls for completion of our water line by December 27th. We are working on our pumping station for sewer disposal in a below sea level area, with constant pressure of water seepage. It was necessary to pile and coffer-dam the excavation to lay our mat. We will be ready for steel and concrete on this unit on the 28th of November. Work progress is satisfactory.

Job 20.4—Access Roads: The road circle in the new camp is being graded and we are in a position to place headers for asphalt. With no prospect of rock at the present time we await some word for the starting date. We are ready to work on these roads as soon as asphalt is available.

Job 20.5—Excavation: This work is slowing down to the point where we will have to shut down if the pumping, equipment, hose, and nozzles are not made available very soon. We are cleaning up all odds and ends and grading access roads to the gasoline storage. It is hardly possible to keep the work going on the runways for more than ten days. May we have your comment?

Job 20.5—Asphalt Plant: As shown in our previous reports, the hot plant has been ready for four weeks and still no rock. We have on hand some 9,000 barrels of asphalt, ample fuel oil and everything ready to go, but no rock. Our Area Engineer is using every effort to procure the necessary materials which so far have not been available. Your help is requested.

This report is in itself a summary of all operations, and while realizing that other priority jobs are more important, it will be realized that building new crews is an expensive and slow process. This is truly a time when the front office must come to our aid.

ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors.*

RH/ac

2926 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Exhibit No. 3-D

NOVEMBER 25, 1941.

To: E. E. Ashlock, General Superintendent, Pier 2 A.
From: Robert Hoffman, Area Superintendent, Fifth Field Area.
Subject: Report, Week Ending November 22nd, 1941.

We have attempted this week to use every effort in procuring the necessary authority and materials to keep the jobs going.

Job 20.0—A skeleton crew of carpenters is picking up all the loose ends, building forms, and re-roofing buildings where necessary. We need an order for about ten new buildings to get back into the swing of showing progress.

Job 20.1—As indicated in our last week's report, there is no work going on at the tanks. We still await an answer to our request of last week, in regard to wire brushing and priming.

Job 20.130—Progress has been even better last week than previously at the tunnel. We should be in full stride this coming week.

Job 20.2—Sewer and water lines continuing on good schedule. Our completion date as scheduled last week still stands.

Job 20.5—Excavation. This job almost came to a standstill until Mr. Grafe gave the word to go ahead on a modified plan. We are not proceeding with our final lift on the "cuts" and by the end of the week will be making fine grade. With the authority as given by Mr. Grafe, we should make the best showing on this job that we have been able, up to date.

Job 20.5—Asphalt Plant: This unit is ready to go. The roads in the camp are being fine graded and our schedule calls for laying our first asphalt on Wednesday, November 26th. We have made arrangements with the Ready Mix Concrete Company for 300 tons of rock per day, delivery starting Tuesday, November 25th. We are in urgent need of a one yard "clam" so that we can utilize our stock pile for loading the bings.

Summary: We have also learned that Col. Weddington, commanding officer at Bellows Field, has secured the approval of General Martin for some forty additional barracks and buildings to be placed in the new camp. If this is true, it will be necessary to tear up part of our finished paved roads to serve the new units, because of the present line of sewer and water. It seems a pity to make this new line, which is not complete, almost obsolete before everything is completed. This advanced information is given for some future thought.

ROBERT HOFFMAN,
*Area Superintendent Fifth Field Area,
Hawaiian Constructors.*

RH/ac

Exhibit No. 3-E

DECEMBER 1, 1941.

To: E. E. Ashlock, General Superintendent, Pier 2 A.
From: Robert Hoffman, Area Superintendent, Fifth Field Area.
Subject: Report: Week Ending November 29, 1941.

A faster movement in operations for the entire job, which was accelerated by definite orders and specifications, which we have been lacking up to this date, makes the entire job look more promising. The following report explains the reason for the above statement.

Job 20.0—Procurement of materials still is a serious stumbling block and transportation of materials from the Base Yard seems to have passed out of the picture altogether. Small items such as a few screens, a few doors, probably 50-60 sash, and minor fittings for the mechanical work do not seem to arrive after they are ordered, and repeated trips into the Government Base Yard at Fort Kam produces no results at all. A definite solution to this problem must be worked out in order to secure the items that are now in stock. This will require a more cooperative spirit between the U. S. Engineers Base Yard and our transportation department.

Job 20.1—Tanks: Work is stopped altogether because of withdrawal of all welders and welding equipment. We are awaiting the fittings for these tanks and are now on the verge of steel brushing and priming the outer surface to preserve the steel. The question of applying the final enamel, which is a hot process of application, is to be determined by the Area Engineer who is attempting to secure the final authority.

Job 20.130—Tunnel: Progress has been faster and the average bore per day has been up to about seven feet. A sudden cut into clay will make additional gunnitting necessary for safety. This matter has been transmitted to the Operation Superintendent on the tunnel. Based on the depth of bore under present conditions, an estimated 100 working days will complete this project in this area. Poor muck cars with constant break downs has not helped production.

Job 20.2—Water and sewer lines are progressing on schedule. We are sadly lacking in 8" and 10" vitreous sewer pipe which we are unable to secure in Honolulu to carry on our work. The writer personally found 1,400 lengths of 8" pipe in the Base Yard, but it seems that our requisitions are not being honored, without definite reason for such disregard. Can we secure some help from your office to immediately secure this pipe, so that we may proceed with our work.

6" Bell and Spigot, gate valves, are not procurable, and where the specifications demand that these be placed along our line our work comes to a standstill because of our inability to procure same.

Pumping station No. 1 is right on schedule. The mat has been poured and the wet pit is being "stepped" at the present time. The second pour is scheduled for Friday, December 5th, which will bring us above the water line and permit stopping of the 24 hour pump. In connection with this pumping station, may we ask that a follow up be made regarding the Chicago pumps, and fittings for the high pressure line, necessary to complete this item.

Emphasis must be made regarding the importance of this pumping station, as the present temporary cesspools around the Barracks are not adequate to serve the camp. It is estimated that another 90 days will create a seriously unhealthful condition due to lack of sewage disposal. If this equipment has been ordered, can we find out when, by whom, and when we may expect delivery in order to anticipate hooking in our line.

Job 20.4—Excavation: The modified instructions by Col Wyman, directing 6" lifts with water has given us a faster movement in completion of top grade on the runways. Briefly, with everything working in order, we should be ready for asphalt on the runways not later than December 22nd. An additional bulldozer and a road patrol would be a tremendous help in keeping this work going. We are now securing ample water for ordinary work on the runways.

Job 20.7—This is a new order for twenty-five new buildings in which excavation has already started. A further report on this progress will be made next week.

ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors.*

RH/ac

Exhibit No. 3-F

DECEMBER 14, 1941.

To: Charles Clapp, General Superintendent, Hawaiian Constructors.

From: Robert Hoffman, Area Superintendent, Fifth Field Area, Hawaiian Constructors.

Subject: Report for Week Ending December 13, 1941.

As you can well appreciate our normal operation this week have been considerably disrupted, due to the need for emergency structures, inability of some employees to reach the project, and almost total discontinuance of delivery of material. However, we are proceeding as fast as possible as the following detailed report will show.

20.0—All buildings on this order are erected and in use. Minor sewer connections when sewage plant is operating will make this job 100% complete.

20.1—We are now prepared to sand blast and prime the steel tanks as soon as the enamel is obtained and authority is given the Area Engineer to go ahead. It is suggested that this work be begun as soon as possible as the tanks are now rusting, and each day of delay will make a proper job of protection slower, more expensive, and harder to accomplish.

20.120—Nothing to report as the tunnel is not yet ready to accommodate the tanks. It is suggested that inquiry be made in regard to the procurement of the fittings and dispensing equipment, inasmuch as these are not obtainable on the island.

2928 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

20.130—Progress has come to a standstill because the labor has practically all been drawn off to other jobs.

20.2—The sewage pumping station concrete work is 60% completed and we can begin to install equipment in about 5 days. As for sewer lines in the field we are unable to obtain 10" vitrified pipe. Your assistance along this line will be appreciated.

20.3—The infirmary building is 90% complete lacking only in some final fittings. Due to the exigency created by moving troops to Bellows Field from other posts however, some parts of the infirmary are now in use by the Army.

20.4—No work was done on roads this week due to more urgent need of men and equipment elsewhere.

20.5—All efforts were directed to providing a temporary runway and we have had such runway in use by the Army since Tuesday. The magnitude of the job in providing what Army officers have called the best runway in the islands in two days time cannot be over stated. The men worked with but few interruptions, with all the difficulty of working in the open entirely without light, and with few exceptions have done a good job.

20.5—Hot Plant—With the decision Sunday A. M. to immediately provide a runway and dispense with asphalt work the hot plant was shut down. However on the following Saturday we received unofficial word to proceed with paving work and in anticipation of official notice we are preparing the plant for service again, expecting to go into action Tuesday A. M.

20.6—No equipment on hand for this installation.

20.7—We are proceeding full speed ahead on this job as fast as we get labor and material. During the last three days of the week we have completed two warehouse buildings on this order ready for painting and are proceeding with foundation work for two more.

In summary we ask that you use your weight to obtain better material procurement and delivery.

Yours truly,

ROBERT HOFFMAN,
Area Superintendent, Fifth Field Area,
Bellows Field.

RH/m

Exhibit No. 3-G

DECEMBER 22, 1941.

To: C. G. Clapp, Project Manager.

From: Robert Hoffman, Area Superintendent, Fifth Field Area.

Subject: Weekly Report, ending December 20th, 1941.

This week has seen this area back to about 90 percent of normal operations, and we expect to be 100 percent within a few days. While it is true that we have lost some of our men have not returned as yet, we feel sure that a week or two will straighten us all out and we will resume operations as of prior to December 7th.

Job 20.0—With the cancelation of two small magazines, we are pleased to report that this job order is 100 percent completed.

Job 20.130—Tunnel: This job and explanation thereof is amply covered in our recent confidential report to you. As we understand, progress is reported direct to you through another source.

Job 20.1—Tanks: Part of our welding crew returned Friday and we are now awaiting definite decision as to the type of fittings on these tanks so that we can properly place them to enable us to sandblast, prime and enamel before placing tanks in position. We would appreciate your office's helping us locate the fittings, if they are on the Island, so that we may quickly complete this job. The actual work involved for the welders on this job would not take over a few days.

Job 20.2—Utilities: All sewer lines are completed with the exception of 400 feet of 8-inch pipe which will be placed in position not later than Friday, December 26th. With the laying of this minor run, all sewer lines will be 100 percent complete. We have managed to secure 2 temporary 3-inch pumps which we plan to put in our pump station, and we schedule the operation of the sewer system for the field not later than Saturday, January 3rd. In connection with this sewer system, by order of the Area Engineer we have located a cesspool sunk between Runway A and Runway B that will have a capacity of 3,000,000 gallons of sewerage. We are going to use this until such time as

the proper equipment arrives. This is in accordance with the wishes of the Commanding Officer and the Area Engineer and meets their entire approval.

The Water system is in and in operation. The only portion not laid is that which the Engineers have no data on and which is a secondary return line having no effective force on the present operating system.

The electrical distribution system is complete in the Main Camp. An estimate of 65 percent totally complete would not be too generous. A delay in the procurement of transformers, necessary wire and equipment has slowed us down considerably on this phase of the job. Were we to have the necessary equipment, we could complete this part of the work in three weeks.

Job 20.4—Roads: We have stopped on the grading of 7,000 feet of access roads on order of the Area Engineer. It is our hope that this order will be lifted soon so that we can grade and pave and complete this work. Your help on this would be very beneficial as we would like to see the camp roads in shape.

Job 20.5—Excavation: Runway B, which has been in use since Friday, December 12th, taking ships as large as the B-18's and A-20's, has been pronounced by landing aviators as one of the best they were ever on. While it is true that constant maintenance must be used in keeping this runway in shape, there is hardly a doubt but that asphalt should cover the runway. The runway is now 400 feet wide and we have noticed that 3 ships take off simultaneously and land the same way.

We have built dispersal bunkers which the Commanding Officer says are excellent.

Our fill to the heading of the runway is proceeding very fast and we expect the full fill to mature for actual use by January 6th, which will then give them a runway approximately 6,800 feet in length, capable of taking the largest ships we know of.

It is our understanding that we are to go across the King Kam highway for further dispersal of ships which will be in a finger pattern and will be quite a good sized job.

Runway A is coming along faster than expected and should be ready on the same basis as Runway B is now, not later than January 15th. Another wagon drill, shovel, a few more trucks, would be of great help in speeding up this work, if we should be so fortunate as to be able to get them.

Job 20.5—Hot Plant: This unit is now formant awaiting further orders.

Job 20.7—Mobilization Buildings: This job started off on December 15th and we have averaged one building a day since then. The total order calls for 20 buildings and if we are able to procure the materials, this job should be complete 45 days from today. Again our electrical supplies are slow, as is our plumbing. Your help again is requested on these items.

Job 20.8—One Item—11 Building: We have just received this order and are ready to go through on it subject to the proper placement by the Engineers.

SUMMARY: Under the conditions that exist and the excitement caused by circumstances beyond our control as of December 7th, the work has proceeded much better than expected. In fact, the workmen have produced more in the same time than prior to this period. Our labor has been consistent and there has been no trouble of any kind that might cause a let-up in our determined efforts to produce more. Procurement through the U. S. Engineers still seems to be a stumbling block with more than an ordinary amount of time wastage in trying to get orders filled. We feel sure that this problem will soon be ironed out. If ever there was a time for proper organizations, it is here now.

ROBERT HOFFMAN,
Area Superintendent, Fifth Field Area,
Hawaiian Constructors.

RH: DM

Exhibit No. 3-H

JANUARY 30, 1943.

To: C. G. Clapp, Project Manager.

From: Robert Hoffman, Area Superintendent, Fifth Field Area.

Subject: Job Orders 156-W, 273-W and 288-W.

136-W—Construction of Sewer System & 500,000 Gal. Water Tank at Ulupau: The writer has not yet been informed that Mr. Nichols has received the Sewer Contract nor have we received any information as to what part of this Sewer Contract this office will perform.

2930 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

We have not received the plan for a 500,000 gallon water tank and there is nothing we can do unless we have information that will tell us what to do. It is hardly plausible in the fact of such deficient information to expect resulting production on this job.

273-W—Construction of Tent Floors and Two Latrines at Ulupau: The tent floors are being fabricated at Bellows Field and the latrine location has not been decided upon by Col. Dutton, the commander of the camp.

288-W—Construction of a Complete Camp at Ulupau: The only instructions the writer has received was a telephone call from Mr. Benson that we were to take over the camp. I was also advised that a Mr. Freitas would continue in charge of the construction forces. However, upon investigation, I found that Mr. Freitas, whom I talked to personally, did not have time to give any effort to this job and upon consulting Mr. Benson, was advised that Mr. Freitas would not be connected with the matter. In addition to Mr. Freitas, a man by the name of Leebrick, whose duties are still a mystery to me, but who seems to be flying from town to Ulupau in a U. S. E. D. car seems to take upon himself work and measures not within the scope of the work order.

They are building chiffoniers for officers, special tables and other items requested by Col. Dutton.

In addition to these two men, a man by the name of Mr. Neves, who is supposed to be the superintendent of the job is in charge of construction. He appears to be doing the actual work, and claims he is taking orders from the Pacific Construction Company. In other words, here is a job which is but a drop in the bucket, with no supervisory ability, employing about 60 men and the Bellows Field job on Camp Construction employing about 300 men where we have but one foreman.

Yesterday, January 29th, Mr. Benson visited Bellows Field, and upon questioning learned that Mr. Freitas was coming back to take charge of the job at Ulupau.

This letter is in reply particularly to your memorandum of January 27th, from Mr. A. A. Taylor who seemed to go overboard in this project without knowing the fact of the case, or the result of inaccurate information given Taylor by both our office down town and at Ulupau.

Will you kindly advise this office in writing, if we are to direct supervision, if we are to order materials, and whether or not it is necessary for me to keep three supervising superintendents on a job the size of a peanut?

I will await your reply and will take no further action until that time.

ROBERT HOFFMAN,
Area Superintendent,
Fifth Field Area,
Hawaiian Constructors.

Exhibit No. 4

DECEMBER 15, 1941.

(1) Bunkers for planes.

The two item No. 15 buildings near the service mats will have priority over all barrack construction and should be rushed through all daylight hours to completion.

(2) Runway B shall be graded to receive asphalt as shown on plane.

Station 0+0 to -10+00 shall be rushed, all coral to be placed 6' layers and thoroughly watered. No coral shall be used on any other area for building construction.

All shooting shall be done at 11 a. m. only, and two hours notification given the Area Engineer before shots are fired.

No material or equipment shall leave the field without approval of the Area Engineer.

(3) The tunnel shall be continued. No tunnel equipment shall leave the Area without the approval of the Area Engineer.

Complete welding on tanks at tunnel.

Place bridge as indicated over slough and open road to tunnel.

Bomb storage.

P. J. LYNCH,
Area Engineer,
Fifth Field Area.

INTER-OFFICE CORRESPONDENCE

HAWAIIAN CONSTRUCTORS

Honolulu, T. H.

To: P. J. Lynch, Engr. 5th Area.

From: Supt. 5th Area.

Subject: Caulking Head.

Our Req. #1027 H. C. dated 10/22 calls for 5000# Caulking lead for 20.2 sewer water lines. May we ask that this item be rushed so that we may push this phase of the work with all possible speed.

HOFFMAN.

Exhibit No. 6

AUGUST 18, 1941.

Memorandum to Mr. Lynch:

Referring to your memorandum of August 9 asking for suggestions regarding an additional concrete mixer because of the large concrete pours anticipated, please be advised that it is almost necessary that we have additional mixing equipment in order to facilitate our work.

It is hardly possible to pour good concrete in a six foot wall without having a cold joint here and there, and the writer would appreciate your every effort in helping secure another mixer so that these walls could be poured out in a period not to exceed four hours.

Thanking you kindly for your cooperation, I am,

Very truly yours,

ROBERT HOFFMAN.

Exhibit No. 7

AUGUST 1, 1941.

Memorandum to Mr. E. E. Ashlock.

Subject: Item 32. Storehouse, SH-18, 60 x 153.

Item 19. Storehouse, SH-13, 60 x 153.

The estimated amounts of materials for both of these buildings as regards to the concrete yardage to be poured in the footings, should be revised in accordance with this memorandum.

It is the writer's understanding that 117 cubic yards have been allotted for the footings in each of these buildings which, of course, may fit some of these buildings in certain localities. Due to low ground and the fact that an elevation of 12 must be maintained on this field, the following yardage will be used on these two units as shown below:

a. SH-18, Item 32, 184 Cu. Yds.

b. SH-13, Item 19, 216 " "

The amounts shown are almost twice the amounts of the original estimate and the cost of the additional forming must also be taken into consideration.

ROBERT HOFFMAN.

PJL: ECB.

2932 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Exhibit No. 9-A

JANUARY 31, 1942.

To: C. G. Clapp, Project Manager.
From: Robert Hoffman, Area Superintendent, Fifth Field Area.
Subject: Requisitions.

Please refer to your letter dated January 22nd advising us of the new procedure in the securing of materials arriving on ships and delivered to Base Yards for further disposal to final destination.

We immediately made out requisitions No. RS5-254, -255, -256, -257, -258, -259, -260, -261 and -262, all dated January 24th, which was just 2 days after your instructions were received, and disposed of them accordingly.

These requisitions have since been knocked around, Mr. Dodd sending his copy back disclaiming all knowledge of the procedure. Mr. Freitas, whom you mentioned in your letter, has since been purged or liquidated, and today these requisitions were put back into my hands.

Am I permitted to pass the buck to you by attaching these requisitions to this letter in the hopes that this matter can be straightened out and that we can get the material purchased for us and which we need at this field, without actually declaring war? Without becoming too serious, it seems that the biggest fight we have here is fighting to get the stuff we need—not the Japs.

ROBERT HOFFMAN,
Area Superintendent, Fifth Field Area,
Hawaiian Constructors.

RH: DM.
Enc. 9.

Charles O'Neill.
Earle A. Keifer, Jr.

Exhibit No. 9-B

To: Procurement Department (Mr. Sax).
From: Robert Hoffman.
Date: March 10, 1942.

Attached you will find our original requisitions, which we made out on notification of the manifest this material had arrived by boat the middle of January.

We forwarded these requisitions to Base Yard 9 and after the papers kicked around town for about a month they were returned, with no notation whatsoever, although our Mr. Kiefer positively identifies the material as having arrived and purchased for procurement.

We are attaching new requisitions and ask that they be released from the yard in which they are located, and also request that the original papers attached be returned to this office.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

RH/nf
encl.

Exhibit No. 10-A

To: A. A. Sack, Procurement Section, 15th Field Area, Montague Hall.
From: Robert Hoffman, Superintendent, Fifth Field Area.
Date: March 26, 1942.

We attach hereto Tally Outs 2954 and 3018 advising us that materials requested were in Base Yard 1 ready for delivery.

We received these tally outs on the morning of the 23rd of March and attempted the pickup the same afternoon.

While the material requested does not seem important, we are compelled to advise that the axes and handles were the most important requirements of this field in the last few days, as we use them to open the asphalt barrels, in order to charge the tanks, so that asphalt may be layed on the runways, which are the first priority.

We again ask that our original requisitions be honored for purchase and that this material be given us immediately.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

RH/nf
cc: Mr. Woolley

Exhibit No. 10-B

To: A. A. Sack, Procurement Section, U. S. Engineer Department, 15th Field Area, Montague Hall, Punahou Campus.
From: Robert Hoffman, Area Superintendent, Fifth Field Area.
Date: March 23, 1942.

Attached you will find your Tally Out 2717, calling for 1000 cinder bricks, and on which we sent our truck to Base Yard 6—the second time—and still they say “No soap.”

May we again emphasize that, due to the lack of transportation, these continual calls for material at designated base yards on false runs is hurting us seriously at this time.

There is plenty of cinder brick available in town and the delay so far has caused some misunderstanding between the Commanding Officer of this post and this office. The building is occupied, but the latrine cesspool cannot be built without the brick.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

RH/nf

Exhibit No. 10-C

To: A. A. Sack, Procurement Department, 15th Field Area, Montague Hall, Punahou Campus.
From: Robert Hoffman, Superintendent, Fifth Field Area.
Date: March 21, 1942.

We attach hereto your Tally Outs 65, 300, 307, 326, 1533, 2116, 2231 and 2240, returned to us with the notation “Materials not on hand,” after they were tallied out by your office.

Will you kindly okeh these requisitions and forward them for procurement, to prevent further delay.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

RH/nf
encl.

Exhibit No. 10-D

To: W. D. Lomax.
From: Robert Hoffman.
Date: March 21, 1942.

The attached copies of tally outs were returned to us after we were advised that the material was in the base yard.

This slows up our work considerably and, as you will note from the attached letter, we are asking Mr. Sack to expedite this through procurement.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

RH/nf
encl.

Exhibit No. 10-E

To: A. A. Sack.
From: Robert Hoffman.
Date: March 15, 1942.

We inclose copies of Tally Outs 883, 1426 and 1427, which were issued by your office and which, evidently, do not coincide with the records of materials at the base yard.

This has been a constant occurrence in the past three weeks, delaying and doubling the work of both procurement and, in some cases, actual production.

We are inclosing duplicate copies of Purchase Orders 1787 and 1746, and ask that they be quickly passed through.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

2934 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Exhibit No. 11

To: H. W. Rohl.
From: Robert Hoffman.
Date: March 18, 1942.
Subject: Guns at Ulupau.

Your call at 2:30 the morning of the 17th, requesting additional information on the replacement of guns at Ulupau, while merited, was a surprise, in view of the facts as chronologically related below:

It so happens that on the morning of March 16th, at 9:30, the writer for the first time saw the detail plan of the bolt and plate installations on this gun—in the office of Mr. Lloyd, the assistant area engineer. The writer to date, two days later, still has no plans, but merely a takeoff which was made.

There have been constant rains in the Ulupau and Bellows areas since March 2nd and, with the red clay surrounding Ulupau, it was, therefore, impossible to even move into excavation, although two gun excavations had already been made, with the exception of the trim.

Yesterday morning, just six hours after talking to you and Colonel Robinson, we were advised that the grade had been changed on the excavations, made by the survey party, so that we had to work back in again and reset.

The bolts for the gun plates had not been ordered by the Engineers and are still not available, as far as I know.

It is impossible to understand how anyone could expect a job to be done, without plans, pre-ordered materials, favorable weather conditions and with the existing deficiencies on the part of those who started direction of the work.

This is no alibi of the writer or any part of this organization, but merely a statement of fact.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

MISURA.

Exhibit No. 18

DECEMBER 22, 1941.

To: G. G. Clapp, Project Manager.
From: Robert Hoffman, Area Superintendent, Fifth Field Area.
Subject: Reference your letter of December 14th.

A careful study in compliance with your preliminary request, as outlined in your letter of December 14th, discloses the following information:

Confirming our previous letter to you, there is no black top on either runway A or B for the present. It is also my instructions from Area Engineer that for the time being there will be no asphalt on the access roads throughout the Main Camp. This places our hot plant at a standstill and leaves me with a paving superintendent who will have to be placed in some other work to keep him busy.

The priorities as listed now show bunker construction—1st, runway—2nd, fuel storage—3rd, ammunition storage—4th, and then personnel protection.

2936 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

As regards the bunker storage, we have been informed that the Commanding Officer of this field in accord with the General Officer in charge of the Hawaiian Air Force has selected a location across the King Kam Highway towards the mountains. Should this plan go through, it means building an underpass over the main highway and an access road wide enough to accommodate our larger ships passing each other or approximately 400 feet in width.

From the tentative design of bunker construction that we have seen it will take approximately 15,000 yards of coral or fast dirt to construct each bunker, and if there are to be 54 bunkers our yardage will run close to 800,000 yards. To this we must add 240,000 yards for the present fill at the head of the runway from station 0.00 and an additional 150,000 yards for the access runway to the bunker storage.

If the bunker storage locations is changed it will still take 800,000 yards for this item alone which is a considerable amount of material. Sand can also be used as it will blow the minute the motors are started and is also detrimental to the ships so we have but one alternative and that is coral.

Across the slough from Runway B we have an open quarry pit in which there is more than a million yards of fine coral to be had. This pit is already open and is all level ground. In order to operate it, we would have to have at least one more shovel of not less than 2½ yard capacity, 15 dump trucks, 2 additional wagon drills, and a provision for ample powder and caps for shooting.

It is regrettable that we cannot use sand in the fill for the extended runway as this would mean a savings of almost 200,000 yards of coral.

We would appreciate consideration of the facts enclosed and suggest that some effort be made to secure the equipment necessary to expedite this work. While the job is not large neither is it small and it needs some careful planning to secure the maximum production from the least amount of equipment we will be able to have on this field. Your reply will be appreciated.

ROBERT HOFFMAN,
Area Superintendent,
Fifth Field Area,
Hawaitian Constructors.

Memorandum

To: MR. HOFFMAN.

It is reported to me that nails, flooring and other material are unprotected at Ulupau.

Now about getting some tarpaulins for protection.

THOMAS E. TILLMAN.

Exhibit No. 20

Memorandum To H. W. Rohl.

From Robert Hoffman.

Date: March 10, 1942.

We are at a loss to understand why our original list, which you recommended be mailed to the 15th Area, on equipment necessary for tunneling, was stopped. Mr. Lomax advises that you held up this list without notation to hold in abeyance. Your call last night seemingly advised that we proceed at once.

Will you kindly advise this office whether we are to proceed and, if so, give us some help in securing the equipment and we shall give you a pretty good job. I have the men and am anxious to hand much the second tunnel cheaper and faster than was done with the equipment on the previous job.

We fully understand the difficulty in securing equipment and general conditions pertaining to the entire setup, but we still feel that you can give us some help, and we shall do our best with what we have to work with.

We thank you for your help.

RH/nf

ROBERT HOFFMAN,
Superintendent Fifth Field Area.

Exhibit No. 26

OCTOBER 28, 1941.

Subject: Asphalt Containers.

Mr. ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors,
Bellows Field, T. H.*

Please refer to your letter dated October 27. Radio has been sent to stop all shipping of asphalt in paper containers.

P. J. LYNCH,
Area Engineer, Fifth Field Area.

OCTOBER 27, 1941.

From: Robert Hoffman, Area Superintendent, 5th Field Area.

To: P. J. Lynch, Area Engineer, 5th Field Area.

Subject: Asphalt Containers.

The recent losses in transport and delivery of asphalt fiber containers has proved conclusively that these fiber containers in the final analysis are excessive in cost compared to metal or wood.

It is suggested that a recommendation be made that no more asphalt be purchased or shipped in fiber containers for this tropical climate.

It is estimated that we have lost approximately 20% of our present shipment to this field.

The rains and heat necessitate a change in packaging.

Yours truly,

ROBERT HOFFMAN,
*Area Superintendent, 5th Field Area,
Hawaiian Constructors.*

Exhibit No. 27

FEBRUARY 2, 1942.

To: P. J. Lynch, Area Engineer, Fifth Field Area.

From: Robert Hoffman, Area Superintendent, Fifth Field Area.

Subject: Batching of concrete at Bellows Field.

Kindly refer to Memorandum of January 27th signed by one B. E. Nutter in which he states that the mixes in use are not those transmitted to the Fifth Field Area and are not in accord with good practice for manufacture of economical concrete of good quality.

Mr. Nutter is wrong and knows not whereof he speaks. Contrary to his statement, there has been an Area inspector on the job at every pouring. Special batch boxes were built and special care was taken to conform 100 per cent to the instructions issued by Mr. Nutter's office, which under the conditions and the materials used cannot give him what he expects without having further knowledge of the effect of mixing on this field. Mr. Nutter should be more careful in his loose statements as he does not speak the truth.

ROBERT HOFFMAN,
*Area Superintendent, Fifth Field Area,
Hawaiian Constructors.*

HAWAIIAN CONSTRUCTORS,
Punahou School, Honolulu, T. H.

GENTLEMEN: Receipt is acknowledged of your letter of February 28 concerning the inclosure from Waimanalo Sugar Company.

In order for this office to make payment on any of the obligations incurred by you, it is necessary that accompanying each bill you submit to us for payment, there be a copy of the authorization of the District Engineer for incurring this obligation, a certified copy of the receiving report, preferably countersigned by a government employee and a certified copy of the bill.

Only upon receipt of the above, may payment be made. The attached bill is returned to you for addition of this information.

Very truly yours,

THEODORE WYMAN, Jr.,
*Colonel, Corps of Engineers,
District Engineer.*

Exhibit 28 "C"

MARCH 6, 1942.

Mr. R. HOFFMAN, Supt.,
Hawaiian Constructors, Bellows Field, Oahu, T. H.

DEAR MR. HOFFMAN: we are attaching hereto quadruplicate copies of the Waimanalo Sugar Company invoice in the amount of \$2,614.74. Also attached is letter from Colon Wyman, in which he requests certified copy of the receiving report countersigned by a government employee be attached to the invoice.

We note that invoice makes reference to field order numbers and it is assumed that these field order numbers originate with the U. S. E. D. in your area. With this in mind we assume that proper receiving reports can be obtained by you.

Upon completion of the above request, please return all data to the writer.

Very truly yours,

HAWAIIAN CONSTRUCTORS.
(Signed) By ROBERT KARMANN.

HAWAIIAN CONSTRUCTORS,
Honolulu, Hawaii, March 14, 1942.

ROBERT HOFFMAN, *Supt.*
Bellows Field, Oahu, T. H.

DEAR SIR: We are returning herewith quadruplicate copies of Waimanalo Sugar Company invoice in the amount of \$2,614.74, as per advice of Mr. C. C. Middleton. We believe that these bills should be turned through by the Area Engineer for payment by his office.

This office is not familiar with the transaction, and further, we have been advised that the Field Orders no doubt originate in the Area Engineer's office. We further believe that a Cost Sheet may be required.

For your information, we are attaching hereto a copy of the letter signed by Colonel Wyman as of March 2nd, which is the only knowledge this office has of this transaction.

Yours very truly,

By: (s) HAWAIIAN CONSTRUCTORS,
R. Karmann.
ROBERT KARMANN.

MEMORANDUM

MARCH 30, 1942.

To: Robert Hoffman.
From: C. C. Middleton.

We are enclosing copy of letter dated March twenty-third from the Department Engineer together with invoices from the Waimanalo Sugar Company.

It is our belief that the field orders noted on this invoice are U. S. E. D. field orders.

Please advise us if we are correct, returning all the attached papers intact.

Please handle the above at once.

Honolulu, T. H.

DEPARTMENT ENGINEER, HAWAIIAN DEPARTMENT,
March 23, 1942.

Subject: Contract No. W-414-eng-602.

HAWAIIAN CONSTRUCTORS,
Punahou Campus, Honolulu, T. H.

GENTLEMEN: The inclosed invoice of the Waimanalo Sugar Company dated February 23, 1942, in the amount of \$2,614.00 has been resubmitted to this office

2942 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

by your Superintendent, Fifth Field Area, Bellows Field, through the U. S. Area Engineer at that point. This invoice was returned to you upon its original submission by letter of this office dated March 2, 1942, for lack of supporting evidence of advance authority from the District Engineer for incurring this obligation.

In view of the fact that this was a direct purchase made by you without prior authorization of this office, and that no evidence of competition has been submitted with respect thereto, the invoice is returned to you for direct payment. Reimbursement therefor will be authorized under the terms of your Contract No. W-414-eng-602 upon submission by you of receipted invoice, accompanied by evidence that the method of purchase was in conformity with contract requirements.

Very truly yours,

/s/ B. L. Robinson,
B. L. ROBINSON,
Lt. Col., Corps of Engineers,
Contracting Officer.

1 Inclosure
Inv., Waimanalo
Sugar Co. (in dup.)

Exhibit No. 28-G

To: C. C. Middleton.
From: Robert Hoffman.
Date: March 31, 1942.

We return herewith the invoice pertaining to work done by the Waimanalo Sugar Company on equipment and for necessary parts for the job at Bellows Field.

Will you kindly inform Colonel Robinson that the signature of P. J. Lynch, who was the area engineer during the entire period which appears on this invoice, is affixed to it, and that it was under his orders, direct to the Waimanalo Sugar Company, that the work was done and the parts secured.

It is quite evident that Colonel Robinson is pursuing a course detrimental to not only this organization, but to defense as well, in denying the signature and consent of the duly appointed area engineer—who had been in service for one year.

It would please me much to present a copy of this letter to Colonel Robinson—and to General Emmons, if necessary—to ferret out the reason Colonel Robinson refuses to recognize the signature and authority of a person over which there has been no dispute up until this time.

The matter is too damned silly even to write a letter on.

ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

MEMORANDUM

To: T. E. Tillman.

From: L. S. Hutchinson.

Subject: Necessity of Estimates for Uncompleted Work.

I will again mention that it is of utmost importance to the constructor that he may properly plan and organize his organization, and to do so we must have a minimum of thirty to sixty days planning of work in advance.

Such items as quarry, concrete pouring, building construction and general organization all depend on our ability to populate program for future requirements from the work outlined.

L. S. HUTCHINSON,
*Area Superintendent, Fifth Field Area,
Hawaiian Constructors.*

HONOLULU, HAWAII

FIFTH FIELD AREA,
Bellows Field, T. H., April 8, 1942.

Memorandum to: Mr. Hoffman.

Each time I visit the hot plant in the evening, I find a large surplus of labor standing around with apparently nothing to do. In my opinion this labor, which you are using to pick up asphalt and get it to the hot plant, could be reduced at least 50 percent.

There is no sense in having a crew standing out at the stock pile waiting for trucks or sleds to come back from the hot plant, while you have another crew idle half the time standing around at the hot plant unloading platform. *I want this condition remedied immediately.* If you cannot find anything better for them to do, send them up to the tunnel and start them to cleaning up there or carrying pipe and fittings into the tunnel.

/s/ Thos. E. Tillman,
THOMAS E. TILLMAN,
Area Engineer, Fifth Field Area.

FIFTH FIELD AREA,
Bellows Field, T. H., April 8, 1942.

Memorandum to: Mr. Robert Hoffman.

I have repeatedly asked you to carry the paving on Runway A to a full width of 200' and in runs of 500' to 700' in length. This request has been ignored repeatedly, and I find the fine grading crew working on ahead of the paver.

Your fine grading crew has complained of no blue tops as their excuse for not carrying the fine grade to the maximum width. Upon checking, I find that the blue tops have been there. *I want this condition remedied immediately,* and I insist that this pavement be carried through the full 200' width as we go.

FIFTH FIELD AREA,
Bellows Field, T. H., April 8, 1942.

Subject: Greasing of Equipment.

To: The Department Engineer, Hawaiian Department, Honolulu, T. H.
(Through: Captain Ralph L. McDaniel.)

1. The Area Engineer is convinced that the present setup for greasing of equipment at Fifth Field Area is all wrong, and that equipment is being unnecessarily wrecked.

2. The men in charge of the greasing of the trucks are not under the supervision or control of the shop foreman. In fact, the Area Engineer cannot find out to whom these men are responsible.

3. At the present time there are seven trucks standing in the shop waiting for repairs. One 1,500 gallon sprinkler truck has been idle while waiting for repairs due to absolute neglect. The men charged with the responsibility of greasing this sprinkler truck have failed to put grease in the drive shaft bearing with the result that the shaft bearing is completely destroyed. The same bearing on the new Mac trucks, which have been at Fifth Field Area for approximately ten days, was never greased until yesterday.

4. With equipment as scarce as it is, the Area Engineer recommends that some action be taken whereby the men responsible for the greasing of equipment in the field will be responsible to their properly designated shop foreman. It is also requested that some system be worked out whereby the equipment can be greased while idle—either during lunch hour or while it is not working at all—so that it will not be tied up while being serviced.

Exhibit No. 31-J

HAWAIIAN CONSTRUCTORS

HONOLULU, T. H.

To: T. E. Tillman.
From: Robert Hoffman.
Date: April 8, 1942.

Your memorandum of April 8th should have been addressed to Mr. Hutchinson, superintendent of the field. As you are aware, the writer was replaced Monday morning, April 6th, and it has been as a courtesy to you that he stayed on for a few days.

Your statement that you see surplus labor around the asphalt plant is absolutely untrue, as we have been shy of labor for the past two months. When a man moves

500-lb. barrels for 15 or 20 minutes, he is entitled to stand and rest for a few minutes; and if you lack the knowledge of a good construction man, as is apparent from the fact that you can't use good reasoning, it is time that you were told. It is certainly a pity that in defense work you have taken up the little items and have missed the big ones that would have put you somewhere in the upper brackets.

This letter, while caustic, is something you are asking for and it is to be regretted that the job is slowed down because of your attitude.

Also your memorandum of April 8th, which should have been directed to Mr. Hutchinson, in which you make the untrue statement that the blue tops were on runway A—may I correct you by saying that there were no blue tops on the runway after 1 o'clock on the afternoon of April 7th.

May I also advise you that your constant interference with the foremen on the job is creating so much dissatisfaction that three of the foremen are ready to leave.

As a last statement—you have done more damage in six weeks than the previous area engineer, at the rate he was going, could have done in ten years, as far as morale is concerned.

I think, perhaps, that if you were more truthful in your statements and less conspicuous in your desire to undermine the workers on this field, you would be more appreciated downtown. Frankly, Tillman, you are not fitted for this kind of a job and you have proved it conclusively to all concerned.

Robert Hoffman,
ROBERT HOFFMAN,
Superintendent, Fifth Field Area.

Exhibit No. 31-K

MEMORANDUM

APRIL 15, 1942.

To: Executive Committee.
From: L. S. Hutchinson.

I wish to hereby be placed on record that as of April 6, 1942, I disclaim responsibility of all tools and equipment that is charged to Hawaiian Constructors into my responsibility. The reason for this declaration is as follows:

On the above mentioned date, U. S. E. D., by order of the Fifth Area Engineer took over all stock rooms and storage places wherein the above material was stored, and also took over all the responsibility of checking out materials and supplies for the construction. As part of this move, they have issued tools and property regardless of to whom it was charged, and without proper signatures of receipt.

In view of the above circumstances it is unreasonable to expect that we should be held responsible for these items.

For the signature of
L. S. HUTCHINSON,
*Area Superintendent, Fifth Field,
Hawaiian Constructors.*
